PREFACE.

IN presenting the fifth issue of HAZELL'S ANNUAL to public notice, it is almost superfluous to draw attention to the varied contents of the work, as it has already established a position for itself as a hand-book, alike indispensable and unique. It is only necessary to say that, as in previous years, no efforts have been spared to render the ANNUAL thoroughly reliable and adapted to the individual requirements of our numerous readers.

It will be seen that many new and important articles have been inserted, bearing upon the special topics of the moment, and that the remainder of the book has been revised and brought up to the latest possible date.

Valuable suggestions—many of them most serviceable—were received, during the past year, from thoughtful correspondents in all parts of the world. The Editor, while expressing his thanks for such assistance, begs also to acknowledge his indebtedness for much official and other information, courteously supplied to him; and he again invites communications from any of his readers relative to the correction of possible errors, or the increased utility of the work.

E. D. PRICE.

A

[Abb

Abbreviations, List of. May be classified into—initial prefixes of royal personages—affixes of rank in orders of knighthood—indications of military, naval, or civil service—university degrees—diplomas of medical and other licensing bodies—membership of learned institutions—and miscellaneous. Those here given occur more or less frequently, and are all of recognised status. A few of them are very rarely used. Degrees conferred by some one or all of British, Irish, or Colonial Universities, are indicated by "Univ." Degrees granted only in America, or only so expressed there, are shown by "U.S.A." Here it is not unusual to add "Oxon.," "Camb.," "Lond.," to indicate the source of the degree. Similarly, medical and scientific *alumni* add an L. for London, E. for Edinburgh, and I. for Ireland, the relative value of diplomas from bodies of similar name and profession not being always the same. Letter-affixes are employed by Freemasons and similar bodies among themselves, but are only intelligible to the initiated.

A.A. . . . Associate of Arts.
A.B. . . . Bachelor of Arts (Univ.). Also describes "able-bodied" seamen.
A.C.A. . . . Associate of Chartered Accountants, England and Wales.
A.C.E. . . . Associate of the College of Engineering.
A.I.C.E. . . . Associate of the Institution of Civil Engineers.
A.K.C. . . . Associate King's Coll., Lond.
Ala. . . . Alabama.
A.L.S. . . . Associate of the Linnæan Society.
A.M. . . . Master of Arts (Univ.)
A.M.I.C.E. . . . Associate Member of the Institute of Civil Engineers.
A.R.A. . . . Associate of the Royal Academy.
Ark. . . . Arkansas.
A.R.S.A. . . . Associate of the Royal Scottish Academy.
B.A. . . . Bachelor of Arts (Univ.).
B.C.L. . . . Bachelor of Civil Law (Univ.).
B.D. . . . Bachelor of Divinity (Univ.).
B.E. or B. Eng. . . . Bachelor of Engineering (Univ.)
B. es L. . . . Bachelier (contr. en lcs) Lettres (French Univ.).
B.L. or B.LL. . . . Bachelor of Laws (Univ.).
B.M. . . . Bachelor of Medicine (Univ.).
B.S. . . . Bachelor of Surgery (Univ.).
B.Sc. . . . Bachelor of Science (Univ.).
Bt. or Bart. . . . Baronet.
C.A. . . . County Alderman.
Cal. . . . California.
C.B. . . . Companion of the Order of the Bath.
C.C. . . . County Councillor. (Also Common Councillor.)
C.E. . . . Civil Engineer.

C.I.E. . . . Companion of the Order of the Indian Empire.
C.M. . . . Master of Surgery (Univ.).
C.M.G. . . . Companion of the Order of St. Michael and St. George.
C.M.Z.S. or C.M.Z.S.L. . . . Corresponding Member of Zoological Society, London.
Col. . . . Colorado.
C.P. . . . Clerk of the Peace.
C.S. . . . Clerk to the Signet.
C.S.I. . . . Companion of the Order of the Star of India.
Ct. . . . Connecticut.
D.C. . . . District of Columbia (U.S.A.).
D.C.L. . . . Doctor of Civil Law (Univ.).
D.D. . . . Doctor of Divinity (Univ.).
D.D.S. . . . Doctor of Dental Surgery (Univ.).
Del. . . . Delaware.
D.G. . . . *Dei Gratia*, By the grace of God (Royal).
D.L. . . . Deputy Lieutenant.
D.Lit. . . . Doctor of Literature (Univ.).
D.M. . . . Doctor of Music (Univ. U.S.A.).
D.P. . . . Doctor of Philosophy (Univ. U.S.A.).
D.Sc. . . . Doctor of Science (Univ.).
D.T. . . . Doctor of Theology (Univ. U.S.A.).
E.I.C. or E.I.C.S. . . . East India Company's Service. *Still used by a few old veterans.*

- Abd-ul-Hamid II., Sultan of Turkey.** Born August 6th, 1842. He was proclaimed Sultan in succession to his brother Murad V., who was deposed in consequence of his mental incapacity (August 31st, 1876). Under the rule of Abd-ul-Hamid the Ottoman Empire has been dismembered of some of its fairest regions. The *Berlin Treaty*, concluded after the disastrous war with Russia in '78, practically deprived the Sultan of Bulgaria, Bosnia, and Herzegovina in Europe, and of Ardahan, Kars, and Batoum in Asia. By article 61 of the same treaty the Sultan undertook to carry out without further delay the amelioration and the reforms demanded by the Armenians, and to guarantee their security against the Circassians and Khurds. His neglect to abide by this stipulation has led to serious trouble in Armenia (*q.v.*). Since the conclusion of the Russo-Turkish war the Sultan has been alternately under the influence of one or other of the Great Powers. Being *Suzerain of Egypt*, he naturally opposed the English occupation, and was believed to have secretly encouraged the rebellion of Arabi. His empire, however, being practically in a state of bankruptcy and decay, he is powerless to act independently of the advice of the power or powers whose influence happens to be uppermost at his court. Consult "The Twelve Years Reign of H.I.M. Abdul Hamid II.," by Princess Annie de Lusignan, '89.
- Abdurrahman Khan, Ameer of Afghanistan.** is a nephew of the late Ameer, Shere Ali, and was b. 1830. He took sides against his uncle in the civil war of '64, and won the battles of Shaikhabad and Khelat-i-Ghilzai. In '68 he was defeated by Yakoub Khan, son of Shere Ali, and fled for protection to Russian territory. The Russians provide him with a residence at Samarcand, and a pension. In '79 he made his way to the Cabul frontier, and, having gained the allegiance of the leading men of that city, was acknowledged *Ameer* by the *British Government*, who allow him a pension of £160,000 a year. He has repeatedly been engaged in suppressing revolts against his authority, the most serious of which was that led by Ishak Khan, in '88. On Dec. 26th, '88, he was shot at by a Sepoy, at Mazar-i-Sherif, but without injury. See *AFGHANISTAN*.
- Abel, Sir Frederick Augustus, C.B., D.C.L., F.R.S., b. 1827,** is chemist to the War Department, chemical referee to the Government, a member of the Royal Engineers' Committee, associate member of the Ordnance Committee, Past President of the Institute of Chemistry, of the Society of Chemical Industry, of the Chemical Society, and Society of Telegraph Engineers and Electricians; Royal Medallist for researches in explosives; member of the Royal Commission on accidents in mines, and hon. member of the Institutes of Civil and Mechanical Engineers. He was commissioner to the Electrical Exhibition at Vienna in 1883, and was knighted in that year. He is *secretary of the Imperial Institute (q.v.)*, *Rede Lecturer '88*; President of the Special Committee on Explosives appointed '89.
- Aberdeen University** was founded in 1494 by

Bishop Elphinstone, with only one college—viz. **King's**. In 1593 **George Keith, Earl Marischal**, founded **Marischal College**, which was also a university distinct from the former foundation. In 1606 these two universities were united into one institution, and now form the University of Aberdeen. The arts and divinity classes meet in the old college, while the law and medical meet in the new. **Lord Rector** ('89), Rt. Hon. **G. J. Goschen, M.P. (q.v.)**. **Principal**, **W. D. Geddes, LL.D.**; there are 23 professors and 900 students. In conjunction with Glasgow it sends one representative to Parliament (present member, **J. A. Campbell, LL.D.**). It grants certificates of proficiency to women in the local examinations which it has instituted throughout the northern counties of Scotland. Its degrees are: **M.A.** (hood black silk, lined with white silk); **B.D.** (h. black silk, lined with red silk); **D.D.** (h. purple cloth, lined with white silk); **LL.D.** (h. purple cloth, lined with pale blue silk); **M.B., C.M.** (h. black silk, lined with crimson silk); **M.D.** (h. purple cloth, lined with crimson silk). Among her alumni are **Dr. Alexander Bain**; **Sir Robert Hamilton**, Governor of Tasmania; **Mr. Justice Stirling**; **Professor Robertson Smith**; **Professor Blackie**; and **Archibald Forbes**.

Aboukir Lake Drainage. A concession was granted in '87 to reclaim this lake surface, which lies close to Alexandria. It seems that early in the last century a space of about 31,000 acres, which lay rather below the sea level, but was highly cultivated and thickly populated, was flooded by the sea, and again was inundated by the cutting of the embankment in 1801 during the siege of Alexandria. In the summer the water evaporated, but in winter the drainage from the higher land and the rain took up the salt in solution, so that all the year round the whole tract was useless. The *concessionnaire* undertook to pump the salt water off the land and flood it from the **Mahmoudieh Canal**, and it is hoped that after repeated washings the soil will be restored. If so, it is expected to let at about £4 an acre, partly owing to its proximity to Alexandria. The English company who have the work in hand pumped the lake dry in April '88, and the work of cutting the canals and drains has been going on since. On Sept. 18th, '89, according to *Le Phare d'Alexandrie*, the Khedive visited the scene of the operations, and the following account was published of the condition of the work:—"To accomplish an enormous length of canals and drains, which comprise the main design of the work, about 1,250,000 cubic metres of earthwork were excavated. This took two seasons. The work now in hand is subdividing the large areas by a network of small canals and drains, and of this work 4,000 feddans are now ready. The land by this means is cut up into small sections, which readily part with their salt, and by the second season will produce all the crops of Lower Egypt. On the land near **Ramleh**, just beyond **Gabriel station**, there is now quite a change. Where formerly, and that only a twelvemonth ago, there was only a bare stretch of salt land, there is now a waving sea of green crop. Steam ploughs are busy at work near **Kafr-Dawar** on a stretch of magnificent land there, for the domain of the company reaches from **Ramleh** almost to **Kafr-Dawar**, and by next summer this portion will show crops of fine quality. Already the company has let a considerable area on three years' lease at £1200, £1200, and £1300, and in the

course of the next month will largely extend the area let."

Abyssinia. Called **Habesh** by foreigners, **Mekadash** and **Itopia** by its inhabitants. A country of North Africa, occupying a highland region S.W. of the Red Sea. Estimated area 150,000 square miles; pop. 3,000,000. Ancient cap., **Gondar**. Country made up of many semi-independent small states, belonging to three great divisions: **Tigré** in the north, **Amhara** central, **Shoa** in the south. The capital of **Shoa** is **Ankober**, and its outlet the Gulf of **Tajurah**. Abyssinian trade passes through **Adowa**, the present capital, to the port of **Massowah**, now Italian. Contains the sources of the **Blue Nile**, **Atbara**, and **Mareb** rivers, the first of which flows out of great lake **Dembea**, or **Teana**, 60 miles by 25. Surface tablelands, 6,000 to 9,000 feet, broken by deep ravines, summits rising to 15,000 feet. Three distinct zones of elevation, roughly to be described as tropical, temperate, and highland. Temperate zone chief scene of industry and habitation. Government monarchical, and a sort of feudal military system obtains. Religion a form of the Armenian and Coptic Christian Church, called **Monophysite**. Manufactures limited to coarse cotton and woollen cloths, leather, pottery, and some iron, steel, and other metal articles. Exports are ivory, gold dust, musk, coffee, and some other productions. Imports are arms, Persian carpets and silks, French velvet and broadcloth, Venetian beads, etc. The language of court and commerce is **Amharic**. The kings of Abyssinia claim descent direct from **King Solomon**. People a mixed race: **Semitic** or **Arabic** type most prevalent; colour yellow-brown to black. There are **Mohammedans**, and **Jews** called **Falashas**. They are exclusive, more moral than the rest of the population, number about 250,000, and are the principal agriculturists and manufacturers of Abyssinia. There is a despised aboriginal race called **Waito** dwelling round **Dembea**. The country has possessed some civilisation from ancient times, but has retrograded. The families of **Mohammed** and his partisans took refuge here after the **Illegin**, and were hospitably received. In the sixteenth century Portuguese colonists obtained a footing, introducing some arts, but were expelled in 1633. The fine castellated palace of **Gondar**, now a ruin, was built by them. In 1866 the tyrant **Lij Kassa**, or **Theodoros**, gained power over the entire country. He imprisoned Englishmen, and a force under **Lord Napier** was sent to chastise him. It reached the fortress of **Magdala**, where a decisive battle was fought (1868), resulting in **Theodore's** defeat and suicide. **Prince Kassa**, of **Tigré**, then obtained British assistance, and now, as **Johannes II.**, rules over **Tigré** and **Amhara**. **Shoa**, till lately virtually independent, under **King Menelik**, is now under the suzerainty of **Negus Johannes**. During the **Soudan campaign** **Admiral Hewitt** and others visited **Johannes**, and an understanding between him and the British Government was arrived at. He sent an army under **General Ras Aloula** to the relief of **Kassala**. A battle was fought at **Kufelt**, Sept. 23rd, 1895, when **Oman Digma's** army was broken up by the Abyssinian forces. During 1887-88 various conflicts took place between Abyssinian forces and those of Italy at **Massowah**. (See ITALY.) During '89 the expedition of **Captain Atholoff** to Abyssinia landed at **Tadjurah** (Jan. 18th). After refusing to

acknowledge the rights of France and conform to the regulations prohibiting transport of arms on the territory, he then hoisted the Russian commercial flag at Sagallo, a place dependent on Obok, and resisted, stating that Sagallo had been ceded to him by the Sultan of Fadj, and he recognised no authority but that of the Emperor of Russia. The Russian Government disclaimed that he was acting in any official connection. On Feb. 17th Admiral Olmy (French) fired at the fort of Sagallo, which then surrendered. Most of the members of the expedition ultimately reached Sebastopol in a man-of-war. In March a war occurred between King John and King Menelek, in which the former was killed (10th); and the latter, at the head of 130,000 men, assumed the title of Negus. It was reported from Massowah (June) that a party of irregulars under Italian officers had occupied Senahit, on the Abyssinian frontier. In June the Italian troops occupied Keven. A despatch from Count Antonelli announced that the cousin of King Menelek was proceeding with a mission to King Humbert with a letter and gifts, and that King M. had been generally recognised as Negus, and was marching towards Gondar. The Italian general, Baldissera, occupied Asinara. A special mission from King Menelek visited King Humbert (Aug.), and accompanied by Count Antonelli, the Italian explorer, were received on their way at Zeilah by the British authorities, and subsequently had audience of the king and Signor Crispi in the Quirinal Palace, with whom Prince Makonnen, head of the mission, also held a conference, to settle details of commercial and monetary convention, and a treaty of peace and friendship previously signed, its most important engagement being that King Menelek should not maintain diplomatic relations with other Powers except through Italy. The fortification of Asinara completed. Ras Alula, after making peace overtures to General Baldissera, who rejected them, retreated beyond Gura. A despatch from Aden (Sept. 19th) stated that King Menelek proposed to have himself crowned Emperor of Abyssinia on Mount Mannagacha, the historical coronation place of the ancient kings of Ethiopia. A loan of 4,000,000 fr. was contracted in the name of King Menelek with the Italian National Bank (Oct.), for the purpose chiefly of opening up routes for commerce in Abyssinia, under the superintendence of Italians. It was announced at Rome (14th) that Italy had declared a protectorate over Abyssinia. Engagement between the king's forces and Ras-manjessi, who was defeated, and subsequently submitted. Consult De Cosson's "Abyssinia."

Academy, The. See ROYAL ACADEMY.

"Academy." A weekly review of literature, science, and art; estab. 1869. Its chief characteristic is that the articles are signed by the writers, and it has always devoted a large proportion of its space to branches of unremunerative learning, especially philology and oriental studies. Its founder and first editor was Dr. O. E. Appleton (d. 1879). Its present editor is Mr. J. S. Cotton (q.v.)

Acadia. The name of Nova Scotia while it remained a French colony.

Act of Union with Ireland. See IRELAND.

Acts of Parliament. All public Acts affecting the United Kingdom, and all local Acts affecting only limited areas, as well as private Acts of Parliament, are published, and can be obtained (if in print) at various prices, from

Messrs. Eyre & Spottiswoode, East Harding Street, London, E.C., who also publish at the close of each Session a cheap edition of the public Acts in covers.

Acts of Parliament passed Dec. '88, and Feb.—Aug. '89. See SESSION, sects. 3 and 51.

Address, Forms of—alphabetically arranged.

(See also COURTESY, TITLES OF.) **Archbishop**—commence *My Lord Archbishop*; refer to personally as *Your Grace*; and address letter to "His Grace the Archbishop of —." An Archbishop's wife and the other members of his family enjoy no title as such. **Archdeacon**—commence *Venerable Sir*; refer to as *Sir*; address to "The Venerable the Archdeacon of —." **Baron**—commence *My Lord*; refer to personally as *Your Lordship* or *My Lord*; and address letter to "The Rt. Hon. Lord —." **Baroness or Baron's wife**—commence *Madam*; refer to personally as *Your Ladyship* or *My Lady*; and address to "The Lady —," or more strictly "The Rt. Hon. the Baroness —." **Baron's son**—commence *Sir*; refer to as *Sir*; and address to "The Hon. John —." **Baron's daughter**—commence *Madam*; refer to as *Madam*; and address, if unmarried, to the "The Hon. Jane —," if married to an esquire to "The Hon. Mrs. —." **Baronet**—commence *Sir*; refer to as *Sir*; address to "Sir William —, Bart." **Baronet's wife**—commence *Madam*; refer to as *Your Ladyship*; address to "Lady —" (without Christian name, unless she be the daughter of a duke, marquis, or earl). **Bishop**—commence *My Lord*; refer to as *Your Lordship*; address to "The Right Rev. the Lord Bishop of —." **Retired Bishops**—commence *Right Rev. Sir*; address to the "Right Rev. Bishop" (then the surname). **Bishops Suffragan**—commence in the same way, and address to "The Bishop Suffragan of —." **A Bishop's wife and children** enjoy no title whatsoever as such. **Canon**—commence *Rev. Sir*; refer to as *Sir*; address to the "Rev. Canon —." **Cardinal**—commence *Your Eminence*; refer to as same, address to "*His Eminence*." **Clark in Holy Orders**—commence *Rev. Sir*; refer to as *Sir*; address to "The Rev. John Jones," or, if the Christian name be not known, to "The Rev. — Jones." **Countess** (see EARL). **Dean**—commence *Very Rev. Sir*; refer to personally as *Sir*; address to "Very Rev. the Dean of —." **Dowager**—the widow of a peer or baronet should be addressed as "The Dowager Duchess of —," or "The Dowager Lady —," when her son or grandson succeeds to the title and is married. **Duke**—commence *My Lord Duke*; refer to as *Your Grace*; and address to "His Grace the Duke of —." **Duchess**—commence *Madam*; refer to as *Your Grace*; and address to "Her Grace the Duchess of —." **Duke's eldest son** as if he held legally the second title of his father. **Duke's younger son**—commence *My Lord*; refer to as *Your Lordship*; and address to "The Lord Henry —." **Duke's daughter**—commence, *Madam*; refer to as *Your Ladyship*; and address to "The Lady Ellen —." **Earl**—commence *My Lord*; refer to as *Your Lordship*; and address to "The Rt. Hon. the Earl of —." **Earl's eldest son** as if he held legally the second title of his father. **Earl's younger son**, same as the younger son of baron. **Earl's daughter**, same as the daughter of a duke. **Countess**—commence *Madam*; refer to as *Your Ladyship*; address to "The Rt. Hon. the Countess of —." **Judge of the High Court of Justice**—commence *Sir*; refer to in

letter only as *Sir*, but on the bench as *My Lord*; address to "The Hon. Sir John —" *Knight*—commence and refer to as *Sir*; and address to "Sir Thomas —" If a *Knight Bachelor* (*Kt.*), the form of knighthood usually conferred upon a judge, and the law officers amongst others) it is not customary to add "Knight," except in formal documents; but if the person addressed be a *K.G.* or *K.T.* or *K.P.* or *G.C.B.*, etc., etc. it is usual to add the initials after the name. When the person addressed is a knight of several orders give at least the initials of the most illustrious. *Knight's wife*, same as wife of a baronet. *Lord-Lieutenant of Ireland*—commence *My Lord Marquis* or *My Lord*, according to rank; address to "His Excellency the Lord-Lieutenant," or, if a duke, to "His Grace the Lord-Lieutenant." *Lord Mayor*—commence *My Lord*; refer to as *My Lord* or *Your Lordship*; and address to "The Right Hon. the Lord Mayor of London, or York, or Dublin," as the case may be. *Lady Mayoress*, same as baroness, addressing to "The Rt. Hon. the Lady Mayoress." *Marquis*—commence *My Lord Marquis*; and refer to as *My Lord* or *Your Lordship*; and address "The Most Hon. the Marquis of —" *Marchioness*—commence, *Madam*; refer to as *Your Ladyship*; and address to "The Most Hon. the Marchioness of —" *Eldest son* as if he legally held the second title of his father. *Younger son*, same as younger son of a duke. *Marquis's daughter*, same as daughter of a duke. *Mayor*—commence and refer to as *Sir*; and address to "The Mayor of —" or in any formal documents to "The Right Worshipful the Mayor of —" *Prince*—commence *Sir*; refer to as *Your Royal Highness*; and address, if a prince, "His Royal Highness Prince —," or, if a duke also "His Royal Highness the Duke of —" *Princess*—commence, *Madam*; refer to personally as *Your Royal Highness*; and address to "Her Royal Highness the Princess —," or, if a duchess, to "Her Royal Highness the Duchess of —" *Privy Councillor*—commence and refer to according to rank, but address to the "Right Honourable —" and if a commoner omit *Esq.* (e.g., "The Rt. Hon. E. T. Bouvier"). *M.P.* should be added after the surname, or after *Bart.* or *Esq.*, if belonging to the House, a baronet, etc. (e.g., the Right Hon. Lord Randolph Churchill, *M.P.*; Sir Joseph W. Pease, *Bart.*, *M.P.*; Jesse Collings, *Esq.*, *M.P.*). A *Privy Councillor's* wife and children take no title as such. *Queen*—commence *Madam*; refer to personally as *Your Majesty*; and address "The Queen's Most Excellent Majesty." *Viscount*—commence *My Lord*; refer to as *Your Lordship* or *My Lord*; address to "The Rt. Hon. Lord Viscount," or "The Lord Viscount —" *Viscountess*—commence *Madam*; refer to as *Your Ladyship*; and address to "The Rt. Hon. the Viscountess —," or "The Viscountess —" *Viscount's son* or daughter, same as son or daughter of a baron. *NOTE*.—A *marquis*, or an earl, or a viscount by courtesy is addressed as if he were a peer and enjoyed one of those titles by right. In communications upon official business give the office held by the person addressed in a line beneath the name. In writing proper names the first part of a compound name must not be confused with a Christian name: e.g., J. Robinson-Browne must not be addressed as "Robinson-Browne, Esq.," and in the case of a knight, Sir William Jones-Smith

must not be written to as Sir Jones-Smith, which would be as incorrect as Sir Campbell or Sir Jones.

Adelaide. Capital of *S. Australia* (*q.v.*); pop. (including suburbs) 128,377; on St. Vincent Gulf.

Aden. A town and territory on the S. coast of Yemen, Arabia, 110 miles east of the Straits of Bab-el-Mandeb, and is a British dependency. Total area 70 sq. m. Consists of a rocky promontory not unlike Gibraltar, joined to the mainland by a low isthmus, and is under a *Resident*, who acts as military and civil governor. The harbour, a very fine one, touched at by 1500 ships annually, is the entrepôt of trade for surrounding countries. It is a coaling station (*q.v.*) for our navy. For physical geography see earlier eds., and consult "From London to Bokhara in 1887," by Col. Le Messurier, R.E.; and for statistics see *BRITISH EMPIRE* (table).

Adler, Hermann, M.A., Ph.D. Delegate Chief Rabbi, son of the Chief Rabbi, Dr. Nathan M. Adler, was b. in Hanover, 1839. Educated at Univ. Coll., Lond., B.A. Lond. '59, Ph.D. Leipsic '61. Appointed Principal of the Jews' College in '63, and Minister of the Jewish Synagogue at Bayswater in '64. Dr. A. has contributed much to periodical literature, and is the author of several works of a controversial character, including a reply to Dr. Colenso's "Criticism of the Pentateuch," and "Sermons on Passages in the Bible on which Christian Theologians base their Faith." Some friction between Dr. A. and a section of the East End Jewish workmen occurred last February, in consequence of the Doctor's refusal to preach a special sermon on poverty at their request.

Administrations and Ministers of Great Britain. See *MINISTRIES*.

Admiralty, The. See *NAVY*.

Admiralty Courts. See *HIGH COURT OF JUSTICE*.

Adoption of Children Bill. See *SESSION*, sect. 51a.

Adowa. Capital of Tigré, in Abyssinia (*q.v.*).
Advertising Stations (Rating) Act, '89. See *SESSION*, sect. 52.

Advocate, The Lord, alias King's or Queen's Advocate, is the chief legal officer of the Crown in Scotland. He corresponds to the Attorney-General in England. In the House of Commons, in which he always—though not *ex officio*—sits, he replies to all Scotch questions and takes charge of all Scotch measures. He has a title of Right Honourable by courtesy, and sits within the bar (otherwise confined to peers of the realm and the Solicitor-General) in the Court of Session. The present Lord Advocate is Mr. J. F. B. Robertson, M.P.

Adye, Lieut.-Gen. Sir John M., G.C.B., b. at Sevenoaks, 1819. Entered the Royal Artillery '36. He served throughout the Crimean war, the Indian mutiny, the Sitana campaign, and was chief of the staff and second in command under Sir Garnet Wolseley, in the Egyptian campaign of '82. He received a C.B. for his services in the Crimea, and was created K.C.B. in '73 and G.C.B. at the conclusion of the Egyptian war. He became major-gen. in '75 and lieut.-gen. '79. He has held many important military offices, including the directorship of artillery, the governorship of the Royal Military Academy at Woolwich, the surveyor-generalship of Ordnance, and Governorship of Gibraltar. During the agitation on the supply of defective cutlasses and sword bayonets to the

army and navy, an attempt was made to fasten the responsibility upon Sir John Aclay, but a parliamentary committee appointed to inquire into the matter exonerated him from blame. His works include the "Defence of Cawnpore," "A Review of the Crimean War," "An Account of the Sitana Campaign," and "The British Army in '73." He addressed a letter to the *Times* on "The Defence of Commercial Harbours," Jan. 8th, '89. Sir John is one of the few high military authorities who see no military objection to the construction of the Channel Tunnel.

Affidavit. A written statement sworn to or affirmed before a person having authority to administer oaths. It must be drawn up in the first person, and divided into paragraphs numbered consecutively and dealing each with a distinct portion of the subject. It must be expressed in distinct and positive terms, so as to afford matter for a charge of perjury if false. When used as evidence in an action it must be confined to statements of fact. When used to support applications merely incidental to the conduct of a suit, it may state the deponent's belief as distinguished from his knowledge, but must give the grounds of such belief. It may be sworn (1) in England, in court or before any one of the judges, or before a commissioner appointed to take affidavits; (2) elsewhere in the Queen's dominions before any person authorised to administer an oath; (3) in foreign countries before a British consul or vice-consul. Evidence may be taken by affidavit in any action in which the parties consent to that course; but then leave to try the case with a jury will generally be refused. Consult Foulkes, "Action in the Supreme Court."

Affirmation. The law of England requires an oath to be taken by persons about to discharge various public functions—e.g., a person about to give evidence in a court of justice takes an oath that he will speak the truth; a member of parliament before taking his seat takes the oath of allegiance. But by several statutes, beginning with the early part of the reign of William IV., and ending with the early part of the present reign, Quakers, Moravians, Separatists, and persons who had seceded from any of these bodies, but retained a conscientious objection to taking oaths, were permitted to make an affirmation upon every occasion on which they would otherwise have had to take an oath. By the Common Law Procedure Act 1854, § 20, every person called as a witness in a civil action who might refuse, on conscientious grounds, to take an oath, was enabled to make an affirmation instead. By an Act of 1861 persons called as witnesses in criminal trials were permitted, on declaring that the taking of an oath was according to their religious belief unlawful, to make an affirmation instead. By the Evidence Further Amendment Act 1869, explained by an amending Act of 1870, a person called as a witness in any proceeding, civil or criminal, might, if he objected to take an oath, and if the court were satisfied that it would have no binding effect upon his conscience, give his evidence upon affirmation simply. By the Parliamentary Oaths Act 1866 it was enacted that every person for the time being by law permitted to make an affirmation instead of taking an oath, should be allowed, on making an affirmation in the form therein prescribed, to take his seat in either house.

In the case of *Clarke v. Bradlaugh* (vol. 7, Law Reports, Queen's Bench Division), it was held by Mr. Justice Mathew, and confirmed by the Court of Appeal, that this Act did not apply to any person enabled by the Acts of 1854, 1861, or 1869, to give his evidence on affirmation in a court of justice, but only to persons entitled upon every occasion on which an oath may lawfully be required to make an affirmation instead. Thus an atheist may give evidence upon affirmation in a court of justice; but he cannot by making an affirmation qualify himself to take his seat in either house. See also *Szession, Autumn '88*, sec. 12.

Afghanistan is an inland country of Asia, forming the north-east portion of the great Iran plateau, between lat. 28° 30' and 36° 30' N. and long. 62° and 72° E. Its area is about 279,000 sq. m. It is bounded on the E. by the Sulaiman Mountains; on the S. by Beloochistan; on the W. by Persia; on the N. by Turkestan, as far as the Oxus. *Cabul* is the capital. Exports: tobacco, madder, fruits, furs, shawls, and chintz. There is no Afghan nation; the population (400,000) consisting of discordant tribesmen, constantly in revolt, and only kept in subjection by frequent military expeditions from *Cabul*.—At the close of the year '88 (Dec. 26th) the *Ameer* was fired at by a Sepoy at Mazar-i-Sherif, but escaped without injury. By telegram from Chardui (December) it was stated that *Ishak Khan* had transferred his residence to Samarcand, under alleged Russian protection, and that *Abdurrahman* had left *Cabul* with a large retinue in pursuit of him to the Bokharan boundary, causing considerable excitement on the Russian frontier. The *Ameer's* troops gained a victory over *Shinwarris* (Jan. '89). A number of *Ishak's* partisans were executed at Mazar-i-Sherif by the *Ameer*, who was stated to have broken off commercial relations with Russia. It was reported from Calcutta (Feb. 15th) that the projected mission, under Mr. Durand, to the *Ameer*, abandoned last autumn owing to the latter's departure for Fashkurgan, had been revived. From the same source it was stated (March 1st) that the Government of India were considering the advisability of appointing British officers at Balkh, Maimeneh, and Herat. A rebellion against the *Ameer's* authority in the province of Badakshan was reported in July, but was afterwards quelled. For Agent to Gov.-Gen. of India, see **DIPLOMATIC**; and consult *Encyclopædia Britannica*, article "Afghanistan"; "Northern Afghanistan," by Major C. E. Yate, C.S.I.; and Blue Books.

Africa. Under various headings will be found items dealing with every country, district, or feature of current interest relating to the continent. This gradual partition of Africa among certain European Powers will chiefly interest the political student, who is here referred to CONGO FREE STATE, COLONIES OF EUROPEAN POWERS, and each of the said colonies under its proper title, as well as other countries and regions under their respective names. Consult "Austral Africa, Losing it or Ruling it," by J. Mackenzie; and "Garenganze, or Seven Years' Pioneer Mission Work in Central Africa," by F. S. Arnot, '89.

Africa, Central. A term applied in its widest sense to indicate all of the continent lying between the parallels of 15° N. and 20° S. lat., comprising an area of possibly 8,000,000 sq. miles.

with a population roughly guessed as 100,000,000. The term is more closely connected with the regions lying between the Suaheli coast and Lower Guinea, comprising the Congo valley, the Great Lakes, Equatorial Africa proper, and the native states north of the Zambesi. See GEOGRAPHICAL PROG., CONGO FREE STATE, ZANZIBAR, SOUDAN, ABYSSINIA, SOMALI-LAND, MOZAMBIQUE, ZAMBESI, NYASSA, BLANTYRE, KILIMA-NJARO, ANGOLA, COLONIES OF EUROPEAN POWERS, GERMAN COLONISATION, GERMAN EAST AFRICAN CO., etc.

African Lakes. The great equatorial chain consists of the following, as well as sundry lesser ones:—**Albert Nyassa**, lying under equator, 2,500 feet above sea-level, 150 by 40 miles, discovered by Baker, 1864, now the scene of Emin Pasha's labours; to east of it, **Victoria Nyassa**, 3,800 feet above sea-level, 300 by 200 miles, discovered by Speke, 1858, explored by Stanley; between this and the Congo is **Kata-Nzige**, now being explored; southward of Nyassa is **Tanganyika**, 2,700 feet above sea-level, 400 by 50 miles, discovered by Burton, 1858, explored by Livingstone, Stanley, and Cameron; south-east, **Nyassa**, 1,500 feet above sea-level, 358 by 38 miles, discovered by Livingstone, 1859; south-east, the small **Shirwa**; far to west, **Moerokata**, 65 by 60 miles, discovered by Livingstone, 1867; and south of it, **Bangweolo**, or **Bemba**, 3,600 feet above sea-level, 150 by 75 miles, discovered by Livingstone, 1868. North and west of Moero are other lakes, Lanji, Kassali, Lohemba, etc., not yet fully explored. The Nyassa lies in the basin of the Zambesi, and presents great facilities for penetrating the interior of Africa, facilities of which the **African Lakes Trading Co.**, of Glasgow, have taken advantage. A steamer runs up the Zambesi and the Shiré to **Katunga**, 300 miles; thence a road leads past the rapids to the head of Murchison Falls, 65 miles; thence another steamer sails to **Karonga**, near the northern extremity of Nyassa, 420 miles; and thence a carriage road runs to **Tanganyika**, 210 miles. For notice of lake examined by Mr. Stanley, hitherto known as **Mwota Nzige**, and named by him **Albert Edward Nyanza**, and of Count Teleki's visit to **Lake Samburu**, see GEOGRAPHICAL PROGRESS, '89.

Agricultural Society. See ROYAL AGRICULTURAL SOCIETY.

Agriculture. The United Kingdom must be regarded as a great agricultural as well as trading country. The intelligence and skill of its farmers, the average yield of its productions per acre, as compared with other countries, the early maturing, prime beef producing qualities of its live-stock, are universally admitted to be the distinguishing features of British agriculture. This country has only 22,250,000 acres of arable land, and 25,000,000 acres of permanent pasture; but it possesses a population of 36,000,000, and practises a system of free trade which invites the whole world to compete in its markets on the same terms as the home-producer. British agriculture, therefore, only constitutes a portion of the vegetable and animal food consumed by the people of the kingdom. Portugal, Holland, Spain, France, and Egypt contribute largely to the import supply; and nearly the whole of the vegetables and raw fruits imported (excluding apples), valued at £3,324,226, come from France and Spain. The

vast pastoral territories and fine climate of Australia enable that island-continent to send nearly three-fourths of the foreign supply of wool to the British market, the aggregate value of which, in 1887, was £24,880,593. Cattle and sheep, too, are so cheaply fed in Australia and the United States, that thousands of carcasses are boiled down for the sake of the tallow and stearine, which is exported to this country; of the total value of these two articles imported, £1,074,028, in 1888, three-fourths came from the two countries just mentioned. From the beginning of this century up to the repeal of the corn laws, there had been several periods of depression in agriculture, which were supposed to be caused by over-production, high rents, low prices, and excessive local burdens. Parliamentary inquiries on the subject were held in 1804, 1815, 1822, 1833 and 1836, which resulted in the imposition of duty on foreign wheat when the price at home fell below a certain figure. For instance, in 1822 an Act was passed fixing the limit of price at which importation should be permitted at 70s. for wheat, 35s. for barley, 25s. for oats, per quarter; and also imposing a new sliding scale of duties on foreign wheat when prices were from 70s. to 85s. per quarter. But farmers and the public generally began to recognise that protective duties on grain did not remove depression, and that agitation commenced which led to the repeal of the corn laws. A long spell of prosperity for the British farmer ensued, due not so much to the repeal of the corn laws as to the outbreak and continuance of Continental wars, which threw out of cultivation large areas of wheat lands, and turned countries for the time being from being exporters to importers of grain. This condition of things led to increased demand and unusually high prices for grain in Britain; but the causes having passed away, the reaction came. Its effects, now felt for several years, have been aggravated, among other causes, by preferential tariffs given to foreigners by British railway companies, by the low prices obtained for agricultural produce, in consequence of the increasing competition, arising from importations from abroad, and by a succession of unfavourable seasons. A Royal Commission sat in 1885 to inquire into the causes, and suggest, if possible, remedies for the removal of the depression in agriculture, and various recommendations were made which met with the general approval of the agricultural community. But only one or two of these have had imparted to them the vitality or force of legislation. **The Agricultural Holdings Act** was, in 1883, however, made compulsory; and now the landlord, or tenant, is prevented from contracting himself out of the Act which entitles the tenant, on quitting his farm, to compensation for unexhausted improvements. Apart from the numerous proposals made for the reform of the land laws, such as the abolition of the law of primogeniture, the curtailment of the system of entail and settlements, the adoption of a better system of land transfer, the more immediate remedies suggested for the removal of agricultural depression are "a general revision of existing rents, complete security for the tenant's capital, by granting him continuity of tenure, with free sale of his interest in his holding, the landlord having a right to pre-emption," together with freedom of cropping, reduction of local taxation,

relief from excessive railway charges, the extension of fruit and vegetable, dairy and poultry farming. The *British Fruit Growers' Association* has recently been formed, for the purpose of promoting fruit culture on an extensive scale, and this industry has been further encouraged by the Royal Horticultural Society, who hold periodical Apple and Pear Conferences and Exhibitions. In many cases a generous effort has been made on the part of landlords to assist the tenant by a reduction of rent from 10 to 20 per cent.; but an unusually large number of farms in the kingdom are, and have been for the past two or three years, empty, or are being cultivated by the landlords. The varied character of the climate in the kingdom has much to do with the particular system of agriculture pursued in any district. In the eastern counties, which comprise the comparatively dry and sunny districts of the country, the cultivation of wheat and barley largely prevails; while in the humid climate of the western counties, dairy farming, stock breeding and rearing, and root-growing, are the dominant features of agriculture pursued. The humid climate of Ireland lends itself very suitably to the rearing of cattle and to dairy farming (*q.v.*). In the uplands and hilly districts sheep farming with a little corn growing is generally carried on. In colonies where the area under cultivation is vast compared with the population, and where, too, the land is cheap, the payment of rent the exception, not the rule, and almost every owner the cultivator of his own land, one of their most important industries consists in the sending of their agricultural products to the British market. The general consumer is thus benefited, though the home farmer has to be satisfied with a smaller price than that obtained before for his produce. The United States, Russia, British India, and Australia, and other countries send to Britain annually over £40,000,000 sterling worth of wheat and wheaten flour, other grains and meals; £6,149,065 worth of live cattle, sheep and pigs, were imported in 1887, the larger number of which came from the United States, Canada, Denmark, Holland, and Germany; £14,350,234 worth of fresh-preserved and salted meat of all kinds were imported from Australia, Canada, the United States and other countries; £3,080,561 worth of eggs came principally from France, Belgium, and Germany; while nearly two-thirds of the foreign supply of butter, including butterine, amounting in value to £11,886,717, was sent from Holland, Denmark, and France; four-fifths of the cheese imports, with a total value of £4,508,937, came from the United States, Canada and Holland; and Belgium and France exported to this country nearly the whole of the foreign supply of poultry and game, including rabbits, the value of which was £721,049; and a considerable portion of the shipment of potatoes, valued at £974,133, came from the Channel Islands and France. The extended use of machinery in the operations of agriculture is borne out by the fact that, according to the census of 1881, though the number of persons engaged in the cultivation of farm lands has since 1871 decreased 9·3 per cent., the number of attendants on agricultural machines has considerably increased. The area returned in '88 (latest return) as under cultivation of all kinds of crops, bare fallow, and grass, exclusive of heath and mountain pasture land and of woods and plantations in GREAT

BRITAIN, was 32,684,390 acres. Compared with the returns of '87 there is an increase in land under cultivation of about 69,095 acres, the respective additions in each division being about 42,400 acres for England, 10,247 acres for Wales, and over 16,400 acres for Scotland. Notwithstanding the depression in agriculture so frequently noticed in the reports of collecting officers, there are in certain localities, such as parts of the counties of Cornwall, Devon, Durham, Lancaster, and the North Riding of Yorkshire in England, and others in Wales and Scotland, several instances of land newly reclaimed and brought under cultivation since '86. The total quantity of land returned under wheat in '89 was 2,449,589 acres, against 2,564,237 in '88; barley, 2,121,814 acres, against 2,085,561; oats, 2,888,821, against 2,882,252; potatoes, 579,259, against 590,160; and hops, 57,724, against 58,490. The estimated yield of hops in '89 is 497,811 cwt., at an average yield of 8·62 cwt. per acre, against 281,291 cwt. in the previous year, at an average of 4·81 cwt. The average yield in Sussex on 7282 acres was 10·03 cwt.; in Kent, on 35,487 acres, 9·35 cwt.; on 2102 acres in Surrey, 7·81 cwt.; on 2939 acres in Worcester, 6·69 cwt.; on 6850 acres in Hereford, 5·37 cwt.; and on 2905 acres in Hants, 6·59 cwt. Turning now to the various kinds of live stock, cattle have increased from 6,129,375 in '88 to 6,140,045 in '89; sheep and lambs from 25,257,149 to 25,634,091; and pigs from 2,404,344 to 2,510,938. The impetus given to sheep breeding by the high prices of '88 is shown by an increase in the number of lambs to the extent of 2·4 per cent. —IRELAND. In the returns of the crops and live stock the following changes are to be noticed. There was a decrease in the crop area of 85,810 acres, the area being 5,054,873. The corn crops show altogether a decreased acreage of 36,023 acres, that under wheat being less by 7,882 acres, and oats by 43,723 acres; but barley has increased by 15,051 acres, and rye by 2004 acres. There was a decrease of 17,114 acres of potatoes, 1759 acres of mangolds and beet-root, and the breadth sown with turnips was but 1732 acres. Flax was grown on 113,817 acres, an increase of 204 acres on the acreage of '88. As regards live stock in Ireland, horses increased 8,672 to 604,040, and sheep and lambs taken together 162,960, the total number of sheep and lambs being 3789,629. Pigs have fallen in number, and are fewer by 17,277 than in the preceding year, the total number being now 1,380,548. The number of cattle has also declined to the extent of 521, bringing the total down to 4,093,944. Agricultural Colleges have been established at Cirencester, Downton, and Halesley Bay, Suffolk, and there is also the Aspatia Agricultural College, Cumberland. Amongst the shows of the year were the 10th Shire Horse Show, Agricultural Hall (Feb.); the 21st Birmingham Spring Shorthorn Show and Sale, Bingley Hall (March); the Somerset County Society's Show, Yeovil, the Horse Show, Olympia, and Oxford County Society's Show, Oxford (May); the Royal Agricultural Show, Windsor, the Peterborough Agricultural Society's Show, Peterborough, and the Bath and West of England Agricultural Show, Exeter (June); the Highland Summer Agricultural Show, Melrose (July-Aug.); Royal County Show, Horsham (July); Bath Horse Show (Aug.).—The production of wheat throughout the world in '88 is estimated as follows:—

| In | Probable yield. | Probable imports. | Probable exports. |
|------------------|--------------------|----------------------|----------------------|
| | quarters. | quarters. | quarters. |
| Europe | 152,384,000 | 28,530,000 | 72,124,000 |
| America | 66,000,000 | ... | 17,084,000 |
| Asia | 38,156,000 | ... | 3,609,500 |
| Africa | 3,953,000 | ... | 793,500 |
| Australia | 5,781,000 | ... | 172,000 |
| Total | 264,274,000 | 28,530,000 | 33,790,000 |

The above yield would be in excess of the world's consumption by 5,260,000 qrs. The probable requirements of the United Kingdom in '88-90 will be 17,000,000 qrs., Italy 3,000,000 qrs., Belgium, Holland, and Germany 4,000,000 qrs., and France 2,000,000 qrs. The exports from Russia and Roumania in '88-9 amounted to 16,250,000 qrs., but the probable supplies for the current cereal year are not expected to exceed 11,000,000 qrs. There is also an estimated deficiency of 500,000 qrs. in the Indian supplies, while only 750,000 qrs. are looked for from Australasia, Chili, and the Argentine, against 2,250,000 qrs. actually exported last year. Austria-Hungary shipped 3,300,000 qrs. in '88-9, but no supplies are probable from these countries in '89-90.

Agriculture, Board of. By an Act of last session provision was made for the establishment of a Board of Agriculture for Great Britain, on similar lines to the Board of Trade and Local Government Board. (For details of the powers and duties of the new Board, see Session, sect. 58.) The Board was to be deemed to be established on the appointment of the president, which appointment was duly made by Her Majesty in September last. The powers and duties under the Contagious Diseases (Animals) Acts and other Acts, formerly administered by a committee of the Privy Council, and also the powers and duties of the Land Commissioners under numerous Acts, were transferred to the new Board. **President,** Rt. Hon. Henry Chaplin, M.P.; **Secretary,** Lieut.-Col. George Archibald Leach, C.B.; **Private Sec.** to President, Mr. R. Dawson. The Right Hon. Sir James Caird, one of the Land Commissioners, was appointed by Her Majesty a member of the Board, and several of the ministers are also ex-officio members.

Airy, Sir George Biddell, K.C.B., F.R.S., ex-Astronomer Royal, was b. at Alnwick, Northumberland, 1801. Educated at Hereford, Colchester and Trin. Coll. Camb., where he graduated, senior wrangler '23. Lucasian Professor '26, and '28 Plumian Professor with the charge of the Cambridge Observatory. In '35 he was elected **Astronomer Royal**, and made many improvements in the Observatory at Greenwich, in the methods of taking observations. Sir G. B. Airy conducted the astronomical observations on the occasion of the demarcation of the boundary between Canada and the United States. He is an Associate of the Institute of France, a member of numerous foreign academies, and an honorary graduate of Oxford, Cambridge, and Edinburgh. He has served with distinction on numerous royal commissions of a scientific character, and in '73 and '74 was **President of the Royal Society**. He was created a K.C.B. in '72, and on his retirement from the post of Astro-

nomer Royal in '81 was granted a pension of £1,100 a year. His latest researches have been devoted to a new method of treating the lunar theory.

Aitchison, James Edward Tierney. Retired Brigade Surgeon, Bengal Medical Service. Was educated at the Edinburgh Academy and University. M.D., C.I.E., LL.D., F.R.S. Lond. and Edin.; F.L.S., F.R.C.S. Edin.; M.R.C.P. Edin. Was **British Commissioner Ladakh**, '72. Published "Trade Products of Leh," '74. Botanist with the Kuram Field Forces '79 and '80. Published in Linnæan Society's Journal "The Flora of the Kuram Valley," '80, "Continuation," '81. Was **Naturalist** with the **Afghan Delimitation Commission**, '84-'85. Published in the Transactions of the Linnæan Society "The Botany of the Afghan Delimitation Commission," '88, and "The Zoology," '89. The hon. degree of LL.D. was conferred on him, by the University of Edinburgh, March '89.

Ajuda. A Portuguese trade-port on the Slave Coast, Guinea.

Albani, Madame, the vocalist, whose name prior to her marriage with Mr. Ernest Gye was Emma la Jeunesse, was b. in Montreal. No *prima donna* has a more extensive *répertoire*, and her fame is as great on the oratorio platform as on the lyric stage. She studied under Duprez in Paris, and under Lamperti in Milan. She made a successful *début* at Messina in 1870, and subsequently sang in other Italian theatres, coming to the Covent Garden Opera House in 1872. Wagner's "*Lohengrin*" and "*Tannhäuser*" owe much of the favour they have received in this country to her intellectual and refined impersonation of the heroines. Madame Albani has been connected with all the more important cantatas and oratorios brought forward of late years. She has sung in Paris, in Berlin, and other Continental cities, and throughout the United States. In '88 she sang in the series of **Italian Operas** performed at Covent Garden, under the direction of Mr. Augustus Harris, and at the **Randel Festival**. Mme. A. made a tour in Canada and the United States last spring, and on her return to London reappeared in "*La Traviata*," at the Royal Italian Opera. She sang at the performance of "*Elijah*," at the Handel Recital, Crystal Palace, in June last, and by special command before the Queen in July. On the occasion of Mme. A.'s farewell appearance as **Margaret** in Berlioz's "*Faust*," at the **Albert Hall**, Oct. 30th, prior to her departure for America, she received an enthusiastic ovation.

Albania is a wild and mountainous province of Turkey, renowned for the warlike qualities of its inhabitants. It is in a semi-independent state.-'89. The events of the year presented the general record of brigandage, vendetta, and riots, which the Porte treated with more or less indifference. Amongst other outrages a British subject, travelling between Scutari and Salonica (Sept.) was made a prisoner by a band of Albanians in the Gusinje. Ultimately he was rescued by the intervention of the Prefect of Petch.

Albany, Duchess of. Daughter of the Prince and Princess of Waldeck-Pyrmont, and sister of the Queen of the Netherlands; b. Feb. 17th, 1861. She married H.R.H. Prince Leopold of England, Duke of Albany, April 27th, '84, and became a widow by his sudden death ('84). In '88 the Princess lost her mother, H.R.H.

receives a pension of £6000 a year from the British Govt.

Alberta. Named after Princess Louise, Marchioness of Lorne. A district of the North-West Territories, and a future province of the Dominion of Canada. Lies north of the United States boundary, and extends from Assiniboia and Saskatchewan to the Rocky Mountains. Area 106,500 sq. m. Capital, *Calgary*.

Albert Medal. The, was instituted in 1866 and extended in '67 and '77, for the purpose of rewarding acts of heroism performed by civilians at sea or on land. The recipients of the decoration belong to one of two classes. The first class are awarded a decoration consisting of a gold oval-shaped badge bearing the words on a garter "For Gallantry in Saving Life at Sea," or "on Land," as the case may be. Members of the second class whose act of bravery, though meritorious, has not been so striking, receive a bronze badge with the same inscription.

Albert Victor, Prince, eldest son of the Prince and Princess of Wales, was b. Jan. 8th, 1864, and was educated at Trinity College, Camb., and Univ. of Heidelberg. Previous to his entering as an undergraduate, however, he had passed two years as a naval cadet on board the *Britannia*, and in '79 started with his brother Prince George of Wales on a voyage round the world in the *Bacchante*. He returned to England in '82. The diary of this voyage kept by the young princes was edited by the Rev. J. N. Dalton, their governor, and published by Messrs. Macmillan and Co. ('85). On leaving the university Prince Albert Victor proceeded to Aldershot to prepare for the army. H.R.H. was invested with the Order of the Garter in '83. In company with his brother he visited Ireland '87. Created hon. L.D. of Cambridge, '88. H.R.H. is now Nov. '89 visiting India. He is attended by Col. Sir E. Bradford as chief of the staff. An application to the House of Commons to grant an allowance to him and his sister, the present Duchess of Fife, was made by the Queen last session. The application created much opposition, and a committee was appointed to enquire into the matter. They recommended that no allowance should be made, but that the allowance of the Prince of Wales should be increased by £36,000 a year. In May '89 he visited Belfast and the new dock, and laid the foundation stone of the new Albert Bridge.

Aicester, Frederick Beauchamp Paget Seymour, 1st Baron (creat. 1882), son of the late Sir Horace Beauchamp Seymour, M.P., was b. 1821. He entered the Royal Navy (1834), promoted to Vice-Adm. (1876) and Adm. (1882); was private secretary to First Lord of the Admiralty (1868-70), and a Lord of the Admiralty (1874-4 and 1883-5); served in Burmese war (1824-3); commanded the *Meteor* floating battery in the Black Sea (1855-6), and the naval brigade landed for service in New Zealand (1860-61), where he was severely wounded; was Commander-in-chief in the Mediterranean (1880-83), commanded the naval forces in Egyptian campaign (1882), and was voted the sum of £20,000, and raised to the peerage for his services in the same year.

Alderney. One of the Channel Islands (*q.v.*).

Alexander I., King of Servia, b. '76, and ascended the throne on the abdication of his father, King Milan (*q.v.*), on March 6th, '88. Privately educated at Belgrade, according to

the programme of the German gymnasium or high school. He is under the guardianship of two regents (see *SERVIA*). When Crown Prince he accompanied his mother, Queen Natalie, into exile after her separation from the King, but was forcibly removed from her at Berlin, and conveyed back to Belgrade.

Alexander III., Emperor and Autocrat of all the Russias, b. March 10th, 1845. On the death of his brother the Grand-Duke Nicholas, who died at Nice ('63), he became heir-apparent, and ascended the throne after the assassination of his father the Emperor Alexander II. in '81. He married ('66) Maria Dagmar, daughter of the King of Denmark and sister to the Princess of Wales and the King of Greece. Though the Tzar seldom appears in public in Russia, he has paid several visits to Copenhagen and other parts of Europe since his accession. In Nov. '87 he made a public entrance into Berlin on the occasion of his visit to the Emperor William I. In October '88 the Tzar with his family narrowly escaped death by a railway accident on the Transcaspian Railway (*q.v.*). The Tzar is credited with being strongly averse to war, and has hitherto preserved a policy which has kept the war party in check. On Feb. 19th, '89, his Majesty, with the Tzarina, attended a ball given in St. Petersburg by Sir F. Morier, the British Ambassador. His Majesty received the Emperor William II. at Peterhof, in July '88, and last autumn paid the return visit to Berlin. He presented to the Emperor William a picture by a Russian painter representing the landing of the Emperor at Cronstadt. A similar picture was previously sent to the Tzar by the Emperor.

Alexandra (Princess of Wales). See WALES, PRINCE OF.

Algeria. One of the Barbary States of North Africa, now a French province. Area 122,876 sq. m.; pop. 3,867,000 (1888). It is divided into the three civil divisions of *Oran*, *Constantine*, and *Algiers*—capital cities of same names,—and subdivided into twelve arrondissements, sending deputies to the National Assembly; also the Saharan borders, divided into three military territories. There are 1822 miles of railway. Imports ('87), 211,337,555 fr.; exports 185,959,302 fr., consisting of esparto and halfa grass, barley, wine, oil, tobacco, wool, iron and zinc ores, etc. The French forces maintained in Algeria consist of an army corps numbering 53,306 men. The cost of the colony to France has always been far greater than its revenues. Revenue, '88, 44,034,065 fr.; expenditure, 123,614,172 fr. Inhabitants are French and European settlers, about 250,000; a few Jews; about 500,000 Berbers or Kabyles; and the remainder Bedouin Arabs, of nomadic habits. For Governor-General, etc., see *DIPLOMATIC*. Consult Gaffarel's "L'Algérie," Playfair's "Handbook of Algeria and Tunis," Séguin's "Walks in Algeria," Tchihatcheff's "L'Algérie et Tunisie," Norman's "Colonial France," C. H. Flower's "Algerian Hints for Tourists," etc.

Alison, Lieut.-General Sir Archibald, K.C.B., and Bart., was b. at Edinburgh (1826). Entered the army in 1846. Served throughout the Crimean war. Military Secretary to Lord Clyde during the Indian Mutiny (1857-58). Nominated second in command and Brigadier-General of the European Brigade on the Gold Coast in the *Ashantee Expedition* (1873-74). Deputy Adjutant-General in Ireland (1874-77); Deputy Quartermaster-General (Intelligence

Department) at the Horsé Guards (1878-82). Commanded the Highland Brigade of the expeditionary force to Egypt at the battle of Tel-el-Kehr (1882), and remained in command of the British army of occupation of 12,000 men until May 1883, in which year he was appointed to the command of the troops at Aldershot.

Allen, Grant, author of "Physiological Aesthetics," "Colin Clout's Calendar," "Vignettes from Nature," "The Evolutionist at Large," "Charles Darwin," "Babylon," "For Mamie's Sake," and many articles in the leading magazines, was b. at Kingston, Canada, '48. Educated at Merton College, Oxford. He is considered one of the best scientific authors of the evolutionary school. He has ably contributed to the exposition of the Darwinian theory. His latest works are "The Devil's Die," "This Mortal Coil" ('88), "Dr. Fallisier's Patient," and "Force and Energy" ('89). He vigorously attacked the Liberty and Property Defence League in an article contributed to the *Contemporary* of June last.

Alliance Israelite. See Jews.

Alliance, The United Kingdom, for the "total and immediate legislative suppression of the traffic in intoxicating liquors as beverages," was formed in Manchester, June 1st, 1853. (For history of U. K. A. see ed. '87.) A body of agents is appointed, with centres of operation in all parts of the kingdom. Besides its efforts to secure its own object—prohibition of the liquor traffic by popular consent—it has vigorously supported the Local Option measures of Sir W. Lawson, and it has also given friendly assistance to kindred societies, and has circulated a large body of literature bearing on all branches of the temperance question. It has received the countenance of many distinguished men, including the late Lord Brougham, Bishop Temple, Cardinal Manning, Archdeacon Farrar, etc. Annual receipts, about £12,000. President, Sir Wilfred Lawson, M.P.; Hon. Sec., Mr. S. Pope, Q.C.; Gen. Sec., Mr. James Whyte; Editor of *Organ*, *Alliance News*, Mr. H. S. Sutton. Offices: 44, John Dalton St., Manchester, and 15, Great George St., Westminster, S.W.

Allman, George James, M.D., LL.D., F.R.S., b. at Cork (1812). Educated at the Belfast Academy. Graduated in Arts and Medicine in the University of Dublin. Appointed to the Regius Professorship of Botany in Dublin University (1844-55), Regius Professorship of Natural History in the University of Edinburgh (1855-70). His chief scientific labours have been among the lower orders of the animal kingdom. For his researches in this department of Biology the Royal Society of Edinburgh awarded him (1872) the Brisbane prize; he received the Royal medal from the Royal Society of London (1873), and the Cunningham Gold medal from the Royal Irish Academy (1878). On the completion of the exploring voyage of the *Challenger*, the large collection of Hydroids made during that expedition was assigned to him for determination and description, a similar service having been rendered by him in connection with the exploration of the Gulf Stream under the directions of the United States Government. He was President of the British Association in 1879.

Alton, Rev. H., D.D., Congregational minister, was b. 1818, at Welton, Yorks. Educated at the Countess of Huntingdon's College at Cheshunt. Minister of Union Chapel, Islington

(43) as co-pastor with Rev. T. Lewis; assumed the sole charge '52. Chairman of the Congregational Union '64-5, re-elected '81; D.D. Yale ('71), St. Andrews ('85). Dr. Alton is also an author, and has published amongst other works "Memoirs of the Rev. J. Sherman," "The Vision of God," and edited a posthumous volume of the sermons of the late Rev. Dr. Binney. Dr. Alton has been instrumental in greatly improving the psalmody of the Congregational Church, his work "The Congregational Psalmist" being used in many of the principal churches. Was also for many years editor of the *British Quarterly Review*.—Union Chapel, a handsome edifice, rebuilt in '77 at the cost of £50,000, was finally completed by the erection of the spire, Oct. 21st, '88.

Alma-Tadema, Lawrence, R.A., was b. at Donrhy, in the Netherlands, 1836. Originally intended for one of the learned professions, he devoted himself very largely to the study of ancient classical writers; and in 1852 entered the Antwerp Academy as a student. Subsequently he assisted Baron Henry Leys in painting several of his large pictures, and finally came to London, where, in 1873, he obtained letters of denisation, having resolved to reside permanently in this country. Since then he has delighted the art-world with his productions, in regard to the majority of which he has put to excellent use his early classical training. Honours of all kinds, and by various countries, have been showered upon Mr. Alma-Tadema. He was elected R.A. (1879), and London correspondent in the painting section of the French Academy of Fine Arts. Mr. Alma-Tadema married in 1871 Miss Laura Epps, herself an accomplished artist, who exhibited "Soon Ready" at the New Gallery Exhibition '89. Mr. Alma-Tadema's contribution to last year's Academy exhibition consisted of an important work, "At the Shrine of Venus." He also exhibited a "Dedication to Bacchus," at M. Lefèvre's gallery. He received the Fine Art Medal of Honour at the Paris Exhibition.

Amadeus, Prince, Duke of Aosta, ex-King of Spain, brother of King Humbert of Italy, b. 1845. Elected King of Spain by the Cortes in '70 by 191 votes to 120. He landed at Carthagena on Dec. 30th, the same day that Marshal Prim, who had formerly offered him the crown after the Revolution of '68, died from the wounds received at the hands of an assassin. King A.'s position soon became one of great difficulty, and on Feb. 11th, '73, he announced to the Cortes his intention to abdicate. He married in '67 Princess Mary, daughter of Prince Charles Emmanuel del Pozzo della Cisterna, and in Sept. '88 Princess Letitia, sister of Prince Victor Napoleon, the head of the Bonapartist party.

Amatongaland. An independent native state of South Africa. Area about 4,000 sq. m. Lies N. of Zululand, and extends to Delagoa Bay; has on W. Swaziland and Transvaal, on E. the sea. The Amatonga people are of Zulu race, and are governed by a Queen, under whom are 17 chiefs of districts. In June '89 the Queen Regent despatched some Indunas to the Portuguese Government to solicit the establishment of a protectorate over that portion of Amatongaland not under direct Portuguese sovereignty.

Ambassadors are diplomatic agents resident of foreign states, and representing by virtue in their Letters of Credence their own states.

They are of three kinds, varying with the nature of their commissions: **Ambassadors** proper, **Envoys** and **Plenipotentiaries**, and **Chargés d'Affaires**. They, together with their servants, enjoy certain privileges—viz., exemption from process and arrest, and from taxation—which attach to ordinary foreign residents. An ambassador has also the right of audience of the sovereign Power to which he is accredited. On the death of either of the sovereigns between whom he negotiates, his commission lapses, but may be renewed. For list of Ambassadors see DIPLOMATIC.

Ambulance Association, St. John's. Established in 1877, by the Duke of Manchester, and the Chapter of the Order of St. John of Jerusalem, for the purpose of disseminating general information as to the preliminary treatment of the sick and injured among all classes of society. A course of instruction is given to students. Those who pass the examination receive a certificate of proficiency. Women who have passed the first examination are allowed to attend a second course on home nursing and hygiene. Upwards of 160,000 certificates have been awarded to persons of both sexes. An **Invalid Transport Corps** has also been formed. The work has been extended to the East and West Indies, Canada, China, Australia, New Zealand, and different parts of Europe and Africa. **President:** H.R.H. Prince of Wales, K.G. **Chief Secretary,** Lt.-Col. Sir Herbert C. Ferrott, Bart. **Office,** St. John's Gate, Clerkenwell, London, E.C.

American Political Parties. The two chief political divisions in the U.S. are the Democratic and Republican parties. The Democratic party, by the election of President Cleveland in July '84, came into national power for the first time since '60. Its long exclusion from control was chiefly due to the survival of war prejudices in the North, which was as solidly Republican as the South was Democratic. When the Democrats attained power in '84, it was on the question of administrative reform. Never entirely cohesive, the Democrats were most nearly united on the question of reducing the tariff, although they studiously avoided making this an issue, and would probably have continued to do so had President Cleveland not forced the hand of his party on this question in his message to Congress in December '87. As a result, the presidential election which took place on November 6th, '88, was fought chiefly on the tariff question, although many minor issues were mixed up with it. President Cleveland was re-nominated by his party at the Convention held at St. Louis in June, '88, as the Democratic candidate, with Mr. Allen G. Thurman as vice-president; the Republican candidate for the presidency, selected at the Chicago Convention held in the same month, being General Benjamin Harrison (q.v.), and for the vice-presidency Mr. Levi P. Morton. Mr. James G. Blaine, who opposed President Cleveland in '84, refused to allow himself to be nominated. The result of the election was a severe defeat for the Democratic party, General Harrison being elected by 233 votes, against 168 given to President Cleveland. On the popular vote, however, President Cleveland obtained a majority of 100,476 votes, the recorded figures being: Cleveland, 5,540,329; Harrison, 5,439,853. As had been anticipated, the struggle was greatest in New York State,

which, after a keen contest, the Republicans succeeded in wresting from the Democrats by a majority of 123,000, out of a poll of 1,320,109. The only two Northern states in which the Democrats were successful were Connecticut and New Jersey. The following shows the vote by states, and the polling strength of each State:—**Republicans:** California 8, Colorado 3, Illinois 22, Indiana 15, Iowa 13, Kansas 9, Maine 6, Massachusetts 14, Michigan 13, Minnesota 7, Nebraska 5, Nevada 3, New Hampshire 4, New York 36, Ohio 23, Oregon 3, Pennsylvania 30, Rhode Island 4, Vermont 4, Wisconsin 11; total 233. **Democrats:** Arkansas 7, Alabama 10, Connecticut 6, Delaware 3, Florida 4, Georgia 12, Kentucky 13, Louisiana 8, Maryland 8, Mississippi 9, Missouri 16, New Jersey 9, North Carolina 11, South Carolina 9, Tennessee 12, Texas 13, Virginia 12, West Virginia 6; total 168. Since then four new States—viz., North Dakota, South Dakota, Washington, and Montana—have been admitted into the Union, and on Oct. 1, '89, elections for Senators and Congressmen were held in each State. In the three first-named, the Republicans were victorious, Montana being carried by the Democrats. The result of this was to increase the strength of parties in the Senate from 39 Republicans to 45, and from 37 Democrats to 39. The strength of the House of Representatives was increased from 325 to 330, four of the additional members being Republicans, and the remaining one a Democrat. The result was very important in each case, as in the Senate the Republican majority of 2 has been increased to 6, this being also its majority in the House of Representatives where it was formerly only 3. The Republican party, consequently, reassumed power in March of last year, when President Cleveland's term of office expired. The party is committed to the maintenance of the existing protective tariff, which is its chief rallying-point. In addition to the difference between the two parties on the tariff question, there are certain historic lines of divergence between them, growing out of their attitude during the Civil War. Thus the Republicans tend towards a centralisation of power at Washington, while the Democrats are committed, in theory, to keeping as much power as possible in the hands of individual states. This dividing line, however, becomes fainter with each succeeding year. There are also two minor parties—the **Prohibitionists** and the **Labour Party**. The former is chiefly recruited from the Republican side, and has scarcely any adherents in the South, its stronghold being in New York State. The **Labour Party**, although tolerably numerous, has little homogeneity, and is in a continual state of restlessness through internal differences. It numbers within its ranks the followers of Mr. Henry George (q.v.), an advocate of "land nationalisation"; and the **Knights of Labour** (q.v.), an industrial organisation which aspires at uniting in one immense federation all the diverse groups of workmen throughout the United States. Mention must also be made of the "**Mugwumps**," or Independents, who definitely seceded from the Republican party in 1884, in consequence of the serious charges brought against Mr. Blaine of public corruption and of collusion with political speculators. In the November '88 election, however, a not inconsiderable number of the Mugwumps, who, for the most part, comprise the professorial and

learned classes, returned to their old allegiance, and voted for the Republican candidate.

Andrassy Islands. A group of low, small coral islands, in the Indian Ocean. They are geographically and politically an extension of the Seychelles Islands, forming a part of that dependency of the British colony of Mauritius.

Anarchism. A Socialist heresy which claims a descent, though somewhat remote, from Proudhon, but whose earliest and most prominent exponent in its present form was the late Dr. Bakounin. The Anarchist takes his stand upon the abstract idea of "freedom." See ed. '88. Chief organs: *La Révolte*, 140, Rue Mouffetard, Paris; *Die Freiheit* (Joh. Most), New York; *The Anarchist*, London; *Freedom*, London, etc.

-Ancient Lights, Law on, in '89. A novel point was raised in the case of *Myers v. Catterson* (Chancery Division, July 10th). The plaintiff had leased a piece of ground from the London, Chatham, and Dover Railway Co., and for some years had enjoyed the light which came through two of the railway arches situated on one side of the house. Subsequently the defendant acquired from the company a fee of the land on each side of the archways, and a lease for thirty years of the arches, and proceeded to block them up with wooden hoardings. The court held that the plaintiff was entitled to succeed, on the ground that the defendant took his property from the railway company subject to an obligation on their part not to interfere with the light coming to the plaintiff's house.

Anderson, Mary Antoinette, actress, b. 1859 at Sacramento, Cal. Brought up at Louisville, Ken., where she made her *début* as Juliet Nov. 25th, '75. Played there and in southern cities some months, then at San Francisco as Parthenia. Came east again in '77-8, and appeared at New York, playing there and in all leading towns of U.S. for several years. Her chief parts were those named, and Julia, Bianca, Pauline, Evadne, Ion, Meg Merriliss, Lady Macbeth, the Countess, Duchess of Torrenueva, Berthé, and Galatée. She gained great success on the American stage. In '83 she appeared in England, first at Lyceum, London, Sept. '83, as Parthenia, Pauline, Galatée, and Clarice, and achieved much popularity. She opened the new Memorial Theatre at Stratford-on-Avon, Aug. 30th, '85, as Rosalind. Returning to America, she made a most successful tour with an English company. She revisited England in '86, and in '87 appeared in the "Winter's Tale" as Hermione and Perdita. After successful performances in the provinces, she again left for America, to fulfil an engagement at Wallack's Theatre, New York. She returned to England last April to take several months' rest and recruit her health. She has recently been on a visit to Mr. William Black, at his Highland residence at Oban.

Andrassy, Count Julius, b. at Zemplin, Hungary, 1823. He took an active part in the Hungarian revolution (1848). When the defeat of Austria at Sadowa led the Emperor to concede Home Rule to Hungary, Count Andrassy was made President of the Council and Minister of National Defence in the new Hungarian Parliament. Elected deputy for Pesth (1869), he became Minister for Foreign Affairs of the Austrian empire, and Comptroller of the Household, in succession to Count von Beust (1871), and Chancellor of Austro-Hungary. When the insurrection broke out in Bosnia and Herze-

govina, in 1875, he addressed the well-known "Andrassy note" to the Porte, pointing out the reforms necessary to the safety of the Ottoman empire and the welfare of its Christian subjects. At the European Congress at Berlin, Count Andrassy was chief plenipotentiary of Austria-Hungary, and retired from office in 1879. He has not since taken an active part in public life. The Emperor bestowed on him the Order of the Golden Fleece in 1878. The Count's health has of late caused some anxiety to his friends, and in the Aust. Delegation it was announced, June 22nd, '89, that he had telegraphed resigning his seat through ill-health.

Anegada. A British West Indian island. Area 14 sq. m. Belongs to the presidency of the Virgin Islands, under the federal government of the Leeward Islands (*q.v.*).

Anglican Church, The. By the Anglican Church is meant that group of autonomous Churches which are in communion with or have sprung from the mother Church of England, and have acquired jurisdiction throughout the world. Allegiance to the Primacy of Canterbury is not a condition of the union which subsists between these Churches, nor does the Archbishop of Canterbury claim any jurisdiction save in his own Province, but the conditions of intercommunion as recommended by the Lambeth Conference in July '88, are largely determined by the quasi-patriarchal chair of St. Augustine. The Church of Ireland, the Episcopal Church of Scotland, the Protestant Episcopal Church of the United States of America, the Church of Canada, the Church of Australia, the Indian Church, and the Church of South Africa are all autonomous bodies under the jurisdiction of their own metropolitans, and not amenable to the Ecclesiastical Courts of the Church of England. On the other hand, the Archbishop of Canterbury may claim to act as spiritual arbiter in the last resort in ecclesiastical causes connected with the daughter Churches. Since the death of Dr. Colenso (Bishop of Natal) various attempts have been made to re-establish Royal authority over the South African Church, which had hitherto been legally part of the Established Church of England; but the Crown refused to nominate, and the Archbishop of Canterbury declined to consecrate another Bishop of Natal, whose see is now merged in that of Maritzburg, under the Bishop of Capetown, Metropolitan of Africa. In addition to these autonomous Churches in connection with the Anglican Communion there are twelve missionary bishops representing the English Church in various remote regions of Asia, Africa, and America; and three or four representing the Protestant Episcopal Church of America. The American Church possesses 72 bishops in 50 dioceses and 15 missionary jurisdictions, and 3,700 other clergy. It has 430,000 communicants, and upwards of 1,250,000 baptised members. The average offerings for Church purposes amount to over 20,000,000 dollars a year. The English Episcopate numbers 34 diocesan prelates and 14 suffragans (see CH. OF E.). There are seven bishops in the Scotch Episcopal Church, the Bishop of Brechin (Rev. Dr. Jermyn) being *Primus* (*i.e.* Archbishop). The Church of Ireland has two Archbishops and 11 Bishops. India and the various Colonies of the British Empire own 63 bishops of the Anglican Church.—*Doctrine and Discipline.* In all essential respects the doctrine and discipline of the Churches in connection with

the Anglican communion is the same, differentiations being rather in detail of development than in form or character. (See CHURCH OF ENGLAND.) One important difference is the restoration of Diocesan Synods and general Synodical action which marks the un-Established branches of the Church. The tendency of the American, South African, and Scotch Churches is towards High Churchmanship, and the same may be said in a less degree of the Indian Church; while Broad Evangelicalism is the rule in the Colonies. As in England, however, the extremes of all three parties (see CHURCH PARTIES) are to be found co-existing in every Church, even in the Church of Ireland, which, more than any other, is bound down by its recent constitution and rubrics to a definite "Low" standard of doctrine and ritual. The largest diocese in the Anglican Communion is that of the Bishop of Mid-China, covering as it does 350,000 square miles, and comprising a population of over 100,000,000 souls. The total number of adherents of the Anglican Communion is estimated (approximately) at 40,000,000.

Angling, '89. The close of the '88 rod season for salmon was marked by a series of freshets affording late anglers good sport on most of the larger rivers. The spawning time that followed was one of almost constant spate on many important waters, and fish thus succeeded in getting without difficulty to the best breeding grounds. Less disease than usual has been noticed generally, though here and there it is still very bad; but, on the whole, in those waters not in danger of becoming extinct as fish-producers owing to increasing pollution, conditions are favourable for a full maintenance of the present stock of fish. Two salmon of 50 lb. each have been taken by fly-fishers in Scottish rivers during the season of '89. There was no considerable run of fish in the English rivers until October came in, when angling improved all round, and the autumn salmon fishing was about an average. We are still much at sea as regards the natural history of the *salmonida*, and certain points which have presented themselves in '89 require an explanation that cannot as yet be given. Although the earlier portion of the season afforded good travelling waters following frequent freshets, the fish did not ascend the rivers, apparently because they had not arrived at the mouths of them. It has been noticed, and particularly in regard to the Severn, that a good year usually follows a bad one, and that there is a maximum and minimum point in regard to the quantity of fish ascending rivers, and that these occur at well-marked intervals. It appears from the records of the netmen that the year has been one of unusually heavy fish, with a noticeable scarcity of grilse; but what the causes are that determine these variations we have yet to learn.—The trout fishing of the year has been about up to the average on the southern waters: rather above it in Derbyshire and the Midlands, where the earlier part of the season produced some excellent sport on the Derwent and the Wye; the Watlook Association have latterly turned into the Derwent many thousands of Loch Leven fry, which have thrived well; but in Yorkshire and the North generally the season has been slightly below the average. One remarkable feature of the year has been the scarcity of almost all the aquatic flies, on which the rise of trout, and to a large extent the angler's success, depend.

This has been very generally noticed; but many years of recorded observations, now in process by the Manchester Anglers' Association, are necessary to solve these and other points that have long been riddles. The year afforded some fine specimens of fish—one from Loch Stennis, in the Orkneys, a male yellow trout, weighing 9 lb. The fish was a genuine *salmo fario*; it was taken on a fixed line, and was a perfect specimen of its class, the length being 3 ft. 3 in. by 2 ft. in girth. A fine fish of 14 lb. was killed on Lough Owel, by a local hand trolling with a sprat; and on the Hampshire Test, Mr. R. B. Marston killed, with fly, a remarkably fine trout of 5 lb., and a grayling of 3 lb., in June last. Thames trouting has exhibited few remarkable features, and no trophies of moment. The number of fish-destroyers, natural and unnatural, in and about the river are against any marked increase in the stock of fish; and among the most serious enemies must be classed the too numerous swans, which consume an unlimited amount of spawn.—The growing feeling in favour of a rearrangement of the fence months, for coarse fish other than *salmonida*, has been taken up by the Thames Angling Preservation Society, who, as the result of netting the reservoir at Sunbury, were enabled to turn into the Thames over 1,200 fish, chiefly good roach. The alterations suggested and discussed by the Society in March last are: (1) The abolition of trailing and live and dead gorgel-bait fishing. (2) Fence months for jack and perch to be March, April, May, June, and July; for dace and grayling, March, April, May, and June; for roach and all other coarse fish from April 15th to end of June. (3) Night fishing on the Thames. (4) Sizes of takeable fish: pike to be increased to 22 in., perch to 10 in., chub to 12 in., roach to 8 in., dace to 6 in., rodd to 8 in., barbel to 18 in., trout to 16 in., grayling to 10 in., bream to 10 in., carp to 10 in., gudgeon to 4 in. (5) The impost of a rod licence. The tendency to greater restrictions and care in preserving the inland fisheries is the same as that manifested at the Leeds Conference of '88, and the close times suggested are in the main identical. It is, however, further proposed that the fence season for Thames trout shall be extended to mid-April—a very advisable alteration. It is perhaps too much to hope that these concessions will be obtained with unanimity on all points, but there can be no question that they are steps in the right direction.—The number of anglers and angling associations continues to extend, particularly in London and the neighbourhood of the large towns of the North: in the latter district it is noticeable that the grayling is steadily growing in favour as a game winter fish. The important conference held at Leeds last November has recently, through the Council then appointed, given a further stimulus to the interests of anglers by the proposed formation of a great Northern Anglers' Association, a first meeting of which is to be held at Leeds in the early part of December. The objects of the federation are briefly set forth as "The development of inland fisheries and the protection of anglers' interests generally." The movement was originally promoted by the Manchester and the Yorkshire Anglers' Associations, jointly.—The Twenty-eighth Annual Report of the Inspector of Fisheries foreshadows, among other things, the complete decay of the *salmonida* in the North, owing to the over-

increasing pollution; and the gradual disappearance of char from the Welsh lakes, owing to fishing at wrong periods of the year. The Inspector remarks with favour on the fact that the Yorkshire Fishery Board, having increased their income by the impost of a rod licence for trout, have set aside a sum of money for the establishment of a fish hatchery, for the distribution of fry at cost price in the waters of the county. This example has since been followed by the Ribblesdale Board, and others have it in contemplation. — The year has been marked by an important contribution to angling literature, by Mr. F. M. Halford, in his "Dry Fly Fishing in Theory and Practice," and by the appearance of a promising weekly under the title of *The Rod and Gun*.

Anglo-Jewish Association. See Jews.

Angola. Portuguese West Africa, or Lower Guinea. Stated area, 312,500 sq. m.; pop. 2,000,000. Capital *S. Paul de Loanda*. Divided into the four governments of Angola or Loanda, Ambriz, Benguela, and Mossamedes; port-towns of same names. Consult Monteiro's "Angola and River Congo," Keith Johnston's "Africa," etc.

Angra Pequena. A port, now called "Luderitz Bight," 120 miles north of Orange River mouth, South-west Africa, capital of German Luderitzland (*q.v.*). Luderitz German Trading Station established '83. German flag hoisted, 1st January, '84.

Anguilla. A British West Indian island. Area 35 sq. m., pop. 3,200. Belongs to the presidency of St. Christopher, in the federal government of the Leeward Islands. Is low and flat, deficient in wood and water. Produces salt from a lake, and phosphate of lime; cattle, ponies, and garden stock.

Angus, Joseph, D.D.; b. 1816, at Bolam, Northumberland. Educated at King's College, Stepney College, and Edinburgh University, where he graduated '36. Secretary of the Baptist Missionary Society '40-49, when he was appointed President of Stepney College (now Regent's Park College), for the training of Baptist Ministers. For some years he held the office of English Examiner to the London University and to the Indian Civil Service. His principal works are the "Handbook to the Bible," "English Literature," and the "Handbook of the English Tongue." He also edited Butler's "Analogy and Sermons." Mainly through his influence the sum of £30,000 was recently raised for the purpose of extending the operations of Regent's Park College. Dr. A. was formerly a member of the London School Board, and one of the revisers of the New Testament.

Ani Papyrus. See Egyptology.

Annam. An empire in S.E. Asia, now a French protectorate. It formerly included Tonquin, French (or Lower) Cochinchina, and Cambodia. Area of Annam (or Cochinchina proper), 26,923 sq. m., pop. 6,000,000. Capital Hué, near the coast, garrisoned by French troops. Annam (or Cochinchina proper) stretches northward along the coast from French Cochinchina to Tonquin. It is inclosed on the west by bare hills, beyond which is the domain of the Moi, or hill tribes, and the land of the Laos, subject to Annam. Principal productions: rice, cotton, indigo, tobacco, sugar, silk, bees-wax, pepper, cardamoms, arca-nuts, ornamental woods, ivory, lac, bamboos, etc. Edible birds'-nests and trepang are among the exports to China. Gold is washed in the river-

beds, and other metals worked. There is an emperor, with court and dignitaries, but government is really in French hands. Trade is with China and France, a little with Burmah and Siam. Fishing a very important industry. A little silk and cotton manufacture, metal and wood work. The various peoples belong to the Indo-Chinese race, a link between Chinese and Malays. Religion chiefly Buddhism. A railway is proposed. It was stated, Oct. '88, that the result of negotiations between the Governor-General of French Cochinchina and the King of Annam is that the towns of Hanoi, Haiphong, and Tourane, with a considerable district round each, have been converted into French possessions, within which the king surrenders all his rights. It is also arranged by the new Convention that French property throughout Tonquin and in the open ports shall be subject to French law alone. The King of Annam died at Hué on Jan. 27th, '89, aged 46. Election of Bun-Lian, son of the former king, Tu-Duc, by the Grand Council and Annamite Court. Council of regency, under the presidency of Prince Hwai-Duc, formed. New king ten years old. Notification of new king's election by the French Resident-General. Proclaimed as Thanh Khai Jan. 31st, and crowned Feb. 1st. Envoys from A. visited Paris in July. The Annamite section of the Paris Exhibition (*q.v.*) was one of the most attractive. Consult Vignon's "Les Colonies Françaises," Reclus' "L'Inde et l'Indo-Chine (Géographie Universelle)," Keane and Temple's "Asia," Norman's "Colonial France," etc.

Annenkoff, Lieut.-General. The constructor of the Transcasian Railway (*q.v.*), and designer of a railway to India from the Caspian to Quetta, via Askabad, Sarakhs, Herat, and Candahar, was b. 1837, and educated at the Page School, St. Petersburg. He served in the Polish war in '63, and took part in the draining of the Pinsk Marshes, and, running light strategical railways through them; constructed the Bender-Galatz military railway during the Russo-Turkish war ('78), and was afterwards appointed Director of the Military Transport in Russia. Suggested a railway from the Caspian to assist Skobelev in his campaign against Geok Tepe ('79), and supervised its construction. Afterwards advocated its extension to Samarcand, and was intrusted with the task, which occupied three years ('85-88). Received for this the order of Alexander Nevsky in diamonds, and was appointed chief director of the line for two years. In order to make his proposed Transcasian route to India known to Europe, organised an excursion from Paris to Samarcand in Sept. '88, and in Nov. conducted Baron Alphonse Rothschild, of Paris, over the line.

Annonbon. A lofty, basaltic, and volcanic island in the Gulf of Guinea. It is a Spanish possession, and its climate is salubrious.

Anstey, F., the *nom de plume* of Thomas Anstey Guthrie, author of "Vice Versa," "The Giant's Robe," "The Black Poodle," "The tinted Venus," "The Fallen Idol," "Burglar Bill," etc. He was b. at Kensington '56, educated at King's College School and Trinity Hall, Cambridge, where he graduated in '79. Called to the bar at the Middle Temple, '80. He published "The Pariah," '89.

Anthropology. '89. In physical anthropology the work of Messrs. Jacobs and Spielman on the comparative anthropometry

of English Jews is specially noteworthy. On comparing their measurements with those of other Englishmen examined in Mr. Galton's laboratory, the comparison seems unfavourable to the Jews; but if the poorer East-end Jews be eliminated, the difference almost disappears. Although averages may be lower, the maxima may be greater: thus, while the average weight of Jewesses is 9 lb. below that of other Englishwomen, the highest weight obtained was 5 lb. higher. In keenness of vision, too, the Jewish average is inferior, while their higher limit is superior. Colour-blindness was found to be very prevalent among Jews: a fact which may account for the paucity of Jewish artists, and for the want of taste in the colour of dresses worn by the poorer Jewesses.—The principal contributions to ethnology during the year have been by Mr. E. H. Man, on the *Niobar Islanders*, and by Prof. Haddon on the natives of the islands in *Torres Strait*. Mr. A. Thomson has described the osteology of the *Veddahs of Ceylon*. The well-known volume of anthropological *Notes and Queries*, issued by the British Association, is under revision by Dr. Garson and Mr. Read, of the British Museum. A schedule of questions on the manners, customs, religion, and superstitions of civilised and semi-civilised peoples, has been drawn up by Mr. J. G. Frazer, and widely circulated among missionaries and other travellers. Copies for use may be had on application to Mr. Frazer, Trinity College, Cambridge. A Spanish translation is issued for South America and the Philippines. Valuable sets of answers have already been received from New Zealand, South Africa, and Torres Strait.—The tenth session of the *International Congress of prehistoric anthropology* was held in Paris from August 19th to 26th, under the presidency of Prof. Quételet. At this meeting, M. Cartailhac presented his new work, "*La France préhistorique*." The Paris Exhibition brought together a remarkable assemblage of prehistoric antiquities from French museums and private collections. On some of the engraved objects of the stone age, traces of colour have been found, suggesting a degree of culture scarcely suspected. "The *History of Work*" included life-sized groups of figures chipping stone implements, engraving bone, and casting metal celts; while the "*History of Habitations*" comprised models of rock shelters and other dwellings of prehistoric man, including a perfect restoration of a Swiss lake-village.—At the *British Association* Sir William Turner, of Edinburgh, presided over the section of Anthropology, and delivered an address on Heredity.—Anthropology is permanently represented in this country by the *Anthropological Institute of Great Britain and Ireland*; *Pres.* for '89, Dr. J. Beddoe; *Hon. Sec.*, F. W. Rudler; *Offices*, 3, Hanover Square, W.

Anticosti. A large island in the Gulf of St. Lawrence under the Government of Canada. It is 125 miles long by 30 wide; area, 2600 sq. m.; pop. 600. The coast is rocky, barren, and almost everywhere are lighthouses, fishing boats, and only organised settlements in the wilderness of mountain, forest, and swamp, abounding in furred and feathered game. There are tracts adapted for cultivation, and fruit and vegetables raised experimentally seem of first-class quality. Mineral wealth is reported. A favourite resort for

salmon and trout fishing. Discovered 1535 by Corbier, who called it Assumption.

Antigua.—*i.e.* "ancient," so called by Columbus. A British West Indian island. Area 108 sq. m., pop. 34,151. With Barbuda forms a presidency of the *Leeward Islands*. Its capital St. John, pop. nearly 10,000, is the seat of the federal government. English Harbour is a naval station, and one of the finest harbours in the West Indies. The island is hilly, attaining 1,200 feet. It is based on igneous rock on the west, calcareous on the east. Though suffering sometimes from drought, it is very fertile. Produces sugar and rum, arrowroot, tobacco, and at one time cotton. Climate healthy; subject to earthquakes.—Government is administered by the Governor of the Leeward Islands, assisted by a local council of twenty-four members (twelve elected). Four delegates are sent to the Federal Council. Antigua was settled by British in 1632, seized by the French for a short time in 1666, but has since remained a British colony.

Antilles. Name of the chain of islands surrounding the Caribbean Sea. They are divided into Greater and Lesser. See WEST INDIES.

Anti-Slavery Society. See BRITISH AND FOREIGN A.-S.

Anti-Vaccination. See VACCINATION, ANTI-
Anti-Vivisection. See VIVISECTION, ANTI-
Aquatics. The rowing contests and sculling

matches decided in the course of '89 were of an interesting character, but as usual precedence must be given to the *Oxford and Cambridge boat-race*, as being the leading event of the aquatic season. The date selected was March 30th, and pleasant weather prevailed during the struggle; but continuous changes made in the Oxford eight, even after strict practice was commenced, had so lessened the confidence of the partisans of the Dark Blues that, when Mr. Frank Willan fired the starting-pistol, odds of 3 to 1 were freely laid on the Cambridge crew. For a moment the Oxford boat seemed to be in front, but Gardner, setting his men a fine sweeping stroke of 40 to the minute, rapidly got level, and shot past his opponents before Alexander's boathouse was reached. From this point to the finish the issue was never once in doubt, and Cambridge, swinging well together, won by fully two and a-half lengths. The time occupied by the victors in covering the full course from Putney to Mortlake was 20 min. 14 sec. The crews were constituted as follows:—*Cambridge*.—1. R. H. Symonds-Taylor, Trinity Hall; 2. L. Hannen, Trinity Hall; 3. R. H. P. Orde, First Trin.; 4. C. B. P. Bell, Trinity Hall; 5. S. D. Mottelbury, Third Trin.; 6. P. Landale, Trinity Hall; 7. F. H. Maugham, Trinity Hall; J. C. Gardner, Emmanuel (st.); and T. W. Northmore, Queens' (cox.). *Oxford*.—1. H. E. L. Puxley, Corpus; 2. R. P. Rowe, Magdalen; 3. T. A. Cook, Wadham; 4. F. C. Drake, New; 5. Lord Amphil, New; 6. H. R. Parker, Brasenose; 7. G. Nickalls, Magdalen; W. F. C. Holland, Brasenose (st.); and J. P. Heywood-Lonsdale, New (cox.). This race between the two great universities was inaugurated in '89, but continued with irregularity until '56; and of the forty-six contests so far decided twenty-three have been won by Oxford and twenty-two by Cambridge, that of '77 having terminated in a dead heat. Outriggers were first used in '48; in '67 boats without keels were introduced; in '78, in which year the time occupied by the

winners was 19 min. 35 sec., the quickest on record, sliding seats were first employed. Since '64 the course has invariably been from Putney to Mortlake, a distance of about $\frac{1}{4}$ miles, and, with few exceptions, the date has been fixed for the Saturday before Good Friday.—**Henley Regatta** took place on July 3rd, 4th, and 5th, and this being its jubilee year the attendance was very large on each afternoon; indeed, the committee were unable to grant half the numerous applications made for stations for house-boats and launches. The racing was exceptionally good, and this popular and picturesque regatta proved highly enjoyable from start to finish. Mr. Guy Nickalls, who rowed No. 7 in the Oxford boat, defeated Mr. C. G. Pasotta, of the New York Athletic Club, in the final for the Diamond Challenge Souls; and in that for the Silver Goblets Mr. J. C. Gardner, the Light Blue stroke, and Mr. S. D. Muttibury, of Third Trinity, Cambridge, beat Mr. Guy Nickalls and Lord Amphil, No. 5 of the Oxford crew, by a few feet, after one of the best contested races ever witnessed at Henley. A London Rowing Club four won the Wyfold Challenge Cup. An eight representing Christ Church, Oxford, was successful in both the Ladies' Challenge Plate and Thames Challenge Cup. The Stewards' Challenge Cup was credited to a Thames Rowing Club four; and an eight of the same club, stroked by Mr. J. A. Drake-Smith, was awarded the Grand Challenge Cup; and the Visitors' Challenge Cup fell to four representatives of Third Trinity, Cambridge.—**Marlow Regatta**, which acts as a fitting wind-up to Henley, was held on July 6th, over the customary course between Temple Mills and Marlow Bridge, and the card included the usual events for the challenge trophies. The Thames Rowing Club won the Senior Fours and Pairs; but New College, Oxford, took the Grand Challenge Cup for eights from them, after a severe race, in the course of which a foul occurred, but the claim made on behalf of Thames was disallowed. Mr. Kennedy, of the Kingston Club, rowed over for the Senior Souls, and in the Junior Mr. A. R. Gaddum, First Trinity, easily beat Mr. A. S. Vivian, Thames Rowing Club. The Junior Fours were awarded to the Marlow Rowing Club, and the same club also won the Town Challenge Cup; whilst the Public Schools Challenge Fours were secured by the Bedford Modern Boys, who beat St. Paul's School easily.—At the Moulsey Regatta the Thames R. C. had a row over for the Senior Challenge Fours, and also won the Senior Eights and Pairs. The Senior Souls went to the Kingston Club through the agency of G. E. B. Kennedy. Mr. M. W. Mossop, London R. C., won the Junior Souls. The Garrick Pairs fell to Kingston, and the Junior Eights and Fours to Cooper's Hill.—The Metropolitan Regatta was held on July 16th, when the Champion Cup was won by an eight stroked by Mr. J. A. Drake-Smith; the Challenge Cup fell to the crew guided by Mr. E. L. Hartley; the Thames Cup was appropriately credited to the Thames R. C. four, stroked by Mr. B. W. Locker; and the Metropolitan Pairs were awarded to Messrs. S. Martineau and F. E. Thorn, London R. C. Mr. Bruce Dick, London R. C., won the London Cup, and Mr. B. B. Cubitt, London R. C., secured the Junior Souls.—The Wingfield Souls, on July 18th, did not produce a race, Mr. Guy Nickalls being unopposed.—At Kingston Regatta, which took place on July 20th, the Senior Eights,

Fours and Pairs were won by representatives of the Thames R. C. Mr. W. J. Thompson, Kingston R. C., took the Junior Souls, and Mr. G. E. B. Kennedy was victorious in the Senior Souls.—The School Pulling at Eton on the same day resulted in favour of Mr. H. B. Christian and Mr. J. Collins, and on July 23rd Mr. Kendall's eight won the Novice Eights.—At Reading Regatta, on July 24th, the leading events resulted as follows: Challenge Cup, Marlow R. C.; Bandman Challenge Cup, Kingston R. C.; Junior Fours, Reading R. C.; Reading Challenge Bowl, Mr. C. W. Hughes, Thames R. C.; Reading Grand Challenge Cup, London R. C.; and the Reading Challenge Vase, Kingston R. C.—At Bedford Regatta, held on July 31st, the Thames R. C. won the Senior Fours; Leicester R. C. the Junior Fours; Mr. H. E. Fison, Corpus Christi College, the Junior Souls; and Mr. P. E. Shaw, Lady Margaret's, the Senior Souls.—Doggert's Coat and Badge, originally instituted by Mr. Thomas Doggett, a well-known actor of his day, in commemoration of the accession of the family of her present Majesty to the throne of England, was rowed on August 1st, from London Bridge to Chelsea. The event is confined to young watermen of the Thames, and the Fishmongers' Company contribute very generously to the prizes. The winner on the last anniversary was George McKenzie Green, of Barnes.—At the Maidenhead Regatta, also held on August 1st, Orkney B. C. won the Lawson Challenge Cup. Mr. W. H. Grenfell won the Single Punting Championship; Mr. N. H. Franks and Mr. W. Searle the Double Punting.—On August 24th the Professional Punting Championship resulted in an easy win for Abel Beasley, who, in covering the mile in 10 min. 59 sec. did a best on record.—A sporting match against time, in which Messrs. W. H. Grenfell, R. C. Lehmann, and F. C. Holland, engaged to row from Oxford to Putney in 24 hours, caused great interest, and the trio accomplished the task with ease on Aug. 28th.—With regard to the Sculling contests, it may be mentioned that on Jan. 5th G. Bubar and G. Norval rowed half a mile on the Tyne for £40, "off-handed" (i.e., without any special training), and Norval won easily by $\frac{1}{4}$ length.—On Feb. 13th Boss beat Bubar for the championship and £400.—On March 1st Matterson beat J. Kennedy, of Shoalhaven, for £200, over the Paramatta championship course.—On March 3rd O'Connor beat Gaudaur for £400 and American championship, at San Francisco.—On March 16th W. Davies unsuccessfully attempted to concede J. Grierson 6 lengths, for £50, Grierson winning easily.—On August 30th O. Stevenson beat Edward Kemp (brother to Peter Kemp), on the Paramatta, for £200.—On Sept. 2nd the Montauit Souls resulted in favour of Mr. E. W. Stout.—On Sept. 14th G. Norval (scratch) beat J. Walker, of Stockton, 10 sec., on Tyne, for £100.—One of the most interesting sculling matches of the year was that between H. E. Searle, of Grafton, Australia, the champion of the world—a title he gained after defeating C. Kemp, on the Paramatta—and W. O'Connor, the Canadian champion. It was arranged that these celebrities should meet over the Thames; championship course for a stake of £1,000, and the Sportsman Challenge Cup, value £200, presented by the proprietors of our oldest daily sporting newspaper. The race took place on Sept. 5th, and, although O'Connor started favourite, he was fairly beaten before Hammersmith Bridge

was reached (8 min. 38 sec., the quickest on record), and Searle, going on at his ease, finished up at Mortlake a winner by 10 lengths, his time being 25 min. 45 sec. His parents were natives of Eastbourne, and emigrated in '64.—Another sculling match took place over the same course on Oct. 14th, between Neil Matterson, of Clarence River, Sydney, and George Bubeare, of Hammersmith, for a stake of £400; and in this the colours of Australia were again borne to the front, for Matterson, taking a lead almost from the start, won easily by 6 lengths in 25 min. 2 sec., the quickest time on record. Consult *Rowing Almanac*, and "Boating," by W. B. Woodgate.

Arbitration, Law on, in '89. One of the largest arbitration cases which has come before the Courts of Law was that of *Kirk and Randall v. The East and West India Dock Co.* The arbitrator, Sir Frederick Bramwell, had made an award in favour of the plaintiffs for the sum of £165,000. He had admitted evidence as to the nature of the soil which had to be excavated by the plaintiffs, a firm of contractors, and the company first applied to have the submission to arbitration revoked, on the ground that this was irrelevant. The Queen's Bench Division, however, refused to interfere, and so did the Court of Appeal; while a subsequent motion (May 4th) to have the award set aside, on the ground that the arbitrator had made a mistake in law, was also refused.

Arch, Joseph, b. at Barford, Warwickshire, 1866. He was the son of an agricultural labourer, and for many years was a field worker himself. When a young man he attained considerable proficiency in public speaking by preaching from Primitive Methodist platforms. In 1872 he began an agitation in favour of improving the position of the agricultural labourers, which spread over a great part of England, and led to the establishment of the *National Agricultural Labourers' Union*, of which he was president. At the general election of 1885 he contested, as a Radical, North-West Norfolk against Lord H. C. Bentinck, and was returned; but in the July election of 1886 suffered defeat by a majority of 20 at the hands of the same noble lord, against whose return he filed a petition, which was dismissed with costs. After his election to the House of Commons he was entertained at a banquet at the Westminster Palace Hotel. The Marquis of Ripon presided, and Mr. Chamberlain and other political notabilities were present.

Archbishop's Court. See ECCLESIASTICAL C. **Archbishops, English.** See CHURCH OF ENGLAND.

Archdeacon. See DIOCESE.

Archery. (For earlier details see ed. '87.) The long-bow was in general use in England in the time of Edward I., and the victories of Crecy, Poitiers, and Agincourt are chiefly attributed by old chroniclers to the skill of the English archers. Henry VII. in 1485 instituted the Yeomen of the Guard, then all archers; Charles II. renewed the Finsbury archers in 1682; and as late as 1753 targets for archery practice were set up in Finsbury Fields. The regulation long-bow was six feet long, and the arrow three feet, whilst the usual range varied between three hundred and four hundred yards. The cross-bow was fixed to a stock and discharged with a trigger. The *Society of Toxicophiles* was established by Sir Aston Lever in 1781, and formed a division of the *Artillery*

Company between 1784 and 1803; whilst thirty years later they were privileged with ground in the inner circle of Regent's Park, and there built the Archery Lodge. The invention of firearms has rendered archery next to useless for all practical purposes; but as a pastime it remains much in favour with ladies and gentlemen in the higher walks of life. The famous castle at Raglan, in Monmouthshire, has an excellent shooting ground, and is largely patronised by the clubs of the adjoining counties of Worcester, Gloucester, and Hereford; whilst from north to south and east to west meetings are held during the summer months.—At the *Grand National* gathering, held on July 24th and 25th, '89, Mr. Gregson, of the John o' Gaunt Bowmen, gained championship honours; and Miss Leigh, for the fifth time in succession, won the title of lady champion.

Archies, Court of. The statutory court for the trial of causes ecclesiastical in the Province of Canterbury (see ECCLESIASTICAL COURTS). Formerly a purely canonical authority, with jurisdiction in certain matrimonial causes, the Dean of Arches held his court in the church of St. Mary-le-Bow, or *Santa Maria de Archibus*, receiving and determining appeals from inferior ecclesiastical courts within the Southern Province. By the *Church Discipline Act '41*, and the *Public Worship Regulation Act '74*, Parliament effected considerable modifications of the Court of Arches, supplementing the ecclesiastical by civil powers. By the latter Act (7th section) provision was made for the union of the Courts of the two Metropolitans. The two Archbishops were required to appoint a barrister of ten years' standing, or a judge of one of the Superior Courts, to be a judge of both Courts. Every person appointed must be a member of the Church of England, and when entering upon his office must sign a declaration to that effect. He retains the title of *Dean of the Arches*, but when sitting in the Northern Province is styled *Official Principal of the Province of York*. Lord Penzance, the first Dean of the Arches appointed under this section, still holds the office. He has no Court, and usually sits in his dressing-room in the House of Lords—a circumstance which has entailed many disputes on points of jurisdiction. In connection with the trial of the *Bishop of Lincoln (q.v.)* the question of jurisdiction arose, when it was contended that the Archbishop's authority to sit as a supreme ecclesiastical tribunal had lapsed, partly through non-use and partly by statute. The Archbishop, however, ruled that he possessed jurisdiction, and thus there are two Archbishops' Courts.

Arctic Railway. This line has the distinguished honour of being the most northern railway in the world. The *Lulea-Ostern Railway*, which is the property of the Swedish and Norwegian Railway Co., appears to have its *raison d'être* in bringing down the enormously rich iron deposits of the far north to the port of Lulea, and is still in course of construction. The works were pushed on vigorously during the summer of '87, and in the Dec. of that year the railway, 132 miles long, was laid from Lulea to the Gellivara Iron Mountain and was rapidly approaching completion. The boundaries of Lapland are passed at 694 miles, and the arctic circle is entered at 772 miles from Lulea. The ore is of almost virgin purity, their excellence having been thoroughly tested (see ed. '88). The whole

scheme of the railway is to continue the line from the Iron Mountain, through the rich ore deposits of the neighbourhood, through Norwegian territory to the Ofoten Fjord. Some idea of the scope of the company's operations will be found in a prospectus published during the first week of Oct., '88, describing the immense beds of iron accessible by quarrying at a royalty of 6d. to 8d. per ton, the excellently equipped line, the quay accommodation and appointments at Lulea, and the establishment of the Anglo-Scandinavian Steamship Co. which had launched its first steamer of 4,000 tons to take part with 10 others in the trade. The prospectus offered 75,000 ordinary, and 101,700 5 per cent. preference shares of £5 each, the total capital of the company being £750,000 ordinary, £750,000 preference, and £1,500,000 5 per cent. debentures. Mr. Josiah F. Smith, the well-known past-president of the Iron and Steel Institute, after visiting the railway and iron field, joined the Board of Directors, and issued a report of his observations. The first train of 41 wagons, containing 1,000 tons of ore, arrived at the company's quay at Lulea from the Gellivara Iron Mountain, on March 12th. During the following month the company concluded a further contract with Bolckow's, of Middlesbrough, for 6000 tons of steel rails. It was reported in November that the new brand of Swedish iron, made from Gellivara ore, was being offered at Walker-on-Tyne for 44s. 6d. per ton, some founders preferring it to the best Scotch. The Norwegian section of the line, which extends from the Swedish frontier to the railway terminus and harbour of Victoria-haven, a length of twenty-five or twenty-six miles, is expected to be completed in '90, by which time the Swedish section, from Gellivara to the Norwegian frontier should be complete, and the whole line opened throughout. The work on the Norwegian side is very rough, and the average gradient 1 in 55½, but this is in favour of the export traffic. The estimated cost of the section is £388,388. The export of the Gellivara iron ore from Lulea commenced some time ago, and the company are said to have more orders than they can execute.

Area and Population of United Kingdom. See P. AND A. OF UNITED KINGDOM.

Argentine Republic. A group of 14 States and 9 Territories, with an extensive seaboard on the east coast of South America. The constitution is, with some exceptions, identical with that of the United States. It vests the executive power in the hands of a President, elected for six years, not being re-eligible; and the legislative authority in that of a Senate of 30 members, 2 chosen by the capital and 2 by each province, and a House of Deputies of 86 members elected by the people. The provinces elect their own governors and legislators, and have complete control over their internal affairs. The State religion is Roman Catholic; but all others are tolerated. Education is highly developed. There are 3,227 elementary schools, with 254,608 pupils. Area, including Patagonia, 1,124,086 sq. miles; population, 3,500,000, the great majority of Spanish origin and of other European countries. Capital of the Republic, Buenos Ayres, with 510,000 inhabitants (census July '89). Capital of the Province of Buenos Ayres, La Plata. The climate of the country is temperate and healthy. Revenue, 57,657,712 dollars in '88; expenditure, 50,801,631 dollars. Debt (internal and external) of the Republic

at the end of '89, 119,097,974 dollars. Army, about 7,400; national guard, about 350,000. Navy, 3 ironclads and 15 other ships. Commerce in '88, 280,690,212 dollars. Principal productions, wool in great abundance, hides, flax, sugar, maize, wheat. The rich mineral resources are beginning to be developed. Length of railways, 5,000 miles, connecting the capital with the principal cities of the Republic. Telegraphs, 13,645 miles, connecting all the Republic. Two cables (one by the Atlantic and the other by the Pacific) connect the Republic with all the cities in the world. On 3rd Nov '87 a law of national banks, similar to the banking law of the United States, was promulgated. There are at present 23 banks.

"Argosy, The." First published Dec. '65, the first serial story being written by the late Charles Reade. In 08 Mrs. Henry Wood (d. '87), authoress of "East Lynne," became editor. Many of her stories appeared in the pages of the *A.* (published since '72 by Messrs. Bentley & Son). Mrs. Wood was for some time an anonymous contributor, under the nom de plume of Johnny Ludlow, of a series of shorter stories, which achieved wide popularity. Present editor, Mr. Charles W. Wood. Office: 8, New Burlington St., W.

Argyll, George Douglas Campbell, P.C., 8th Duke of (creat. 1701); Baron Sundridge and Hamilton (1766), by which title he holds his seat in the House of Lords; K.G. (1884). Was b. 1823; succeeded his father in 1847; Lord Privy Seal (Jan. 1853), and Postmaster-General (Nov. 1855); again Lord Privy Seal (June 1859 to July 1866); Secretary for India, and President of the Council of India (Dec. 1868); the third time Lord Privy Seal (1880 to April 1881); is Hereditary Master of the Queen's Household in Scotland, and Hereditary Sheriff of Argyllshire, Chancellor of the University of St. Andrews (1851); Rector of the University of Glasgow (1854); is chief of the great family of Campbell, and a lineal descendant of the "MacCullum More." The Duke is a prolific writer upon scientific, political, and social subjects, and a frequent contributor to the leading periodicals. He is the author of various works, among which may be mentioned "The Reign of Law," and "Scotland as it Was and Is," '88. He broke from his connection with the policy of Mr. Gladstone when the latter adopted the Home Rule programme. He opened a new pier at Boscombe, Bournemouth, July '89.

Armies, Foreign. See FOREIGN ARMIES.

Armitage, Edward, R.A., historical and mural painter, b. 1817. Educated in France and Germany. A pupil of Paul Delaroche, of Paris. In '40 he contributed "The Landing of Julius Caesar in Britain" to the Cartoon Exhibition in Westminster Hall, and obtained a first-class prize of £300. In '45 he took a £200 prize for a cartoon and coloured design, "The Spirit of Religion," and ('47) another first prize of £500 was awarded him for "The Battle of the Marston," now the property of the Queen. He afterwards visited the Crimea, and painted "The Charge of Balaklava" and "The Guards at Inkermann." Among his still later achievements were a colossal figure, entitled "Retribution," representing the suppression of the Indian mutiny; two frescoes in the upper waiting hall of Westminster Palace; and a series of monochrome wall paintings at University Hall, Gordon Square. Elected R.A. ('72). Has been a regular contributor to the

Academy since '48. One of his latest works is a large canvas, "**The Institution of the Franciscan Order**," which he presented to the Church of St. John, Islington. Sacred and mythological subjects are favourite studies with Mr. Armitage.

Armoured Ships. See NAVY, BRITISH, and NAVIES, FOREIGN.

Armour Plates and Ordnance. The use of armour plates as a protection against artillery appears to have been contemplated by inventors early in the present century. In 1812 John Stevens, of New Jersey, proposed it for ships, and Major-General Ford, R.E., obtained a trial of masonry, protected by iron bars, at Woolwich in '27. To **Napoleon III.**, however, is the credit due of first employing iron on the sides of floating batteries in actual war in '55, when such a measure of success was achieved as led to the construction of the *Gloire* and *Warrior*, the first ironclad ships of the French and British navies. The **American War**, soon after this, called out all the powers existing in the States available for the manufacture of armoured ships, and the notable part played by them in the war has led to the idea that America took a more leading part in the development of armour than was actually the case. The *Merrimac* and other American vessels were covered with armour, made *impromptu* of railway iron, or of thin plates laid over each other, constituting what is termed "**laminated armour**," a kind which was found to possess about two-thirds of the resisting power of a solid rolled iron plate of the same thickness. In March '62 a "**Special Committee on Iron**" was appointed, under the presidency of Sir John Hay, then Captain R.N., who conducted a series of trials of plates at Shoeburyness. After disposing of the claims of various crude devices, and after a long series of experiments, this Committee decided in favour of soft wrought iron, bolted on to oak backing. Hard backing was found to support the armour better than soft, but at the expense of the bolts and structure, which were liable to be shattered by the blow of impact. At this time there were two distinct methods on which armour plates were attacked—namely, "**racking**," practised in America, and "**punching**" in Europe. The former consists in bending and distorting plates, and shaking the entire structure and dislodging bolts by heavy projectiles striking at a low velocity, such as might be discharged by the heavy cast-iron smooth-bore guns then employed in America. Punching, on the other hand, consists in driving a projectile through the plate—a task which is most easily performed with guns of smaller calibre discharging projectiles with high velocity. In its original form, racking soon went out, and for some years the development of armour and of the ordnance brought against it, consisted chiefly in the increase in the scale of both plates and guns, wrought iron being wholly used for armour. To the softness of this material the success is due of a projectile proposed, about '64, by the late **Sir W. Palliser**, which for many years was almost the only one employed for the attack of plates in England or abroad, and of which at the present date our main stores consist. This was a shot or shell made of iron cast in a metal chill, and thus rendered very hard, although brittle. These projectiles drove their sharp points into the soft iron, and their heads were buried and supported, before the full resistance was felt; thus they behaved better than the shot

made of steel, which at that time were softer; and the chilled iron projectiles, being cheaply and easily made, maintained their reputation until '77 when steel, steel-faced, and chilled iron armour came in, with a hard surface, on which the chilled Palliser shot broke before it obtained support round the head. About '72 armour plates had attained a thickness of 12 in. and 14 in. on turret ships, such as the *Thunderer*, *Devastation*, and *Glattton*. (It is undesirable here to enter into questions of construction of ships, for which the reader is referred to the article NAVY, p. 392 of ed. '88.) But it should be mentioned that it was thought that the structure of a ship's turret might be distorted or racked, and the rotation and working prevented, by the impact of heavy shot. At Portland, on July 5th, '72, therefore, was made the extraordinary trial of firing at the turret of the *Glattton* herself with the 25-ton gun of the *Hotspur*, when it was found that no shot of that day could so distort the turret as to interfere with its working, which was perfect after receiving two shots, fired at the short range of 200 yards. The turret was nearly perforated, and some bolts were torn off, but a goat, rabbit, and hen, which had been placed in the interior, were uninjured. So far wrought iron plates alone had met with approval in England, and, for the most part, everywhere. These were bolted on to wood for ships, and to concrete of various kinds as well as wood for land forts, by means of wrought-iron bolts made on the **Palliser English system**, the chief features of which were a projecting screw-thread, a clear space left round the shank of the bolt, and a spherical head. About this time appeared fresh forms of armour. In '68 armour made of chilled cast iron was tried at Tegel, in Prussia, by Herr Gruson of Magdeburg, which by '74 had established its reputation, and was adopted by the German Government for coast defence. In '76 solid steel armour exhibited such remarkable powers of resistance at Spezia, that steel, either in the solid form or compounded with wrought iron, was soon afterwards adopted in England and elsewhere. Chilled iron may be conveniently dealt with first. Gruson urged that it can be easily cast in the form of large massive curved shields, which are built up into shields and forts, generally in cupola form, closely resembling an orange from which the skin has been taken. Being cast, any desired form is easily given, and the thickness of each part is easily proportioned to the strain expected to fall on it. The hardness is such that the best projectiles that have been made, up to the present day, shiver into atoms against the surface of the chilled iron; and although the shield becomes fractured, so long as the fragments remain in their place the guns and men behind the shield are in complete safety, as there are no bolts or other langridge to fly in the interior. Owing, however, to the fact that it breaks up under the continued fire of steel projectiles, its use has been confined to coast defence both in France and Germany. In this situation it is only exposed to the fire of ships for a short time, and this it is admirably calculated to resist, even when the largest projectiles are used. This was exhibited in a notable trial of Gruson's armour at Spezia, in April '86, when a large shield, intended to form one portion of the ring of a cupola, was fired at by an Armstrong 100-ton breech-loading gun. The shield, though fractured, retained considerable resisting power after being struck

by three specially made steel Krupp projectiles and one from St. Chamond, all fired from the 100-ton breech-loading gun. After this most successful trial, two Gruson's armoured cupolas or turrets were approved, each to contain two of Krupp's 19-ton guns, one on each side of the entrance of Spezia harbour. It should be understood that the mass required for a Gruson shield is considerable, so that it has not been seriously thought of for ships. In '76, Schneider's solid steel plates were tested at Spezia in comparison with wrought-iron plates supplied by Cammell, Marrel, and Brown. Under the fire of 10-inch guns the steel plates cracked, while those of wrought-iron suffered but little. On the other hand, the steel stopped the projectile of the 100-ton muzzle-loading gun, which passed through the wrought-iron plates easily. It was thus discovered that steel has a remarkable power of transmitting the shock of impact through its mass, and so absorbing an enormous blow, though at the cost of its wholesale destruction, for the steel plates were broken to pieces; while wrought iron, on the other hand, yields locally. Consequently steel armour is well suited to enable a vessel to pass a formidable battery of guns quickly, although such armour may gradually yield under long-continued fire even of light guns; while wrought iron bears continued fire well from any guns incapable of actually perforating it, but is perforated by projectiles which steel of the same thickness would keep out. Our naval authorities strongly objected to the fracture of ships' armour, and hence steel-faced wrought iron plates, which admit of a very hard face in conjunction with a soft back, met with more favour than steel in England. These steel-faced or compound plates have been made on two plans: Messrs. Cammell manufacture them on Wilson's patent, by which a wrought-iron "foundation plate" has a front or face plate of about half its thickness, formed by running cast steel on it while white-hot. Sir J. Brown & Co. manufacture plates on Ellis's patent, by which a thin steel face is cemented to a wrought iron foundation plate by running in steel between them. For Wilson's plates it is claimed that there are fewer junction surfaces and more soundness: for Ellis's that a specially excellent face can be secured. Compound plates are brought to their final thickness by rolling; solid steel plates are hammered. These compound plates have competed many times with Schneider's solid steel, with various results. At Spezia, where the trial was conducted with 10-inch plates, Schneider's has been eventually preferred. At O'hta, near St. Petersburg, Amager, near Copenhagen, and at Pola in Austria, the compound plates have been victorious. The plates in these cases were 12 inches thick, or less. In England, it is generally considered that it is not possible by any system of treatment to give to one solid piece of steel the soft tenacious back and at the same time the hard face that is desirable. Consequently, it is thought that plates compounded of hard steel and soft iron, or of a hard and a soft steel, ought eventually to form the best shield. During '88, competitive trials have been carried on with solid steel and steel-faced plates on board H.M.S. *Nettle*, at Portsmouth. Unfortunately Schneider could not be induced to offer plates for trial on such conditions as the Admiralty would accept, so that the trial was confined to English-made steel and steel faced

plates. This series of experiments has been completed, but with the exception of some excellent results obtained with Wilson's plates, which were published in the American *Army and Navy Journal* and other papers, no report has been brought out. The following are the only makers of armour plates on any considerable scale: For solid steel, Messrs. Schneider at Creusot in France and the Terni works in Italy. For steel-faced armour on Wilson's patent, Messrs. Cammell, Sheffield; Marrel at Rive de Gier, Loire; La Compagnie Anonyme des Forges at Paris; La Compagnie des Hauts Fourneaux, St. Chamond; the Dillingen Works in Germany, and Tjora Works, Kolpino, St. Petersburg. For steel-faced armour on Ellis's patent, Sir J. Brown & Co., Sheffield. Experimental steel plates tampered in lead have been made on a small scale by the Société de Chatillon et Commeny recently, and competitive plates have been made by several English firms. As armour has become harder, chilled iron Palliser projectiles have been superseded by those of forged steel, of which very excellent ones were made in '78 by the late Sir Joseph Whitworth; but owing to a want of encouragement for some time past, the manufacture of steel projectiles has been pushed forward on the Continent and neglected at home until recently. Krupp's steel projectiles, and those of St. Chamond, Holtzer and Firmini, are the best known. The two latter firms have supplied steel shells for the British service. Now Firth, Hadfield, and other firms in this country, are succeeding in making excellent steel projectiles. The performances of armour in actual war were first displayed fully when the American Confederate ship *Merrimac* destroyed wooden vessels in rapid succession until encountered by the *Monitor*. Ironclad ships were hulled times innumerable, without injury, during that war; and the British fleet in the attack of Alexandria, in '82, benefited undoubtedly by its armour, which was in no case perforated. Nevertheless, as the power of guns increased, the value of armour became the subject of serious question. To resist guns of the present day, plates require to be so thick that complete armour, such as that on the *Thunderer* or *Dreadnought*, gradually gave place to armour of much greater thickness, amounting to 20 inches of steel-faced iron or 24 inches of iron, confined to the so-called vital parts of a ship. These consist of the engines, magazines, principal guns, and sufficient hull to insure the floating of the vessel. Protection is also partly given by horizontal armour—that is, by steel decks. These features are embodied in the *Inflexible* and the *Admiral* classes of so-called citadel ships, as well as the *Victoria* and *Nile* classes, and the belted cruisers and protected ships in a greater or less degree. It is only necessary here to notice the general principle on which a ship is plated—namely, that the deck plates should resist the same shot glancing on it at an angle of ten degrees that the side armour resists striking direct. It follows, then, that unless a ship heels over to an angle of ten degrees, or unless she is subject to a plunging fire at a falling angle of ten degrees, her deck is stronger than her side armour. Beyond this angle the deck is weaker, but it is only likely to be struck by high-angle fire or under very special circumstances. With regard to the protection now afforded by armour, it is doubtless true that guns are now afloat which

are capable of piercing the side of any armoured ship. The 111-ton guns of the *Bombow* perforate about 35 inches of iron or 28 of steel, if close to the muzzle. The 67-ton guns of the *Camperdown* or *Roadsey* perforate 30 inches of iron or 24 of steel; and many guns of less power would perforate most of the armour afloat under favourable conditions. It is to be remembered, however, that in action a ship is generally struck obliquely, when armour will keep out shot which would perforate easily if striking directly; and more especially that the entrance of "dead metal" into the interior of a ship is a small evil compared with that of "live shell"; so that armour capable of keeping shell alone out, performs its most important function. An unarmoured ship is liable to be burnt and torn by common shell bursting in the interior, and the men swept down wholesale by shrapnel shell bullets, as was shown in the Shannon trials at Shoeburyness in '75. At the meetings of the Institution of Naval Architects and Civil Engineers in '89, valuable papers were read on the new Admiralty designs for armoured ships by Mr. White, the Superintendent of Naval Construction, and by Sir Nathaniel Barnaby, his predecessor. These papers provoked a warm attack from Sir Edward Reed, Sir Nathaniel Barnaby's predecessor, and were the means of bringing public information on the question of armour up to date. Two great principles are recognised in the new vessels: (1) the necessity of providing ships with a powerful secondary armament of quick-firing guns, and (2) the necessity of protecting portions of the ship which do not come under the term "vital parts" by means of this armour, in order to prevent their wholesale destruction by quick fire guns of light calibre; or, on the other hand, by the entrance of steel shells containing charges of any so-called "high explosive," such as blasting gelatine, Lyddite, Roburite, Bellite, or Melinite. The necessity for this protection against quick fire is apparent from the fact that at Shoeburyness a target, six feet square, was struck five times running at 1,300 yards range in 31 seconds by a single piece in action. Three 4½-inch guns fire 72 rounds in two minutes. Sir F. Abel stated that a steel shell containing high explosive has passed intact through six inches of steel-faced armour, bursting on the far side. This re-introduction of thin armour, accompanied by other protective devices, such as that termed Woodite, is a marked change to note in connection with the year '89. Owing to their extensive surface of thin armour, vessels of the *Minotaur* class are likely to have a new "lease of life" with fresh engines. To protect cruisers from shell fire it is probable that plates may be employed of increased hardness, which will break up all projectiles, though in the act of doing so they should be smashed, and perhaps even, in a great measure, stripped off the ship. The behaviour of chilled iron distinctly indicates the possibility of this alternative to that of exposing the ship without protection against the terrible attack of shells.

Armstead, Henry Hugh, R.A., sculptor, b. 1828. Elected an A.R.A. (75), R.A. (79). As a draughtsman, modeller, and chaser of silver, gold, and jewellery, he has executed a large number of works. His productions in marble, bronze, stone, and wood include the south and east sides of the Albert Memorial, Hyde Park, representing great musicians,

painters, and poets; four large bronze figures of the Albert Memorial, representing chemistry, astronomy, medicine, and rhetoric; the external decorations for the Colonial Offices; and the effigy of the late Bishop of Winchester in Winchester Cathedral. Mr. Armstead also designed the carved oak panels, beneath Dyce's frescoes, in Her Majesty's robing-room at Westminster Palace, illustrating the life of King Arthur and the history of Sir Galahad. At the R. A. exhibition of '89 he exhibited a fine statue of Lieutenant Waghorn, the pioneer of the Overland Route.

Armstrong, George Francis, M.A., D.Lit., b. in Dublin 1845. Educated at Dublin and Jersey, and matriculated at Dublin Univ. '62. In '65 he won the Vice-Chancellor's prize for a poem on "Circassia," and was appointed President of the Philosophical Society. He gained the gold medal of the Historical Society for composition in '66, and '71 accepted the post of Professor of History and English Literature in Queen's College, Cork. In '72 the degree of M.A. was conferred upon him by Trinity College for his literary services, and that of D.Lit. from the Queen's Univ. Dr. A. is the author of the "Tragedy of Israel," "A Garland from Greece," "Ugoue," "Stories of Wicklow," etc.

Army, The British. The total cost of the army for the financial year '89-90 is £17,335,800, against £16,700,333 in '88-9. The various heads of expenditure are:—

| Effective services:— | |
|--|-------------|
| Pay of general staff, regimental pay (officers and men) and allowances | £ 5,004,500 |
| Divine service, chaplains, etc. | 57,200 |
| Administration of military law | 29,000 |
| Medical establishments | 299,500 |
| Militia pay and allowances | 530,000 |
| Yeomanry pay and allowances | 76,000 |
| Volunteer pay and allowances (Staff and capitation grant, etc.) | 742,700 |
| Army Reserve pay and allowances | 477,600 |
| Transport and remounts | 668,400 |
| Provisions, forage, fuel, etc. | 2,605,000 |
| Clothing establishments, services and supplies | 845,600 |
| Supply, manufacture, etc., of warlike stores | 1,808,000 |
| Works, buildings and fortifications | 715,000 |
| Military education | 115,300 |
| Miscellaneous services | 89,800 |
| War Office establishments | 257,900 |

Total cost effective services **14,382,400**

| Non-effective services:— | |
|---|-----------|
| Rewards for distinguished services | 15,700 |
| Half pay | 79,300 |
| Retired pay, gratuities, and payments allowed by Army Purchase Commission | 1,186,600 |
| Widows' pensions and compassionate allowances | 129,700 |
| Pensions for wounds | 12,900 |
| Chelsea and Kilmainham Hospitals (in-pensioners) | 32,300 |
| Out-pensions | 1,337,400 |
| Superannuation, compensation, and compassionate allowances | 177,600 |
| Retired allowances to adjutants militia, yeomanry, and volunteers | 43,200 |

Total non-effective services **3,012,400**

Total effective and non-effective services **17,394,800**

The effective strength of the army and arms according to latest returns was: Household Cavalry, 1,022; Cavalry of the Line, 15,397; Royal Horse Artillery, 3,155; Royal Artillery—Field Batteries, 12,530; Garrison Batteries, 15,398; Royal Engineers, 4,926; Foot Guards, 5,025; Infantry of the Line, 121,784; Colonial Corps, 2,245; Army Service Corps (in '89 ed. Commissariat), 2,469; Ordnance Store Corps, 532; Medical Staff Corps, 2,026. **General total**, 186,509. **Distribution**.—The army is thus accredited: To England and Wales, 70,613; to Jersey, 843; Guernsey and Alderney, 825; Scotland, 3,912; Ireland, 26,854; total for **Home Service**, 103,047. Egypt, 3,389; in colonies, 28,941; East Indies—Bengal, 46,890; Bombay, 12,711; Madras, 11,289; Burmah, 3,155; total **Indian European establishment**, 74,045. The home establishment,—**Reserve and Auxiliary Forces**. The strength of the First-class Army Reserve on Jan. 1st, '89, was 50,341; Second-class Army Reserve, 2,854; Militia, 119,388; Yeomanry, 10,961; Volunteers, 226,469; total 410,013, against the following numbers on Jan. 1st, '88:—Army Reserve, First Class, 50,950; Second Class, 4,118; Militia, 121,411; Yeomanry, 11,267; Volunteers, 228,038.—**Nationalities**. The nationalities of non-commissioned officers and men of the army is as follows: English 150,048, proportion per 1000, 751; Scotch, 16,838, proportion per 1000, 84; Irish 30,302, proportion per 1000, 152; born in India or Colonies 4,907, proportion per 1000, 12; Foreigners 136, proportion per 1000, 1.—**Religious statistics**. There are 135,380 Church of England, proportion per 1000, 672; 15,703 Presbyterians, proportion per 1000, 78; 10,316 Wesleyans, proportion per 1000, 50; other Protestants, 1,313, proportion per 1000, 6; Roman Catholics, 39,126, proportion per 1000, 194.—**Educational acquirements**. The number of men who can neither read nor write is returned at 4,547, proportion per 1000, 19; number who can read but cannot write, 2,444, proportion per 1000, 11; number who can write but cannot read, 2,390, proportion per 1000, 11; number who can only read and write, 21,379, proportion per 1000, 105. Better educated—holding fourth-class certificates, 65,517, 311 per 1000; holding third-class certificates, 37,537, 187 per 1000; holding second-class certificates, 39,101, 195 per 1000; holding first-class certificates, 1,524, 8 per 1000; not holding certificates, 30,709, 153 per 1000. **Conditions of Service**.—A recruit may enlist for any particular corps or department in which there are vacancies, or for general service. The limits of age are 18 to 25 years, except for Medical Staff Corps, when they are 18 to 28. Men of good character discharged from Army Marines, Navy, or Irish Constabulary, are taken up to 28. The height for Cavalry ranges from 5 ft. 6 in. to 5 ft. 11 in.; for Artillery from 5 ft. 4 in. to 5 ft. 6 in.; for Engineers from 5 ft. 4 in. to 5 ft. 6 in.; for Foot Guards 5 ft. 8 in. and upwards; for Infantry from 5 ft. 4 in. upwards. The minimum chest measurement is 33 in., and the minimum weight 115 lb. The terms of enlistment are: for long service (i.e. 12 years' Army service), or short service (i.e. 7 years' Army service), and 5 years' Reserve service, which will be extended to 8 years' Army service and 4 years' Reserve service if the period of Army service expires while a man is serving abroad. In the Foot Guards, short service consists of 3 years' Army service and 9 years' Reserve service. The rates of pay

range from 6s. a day for a Brigade Sergeant-Major Royal Horse Artillery, and 5s. 10d. for Regimental Corporal-Major Household Cavalry to 1s. 2d. for sappers and privates. **Deferred Pay**. An addition of £3 a year is made to the daily pay of a soldier during the first 12 years' Army service; but the issue of this is deferred until Army service is completed, whether on final discharge or transfer to the First-class Army Reserve. Soldiers who enlist for 3 years' Army service only are not entitled to deferred pay, nor are those discharged for misconduct or by purchase. Non-commissioned officers re-engaging are granted deferred pay up to 21 years' service. Soldiers who serve on to 21 years are entitled to life pensions varying from 1s. 1d. to 2s. 9d. a day, or if warrant officers from 3s. to 5s. a day. Men serving in the First-class Army Reserve receive pay at the rate of 6d. a day—viz., 4d. a day pay, and 2d. deferred pay. They are liable to be called up annually for training for a period not exceeding 12 days or 20 drills. A soldier desiring to leave the army during the first three months of his service can do so on payment of £10. After three months the amount is increased to £15.

Mobilisation. A scheme has been drawn up for the mobilisation of the forces. Under this arrangement two Army Corps will always be held in readiness for embarkation should the despatch of an expedition be rendered necessary. The regiments in the first Army Corps are maintained at an establishment of—Cavalry 625 of all ranks and 380 troop horses, Foot Guards 840 of all ranks, Infantry 824 of all ranks. Their reserves are liable to be called up at any moment, and their militia battalions would be embodied on the despatch of the Line battalions from England. Every arrangement has been made so that the regiments might be "put on board" with the utmost despatch, and with this view they are kept as much as possible consolidated—i.e., not on detachment duty. The second Army Corps is also told off, but the regiments forming it would be given a longer time to prepare. They are principally employed in Ireland, and at stations which necessitate a splitting up of troops and companies to supply out-stations. The **Royal Bodyguard** consists of two Classes or Corps—the Hon. Corps of Gentlemen-at-arms, and the Yeomen of the Guard. The former, which forms the personal bodyguard of the Sovereign on all state occasions, was established in 1509, and consists of a Captain, always a peer, who goes out with the Government, Lieutenant, Standard Bearer, Clerk of the Cheque, and Adjutant, sub-officer, and forty Gentleman-at-arms. The appointments are in the gift of the Captain, and candidates must hold field officers' rank and be decorated for war service. The emoluments for ordinary "Gentlemen" are about £70 per annum. The Yeomen of the Guard were instituted by Henry VII. in 1485. They consist of a Captain, a peer who goes out with the Government, 7 officers, Lieutenant, Ensign, 4 Exons and a Clerk of the Cheque, and Adjutant, and 140 Yeomen. The officers must all have had war service, and are appointed by the Captain for the time being; the Yeomen are all pensioned non-commissioned officers who are selected by the Commander-in-Chief. **Aides-de-Camp, Queen's**. There are 4 personal Aides-de-camp, all members of the Royal Family, who hold honorary appointments; and 34 Aides-de-camp: of the latter 11—6 paid and

5 unpaid—are officers of the Imperial Army, 2 paid—are Indian officers, 2 unpaid represent the Royal Marines, and the remainder the Militia, Yeomanry, and Volunteers. The paid Aides-de-camp draw 10s. a day each from military funds. Officers only are eligible on full pay who have the rank of Lieut.-Colonel, and the appointments are made by the Queen on the recommendation of the Commander-in-Chief. The **Military Knights of Windsor** were instituted in 1349, and consist of 12 Knights on Royal foundation, and 5 on lower. Officers are selected by the Commander-in-Chief who are in straitened circumstances, or who have special claims on the ground of war service, and are provided with rooms in the Castle. (For historical sketch of Army see ed. '87.) Consult Colonel Maurice in 9th ed. "Encyclopædia Britannica"; General Sir E. Hamley's "Operations of War"; Lord Wolseley's "Soldier's Pocket Book"; Prince Kraft's "Letters"; Baron von der Goltz's "The Nation in Arms"; Colonel Harrison's "Handbook"; Lord Justice Clerk Macdonald's "Common Sense on Parade"; publications and translations of the Manchester Tactical Society, chiefly those of Captain Spenser Wilkinson, of the *Manchester Guardian*; the new German Drill Book, Part II.; and the new English Drill Book.

Army and Navy Audit Act, '89. See **SESSION**, sect. 87.

Arnold, Sir Edwin, K.C.S.I., poet and journalist; b. 1832. Educated at King's School, Rochester; King's Coll., London, and Univ. Coll., Oxford, where he graduated, '54. He was subsequently appointed second master of King Edward the Sixth's School, Birmingham, and afterwards proceeded to India as **Principal of Government Sanskrit College at Poona.** On his return to England, in '61, he joined the *Daily Telegraph*, with which he has been connected ever since. Sir E. A. has devoted much attention to the study of Indian literature. His best known works are "The Indian Song of Songs," a metrical paraphrase from the Sanscrit, and "The Light of Asia," an epic poem upon the life and teaching of the great Indian prophet, Buddha, which was set to music by Mr. David Buck, and performed at St. James's Hall in March '89. Sir Edwin's latest productions include a volume of poems entitled "**Lotus and Jewel**," "Selected Poems: National and Non-Oriental," "**Death and Afterwards**," "With Sa'di in the Garden," and "In my Lady's Praise," published shortly after the death of his wife, in June '89. He was made a Companion of the Star of India on the occasion of Her Majesty's proclamation as Empress of India, '77, and received the honour of K.C.S.I. Jan. '88. He started in August last on a tour round the world. A record of his travels has appeared in the pages of the *Daily Telegraph* during the autumn.

Arrest of Peers and Members. See **PRIVILEGES OF PEERS AND MEMBERS.**

Arrondissement. (From the French.) An extent of French territory under the administration of a sub-prefect (*sous-préfet*); also a portion of a town having its own civil officers. An *arrondissement*, as it is understood in France, may be compared to an English district; when it applies to the portion of a town, it is similar to an English parish or ward.

Art, '89. Winter exhibitions are still in favour, and that held in the rooms of the **Royal Academy**, at Burlington House, excited undiminished interest. Examples of deceased British artists

formed the bulk of the collection, which included some fine drawings of Turner's, from Farnley Hall, and numerous works by the late F. Holl. Some magnificent Rembrandts, the most important of which came from Buckingham Palace, were also displayed. The French school was acceptably, even if, as usual, inadequately exemplified, by a few Watteaus, Lancret's, and Greuzes. A second "**Century of British Art**," ending with 1837, was illustrated at the **Grosvenor Gallery**. Constable was the artist most fully represented. A few pastels by English artists testified that the charming art of drawing in coloured chalks was not utterly neglected a generation or two ago.

The exhibition of relics of the House of Stuart, in the **New Gallery**, contained, besides many objects of artistic workmanship, a number of interesting portraits. Amongst other winter exhibitions were those of the Institute of Painters in Oil Colours, the Society of British Artists, and the Dudley Gallery Art Society.

Some 2,200 works were on view at the 22nd summer exhibition of the **Royal Academy**, many portraits contributing to make this the largest number of pictures hung at one time in the Burlington House galleries. The President's most important canvas was "Greek Girls playing at Ball." Sir John Millais sent two landscapes, "The Old Garden" and "Murthy Water," as well as a portrait of Mrs. Hardy, Mr. Alma Tadema's "At the Shrine of Venus," and Mr. Orchardson's "The Young Duke," took high rank in popular estimation: so did Mr. B. Rivière's "Ota Fool and his Folly there is no End," Mr. H. Moore's characteristic seascapes, and Mr. Hook's bracing pictures. Mr. Fildes exhibited a somewhat trite, but cleverly painted Venetian subject, Mr. H. W. B. Davis some charming landscapes, and Mr. Faed several of his pathetic compositions. Mr. Armitage's "Yachting Souvenir: Lunch in Mid-Channel," showed the artist in a novel and humorous mood. There were portraits from the studios of Messrs. Pettie, Oulless, Richmond, Boughton, and Prof. Herkomer; and Messrs. Poynter, Crofts, Swann, Armistead, Leslie, and the Misses Montalba, added considerably to the average merit of the gathering. Mr. W. L. Wyllie, who was elected an Associate, sent "The Homeward-bound Pennant." The works hung in the Water-colour and White-and-black rooms were of a class not hitherto reached in this department of art at Burlington House, whilst the architectural drawings proved of more than technical interest, owing to the number of elaborate perspective views displayed. Sculpture, though still insufficiently encouraged at the Royal Academy exhibition, was honourably represented by Messrs. Brock, Gilbert, Woolner, Armistead and Sir E. Boehm. —At the **Grosvenor Gallery** a lowering of the artistic standard of the works exhibited was noticeable. Some admirable works were, however, on the walls. Amongst these may be mentioned Sir John Millais's "Shelling Peas," Mr. Rivière's "Prometheus," Mr. Goodall's "Pets of the Harem," Mr. Pettie's portrait of Mr. Rider Haggard, and Mr. Legros' "River Side." The lady contributors included H.R.H. the Princess Louise and the Marchioness of Granby, the former sending a portrait of Col. the Hon. C. Lindsay, and the latter that of the present Duchess of Portland. Mr. Margetson's full-length portrait of Miss Ellen Terry as Lady Macbeth invited comparison with Mr.

Sargent's similar subject in the *New Gallery*. Sir Coutts Lindsay's chief exhibit was the portrait of Lady Mary Lloyd, and Mr. John M. Swan's "*A Fallen Monarch*" was one of the "sensation" pictures of the year. Sir E. Boehm, Messrs. Birch and Conrad Dressler, and Count and Countess Gleichen were responsible for the few examples of plastic art in the Gallery. An exhibition of *pastel drawings* was also held here in the autumn, Mr. Reginald Machell's "*The Peri at the Gates of Heaven*" meeting with much approval.—The structural additions to the *New Gallery* were fully appreciated during the *summer exhibition*. Mr. La Thangue's portrait of Mrs. Mitchell attracted much attention and discussion. Prof. Legros appeared advantageously in the dual capacity of sculptor and painter, and Messrs. Herkomer, Richmond, Goodwin, Shannon, Halle, Stokes, and Padiett's contributions were prominently meritorious. Mr. E. Burne-Jones refrained from exhibiting any large works, but sent a series of studies for his paintings of "*Avalon*," "*Danæ*," etc. Two important pictures from this artist's brush, illustrating the Nativity, were presented by a member of the congregation to the Church of St. John the Evangelist at Torquay.—The 11th exhibition of the *Society of Painters in Water Colours* brought to light some excellent workmanship: notably in Mr. Walter Crane's "*Flora and Pegasus*," Mr. Hunt's "*Windsor Castle*," Mr. Wallis's Eastern subjects, Mr. Poynter's "*Mulgrove Woods*," and Mr. Fripp's, Mr. Goodwin's, and Mr. D. Murray's drawings. The veteran Sir John Gilbert, who has been induced to withdraw his resignation, sent a characteristically vigorous drawing of "*Charcoal Burners*." The works of Sir D. Linton, and Messrs. Severn, Rivers, White, Slocombe, Weedon, Dollman, and Dadd were amongst the most attractive in the exhibition of the *Institute of Painters in Water Colours*.—The exhibits at the *Society of British Artists* were of average interest. The *Society of Lady Artists* held their annual show in the Egyptian Hall, Piccadilly, with a degree of success commensurate with the merit of the works displayed. The *Nineteenth Century Art Society* had its several exhibitions during the year. Some charming water-colour drawings by T. B. Hardy were amongst other meritorious works.—A novelty in London was the exhibition, in the building known as "*Olympia*," at Kensington, of a number of pictures rejected by the hanging committee of the *Royal Academy*; but this English prototype of the "*Salon des Refusés*" does not appear to have met with the success evidently expected by its promoters. Another and happier innovation was the display, in the galleries of the *Institute of Painters in Water Colours*, of a series of drawings and prints by *British humorists*. It included some rare examples of Hogarth, Rowlandson, and Gillray. Doyle, Cruikshank, and Leech were also represented, as well as such well-known living artists as Messrs. Keen, Du Maurier, Tenniel, and F. Barnard. The exhibition proved specially acceptable to the many who are not familiar with the rich collection of caricatures in the print-room of the British Museum. The *National Portrait Gallery* is at last about to find a permanent home, thanks to the generous offer of a private individual to provide funds for the erection of a suitable building. The site granted and selected by the Government

was that which is vacant at the back of the National Gallery, and faces the new Charing Cross road. During the past year a number of portraits were added by purchase and presentation. The majority of these were not deposited with the rest of the collection in the Bethnal Green Museum, but are accessible to the public in one of the lower rooms of the National Gallery. Messrs. Dowdeswell held a series of exhibitions at their galleries in New Bond Street. Of these the most interesting were the "*Sketches of Sussex Scenery*" by Mr. W. E. Wimperis, Mr. C. E. Hern's representations of London Churches, Mr. B. J. M. Donne's drawings from the Tyrol, a collection of works by celebrated Dutch and French artists, and some pictures of Chinese and Japanese life by Mr. Theodore Wores. The energetic *Fine Arts Society* had on view during the season Mr. P. Naftel's sketches in Sark, North Wales, etc.; Miss Patmore's dainty representations of birds, still life, and flowers; Mr. F. Coleridge's water-colour drawings of the Thames; a collection of water-colour drawings by Dutch artists; Mrs. Allingham's drawings "*On the Surrey Border*"; "*Scenes in Egypt*," by Mr. Roussoff; and several other interesting collections, amongst which Mr. Stacy Marks's studies of birds enchanted ornithologists. Considerable stir was made in art circles by Messrs. Boussod, Valadon, & Co.'s exhibition of *Claude Monet's works* and of an unprecedentedly representative series of paintings from the brush of Corot. The same firm also published a number of prints of high artistic merit. A large and typical collection of *George Ottermole's water-colour drawings* was on show at Messrs. Vokins's gallery. Messrs. Agnew's and Messrs. Tooth's exhibitions were of the usual high class. In the latter's were three gems by M. Meissonnier. Another Meissonnier, "*Le Rieur*," was on view at the French Gallery, where Herr Krämer and Mrs. Hays occupied considerable wall space. M. Lefèvre exhibited Mr. Tadema's masterpiece, "*A Dedication to Bacchus*," and a new work by Rosa Bonheur.—*Engravings* have lost none of their attraction for amateurs. Amongst the plates published during the past twelve months may be mentioned that representing the Church of St. Gilles at Arles, by Mr. Haig; a reproduction, in dry paint, of Frank Hals' celebrated picture in the Haarlem collection, "*The Archers of St. Adrien*," by Mr. Mortimer Menpes; Mr. Hole's "*Mill on the Yare*," after Crome; Mr. Wallace Remington's large view of "*Nuremberg*"; Mr. Holloway's "*Victory at Rest*"; Mr. Baird's two subjects from Glasgow Cathedral—"*Lauder's Crypt*" and "*Blackadder Crypt*"; Mr. McCormack's "*Waiting*"; and Mr. Walker's "*St. Paul's by Moonlight*."—One of the most important collections sold by Messrs. Sotheby, Wilkinson, & Hodge, was that of *Rembrandt's etchings*, belonging to Mr. Webster of Aberdeen. The day's sale realised £308 18s.; the impressions fetching the highest prices being "*Low House on the Banks of a Canal*," £360; "*Landscape, with two Horses*," £345; "*The Canal*," £125; "*Goldweaver's Field*," £114; "*Coach landscape*," £100; and "*Ephraim Bonus*," £100.—The following artists were awarded prizes in the Fine Arts section of the *Paris Exhibition (q.v.)*—viz., *Grand Prizes*: Mr. Alma Tadema, Mr. Bollcutt, Sir T. Gilbert, Mr. Haden, Sir F. Leighton, Mr. Moore, and Mr. Shaw; *Gold Medals*: Messrs. Aumonier, Burne-

Jones, Douglas, Fordham, Gregory, East, Herkomer, Hook, Keene, Leader, Langly, Macbeth, Orchardson, Parsons, Reid, Short, Whistler, Shannon, W. L. Wyllie, Webb, Bell, and Sir F. Leighton.—An interesting feature of the past year has been the success attending the great shows in London, Edinburgh, Dublin, Liverpool, Manchester, Glasgow, and other commercial centres, which shows a growing and general appreciation of art.

Artillery. (A concise history of artillery from early times is given in ed. '87.) On Her Majesty's accession, fifty years ago, all the guns in use by the army and navy were so simple in construction, and of so few patterns, that they might all be fully and accurately described in a single column of this book. For many succeeding years, and till the introduction of rifled cannon, all matters connected with ordnance remained almost in a state of torpor. Since then the wave of improvement and progress, set in motion by that change, has rolled on rapidly, sweeping away in its course nearly everything that was unfit to stand the tests of experiment and comparison. Improved means of forging and working large masses of iron and steel, and consequently of making guns of dimensions which seemed, and indeed were, unattainable ten years ago, have been utilised to the utmost. When the 80-ton gun, popularly styled the *Woolwich Infant*, made its appearance, it was an object of general admiration, and the opinion was freely expressed that there would be no use in attempting to make a larger gun. But so rapid has been the advance in the direction of increased size, that the *Woolwich Infant* has been obliged to "take a back seat." While the size, range, and accuracy of guns have been increased, progress has been made, *pari passu*, in other directions. The appliances for mounting, loading, and moving big guns have been so much improved, that all necessary work with them is now done with less expenditure of manual labour than was formerly required to work guns of comparatively small size and weight. An inevitable result of adopting ingenious mechanical contrivances, instead of simple muscular exertion, and of utilising steam and hydraulic pressure in the service of artillery, is increased complexity in appliances, and the necessity of far more training and skill of naval and military gunners. Improvement in the construction of guns was for several years retarded, or rather almost stopped, by blind and obstinate adherence on the part of some officials to the principle of muzzle-loading, long after it had been condemned by the most scientific and practical artillerymen of other countries. Since that unreasonable restriction has been removed, changes—most of them improvements—have been introduced with such startling rapidity, and types and patterns of guns, carriages, and projectiles have multiplied to such an extent, that it is impossible to describe them all in the limits of an article of reasonable length. All that can be done, therefore, is to mention those guns which, from novelty or importance, claim most attention, briefly noticing or passing over those which are, or soon will be, quite obsolete. The necessity for this limitation will be evident from the statement that there are more than a hundred patterns of cannon in the service, exclusive of mortars, machine guns, and old smooth-bores. The largest gun yet made in England is that called the 111-ton gun. Without

going into many figures, or quoting any of those calculations which have no attractions for general readers, it may be stated roughly that this enormous gun is almost exactly 15 yards long, weighs 111 tons, fires a shot of 1,800 lb. (about equal in weight to the whole broadside of a 120-gun ship), has a service-charge of 1,000 pounds of powder, and will penetrate an armour plate nearly a yard in thickness at 1,000 yards. The destructive effects in war of a shot or shell from such a gun must be for the present a matter of speculation, and we must wait for the next great war to realise them. But it may be safely predicted that the shell bursting in an earthwork would act like a mine, and would demolish, like a house of cards, a building that would withstand almost uninjured the explosion of any shell hitherto tried in war. Its shot would pass through and through an iron ship on the sides of which a shot from the *Woolwich Infant* would make but a slight impression, and from which the old spherical shot would rebound like peas, or crumble like snowballs. Next after the 111-ton gun—for the present the *facile princeps* of British ordnance, both for sea service and land defences—comes the 100-ton gun, a muzzle-loader, and intended for land service only, with a shot a little heavier than that of the former gun, but with much less penetrative power. Then we have the 80-ton gun, and, in a descending scale of size and efficacy, some fifty other varieties of heavy guns, muzzle-loaders and breech-loaders. **Siege guns and guns of position**, carrying shot not exceeding 40 lb., contribute comparatively few to the long list of patterns. In guns of this class there have not been many changes within the last few years. Of **field guns** we have still fourteen patterns of muzzle-loaders, from 16-pounders to 7-pounders; and seven patterns of breech-loaders, from 20-pounders to 6-pounders. Although the superiority of breech-loaders for horse artillery and field batteries has long been admitted, the complete re-arming of these batteries has been delayed, from considerations of economy. The new 12-pounder, intended at first for horse artillery only, is, we are assured, notwithstanding the disadvantage of its excessive recoil, by far the best light field gun in existence. It weighs only 7 cwt.; and, with a charge of 4 lb., has a muzzle velocity of 1,770 per second, and a range, with 25° of elevation, of 7,930 yards. In all these particulars it claims to be superior to any foreign gun of similar size and weight. The re-arming of our horse artillery batteries with this gun is proceeding so slowly as to prove the utter inadequacy of the *Woolwich Gun Factory*, even when working at high pressure, to supply the wants of the army. Of the new 20-pounder, from which so much was expected, and which has been favourably reported on, but little is heard just now; and some influential artillery officers are in favour of arming all our field batteries, as well as the horse artillery, with the new 12-pounder. **Horse artillery batteries** are expected to equal cavalry in rapidity of movement, while from field batteries great range and a crushing fire are required rather than extreme speed. The same pattern of gun cannot, therefore, be the best for both. If the new 20-pounder realise the expectations it has raised, it should be made in large numbers and supplied to the field batteries. The range and accuracy of rifled

field guns have advanced with such rapid strides that the use of *howitzers* is now very limited, and it is not rash to predict that ordinance of that class will soon be consigned to the limbo of obsolete weapons in Woolwich arsenal. **High-angle fire** from siege guns has also been much developed, and **rifled mortars** have an accuracy unattainable by smooth-bores. The present pattern of **screw gun for mountain batteries** will not, in all probability, be long retained without alteration; for if the plan of having a gun made in two pieces, to facilitate carriage in mountainous or rough country, be found very convenient, the principle will surely be carried so far as to have guns made in three or more pieces, so that the size of the gun when screwed together may be increased, while the difficulty of transport will be still further reduced. If, on the other hand, the slight loss of time in putting the gun together, and the greater liability to injury resulting from its construction be found to outweigh the advantages of its portability, a very light gun in one piece will be substituted. In one direction progress has been very slow. The **ranges** at which guns of all kinds can be fired with effect have lately been increased to such lengths, that man's unaided vision can no longer evoke the full powers of the guns. And here it may be mentioned that a shot from one of Longridge's wire guns, lately tried at Shoburyness, at a high elevation, attained the extraordinary distance of twelve miles! The advantage of **telescope sights** for long distances has been fully proved for several years; but, till the conviction of the expediency of fitting *all guns* with such sights becomes general among artillery officers, much of the accuracy of fire of our guns will be lost by the adherence to the rough modes of aiming that were only good enough for the erratic old smooth-bores. The objection that telescope sights may be shot away, and are easily damaged, is not a valid one; for when the telescope can no longer be used, the ordinary sights will be available. If wonderful practice can be made with ordinary rifles fitted with telescope sights—and this has been done in war as well as on ranges—what degree of accuracy may not be attained with cannon so fitted when most of the errors caused by defective vision, and all the deviations caused by unsteadiness or nervousness, are eliminated? Scott's telescope sights have been tried for some years, and have been highly approved; but they have a grave defect. They are not constructed to stand the concussion of firing, and must therefore be removed after laying the guns and before firing. Fixed telescope sights are needed to utilise fully the accuracy of all rifled cannon. Whether **machine guns** should be intrusted to **artillery**, or to **cavalry**, or to **infantry**, or to each arm of the service according to circumstances, is a question the decision of which seems remote. Perhaps our next great war will solve it, or the next but one. In the meantime the improvements which are being made in the construction and working of machine guns, and of "**quick-firing**" **shell guns**, are enlarging the sphere of utility of these guns, and keeping professional opinion as to their use in a state of constant transition. Of **machine guns** we have already in the service six patterns of the Nordenfeldt, five patterns of the Gardner, and three patterns of the Gatling; and of "**quick-firing**" guns we have the Nordenfeldt 6-pounder, and the Hotchkiss 6-pounder

and 3-pounder. But the 36-pounder and 70-pounder guns lately made at Elswick are far more formidable weapons than those just named. These guns can fire from 10 to 15 well-aimed shots per minute, and can pierce an armour plate 5 inches thick at 1,000 yards. As regards the **Maxim gun**, which will fire away as long as it has any ammunition, though all that worked it be killed, it is to be regretted that the Government did not secure its exclusive possession, even at enormous cost. **Capt. Zlatinaki's dynamite tube gun** has made great progress in the estimation of experts. A large steamer called the *Vesuvius* has been specially built for this novel armament. She carries three 15-in. guns, fixed at an angle of 15°, all parallel to the keel and pointing forward. The direction is given entirely by the steering, and the range is regulated by the quantity of compressed air admitted at each discharge. The fire from these tubes, while vastly inferior in range and accuracy to that of rifled cannon, should prove awfully destructive within their present effective range of a mile. It should be remembered that this invention is yet in its infancy, and therefore it seems only prudent to follow the American's advice, "**Never prophesy till you know.**" The nature and quality of ammunition are intimately, indeed inseparably, connected with the construction and patterns of guns. The use of some of the "**higher explosives**" has been successfully tested, at least for filling shells; and the secrets of making melinite and cocoa powder have been acquired from France and Germany respectively. Diversity in the modes of **granulating gunpowder**, has been found so advantageous that the size of the grains (if they may be so called) increases in approximate proportion with that of the guns; so that those for use with the largest guns are perforated hexagonal prisms, some inches in length and diameter. Many kinds of **smokeless**, or nearly smokeless, **gunpowder** have been tried lately with success. Doubts are felt about the permanence of the qualities of these powders to resist the effect of variations of temperature and diversities of climate; but improvements in the processes of making them will, in all probability, soon remove any such disadvantages. The use of smokeless powder will revolutionise the aspect of battle-fields, but it will not prove an unmixed advantage to assailants. Smokeless gunpowder is said to be comparatively noiseless. With so many and so startling inventions for attack and for defence as have lately been made public, and with others the destructive powers of which are darkly hinted, the future of warfare—even the near future—defies calculation, and must be a subject for vague but intensely interesting conjecture to those by whom, and on whom, these new agents of destruction may be tried.

Artin, Yacoub Pasha. Egyptian statesman b. 1846. Armenian by nationality; Christian by creed. Under-secretary of State for Public Instruction '84-88. Just appointed Egyptian Administrator of Railways in Egypt. Yacoub Pasha Artin is an Egyptian of quite exceptional attainments. A profound scholar of Arab literature. He is European in his tastes, speaking six languages with equal facility. To sound common sense he adds a genuine love for his work in the Education department, to which his promotion will be a great loss.

Artists, Musicians, and Actors Deceased. See OBITUARY.

Arts and Crafts Exhibition. See **NEW GALLERY.**

Arts and Letters Club, The, 27, Albemarle St., Piccadilly, W., was founded for the association of gentlemen directly or indirectly interested in all branches of the arts, literature, science, and the liberal professions, and for the special purpose of widely contributing to the cultivation and development of the same. Sec., A. E. Bright.

Ascension Island. In the South Atlantic, 960 miles from African coast, and is a British possession. The port is called Georgetown, and is furnished as a naval station with batteries and storehouses. Used as a sanatorium for people from West Africa. The Governor is a naval officer appointed by the Admiralty. See **BRITISH EMPIRE (table).**

Ascot Gold Cup. See **TURF.**

Ashbourne, Edward Gibson, P.C., 1st Baron (creat. '85), Lord Chancellor of Ireland, was b. in Dublin 37. Graduated with high honours at Trinity Coll., Dublin, and ('75-'85) represented to the Irish bar ('60), and for years practised the University of Dublin in parliament. Called in Ireland, and gained a high reputation in his profession. On entering parliament he took a prominent part in debates, and rendered valuable service to the Conservative party, especially in connection with the Irish policy. **Attorney-General for Ireland ('77-'80).** Lord Ashbourne brought into the House of Peers the **Holdings Act (Ireland), '88.**

Ashkenazim. See **JEWS.**

"Asiatic Quarterly Review." A review the first number of which appeared Jan. 1st, 1886, devoted to the consideration and discussion of Asiatic questions which are becoming increasingly of interest to the British public. Questions are treated from an Oriental as well as European standpoint. Among other distinguished contributors have been the Countess of Dufferin and the Marquis Tseng. A chronicle of Asiatic events and literature forms a feature of the *Review*. Editor: **Mr. D. Boulger, M.R.A.S.**

Askabad. A new Russian town and administrative centre of the province of Transcaspia, 280 miles by railway east of Michaelovsk, on the Caspian, on the direct road to Sarakhs, Herat, and India. **Annexed** by Skobelev in '81. Does a large trade with Meshed, distant 100 miles.

Asquith, Herbert Henry, M.P., b. 1852. Educated at City of London School, and Balliol College, Oxford, where he graduated B.A. '74, 1st class Classics, and Craven University Scholar. Called to the bar at Lincoln's Inn '76. Elected as Liberal member for East Fife '86. Mr. A.'s speeches have received high commendation on several occasions, notably at the annual meeting of the Liberation Society in '88, and at the Palmerston Club, Oxford, last June. Mr. A. was engaged with Sir C. Russell on behalf of Mr. Parnell at the **Parnell Commission ('9, v.),** and distinguished himself by his skillful cross-examination of *Times* witnesses.

Assab. An Italian possession on the Red Sea coast of Africa, now practically abandoned in favour of **Masawa.**

Assiniboia. Named after the Assiniboine river. A district of the **North-West Territories,** and a future province of the Dominion of **Canada.** Lies directly west of Manitoba along the United States boundary. Area 95,000 sq. m. Capital **Regina,** which is the present seat of government for the Territories generally.

Assizes Relief Act, '89. See **SESS.,** sect. 56.

Association Internationale du Congo. See **CONGO FREE STATE.**

Assyriology, '89. The excavations of the past year have resulted in some important discoveries and acquisitions. Amongst these is the clearing out of the greater part of **Sennacherib's palace** at Kouyunjik, including the **Library chambers.** About 1700 tablets and fragments from the celebrated Nineveh Library have been acquired for the British Museum. At **Khorsabad,** or town of Chosroës, some fifteen or sixteen miles to the north-east of Mosul, there has been a renewal of the diggings; and slabs, altars, and other objects of interest, have been rescued from the **palace of Sargon.** In the course of the diggings at Kouyunjik have been found several relics of the **Roman occupation,** comprising rings, bracelets of bronze inlaid with glass, and other objects; as well as several **Persian coins** of the dynasty of the Sassanids. Further south, at **Babylon** and the neighbourhood, it has been found impossible to do much work with the spade, on account of the formidable restrictions placed upon excavations. The acquisition, however, *inter alia*, of a clay instrument, on astrological principles, for working out omens, and formed, accidentally or otherwise, in the shape of a human liver, indicates the existence of sites in Southern Babylonia that should be cleared out without delay. In this connection it is interesting to record that the **latest acquisitions of the British Museum** include about 800 Babylonian and other tablets of the very early epoch of about 2500 B.C. The well-equipped **American expedition** to **Mesopotamia** has unfortunately for a time been checked by a collision with the Arabs, arising out of the alleged violation of a graveyard, in consequence of which a blood-feud has been created rendering it very difficult to carry on operations. Lastly, in this connection, the **German excavations** carried on at **Tel-el-Hibbe,** the ancient **Nar Malka** (situated about fifty miles south-west of Baghdad, on the Yussifich Canal, which connects the Tigris and the Euphrates) have been moderately, although not brilliantly, successful.—Among the contributions to the literature of the year should be noticed the opening of the pages of **Hebraica** (New Haven, Conn.) to the discussion of cuneiform learning. The literature of Assyriology is growing to such an extent, that it is already difficult to travel undiverted over the intermediate stages to the earlier and tentative periods of cuneiform investigation. From America is announced a collective edition of the **Works of the late Rev. Henry Hincks, D.D., T.C.D.;** and a new edition, by Drs. W. M. Arnolt and C. Johnston, of the **Works of Sir Henry Rawlinson.** The reciprocity of Assyriological information between this country and the **United States** is exemplified by an article from the pen of Mr. T. G. Pinches, which appeared in the **New York Journal,** August '89, on "**Belshazzar,**" showing that he was practically king at the time when Babylon was taken, and tracing the novel lines of his private life and his parentage. Mr. Pinches points out that the **capture of Babylon** by Cyrus took place during the night of the 11th of the month **Marcheswan** (October–November), as recorded in **Daniel**:—"In that night was Belshazzar the king of the Chaldeans slain." Another important contribution to Assyriology made by Mr. Pinches is a study of **Sennacherib as Crown Prince;** a translation and a *précis* of certain

letters written by Sennacherib to his father Sargon, the former being at that time a kind of governor or viceroy in the north of Assyria or Armenia. A few catalogues, more or less complete, of recently acquired collections of Babylonian and Assyrian antiquities, have been compiled. They include a continuation of the catalogue of the De Clercq collection in Paris, prepared, in collaboration with M. Menant, by the owner; Dr. Adler's Notes on a collection in the National Museum at Washington; and a provisional List of eighty-five of the British Museum collection, with additional notes on their extension and significance, by Mr. Bezold. To this department of Assyrian literature Mr. Pinches has also contributed *Inscribed Tablets from Babylonia in the Collection of Sir Henry Peek, Bt.*, barely mentioned last year, with translations and explanations, and with a full index of the words in which the original Babylonian characters are given, most valuable to the elementary student of cuneiform. As a sequence to this Catalogue, Mr. Pinches has issued a small work on *Babylonian and Assyrian Cylinder Seals and Signets*, with illustrations by the autotype process. In the second part of the second volume of his *Decouvertes en Chaldée*, M. E. de Sarzec has beautifully reproduced in heliogravure a considerable portion of the recently acquired collection at the Louvre—an example followed by other scholars, as Amiaud and Zimmern. Of a great number of the documents bearing upon the Assyrian empire, a fresh study has been made by scholars as well of the New as of the Old World. In particular, Dr. Winckler has utilised anew these documents for his work, in two volumes, on the *Inscriptions of Sargon II.* The first part of this work is devoted to a very important *Historical Introduction*, covering the reign of this king, with transcripts and translations of most of his inscriptions, and also with a nearly exhaustive vocabulary. The second part comprises autograph reproductions of the entire thesaurus of Sargon texts in the collections of the Louvre and of the Berlin and British Museums; and the whole gives invaluable corrections of the texts from Khorsabad, which were beautifully but inaccurately given in the early edition of M. Botta, the explorer. The *Inscriptions* severally of *Sennacherib*, *Esarhaddon*, and *Assurbanipal* have received further illustration and exposition at the hands of Mr. B. T. A. Evetts, Professor R. F. Harper, and Mr. S. A. Smith, the last of whom, an American scholar, is continuing his work under the title of *Die Keilschrifttexte Assurbanipals*. Dr. C. F. Lehmann is also reported to have ready for early publication a comprehensive edition of all the principal texts of Saosduchinos, the brother of Sardanapalus or Assurbanipal. In the more miscellaneous department, which comprises the legal, fiscal, commercial and social documents, Dr. Strassmaier, S.J., has produced the final volume of his *Inscriptions of Nabonidus*, some 1134 in number; and has already made considerable progress in the application of his method to the inscriptions of Nebuchadnezzar II. Dr. Feiser has also brought out an edition of twenty-one texts in the Berlin Museum, under the title of *Keilschriftliche Aktenstücke*, with transliterations, translations, and glossary; and Mr. E. A. W. Budge has published some important legal documents selected from a fine collection which he himself ac-

quired last year in the East for the British Museum. Various Assyriologists of the first rank have occupied themselves in unravelling the technical difficulties which occur in the documents known generically as "contract-tablets." Some syllabaries, *prolegomena*, lexicographical *mémoires*, etc., having for a direct and definite purpose the furtherance of Assyrian philology, have also made their appearance; and Mr. Bezold, himself an Assyriologist of repute, has recently borne testimony to the facilities placed in the reach of students of Assyriology for acquiring a sounder knowledge of the grammatical structure of the language and the value of the study of Assyriology as a source of important emendations of the Hebrew Bible. The collaboration of Dr. Delitzsch and Dr. Haupt should be mentioned in the conduct of *Beiträge zur Assyriologie*, which contains important articles from the editors, as well as from other scholars. Dr. Haupt's articles are mainly on the *Gisgubur Legends*; whilst those of Dr. Delitzsch are characteristically concerned with Assyrian correspondence—letters, for instance, and despatches from governors of provinces and other officials, to the king. Dr. Delitzsch has also continued his valuable Assyrian dictionary (*Assyrisches Wörterbuch*); and the Rev. A. J. Delattre, S.J., has published a new edition of his "*Les Chaldéens jusqu'à la Formation de l'Empire de Nabuchodonosor, précédé de Considérations sur un Récent Livre de M. Hugo Winckler*"—the *considerations* being a discussion of the general treatment of some departments of Dr. Winckler's labours. The *Continental and American periodicals* devoted either in whole or in part to Assyriology maintain their prosperity and usefulness; the *Babylonian and Oriental Record* is also vigorously sustained. Among the more remarkable of its contributions have been a continued series of articles by Professor Terrien de Lacouperie on the *Origin from Babylonia and Elam of the early Chinese Civilisation*; and a series of articles on *Babylonian Medicine*, the first of which, as a suggestion of the time, on *Leprosy*, appeared in the number for August last, by Mr. W. St. Chad Boscawen, who, as well as Mr. George Bertin, continues to deliver at due intervals his courses of lectures on Assyriology at the British Museum. The short series of four lectures given by Mr. Bertin in June '89 was *On the Babylonian Astronomy*, the real condition of which he had been able to ascertain by a study of astronomical tablets, and to identify so many of the names of the heavenly bodies as in fact to reconstruct the science of the stars as known to the Babylonians. Consult Dr. Birch's Preface to vol. i. of "*Records of the Past*"; Mr. H. Fox Talbot's Introduction to the Translation of the Inscription of Khammurabi, in same vol.; Rev. A. H. Sayce, *passim*, in same work—*Babylonian Literature*, and Lectures upon the Assyrian Language; Mr. George Smith's "*Chaldean Account of Genesis*," "*Chaldean Account of the Deluge*," and "*History of Babylonia*"; Dr. E. Richmond Hodges' "*Cuneiform Decipherment*," in the third edition of Cory's "*Ancient Fragments*"; Birch and Pinches' "*Bronze Ornaments of the Palace Gates of Balawat*"; Mr. E. A. Wallis Budge's "*Babylonian Life and History*"; Mr. W. St. Chad Boscawen's "*From under the Dust of Ages*;"

Professor Sayce's "Hibbert Lectures on the Religion of Babylonia," second edition; George Bertin's "Languages of the Cuneiform Inscriptions"; Ragozin's "History of Assyria," and "History of Chaldea"; "Babylonian and Oriental Record"; "Transactions and Proceedings of the Society of Biblical Archaeology"; "Zeitschrift für Assyriologie"; "Revue Archéologique"; "Journal of the American Oriental Society"; Lyon's "Assyrian Manual"; Fouilles, in illustration of De Sazrec's "Découvertes en Chaldée"; Dieulafoy's "Voyages en Perse"; and others. Dr. L. Oberziner, of Vienna, is preparing, it is understood, a new and important work on Assyriology. Lectures have been delivered during the year at the British Museum on this subject. (For concise history of Assyriology see ed. '87.)

Astronomy, '89. This will be remembered as the "Year of Congresses." Relating to astronomy alone, we have had this past autumn the following:—"Astrophotographik"; "International Celestial Photography and Spectroscopy"; "Meteorology"; "Hydrology and Climatology"; "Chronometrical"; and "Geodetic." In '87 the *Astrophotographic Conference*, held at Paris, decided that a chart of the sky was to be made by photography, and went so far as to fix the refractor of 13 in. objective and 11 ft. focus. The past two years have been devoted to perfecting the methods and experimenting with different kinds of plates, etc. This autumn the *Permanent Committee* met to discuss, and if possible settle, a number of details. Every vital point may now be considered disposed of. The plates (of plate-glass) are to be flat, and 160 mm. square, and the photographic field 2° square; the chemical formula to be left open. One or more bureaus to be established for measuring and reducing the positions of the stars. Amongst numerous other points was the *distribution of the work*. For this purpose the sky has been divided into zones, and those falling to the share of English observatories are:—Oxford, $+53^{\circ}$ dec. to $+48^{\circ}$ dec.; Greenwich, $+48^{\circ}$ to $+40^{\circ}$; Sydney, -34° to -42° ; the Cape, -42° to -50° ; and Melbourne, -70° to -90° . The total solar eclipse of Jan. 1st may be regarded as the observational event of the year. The path of total phase was confined to North America, and was, of course, taken care of by numerous American eclipse parties. The weather was most favourable, and an immense number of photographs were taken, and the spectroscopic and physical observations were also successful. Many of the photos. are of great excellence, and show the corona in its chief features to resemble very closely those of the eclipses of '78 and '67, and so strengthen the theory of the general connection between the form of the corona and the solar activity as shown by the numbers of sun-spots (11-yr. period). The astronomical feeling developed in California by the presence of the Lick Observatory and the occurrence of a total eclipse seems to have created great sympathy between the officers of the Observatory and the numerous amateurs, and has resulted in the establishment of "The Astronomical Society of the Pacific," with Prof. Holden, Director of the Observatory, as first President. First meeting, May 25th. The work of Mr. Crew is described in our last issue. The methods by which the sun's period of rotation has been determined are—by periodic variations in our barometers and thermometers; variations of the magnetic elements;

motions of sun-spots; motions of faculae; and by the spectroscopes. These all give different results, really affording, as Mr. Crew suggests, a means of discriminating the various layers of the sun concerned in the several cases. Assuming the angular velocity of the separate layers to decrease from the sun's centre outwards, the layer affecting barometers is deepest, for we get the solar rotation period from the above methods respectively $24^{\circ}12'$, $24^{\circ}33'$, $24^{\circ}79'$, $25^{\circ}23'$, and $26^{\circ}23'$ days. These results are of course far from infallible.—The rare phenomenon of Jupiter being occulted by the moon occurred on August 7th, and the interest shown by the public generally testifies to the growing appreciation of our science. The total number of small planets is now 387. Five new comets have been detected—two by Barnard, two by Brooks, and one by Davidson. The second of Brooks', discovered on July 6th, has divided into several separate bodies. The month of August was unique in having five telescopic comets under observation at the same time. There has been much discussion respecting a white spot seen on Saturn's ring. Is it objective, or is it purely optical? The balance of opinion gives it as optical. Prof. Pritchard continues his researches in photographic stellar parallax, and up to the present his results are:— β Cygni $0.44''$; μ Cassiop. $0.04''$; α Cassiop. $0.04''$; β Cassiop. $0.16''$; γ Cassiop. $0.07''$; Polaris $0.08''$; and α Cephei $0.06''$. Mr. Isaac Roberts pursues his photographic researches, and has recently given his attention to nebulae, and his photographs show details of structure which must have important bearing on the different theories of the "Origin of the Universe." His photo. of the Great Nebula in Andromeda may be taken as a type. This nebula always presents the appearance of having two dark parallel rifts, one each side of a luminous centre, and surrounded by a bright zone. In the photo. this is clearly explained. They are the two portions of a dark belt surrounding a central body, and separating it from a luminous ring; and, in fact, one's first impression is that he is looking at a very much enlarged photo. of Saturn. His other photos. are equally interesting. The Jubilee of the Fulkow Observatory (12 miles from St. Petersburg) was celebrated with great pomp amid a brilliant gathering of State dignitaries, foreign ambassadors, and scientists. The Astronomer-Royal (W. H. M. Christie) was present as representative of the R.A.S. Dr. Copeland has succeeded Prof. Piazzi Smyth as Astronomer-Royal of Scotland. Sir E. Watkin has offered a site on the top of Snowdon for an astronomical and meteorological observatory. The gold medal of the R.A.S. was presented to M. Lowry for his equatorial condé and his new methods for determining aberration and refraction.—**Obituary.** Warren de la Rue, Prof. Loomis, Col. Tonline, Alvan Clark, and R. Newall.—**Longitude.** To connect the European geodetic system with that of the British Isles, it was agreed to re-determine the difference of longitude between Greenwich and Paris. The observations for this purpose were made in the autumn of '88, as described in our '89 edition. Since then, in June last, similar observations were made at Greenwich and Dunkerque, another French geodetic station. By this means a check on the work of '88 is obtained, for we have a triangle with Greenwich, Paris, and Dunkerque for angles, and if the three

sides do not close something is wrong. This, of course, delays the publication of the result, but enhances the value. The reduction of the work is in a very forward state. The difference of latitude between Greenwich and Paris was also determined in July.—**Coming events:** **Total solar eclipse**, '89, Dec. 21-2. Invisible in England, partial at Cape. Line of central phase passes over Africa, S. Atlantic north of S. America. The R.A.S. is sending an observer (Father Perry) to Cayenne, and another (A. Taylor) to a place near Loanda, on the west coast of Africa. Several amateurs leave England to observe the eclipse, and amongst them Miss Brown. Another total eclipse occurs in '90, Dec. 17th, but the central line is in the Antarctic Ocean; visible as a partial eclipse in Australia. An annular eclipse of the sun, visible in the British Isles as a partial eclipse, on June 17th, from 8.30 to 10.30 a.m. A partial eclipse of the moon, Nov. 25-6, invisible at Greenwich. Neptune is twice occulted by the moon—first on May 6th, 2h. 35m. (morn.), reappearing 3h. 48m.; and again on June 29th, 6h. 59m. (even.), reappearing 11h. 13m. Mercury is well situated as an evening star in May, August, and September. Venus, evening star from April to November. Mars and Jupiter will both be near the horizon. Saturn well placed for observation. It is just possible that we may have a large number of comets in the coming year, as at least two periodic comets are expected.—Consult the *Observatory*, the *Astronomische Nachrichten*: "General Astronomy," by Young; Sir G. B. Airy's "Popular Astronomy"; Proctor's works; Newcomb's "Popular Astronomy"; "Astronomy for Amateurs" (edited by J. W. Oliver); the new edition of "Chambers"; and Miss M. A. Clerke's "History of Astronomy."

Asylums Board (Metropolis). See POOR LAW. **"Atalanta."** A new magazine with many excellent illustrations, commenced Oct. '87. Many of the best known and most popular writers of the day contribute to its pages. One feature of *A.* is the *Atalanta Scholarship and Reading Union*, which aims at the encouragement of a systematic habit of recreative reading in English literature. Programme '88-89, "English Men and Women of Letters of the Nineteenth Century," continued. Editors: L. T. Meade and John C. Staples. Office: Piccadilly, W.

Athabasca (Indian, "swampy"). Named from its great lake. A district of the North-West Territories, and future province of the Dominion of Canada. Lies north of Alberta and east of the British Columbia. Takes in the celebrated Peace River district. Area 122,000 sq. m.

"Athenæum." The leading English literary journal was founded during 1828. Amongst its editors are included the names of Rev. H. Stebbing, Mr. Dilke, and Mr. Hepworth Dixon (who retired in 1869). Shortly after its origin, it was acquired from its founder, Mr. Silk Buckingham, by Mr. John Sterling, and subsequently passed into the hands of Mr. Dilke, to whose ability its success was mainly due. The review of *Continental books* is now published in the summer instead of at the close of the year. An interesting history of Mr. John Francis' connection with the *A.* is given in a new work by Mr. J. C. Francis, "John Francis and the *Athenæum*," '88.

Athletics. Though the sport termed athletics, in contradistinction to pedestrianism, has greatly

increased in public favour of late years, we have few records to alter this year, amateurs having apparently got within a measurable distance of the length of their tether; and in pedestrianism there is absolutely nothing to chronicle. In fact, that branch of sport—with the exception of the leading handicaps decided at Sheffield—is, like the Prize Ring, practically defunct. Exceptional form is occasionally exhibited in championships, at the annual University contests, and in some handicaps; but of late competitors are set such impossible tasks that, as a rule, success is placed utterly beyond their reach. Still some records have been relegated to the past, and others have been neared. The first noteworthy performance of the year was that of Mr. H. C. Tindall, at the *Cambridge University Sports*, on March 16th, when he ran 600 yards in 1 m. 12 s., thus beating his own previous record made at Stamford Bridge on June 6th, '88, by 3 s., the professional record of James Nuttall, accomplished at Manchester Feb. 20th, '64, by 1 s., and getting within 3 s. of the world's record held by L. E. Myers, New York, since July 1st, '82. Mention must also be made of the performance of Mr. Sidney Thomas (Ranelagh Harriers), by his memorable defeat of Mr. J. Kibblewhite in the ten miles amateur championship on April 6th, when he compassed the distance at Stamford Bridge in the fast time of 51 m. 31 s., which is within 12 s. of W. G. George's record, accomplished over the same track on April 7th, '84, whilst he was still an amateur, and barely 25 s. behind the world's record made by W. Cummings at Lillie Bridge on Sept. 28th, '85. Another good performance was that of Mr. E. H. Pelling (Ranelagh Harriers), who, on June 8th, ran 200 yards at his club meeting at Stamford Bridge in even time, thus beating both his own record of 20 s., made on Aug. 1st, '87, and that of 20 s. s., made by L. E. Myers in New York on Sept. 15th, '81. At the championship meeting on June 29th some excellent displays were also recorded. Mr. H. C. L. Tindall (Cambridge U.A.C.) won the "quarter" in 48 s., thus getting within 2 s. of the world's record, held by R. Butterly, the Sheffield professional. He also covered his first 100 yards in 43 s., thus beating L. E. Myers's record of 43 s. s. by an almost infinitesimal fraction. Mr. W. J. Barry, Queen's College, Cork, earned a place in the records by throwing the 16-lb. hammer 130 ft., and tying the celebrated throw of Mr. J. S. Mitchell (Tipperary G.A.C.) at New York on Sept. 6th, '88. Marvellous as was Mr. Pelling's running in June, he eclipsed it on Sept. 28th, when, at the London Athletic Club Meeting, he covered 200 yards in 19 s. s., approaching as nearly as possible to the 19 s. credited to G. Seward on March 22nd, '47, in his match against the late Charles Westhall, whom he beat by 2½ yards at Barnet, in a match for £50 a side. Mr. J. Kibblewhite, the mile champion, has also set the record keepers at work by beating the times credited to W. G. George, J. White, of Gateshead, and Peter Cannon, of Stirling. He ran 3 miles at Stamford Bridge on Aug. 26th in the unprecedented time of 14 m. 29 s. s., the previous bests being 14 m. 39 s. by White, 14 m. 34 s. s. by Cannon, and 14 m. 36 s. by George.

Attorney. See SOLICITOR.

Attorney-General. The, is the chief counsel of the Crown, acting on its behalf in its revenue and criminal proceedings, and other

matters. The Attorney-General has likewise political functions, and has always since 1673 been a member of parliament, receiving his office from the Sovereign on the recommendation of the Government in power. He is paid £7,000 a year for non-contentious business alone. All Government measures on legal questions are in his charge. The Prince of Wales also appoints an attorney-general, who is, however, generally called the Attorney-General for the Duchy of Lancaster, or for the Duchy of Cornwall, according to his appointment. The present Attorney-General is **Sir Richard Webster** (q.v.). There is also an **Attorney-General for Ireland** (Mr. Peter O'Brien), who is always a member of the Irish Privy Council.

Aumale (Duc d'), fourth son of King Louis Philippe, b. 1822. When only a youth he took part in several campaigns in Algeria '40, '42, '43, and '44. In the latter year he married a daughter of Prince Leopold of Salerno. He was **Governor-General of Algeria** when the revolution of '48 broke out in Paris, but at once resigned and joined his father in England, where he chiefly resided until the law banishing the Orleans princes was repealed in '71, after his election to the National Assembly. He was chosen one of the **Forty** in '71, and was made a **General of Division** in the following year. He was president of the Council of War which tried and condemned Marshal Bazaine. The Duke is the author of a **History of the Princes of the House of Condé**. When the Expulsion Bill passed, in '86, he left France, having been at the same time struck off the roll of the French army by the then War Minister, General Boulanger (q.v.). It was discovered soon after that he had bequeathed his beautiful **Chateau of Chantilly**, with its art treasures, to the French nation. The decree banishing the Duke from France was revoked March '89. The same month he was elected President of the French Academy for three months.

Austin, Alfred, b. 1835. Published his first poem, entitled "The Season," in '62. Acted as war correspondent for the *Standard* during the winter of '70-'71 at Versailles. He has ever since been on the editorial staff of that journal. His poem "**Madonna's Child**" is considered to be his best work. His other works include "Interludes," "The Human Tragedy," "Savona-rola," "Soliloquies in Song," "Prince Lucifer," and "Love's Widowhood and other Poems," '89. He is the editor of the *National Review*, and has contributed many political articles to the *Quarterly Review*.

Australasia. A loose term variously applied. It usually signifies (1) the Australian colonies, together with Tasmania, New Zealand, and Fiji; or (2) Australia, Tasmania, New Zealand, New Guinea, New Britain, and New Ireland, Solomon Islands, New Caledonia, and New Hebrides. Consult Wallace's "Australasia"; "Half a Century of Australasian Progress," by Wm. Westgarth; and "Impressions of Australasia," by Dr. R. W. Dale.

Australasian Federation. See **IMPERIAL FEDERATION**.

Australia. The largest island in the world. Is situated south-east of Asia, dividing Pacific from Indian Ocean. Extends 2,400 miles west to east, and 1,971 miles north to south. Area computed at 3,031,169 sq. miles, or twenty-six times the size of Great Britain and Ireland. Present total population 2,819,367. Wholly British possession. Divided into the colo-

nies of Queensland, capital Brisbane; New South Wales, capital Sydney; Victoria, capital Melbourne; South Australia (including Northern Territory), capital Adelaide; and Western Australia, capital Perth. Australia is a great plateau, elevated on the east and inclined towards the west. The eastern half and most of the other territories bordering the coasts on north and west are extremely fertile, and well adapted for grazing. Wool still continues to be the staple export. The great central depression is sterile, and almost impassable on account of want of water, together with prickly growths; having no drainage, the rainfall collects in extensive salt lakes and marshes. In the habitable districts there is a rich and unique flora and fauna. Coal abounds in various districts; gold, iron, copper, are extensively worked. Climates vary from tropical to temperate. Rainfall capricious: in some years excessive, in others prolonged drought. Principal rivers, the Murray and its affluents, navigable many hundred miles in wet seasons. There are 7,000 miles of railroad, and 52,000 miles of telegraph, several large cities, and many towns. The black aborigines are few, and rapidly disappearing. For latest statistics see **BRITISH EMPIRE**, etc. (table). Known to the Portuguese prior to 1540; later visited by Dutch navigators, and then called New Holland. Visited by Cook, and first British settlement (originally penal) formed at **Botany Bay** in 1788. Consult Blair's "Cyclopædia of Australia," Forrest's "Explorations in Australia," Giles' "Geographic Travels in Australia," Gordon and Gotch's "Australian Handbook for 1888," Petherick's "Catalogue of the York Gate Library," the *Torch*, etc.

Austria-Hungary is an empire under the rule of Francis Joseph I. of Hapsburg, Emperor of Austria and King of Hungary, and is composed of a Cisleithan portion, officially known as Austria, and a Transleithan portion known as Hungary, each possessing its separate parliament, but uniting under a common sovereign in the establishment of a common army, navy, financial, diplomatic, postal and telegraphic services, administered by delegations composed of 120 deputies chosen half by Austria and half by Hungary—the upper house in each country selecting 20 and the lower 40 members. The estimated revenue and expenditure for the common affairs of the monarchy for '90 is 120,351,708 fl., nearly seven-tenths of this total being borne by Austria, the remainder by Hungary. General debt, 2,815,761,293 fl. Imports of Austria-Hungary, including Bosnia and Herzegovina ('87), 562,700,000 fl.; exports, 348,800,000 fl. For army and navy see **FOREIGN A.** and **N.** **Austria** (capital Vienna)—area 115,903 sq. m., estimated population in '87, 23,447,192—is governed by an Emperor and a Reichsrath or federal parliament, consisting of a house of peers partly hereditary and partly nominated by the Crown for life, and a house of deputies chosen by popular election. Purely local matters are administered by the seventeen provincial diets (viz., of Upper and Lower Austria, Salzburg, Styria, Carinthia, Carniola, Tyrol, Vorarlberg, Gorizia, Istria, Trieste, Dalmatia, Bohemia, Moravia, Silesia, Galicia and Bukovina). Estimated revenue for '89, 538,515,245 fl.; expenditure, 538,345,786 fl.; Austria's special debt, 983,211,957 fl.—Hungary (capital Buda-Pesth)—area 125,039 sq. m.; estimated population in '86, 16,901,023—embraces the kingdoms of Hungary

Croatia, Slavonia, and Transylvania, and is governed by a King (the Emperor of Austria) and a parliament composed of an upper and hereditary house and a lower and elective house. Estimated revenue for '90, 355,259,247 fl. expenditure, 355,663,646 fl.; Hungary's special debt, about 1,498,070,420 fl.—**Bosnia-Herzegovina** (area 23,366 sq. m., pop. 1,504,091), though in strictness still a province of the Porte, has since the Treaty of Berlin in '78 been occupied and administered by Austria-Hungary, and may fairly be considered as belonging to that empire. Since the reconciliation of the Magyars with the House of Hapsburg, in '67, great progress has been made in reconciling the various races in different stages of civilisation which inhabit this heterogeneous empire (so much so that it is by no means unlikely that Austria-Hungary may be the political heir to a considerable part of the European dominion of the Ottoman Empire, and the possible head of a South Slavonic confederation).—**History, '89. POLITICAL.** The old year closed with prospects of peace for '89, and **M. Tisza** (Jan. 1st), responding to New Year's congratulations of the Liberal party in the Hungarian Diet, expressed his opinion that the **Alliance of the Central European Powers** offered a guarantee for European peace. An ordinance published (Jan. 4th) directed greater attention to be given to **teaching German** in the gymnasiums and Realschulen. An order was also issued that pupils in cadet schools and officers of cavalry should study Russian. The **Bishop of Oradea** was **ennobled** with the title of Prince Bishop, thus restoring the provincial see of Poland to its ancient dignity. The Imperial rescript created much comment in Russia. Great opposition to the **New Army Bill** (see ed. '89) in the Hungarian Parliament caused **M. Tisza** to threaten resignation in the event of the bill not passing in its entirety. The bill was voted in the Lower House (29th) by 267 to 141. The Opposition members of the House displayed great excitement, and demanded the resignation of the Premier. A great crowd of students, workpeople and others, also calling for his resignation, paraded the streets, doing much damage, and came into collision with the police; numerous arrests followed. The **unpopularity** of the measure, however, increased, and another similar demonstration was held at Pesth (Feb. 12th) by the students who the previous day had accorded an enthusiastic reception to the Emperor and Empress. The agitation continuing, another demonstration of 100,000 persons, directed against **M. Tisza** and the obnoxious bill, was held (Feb. 17th), followed by others of a similar nature. Article 25 passed by 253 to 144 (March 26th). The bill eventually passed the Lower House of the Hungarian Parliament (April 3rd), and was received and adopted in its entirety by the Upper House of the Reichsrath (April 8th).—**Prince Alexander of Battenberg** visited Vienna (Jan. 28th), but no event of political importance followed.—**The sad suicide of the Crown Prince Rudolph** (Jan. 30th) at his villa at Meyerling, near Baden, which was announced by the official press, and subsequently discovered to have been attended by circumstances of a most painful nature, cast a deep gloom over the Court and country, the funeral being solemnised at the Capuchins' Church, Vienna (Feb. 5th), in the presence of the Emperor, the Court, the principal members of the Diplomatic Corps,

and representatives of the crowned heads of Europe. **Regium services** were held by the various Austrian embassies. The official gazettes of Vienna and Buda-Pesth published (7th) an Imperial proclamation conveying the thanks of the Emperor to his people for their manifestations of sympathy. The Archduke Charles Louis, the Emperor's brother (Feb. 1st), renounced his rights of succession to the crowns of Austria and Hungary in favour of his eldest son, **Archduke Francis Ferdinand**.—**The Public Warehouse Bill**, forbidding the commissionaires to advance money on goods stored in their establishments, or themselves to undertake commercial operations, was passed against much opposition in the Austrian Reichsrath (16th).—**The 4 per cent. Rentes Loan** of 32,000,000 fr., put up for subscription by the Government at 80, was fully subscribed.—**The debate on the Budget** in the Austrian Reichsrath (28th) was suspended owing to a scene between two members and the President, who left the chair, the Budget being introduced in the Lower House (March 2nd), passed May 9th.—**Count Albert Apponyi** conducted a spirited opposition in the Hungarian House against Article 25 of the **Army Bill**.—**The news of King Milan's abdication** (March) created an unfavourable impression.—On the 15th the **treaty of commerce** between the Empire and the Sultan of Zanzibar was officially published.—**The commemoration of the Hungarian revolution of '48** was made the subject of a demonstration at Buda-Pesth (15th).—Great excitement was caused (19th) by the shooting of a young student by **M. Kohonczy**, a Liberal deputy in the Lower House of the Diet. Arising out of this incident the next day a **great demonstration** took place in front of the Parliament House, **M. Tisza** being greeted with signs of strong disapproval, his carriage pelted, and several members of the Government party assaulted. The police were resisted and the military called out, a number of arrests being made.—In the House the question being raised by a deputy as to the **carrying of arms**, the President requested members to abstain from bringing weapons of any kind to the House. Subsequently the Emperor expressed sympathy with **M. Tisza** in the affronts he had received on the occasion. A notice prohibiting tumultuous assemblies and the carrying of arms in public was issued by the Prefect of Police at Pesth.—**In April ministerial changes** in the Hungarian Cabinet took place, **M. Weckerle** being made Minister of Finance in place of **M. Tisza**, Count Julius Szapary of Commerce, and **M. Désiré Szilagy** of Justice. Adoption (16th) by Finance Committee of Lower House of Diet of bill to establish a cheque-clearing system. The Senate passed a bill for the **sale of state lands to the peasantry** (17th). It was stated by the **Hrvatsk** of Agram (19th) that the Austrian Government was about to **fortify Sarajevo** at a cost of 4,000,000 florins. The **Provincial Diets** of Bohemia, Dalmatia, Galicia, Carniola, Tyrol and Vorarlberg, Istria, Görz and Gradiska, dissolved, and new elections ordered by Imperial decree. Adoption by the Lower Hungarian House of **Recruiting Contingent Bill** (29th). Count Schönbörn raised to the cardinalate. **Mr. Frederick Grant**, son of the late General Grant, presented his credentials (May 15th), on the retirement of General A. Lamton, as United States Minister at Vienna. An important announcement was made by **M. Weckerle**, Hungarian Minister of

finance, relative to the suppression of lotteries in Hungary, and the negotiations opened with the Austrian Government for the purpose. The Upper House of the Austrian Reichsrath accepted Budget and Financial Law without amendment (15th). Martial law was extended in Bosnia and Herzegovina to several offences usually punishable at common law in consequence of lawlessness in the district. The questions pending between Hungary and Croatia settled by Regnicola deputations (June 5th). Sessions of the Austrian and Hungarian delegations opened (3rd). Count Taaffe, in replying to a Jewish deputation, publicly stigmatised the anti-Semitic agitation in Austria (6th). M. Rispi's declaration in the Italian Chamber received with much satisfaction, the Italian Parliament by vote having openly recognised the value of the triple alliance (12th). Austro-Hungarian cavalry are to be armed with revolvers carrying cartridges used for the Manlicher rifle. Shortly after the opening of the Austro-Hungarian delegations session the appointment of Count Giza Teleki as Hungarian Minister of the Interior was announced (19th), and the resignation by Count Andrássy (*q.v.*) of his seat on account of ill-health (22nd). Commemoration of the battle of Kosovo, proposed to be celebrated by fetes and religious services, prohibited within the Magyar kingdom. On the debate (July 8th) in the Hungarian delegations on the Foreign Office Budget, adverse speeches were delivered by Counts Andrássy and Apponyi, and other leading statesmen. The Committee's report, including vote of confidence in Count Kalnoky's policy, proposed by Dr. Falk, adopted. The Austrian and Hungarian delegation sessions closed on the 12th. New issue of Austro-Hungarian paper florins, bearing date July 1st, '89. The old ones, dated Jan. 1st, '82, to be called in and redeemable at par at the state banks till Dec. 31st, '93. In August the Siamese Mission visited Vienna, was received by the Emperor (23rd). Cardinal Galinberti, Papal nuncio, remonstrated with the Bishops of Veglia and Trieste for their Ultralavophile attitude, which had created much ill-feeling amongst the Italian population. A private interview took place between King Milan and the Emperor, and between the King and Count Kalnoky (August 23rd). The Czecho-Slovaks irritated by the dissolution of a literary club at Prague for publishing congratulations to the French on the centenary of the Proclamation of the Rights of Man, 1789. A mandate from Cardinal Ganglbauer, Archbishop of Vienna, read in all the churches of the diocese (25th) in protest against the erection of a monument to Giordano Bruno in Rome. In September the Emperor visited Galicia (3rd), and took part in the military manoeuvres at Jaroslau, in connection with which friction occurred between the Emperor and the inhabitants of Monor, owing to alleged disrespect to the Austrian Imperial Hours at the headquarters of the Honved cavalry, which formed the subject of an intervention on the opening of the adjourned session of the Hungarian Parliament. Count Franz Toun, a member of the Feudal party in Bohemia, succeeded Baron Kraus as Governor of Bohemia (7th). The prosecution instituted against 152 miners for rioting during the strikes in Styria ordered by the Emperor to be stayed (26th). Oct. Trial of the editor of the *Freie Independenten* for treason. An important meeting took place between Count Kalnoky and

Prince Bismarck at Friederichruh. Count Erich Kielmaszegg appointed Governor of Lower Austria in succession to Baron Ludwig Porsinger (8th). Reception by the Emperor of the Extraordinary Mission of the Sultan of Zanzibar (12th), and on the same day the adjourned session of the Hungarian Parliament was opened. Prince Aloys Liechtenstein, late leader of the Ultramontane party in the Austrian Reichsrath, retired from public life, and in doing so withdrew the School Bill of which he was the promoter (13th). Address to the Crown moved by the young Czecho, praying for the coronation of the Emperor as King of Bohemia, was adversely reported on by special committee of the diet (31st).—Bohemian Diet (Nov. 14th) unanimously declared that all members who had absented themselves from its sittings without leave since the 10th should be regarded as having resigned; the German deputies thus lose their seats.—It is stated that the decennial census will be made Dec. 31st. GENERAL.—Among the more serious disasters of the year the following may be noted. Prevalence of suicide in Vienna: 43 cases during May. Very bad harvest in Hungary and South Bosnia, due to continued drought (July). Town of Pax, Hungary, totally destroyed by fire (July 20th). Terrific hailstorm at Pohrlitz, Moravia (Aug. 20th). Collapse of the principal embankment at Saegedin, erected after flood of '79 at a cost of 2,000,000 fl. (Sept. 2nd). The strike among the tramway employes (April) gave rise to riots, which assumed an anti-Semitic character, in the course of which 450 persons were arrested and 206 wounded. The strike lasted three days, and the company eventually conceded the men's demands, and had to pay 50,000 fl. to the town council for neglecting to provide tram service on those days. Strikes also occurred in other branches of industry: in May of a number of workmen at the Franzenstadt station of the Hungarian State Railway; of 4000 colliers at Kladno, Bohemia, for the eight hours movement and higher wages, spreading in June to the district of Pilsen, where 5000 struck work; in July of 14,000 spinners and weavers at Brünn. Great scarcity of water in Vienna (15th).—Trial of agents at Wadowice for decoying 13,000 Galicians (Nov.) into emigration. SOCIAL.—The chief items of social interest have been (Jan.) the appointment by the Emperor of Prince Henry as captain in the navy and colonel in the army. The announcement (9th) of the betrothal of the Princess Louise of Orleans, niece of the Empress, to Prince Alphonso of Bavaria. The first performance at the Vienna Opera of a posthumous opera of Weber, "The Three Pintos." Grand banquet given (19th) by Crown Prince and Princess to the ambassadors. (Feb.) Performance of German adaptation of "The Yeomen of the Guard" at the Karl Theatre, Vienna (2nd). Appointment of Count F. Belgard, P.C., Grand Master of the Household of the Princess Stephanie, who is to be officially called the Crown Princess widow. (March) Baron Koenig appointed Inspector-General of Infantry (1st). First performance of German version of "The Pirates of Penzance" at Wien Theatre (1st). Betrothal of Countess Mary Taaffe to Count Max Coudenhove (25th). Laudatory articles on late John Bright in Austrian papers (28th). Exhibitions of pictures by Pansiger, representing the chief episodes of the Emperor's sporting life from Christmas '48 to Aug. 1st, '87.

opened at Vienna (24th). Austrian Foresters' Congress opened (28th).—(April). The Goldsmiths' Exhibition of precious heirlooms at the Schwartzberg Palace. Herr V. Hengelmüller, late Minister at Belgrade, decorated with the Grand Cross of the Order of Francis Joseph. Meeting of the second congress of Austrian Catholics, Hungarian Catholics taking no part owing to political estrangement.—(May). Proposal to establish a Catholic University at Salzburg. Silver wedding of the Archduke Joseph and Archduchess Clothilde (12th). Movement in military circles to form army and navy stores on the English system (30th). Austrian Derby, plate value 30,000 fl., at the Prater: won by Count A. Apponyi's Triumph (30th).—(June). Serious illness of Cardinal Ganglbauer. Marriage of Countess Irma Schenborn to Prince Max of Fürstenberg (19th). Annual Corpus Christi procession (30th) attended by Emperor and Empress and principal officers of state.—(Aug.). Third Austrian federal rifle meeting opened at Gratz (4th). Austro-German Anthropological Congress opened at Vienna (5th). Opening of new Natural History Museum at Vienna (17th). First Exhibition in Slavonia opened at Eszseg (30th). Commemoration of the death of the Crown Prince (21st). Visit of the Shah to Vienna (22nd): various Court entertainments. Marriage of Countess Theresia Troutmansdorf and the Hereditary Prince Johann Schwartzberg.—(Sept.). Countess Helene Taaffe married to Baron R. von Mattencloft. Inauguration of the Volkstrathe Theatre at Vienna. Six members of the Hungarian Academy of Sciences start for Constantinople to explore archives of Imperial Palace (21st). Decree issued in September ordering all members of the Austrian Civil Service to wear uniform during business hours.—(Oct.). Conversion of Château de Meyerling into nursery for twenty-one Carmelite nuns (21st). Orphanage built and endowed by Herr von Sieberer, at a cost of 1,000,000 fl., opened at Innsbruck. Marriage of Archduke Leopold Salvator to the Princess Blanche of Castile, daughter of Don Carlos (24th). The Count takes by order of the Emperor the name of Herr Johann Orth on entering the British Mercantile Marine (Nov. 13th).—Herr Uhl, Burgomaster of Vienna since '82, resigned (15th).—Amongst the deaths of distinguished persons during the year were those of P. C. Gustav Vizsolyi at Pesth (Feb. 6th); Countess Redern (Princess Victoire Odescalchi) at Pesth (April 15th); Herr Edward Mautner, poet, Vienna (July 1st); Hofrath Josef Wilen, novelist (July 3rd); and Dr. von Steichele, Archbishop of Munich (Oct. 9th). **COMMERCIAL.**—For the first time a Vienna bank (the Union) concluded a loan (20,000,000 dr.) with the Greek Government (4th).—Feb. Inauguration of fortnightly settlement on the Vienna Stock Exchange for Hungarian Gold Rente, Crédit, Staatsbahn, Südbahn, Karl Ludwig-Bahn, and Turkish tobacco shares (27th).—**Marob.** The Danube Steam Navigation Co. decided to run steamers between Galatz and Batoum. Bill for the incorporation of the port of Trieste with the customs territory presented (19th).—April. Undrawn 5 per cent Hungarian Fund Redemption Bonds, including those of Temes, were announced to be redeemed on Nov. 1st, and the Transylvania Bonds on Jan. 1st, '90.—August. New zone system of passenger tariff on Hungarian state railways came into operation (1st).—Annual International grain market at Vienna; small

attendance in consequence of anti-Semitic agitation (26th).—Sept. (See DANUBE IRON-ROADS IMPROVEMENTS.) The colliery owners in North Bohemia endeavoured to get up a coal corner, and manufacturers organised stand-off. It was decided to fit automatic vacuum brakes to trains on Bosnian railways. Telephone service between Vienna and Prague, distant 250 kilometres, established. It was stated by the *Fremdenblatt* (Nov. 6th) that the Austrian Government was prepared to concert measures with the Hungarian Government to re-establish a metallic currency in Austria-Hungary.—Consult Prof. A. Vambéry's "Story of Hungary" (Story of the Nations series); Baron H. de Worms' "Austro-Hungarian Empire Statesman's Year Book; *Almanach de Goltz*; Leger's "History of Austria," '89, etc.

Austrian Political Parties and the Reichsrath. The "Reichsrath," or Council of the Empire, is the central legislative body of Austria, or "Cisleithania." It consists of an Upper House (Herrenhaus) and a Lower House (Abgeordnetenhaus). The Reichsrath, like the legislative body of Hungary or "Transleithania," has its own ministers and government, and exercises full parliamentary functions on all matters within its competence—from which, however, Foreign Affairs and War are excluded. These latter questions are dealt with by a supreme body known as the Delegations composed of 60 members representing the legislative body of Austria, the upper house returning 20 and the lower house 40 delegates, and of an equal number, similarly chosen, representing the legislative body of Hungary. The present Upper House of the Austrian Reichsrath contains 205 members. It is composed of the Princes of the Imperial family who are of age, of whom there are 18; of certain "Erbliche Mitglieder," or hereditary members, upon whose families the privilege has been conferred, and who in the present parliament are 65 in number; of the archbishops, who rank as Princes of the Church, and number 17; and of 105 life members nominated by the Emperor for distinguished services in science or art, or to the Church or State. The Lower House contains 353 members, who are the popular representatives of the seventeen provinces which comprise the Austrian Empire. Bohemia has the largest number of members in the Reichsrath, its contribution being 92; Galicia comes next, with 63; and then follow in order Lower Austria (including Vienna), 37; Moravia, 36; Styria, 23; the Tyrol, 18; Upper Austria, 17; Silesia and Carniola, 10 each; Bukovina, Dalmatia, and Carinthia, 9 each; Salzburg, 5; Trieste, Gorizia, and Istria, 4 each; and finally the Vorarlberg with 3. Each of these provincial divisions, however, has its own separate Diet, consisting of one chamber only, for dealing with purely local matters. The conflict of parties may be said to attain its highest pitch in the lower house of the Reichsrath, which naturally includes members of widely varying race and creed. The most numerous element in the Cisleithan Chamber is the German, which numbers about 200, but is still unable to command a majority, owing to the dissensions within it. Comprised, indeed, in this one powerful national element, are four distinct parties—viz., the so-called German-Austrian Party, the German Party, the German Clerical Party, and the Centre Party. The remaining national groups are the Czechs, led by Dr.

Rieger, who muster 65; the Poles, led by Ritter von Jaworski, with 58; the Slavonians and Italians with 10 each; the Croats with 9, and the Ruthenians with 6. Legislation is therefore only possible by means of combinations; and this is the invariable mode of obtaining a majority, the combination changing at times, although it usually has as its basis the Czechs and Poles and minor nationalities. Such has been the condition of things since 1879, when the united German party, which professes moderate Liberal principles, was broken up through the opposition to the occupation of Bosnia and Herzegovina. The nominal leader of the present German-Austrian party, of '86, is Herbert, an ex-Minister of Justice and a prominent orator; actually, however, the leader of the party is Dr. von Plener. Allied to this group is the German party, led by Dr. Heilsberg. In February '87 this party was 45 strong, but in a month 18 of its members seceded, and formed a separate Anti-Semitic party. This secession has led to the German-Austrian and German parties coming somewhat closer together. The two last-named groups are occasionally supported by a fraction of the centre party, led by Count Goronini, and known as the Goronini party (16); but even if all three parties steadily combined, they would still fall considerably short of an absolute majority. The German Clerical party, which is headed by Count Hohenwart, with 38 followers,

is Clerical first and German afterwards. There is also the small group, numbering about a score, that was led by Prince Liechtenstein, until that deputy resigned the leadership in September last, and shortly afterwards vacated his seat in the Reichsrath. It is therefore invariably to be found in opposition to the German Liberals, and unites with the 65 Czechs, the 58 Poles, and the remaining minor factions, which are always found in opposition to the purely German element. Another small group that generally votes with the majority is the Trentino party of 7 members, all of whom sit for the Tyrol. This little group was led by Dr. Bertolini, until the death of the latter in the summer of '89. It is at present without a head. There are also some 20 "Wilde," or Savages, who belong to no party.

Authors, Society of. See INCORPORATED S. A.

Azores, The. A group of islands in the North Atlantic; belong as an integral part to the kingdom of Portugal. Area 1,005 sq. m., pop. 266,401. Capital Ponta Delgado, on San Miguel Island, but the Governor usually resides at Angra, in the island of Terceira. People Portuguese and Spanish, mostly very poor. Governed as a province of Portugal. Discovered 1439. Called also Western Islands or Terceiras. See COLONIES OF EUROPEAN POWERS.

B

Backwardation. See STOCK EXCHANGE.

Baden. See DIPLOMATIC.

Bahama Islands. Older name Lucayas Islands. Stretch between Florida and the Greater Antilles. Comprise 700 islands or rocky islets, 25 of which are inhabited. The chief island politically is New Providence (85 sq. miles), on which is the capital, Nassau, pop. 12,000, a large and handsome city, and a winter health resort for Americans and West Indians. Other islands are Andros, Eleuthera, Great and Little Bahama, Abaco, Inagua, etc. The northernmost, Turk's and Caicos Islands, have been annexed to Jamaica. Formation of calcareous rock, generally low. Small islands, called Cays, are of coral. Hurricanes and long droughts occur, but climate healthy. Water found by sinking. Much forest and valuable timber. Cattle largely reared. San Salvador (either Cat Island or Watling Island—probably the latter), where Columbus first landed in America, is one of the Bahamas. Chief exports, sponges, turtles, pineapples, and other fruit, a little sugar, cotton and coconut. Resources very inadequately developed.—Government is representative. There is a Governor and Executive, a Legislative Council and a House of Assembly. For latest statistics see BRITISH EMPIRE, etc. (table). Consult Lady Brassey's "The Trades, the Tropics, etc."; Blake's "Try the Bahamas," in *Fortnightly Review*, '86; Powles and Smith's "Bahamas."

Bain, Alexander, LL.D., b. at Aberdeen, 1818. Educated at the University of that city, where he graduated '40. He early distin-

guished himself as a student of both mental and natural philosophy, and in '45 accepted the chair of Natural Philosophy in the Andersonian Univ. of Glasgow, which he occupied only for a few months. He was appointed Assistant-Secretary to the Metropolitan Sanitary Commission in '47, and to the General Board of Health in '50. He had previously commenced his career as a philosophical writer by contributing to the *Westminster Review*, to "Chambers' School Series" and "Information for the People." The publication of "*The Senses and the Intellect*," in '55, and "*The Emotions and the Will*," established his reputation as one of the profoundest investigators of psychological problems. His other important works include "*Mental and Moral Science*," "*Logic, Deductive and Inductive*"; "*Mind and Body—Theories of their Relation*"; "*Education as a Science*," "*English Grammar*," "*English Composition and Rhetoric*," a biography of James Mill, and personal recollections of John Stuart Mill. Professor Bain has also edited the minor works of George Grote, of whom he is the literary executor, and a new edition of whose celebrated *History of Greece* he is now preparing. He was appointed *Regius Professor of Logic* in the Univ. of Aberdeen, '60, and *Lord Rector* of that Univ. in '81, and re-elected '84. Appointed Examiner in Logic ('57) and Moral Philosophy in the Univ. of London, and in '58 Examiner in Moral Science at the India Civil Service Examinations. To both these offices he was frequently re-elected. The refusal of the Government to appoint Professor Bain a University Commissioner provoked a vigorous protest in the House of Commons during the

debate on the Scottish Universities Bill. See Session '89, sect. 124.

Baker, Sir Samuel White, F.R.S., b. in London in 1821. He was first brought into notice by the establishment of a mountain colony in Ceylon, at Newera Ellia, in '47, of which an interesting account is given in his "Eight Years' Wanderings in Ceylon." In '62 he organised at his own cost and conducted an expedition for the discovery of the sources of the Nile. In this expedition he was accompanied by his wife, who is a daughter of M. Finnian von Sass. Having reached the junction of the Atbara with the Nile on June 13th, he explored the basin of the Blue Nile, and in June '62 made his way to Khartoum, where he organised a party to explore the course of the White Nile. He set out on this journey in Dec. '62, and in the following February arrived at Gondokoro, where he met Captains Speke and Grant, who had started from Zanzibar on a similar quest, and reported having reached Victoria Nyanza, which they believed to be the source of the great river. Baker having assisted them to go on to Khartoum, resolved to follow up their discoveries, and without either interpreter or guide, and in face of many difficulties and dangers, set out from Gondokoro on March 26th, '63, and a year afterwards sighted the waters of a great lake which he called the **Albert Nyanza**. For this discovery the Royal Geographical Society awarded him the Victoria gold medal, and Her Majesty conferred upon him the honour of knighthood. In '69 he undertook a successful expedition into Central Africa on behalf of the Khedive, and in '79 was sent by the British Govt. to investigate the resources of Cyprus. He has since undertaken journeys through Syria, India, Japan, and America. He is a Gold Medallist of the Geographical Society of Paris, and has received the Order of the Grand Cordon of the Medjidie. He has recently been spending a sporting holiday in India.

Balfour, Rt. Hon. Arthur James, M.P., P.C., F.R.S., Chief Secretary for Ireland, was b. 1846, and educated at Eton and Trin. Coll. Camb. He entered Parliament in '74 as M.P. for Hertford, which constituency he represented until '85, when he was elected for East Manchester, for which he still sits. By his work entitled "**A Defence of Philosophie Doubt**," Mr. B. gave promise of abilities which could hardly have failed to win recognition by the Conservative party, even had he not been connected by family ties with Lord Salisbury. Mr. B.'s mother is a sister of the noble Marquis. He acted as private secretary to his uncle at the Foreign Office during the critical period '78-80, when the Berlin Treaty was negotiated. He was President of the Local Government Board in Lord Salisbury's first Administration, and on the return of his lordship to power in '86, after serving for a short time as Secretary for Scotland, was appointed Chief Secretary to the Lord Lieutenant of Ireland. Mr. B. introduced the Crimes Act of '86, and since its adoption has energetically devoted himself to the enforcement of its provisions. Mr. B.'s reputation as a parliamentary debater rose considerably during the animated debates which preceded and followed the enactment of that measure. He is Lord Rector of the Univ. of St. Andrews, and an hon. LL.D. of Edinburgh and of Cambridge. In April '88 Mr. B. was entertained at a banquet given by the National Union of Conservative

Associations at St. James's Hall. In October there ensued a correspondence in the *Times* in consequence of a speech by Mr. W. O'Brien. Mr. B., together with Sir F. Leighton (q.v.), received in '88 the freedom of the **Greeners Company**, in which year he also read a paper on "**Positivism**" at the Church Congress. Received freedom of **Goldsmiths' Company** in '89.

Balkh. A large territory N. of the Hindoo Koosh, called Afghan Turkestan, the capital of which is Balkh (**Masat-i-Sherif**). The Ameer maintains a strong garrison at Balkh, and from it despatches the troops that garrison the rest of the territory between the Hindoo Koosh and river Oxus.

Ball, Sir Robert Stawell, LL.D., F.R.S., b. at Dublin July 1st, 1840. Educated at Chester by Dr. Brindley. Appointed Andrews Professor of Astronomy in the University of Dublin and Royal Astronomer of Ireland ('74). He is the author of several works, besides many papers on mathematics, astronomy, and physical science in various publications. He has frequently lectured on astronomy in the leading institutions in the United Kingdom, and delivered "**Christmas Lectures on Astronomy**" at the Royal Institution ('81-2). His "**Story of the Heavens**" is the most popular of his works. The honour of knighthood was conferred upon him in '86. Prof. B. delivered a series of lectures, entitled "**Starland**," before the Royal Institution, '89.

Ballooning. The art of aerial navigation, or rather of researches into its principles, is said to date from the fourteenth century. The first ascent recorded was by the brothers **Montgolfier** by means of a fire balloon, at Annonay, in 1783; and **M.M. Robert and Charles** were the first to use a hydrogen balloon for a similar purpose at Paris in the following month. The following are the chief events since our last issue (to which we would refer the reader for a detailed history up to this point). **Mr. Spencer**, a young man of twenty-five years, caused considerable interest in India by his parachute descents; but on March 19th, '89, ascended, without this modern means of returning, from the Ballygonj Maidan, in the presence of the Viceroy and some thousands of spectators. He made another descent at Calcutta, from a height of 5,000 feet, on April 13th. **Mr. Spencer** made another parachute descent in May at Jubbulpore, but alighted on a steep rock, cutting his head badly. An American aeronaut named **Williams**, who came to England with his partner to show how the parachute business could be done by the aid of hot-air balloons—with the advantage that after the descent the balloon eventually collapses and comes to the ground uninjured—made several successful exhibitions. His experiments from the Alexandra Palace, however, proved unfortunate. On June 5th, owing to something going wrong with the parachute cord, he had to hang on till the hot air evaporated, and he landed on the roof of a building at Highgate. On June 17th the matter was referred to in the House of Commons, when the Home Secretary said that the police could not interfere. At Paris, on June 30th, **M. Mayer**, the aeronaut, with two companions, made an ascent from the locality of the new Bastille; but the balloon dashed with great force against some scaffolding at a height of sixty-five feet, all the occupants of the car being thrown out and very badly hurt. An aeronaut of considerable reputation,

named **Charles Leroux**, met with his death in the Baltic Sea on Sept. 25th. He was born at Waterbury, Connecticut, in 1857, and is said to have made no less than 238 ascents. On the last occasion he ascended from the neighbourhood of Revel with the object of returning to earth by means of a parachute, but on reaching a height of 5000 feet a gale sprang up, and Leroux appears to have made a hurried descent, falling in the sea and meeting his death by drowning. The only fatal accident which happened in this country occurred to a man named **Lennox**, who was engaged by the aeronaut **Higgins**. After the latter had descended near Manchester, on July 16th, the balloon became unmanageable, collapsed, and Lennox was killed.—**War ballooning.** It was stated in November that the well-known military aeronaut **Gen. Brine**, with two members of the Balloon Society, had left England for Gibraltar, the party taking with them two balloons of 40,000 and 30,000 feet capacity. Their expedition was a scientific one, to determine the currents at a high altitude across the Straits of Gibraltar. The prevailing wind at a low altitude has always been from the Atlantic to the Mediterranean. Aeronauts, meteorologists and scientists took considerable interest in this attempt to solve the problem of the currents at a high altitude between Gibraltar and Africa.

Bangor. Rt. Rev. **James Colquhoun Campbell, D.D., Bishop of B.**, 1873, at Stogfield, Argyshire. Educated at Trin. Coll. Camb., where he graduated in honours in '36. Appointed vicar of Roath, Glamorganshire, '39, rector of Merthyr Tydvil '44, and Archdeacon of Llandaff '57, which post he continued to fill till '59, when he was nominated to the see of Bangor.

Bangweolo Lake. See CONGO FREE STATE.

Barjarmassin. A state and Dutch settlement in Borneo (q.v.).

Bank of England (for its history see ed. '78). Projected by **William Paterson**, whose proposal for the same was laid before the Government in the year 1691. Three years later the Bank was established, starting its operations with a loan to the Government of £1,200,000 at 8 per cent., secured on taxes. The **Bank Charter**, granted for eleven years, appointed a governor and twenty-four directors to be elected annually from members of the company possessed of at least £500 stock. Consult "The First Nine Years of the Bank of England," by Prof. Thorold Rogers (*Clarendon Press*), '87.

Bank Holidays. The Act, which declared that certain days in the year should be kept as public holidays, was brought in by Sir John Lubbock, and passed May 25th, 1871. The holidays are, in **England and Ireland:** Easter Monday, Whit Monday, First Monday in August, and Boxing Day (unless Sunday). **Scotland:** New Year's Day, Christmas Day (but should either fall on Sunday, then the following Monday), Good Friday, First Monday in May, and First Monday in August.

Bankruptcy Act, '83. Upon the commission of an act of bankruptcy by a debtor, any of his creditors (with certain exceptions specified by the Act) may present to the court a bankruptcy petition verified by affidavit. Upon this petition the court may make a receiving order, whereby an official receiver (appointed by the Board of Trade) is constituted receiver of the debtor's property. This order is followed by a public sitting of the court, at

which the debtor is examined as to his affairs. A general meeting of creditors is to be held as soon as may be after the making of the receiving order, and is to decide whether or no the debtor is to be adjudged bankrupt. A composition must be approved at a subsequent meeting by a majority in number representing three-fourths in value of the creditors, and must be confirmed by the court. If a composition is not accepted, the debtor must be adjudged bankrupt, and the creditors may either appoint a trustee in bankruptcy, or leave his appointment to the committee of inspection (a committee of not less than three, nor more than five, chosen by the creditors from among themselves, meeting at least once a month, and looking after their interests). The debtor must attend the first meeting of his creditors, and give such information as they require, besides giving, at all times, any information useful in the realisation of his property and its distribution among his creditors. At any time after adjudication the bankrupt may apply for his discharge, which the Court may grant at its discretion, but not if he has committed any misdemeanour under the Act, or under Part II. of the Debtors Act, 1869. An adjudication of bankruptcy disqualifies for sitting in either House of Parliament, and for acting as justice of the peace, town councillor, guardian of the poor, etc. The disqualification ceases if the adjudication be annulled, or if he be discharged with a certificate that his bankruptcy was occasioned by no misconduct on his part. The property divisible among the creditors does not include the bankrupt's tools (if any), or the necessary bedding and apparel of himself, his wife, and children, not exceeding £50 altogether. The first dividend is to be declared and distributed within four months after the first meeting of creditors, and subsequent dividends at intervals of not less than six months. In the distribution, all local rates due at the date of the receiving order which have become payable within the twelve months preceding, all taxes assessed up to the 5th April next before the date of the receiving order, and not exceeding one year's assessment, and all wages of any servant, clerk, labourer, or workman due in respect of services rendered within four months before the date of the receiving order, and not exceeding £50, must be paid in full in priority to all other debts. Any person to whom rent is due from the bankrupt may either before or after the commencement of the bankruptcy distrain upon the bankrupt's goods for one year's rent. The Act does not, except in so far as expressly provided, extend to either Scotland or Ireland. The courts having jurisdiction in bankruptcy are the High Court and the county courts. **Bankruptcy Discharge and Closure Act, '87,** provides a means for the discharge of a bankrupt under the repealed Bankruptcy Acts, and for closing proceedings under the Act of '69.

Bankruptcy Law Act, '89. When a petition in bankruptcy is entered against a man, and he destroys documents in order to conceal the true state of his affairs, or has destroyed documents within four months previously, he is liable to be imprisoned. A question, however, has been raised whether this criminal liability arises where the debtor himself, and not a creditor, presented the petition. The Court for the Consideration of Crown Cases Reserved has considered the point, and has decided that

the ordinary law is applicable in this latter case. But these provisions, which are aimed at persons who fraudulently obtain property on credit, are apparently restricted to cases where a person has subsequently been made bankrupt by a hostile, and not by a personal, petition.

Bankruptcy of Peers and Members of Parliament. See PRIVILEGES OF PEERS, etc.

Banks and Banking. The origin of banking in England in anything like the modern sense of the term dates from the foundation of the Bank of England, in the reign of William III. Charles II. had ruined the credit of the Exchequer by seizing the gold lodged with the Government for safe keeping, and as a consequence William III. found it impossible to borrow money for carrying on his wars. It was then that the scheme for the formation of the Bank of England was brought forward and carried. The Bank made advances to the Government, and in return became sole keeper of the Government balances, and the only joint-stock bank permitted to issue notes in or near London. The formation of other joint stock banks in England dates from 1826, when the disastrous panic of the preceding year, attributed to the bad management of the country private banks, enabled the ministry to compel the Bank of England to give up some of the privileges of its charter. It was ultimately agreed that joint-stock banks should be formed beyond a radius of sixty-five miles from the Metropolis. Country joint-stock banks, however, did not spring up very rapidly at first, and it was not until the prosperous years '33-'36 that any considerable increase in their number took place. Upwards of forty banks were established in '36. The creation of joint-stock banks in London arose from a discovery made in '22 that the Bank Charter Act did not prohibit joint-stock banks being formed in London to carry on business on the lines adopted by London private banks. The Bank's charter gave the Bank of England the exclusive privilege of issuing notes payable on demand, but it did not give it the exclusive privilege of receiving deposits. In the old days, when the charter was framed, the term banking referred chiefly to the issue of notes, deposit banking being hardly known. The result of this discovery was the introduction of a clause into the Bank Act of '33 permitting joint-stock banks to be formed in London, providing they did not issue notes. The London and Westminster and London Joint-Stock banks were formed in '36, the Union and London and County in '39, followed at intervals by others. For several years after this period many legal questions respecting the acceptance of bills, the power of suing for debts, etc., arose from time to time, and constantly embarrassed the operations of the joint-stock banks. All these disabilities, however, were finally swept away by the Joint-Stock Banking Act of '44. It was not, however, till '58 that an Act was passed permitting the creation of joint-stock banks with limited liability. The failure of the City of Glasgow and West of England banks, in '78, brought about another important alteration of the law respecting the liability of banks. The ruin caused by those two catastrophes drew the attention of the public to the hardships of the system of unlimited liability, and in '79 an Act was passed to establish "reserve liability." The essential element of "reserve liability" is that a portion

of the bank's uncalled capital shall be set aside to be called up only in case of failure, and for the purpose of liquidation. Banking practices in England and Scotland differ in many respects, but the cardinal distinction between the two systems lies in the power granted to Scotch banks of issuing notes not convertible except at the head office. It is entirely owing to this privilege that the Scotch banks are able to open so many branches. There is no necessity to keep gold reserves at the branches; a parcel of bank notes is all that is wanted. The Act of '45 regulating Scotch bank issues prohibits any new bank that may be opened in Scotland from issuing notes, and it is easy to see that this proviso renders banking in Scotland a monopoly. The Irish banks are also permitted to issue notes like the Scotch banks, but in their case all notes are payable "at the place or places where they have been issued or are issued." Thus the banks in Ireland, unlike the Scotch banks, must keep some gold at every branch. In England no banks located in London are permitted to issue notes, and even when an English country bank wishes to enter London it is compelled to give up its bank-note issue, should it have any. No new bank starting business in England is allowed to issue notes. At present the total note circulation of the country private and joint-stock banks is under 24 millions sterling, whilst the note circulation of the Bank of England is about 25 millions. The Scotch and Irish banks have a note circulation each of 5½ millions. The total number of joint-stock banks established in the United Kingdom is 185, many of which have numerous and very important branches. Their total paid-up capital is about £70,000,000. The deposits held by all the banks in the United Kingdom, both private and joint stock, are estimated at about 600 millions, the increase during the last ten years being about 90 millions sterling. Judging by the dividends paid, banking in the United Kingdom is one of the most prosperous of mercantile pursuits. The jubilee of the Union Bank was celebrated in Feb. '89.

Bank's Reserve. See MONEY MARKET.

Baptists. The Baptists hold that the only Scriptural mode of baptism is by immersion, and that the proper subjects are "believers"—persons of ripe age to exercise belief. Any other baptism they consider to be contrary to the original institution, contrary to the example of Christ, and also opposed to the spiritual design of the ordinance. Historians, themselves not Baptists, have shown that through many centuries these views have been held amongst the Waldenses, the Albigenses, the Vaudois, the Lollards and Wyclifites. Formerly, on the Continent and in England, they were opprobriously called *Anabaptists*. In 1537 Henry VIII. issued a proclamation against their heresy, as persons who rebaptised themselves. They began their separate existence as *Particular Baptists* in 1633, at a meeting-house in Wapping. As early as 1611, many Baptists, because of persecution, fled to America, and the feeble remnant in London published a *Confession of Faith* (1612) to vindicate their orthodoxy. In 1620 they memorialised the king for liberty of worship. Confessions of Faith they published again in 1644 and 1646. In 1680 a *General Assembly* of Baptists in London published a confession in thirty-two articles, and a Baptist Catechism, after the model of the Assembly's Catechism. Though Baptists do not formally subscribe to

creed, yet there is singular harmony of belief throughout the body. Almost from the time of the Reformation Baptists have been divided in two sections: the "Particular" (or Calvinistic), and the "General" (or Arminian) Baptists. (See below as to the amalgamation of these two sections.) Both sections numbered in '88 (latest returns), in the United Kingdom, 2,770 churches, 3,745 chapels, with 1,221,823 sittings, 1,863 pastors, 4,158 local preachers, 324,498 church members, 482,147 Sunday scholars, 48,977 teachers. These figures include only those churches which have sent returns to the Baptist Union. A rough estimate of the number of members and scholars in non-reporting churches would give about 25,000 members and 30,000 scholars additional. The colleges for training the rising ministry are: Bristol, founded 1770; Regent's Park, 1810; Rawdon, Bradford, 1804; Havfordwest, 1839; Pontypool, 1836 (formerly Abercravenny, 1807); Llangollen, 1862; Manchester (Brighton Grove), 1866; the Metropolitan, Pastor's College, 1856; Scotland, the Theological Hall, 1869. The Baptist Foreign Mission was originated in 1792 (see MISSIONARY SOCIETIES). Baptist churches are congregational in government, holding to the order of pastors (bishops) and deacons. The interests of different counties are cared for by 49 local associations; and the wider affairs of the denomination are attended to by the Baptist Union of Great Britain and Ireland, formed in 1831— which Union, while it has no legislative authority, is adapted to secure united action throughout the whole country. Of late years British and Irish Home missions have become affiliated with the Union, and the Annuity, Augmentation, and Education Funds have been established. On and from Jan. 1st, '90, the Irish Mission will pass from the control of the Council of the Union to that of a committee of the Irish Baptist Association, who will entirely govern and direct the affairs of the Mission. These societies represent the distribution of upwards of £12,000 per annum by the Council of the Union, under one executive. Many of the General Baptists early merged into Socinianism, so that in 1770 the "New Connexion" (Evangelical) became the true exponent of General Baptist views in the country. They have one college for the training of the ministry, at Nottingham, established in 1797, and also separate foreign and home missions; but they are affiliated with the Union for general and united action in Christian work, and are included in the foregoing statistics. There are 192 churches, 111 pastors in charge, 26,782 members; in addition to 10 churches, 10 agents, and 1,401 members in the Foreign Mission field. By a resolution of the Assembly of the Union passed on Oct. 10th, '89, the two sections, "General" and "Particular," will be merged in one; and the distinctive terms will be abolished, the word "Baptist" alone being used. Outside the Baptist denomination there are the Scotch Baptists, with a plural eldership. In England there are some 300 Hyper-Calvinistic Churches. It is computed that in the world at large there are 37,478 Baptist churches, 22,150 pastors and missionaries, and 3,326,512 church members. President of the Baptist Union for the year '89-90, Rev. Thomas Wigner (q.v.). Secretary, Rev. J. H. Booth, D.D. Offices of the Baptist Union, 119, Fournival Street, London, E.C. Consult *The Baptist Handbook*.

Barbadoes. A British West Indian island; geographically but not politically one of the Windward group. Barbadoes is of coral formation, and rises in a succession of limestone and coral terraces to a height of 1104 ft.; while it is almost encircled by coral reefs, which render the approach to it dangerous to mariners. The climate is healthy; but violent hurricanes occur and cause much damage. The scenery is bold and picturesque in parts. There are subterranean streams and caverns. Chief products are sugar and rum, aloes, indigo, cotton, tobacco, arrowroot, ginger, and other products. Coal and petroleum are found, and fisheries are profitable. For latest statistics see *BRITISH EMPIRE* (table). Consult Layard's "Through the West Indies."

Barbuda. A British West Indian island; a dependency of Antigua, and under the federal government of the *Leeward Islands*. Belongs to the Codrington family, and enjoys proprietary government locally.

Baring, Sir Evelyn, C.B., K.C.S.I., G.C.M.G., son of late Henry Baring, 1st cousin of present Lord Northbrook, b. 1840. Captain R.A. '68, major '75; private secretary to Lord Northbrook (Governor General of India) '72-76; English Commissioner of the Public Debt '76-79. Married '76 Ethel, daughter of Sir Rowland (Stanley) Errington. Controller General of Egyptian Finance '79-80; Financial Member of Council India '80-83. Since Oct. '83 H.M.'s Consul General and Minister in Egypt. Sir Evelyn possesses a more complete knowledge of Egypt than any living English official. While Controller General he, jointly with his colleague Mons. de Blegnières, practically ruled the country, and since his return to Egypt has again had to do so under perhaps more difficult circumstances. To a thorough knowledge of finance he joins remarkable administrative ability, extreme industry, strong common sense, and a rough and ready straightforwardness which baffles Oriental diplomacy more than the most studied untruth.

Barnaby, Sir Nathaniel, K.C.B., was b. at Chatham, 1829, and served his apprenticeship as a shipwright at Sheerness. He obtained in '48 an Admiralty Scholarship in the School of Naval Architecture at Portsmouth, and secured an appointment in the designing room of the Admiralty in '55. During the thirty years that he was connected with this department, he rendered important services in the design and construction of our fighting ships. The substitution of steel for iron in shipbuilding was mainly due to his exertions. Sir N. B., who was made a K.C.B. on his retirement as Director of Naval Construction in '85, is the author of the article on the Navy in the *Encyclopædia Britannica*. He has also identified himself with various philanthropic and religious movements. Sir N. Barnaby's paper on the new Admiralty designs for Armoured Ships, at the Institution of Naval Architects ('89), attracted considerable attention amongst naval men.

Barnum, Phineas Taylor, the American showman, b. at Bethel, Conn., 1810. Has been before the public for sixty years as manager, lecturer, author, newspaper editor, banker, and mayor of Bridgeport, Conn., and as the proprietor of his "Greatest Show on Earth." At eighteen years of age he entered the lists as a general merchant in his native town; at twenty-one he was editor and proprietor of the *Herald*

of *Freedom* in Danbury, Conn.; at twenty-six he owned and managed several successful museums and shows; in '42 he brought out Charles S. Stratton, the dwarf, better known throughout the world as General Tom Thumb; he made a fortune out of his *American Museum* in New York, but in '55, having returned to his native place, he engaged in a series of disastrous land and manufacturing speculations, which resulted in his bankruptcy. At the age of forty-one he engaged the late celebrated singer Jenny Lind to sing at 150 concerts in the United States; but while fulfilling this engagement she married Mr. Goldschmidt, and cancelled her contract after ninety-five concerts, the gross receipts of which were \$712,161, Miss Lind receiving \$176,675. At the age of forty-eight Mr. B. again came to London, and lectured at the St. James's Hall, and also in other large English cities. At the age of fifty-five he was elected to the *Connecticut Legislature*, and was thrice re-elected. At sixty-five he was elected *Mayor of Bridgeport, Conn.*, where he is also president of a bank, of a hospital, and of a steamboat company. He has made many large donations to public charities in and around his native place, and notably \$100,000 for a *Natural History Museum* to Tufts's College, Boston. He has written his autobiography, which he keeps up to date, publishing a new edition every few years, as well as works entitled the "Humbugs of the World" and "Struggles and Triumphs." One of his biggest strokes of business was the purchase of the elephant Jumbo from the Zoological Society in '81. The stuffed skin and skeleton of the children's favourite were brought over to London with the Barnum Show to "*Olympia*" in Nov. '89, and exhibited to the children of the children who used to play with the living Jumbo. Three times Mr. B.'s show and winter quarters at Bridgeport have been burnt out; and many times, while travelling, his tents and stables and trains have suffered serious damage from blizzards, tornadoes, and cyclones. Undoubtedly his greatest achievement, besides being the consummation of probably his highest ambition, is the importation of his vast collection of animals, curiosities, circuses and shows to London, in the eightieth year of his age, under his own personal superintendence.

Baroda. See DIPLOMATIC.

Baronetries conferred (Dec. '88 to Nov. '89):—Bohm, J. E., Esq., R.A.; Bramwell, Sir Frederick; Burns, George, Esq., founder of the Cunard Line of steamships; MacKinnon, William, Esq., C.I.E.; Porter, Sir George Hornidge, F.R.C.S.I., Surgeon-in-ordinary to Her Majesty in Ireland; Stokes, Professor, M.P., President of the Royal Society; Whitehead, Alderman James, late Lord Mayor of London.

Barrett, Wilson, the distinguished actor, was b. 1846, and made his *début* at Halifax ('64), subsequently visiting Leeds, Blackpool, and Leicester. Became manager of a theatre in Lancashire. Not being very successful he again sought engagements, and played at Aberdeen. Afterwards Mr. Barrett married Miss Heath, an artiste, and together, with much success, they performed in the provinces. Mr. Barrett's first appearance in London was at the Surrey Theatre in "*East Lynne*." Mr. Barrett achieved much reputation in "*The Lights o' London*" ('81), "*The Romany Rye*" ('82), "*The Silver King*" ('82), "*Claudian*"

('83), "*Chatterton*" ('84), "*Hoodman Blind*" ('85), "*Sister Mary*" ('86), and especially in his representation of *Hamlet* ('84). In the autumn of '86 he commenced a successful season in the United States. On his return, at the end of '87, Mr. Barrett took the leading part in "*The Golden Ladder*," a play produced conjointly by Mr. G. R. Sims and himself. In collaboration with Mr. Hall Caine, he subsequently produced "*Good Old Times*." On March 1st, '88, his romantic drama of "*Now-a-days*" was produced. On May 18th he took farewell of his patrons on his departure for another long American engagement. He appeared on this occasion in his original part of "*Ben-my-Chree*."

Barry Dock. This dock, portion of the Barry Dock and Railway scheme, was formally opened on July 18th, '88. The site is between Barry Island and the mainland, near Cardiff, where there was a channel a quarter of a mile wide, the entrance being protected by two breakwaters 2600 ft. and 700 ft. long respectively. The dock proper is 3100 ft. long, and at its widest is 1100 ft. in width; the water area is 70 acres, while in all there are seventeen coal tips, capable of dealing with 4,000,000 tons a year. The cost of the dock and surroundings has been rather over £850,000; with the railways the scheme will cost £2,000,000.

Barry, The Rt. Rev. Alfred, D.D., D.C.L., b. 1826. Educated at King's Coll., Lond., and Trinity Coll., Camb.: B.A. '48, Fourth Wrangler, and Seventh in the first class of the Classical Tripos. Ordained '50, and '51 appointed Sub-Warden of Trinity Coll. Glenalmond. In '54 he accepted the post of head master of the Leeds Grammar School, which he held till '62, when he was appointed principal of Cheltenham College. He was for some years a member of the School Board for London. In '68 Dr. Barry was elected Principal of King's Coll., Lond., in '80 Chaplain in Ordinary to the Queen, in '81 Canon of Westminster, and in '83 *Bishop of Sydney and Primate of Australia*. On his visit to London in '88 to attend the Pan-Anglican Synod, he was offered and accepted the appointment of *Assistant Bishop* to the Bishop of Rochester. Mr. Macmillan, the publisher, presented to the diocese his fine old mansion "*Knappdale*," Upper Tooting, as an episcopal residence. Among his best-known works are the "*Introduction to the Old Testament*," "*Notes on the Gospels*," and "*Cheltenham College Lectures*." Dr. Barry is also the author of a life of his father, Sir C. Barry, R.A., the architect of the Houses of Parliament.

Baseball. This game was comparatively unknown in England until the spring of '89, when the *American baseball teams*, which had been giving exhibitions of their favourite pastime in Australia, Ceylon, Arabia, Italy, and France, brought their long tour to a close by a visit to the mother country. Over 8000 persons, including the Prince of Wales, attended the opening match, which took place at *Kennington Oval* on March 12th; and though the players displayed marvellous hitting and catching powers, and returned the ball from the field of play with unerring accuracy, it is doubtful if the game will ever become popular with Englishmen. The teams were respectively designated *Chicago* (grey and black colours) and *All America* (white), and, after an interesting exhibition, the former won easily. The players subsequently played at most of our

urge provincial towns, and wound up a pleasant tour at Dublin.—**Description of the game.** The ground in the game of baseball is marked out in diamond shape, with bases 90 feet apart at each corner, the pitcher being in the centre. The "home" plate, a square of vulcanite, is set into the ground between the creases or batting paces, and 50 feet away from this, in the centre of the diamond, the pitcher or bowler's "box" is laid out. On the umpire taking up is customary position behind the striker, play is called, and to score it is necessary for the batter to make the whole circuit of the bases, either a base at a time or with a continuous effort. Any ball caught puts the striker out, and he also has to retire if touched by the ball in the hands of a fielder while away from a base. The pitcher, although at liberty to throw the ball anywhere he pleases, must so deliver it as to cross the home plate not higher than the striker's shoulder, or lower than his knee. Three such fair balls, or deliveries, if not hit, put the batsman out, and five wides, or unfair deliveries, entitle him to go to the first base. When three of a side are out the innings terminates, and the opposing side go in. It will thus be seen that baseball partakes of the features of both cricket and rounders, but of the two it more closely resembles the latter.

Baseterre. Capital of Guadeloupe (*q.v.*). Also capital of St. Christopher (*q.v.*), pop. 7,500.

Baslian, Henry Charlton, M.A., M.D. Lond., F.R.S. ('68), b. at Truro, 1837. Educated at University College, Lond. Elected Fellow of the Royal College of Physicians in '71, Lecturer on Pathology in St. Mary's Hospital in '66, Professor of Pathological Anatomy in University College in '67, and Physician to University College Hospital '71. He has contributed largely to the transactions of the learned societies with which he is connected, and published several works illustrative of the doctrine of evolution and the origin of life. One of his best known works is "*The Brain as an Organ of Mind*," which has been translated into German and French. Dr. R. is also an eminent authority on the diseases of the nervous system.

Basutoland. A native province of British South Africa. It lies inclosed between Natal, the Orange Free State, the Transkeian Territories, and Cape Colony. Basutoland was disannexed from Cape Colony in 1883, and has since been administered by a Resident Commissioner, under the direct authority of the Crown. See **BRITISH EMPIRE**. Consult "*Short History of Basutoland*," by Capt. L. Darwin, R.E., '86.

Batavia. Capital of Java (*q.v.*).
Bath and Wells, Rt. Rev. Lord Arthur Charles Hervey, D.D., 6th Bishop of (founded 905), fourth son of the 1st Marquis of Bristol, b. 1808. Educated at Eton and Trin. Coll., Cambridge; M.A. ('30), when he was sixth in 1st class in classics. Ordained deacon ('32), priest ('33); was rector of Ickworth ('33) and of Horningsheath ('53-59). Archdeacon of Sudbury ('62 until elevated to the episcopate '69). In '88 Lord H. received a handsome testimonial from the clergy in his diocese, in connection with his 80th birthday. He celebrated his golden wedding, July 30th, '89, when he was presented with a testimonial by the ladies of the diocese.

Bath, The Most Honourable Order of the. Originally established by King Henry IV.,

at his coronation, 1399, this order fell into neglect in the seventeenth century, but was revived in 1795, under George I. It was remodelled by the Prince Regent in 1815, to commemorate the auspicious termination of the long and arduous contest in which the Empire had been engaged, and was further enlarged in 1845, and now has three classes, each with Military and Civil (nominal) subdivisions:—

G.C.B. . Knight Grand Cross Bath.

K.C.B. . Knight Commander Bath.

C.B. . Companion Bath.

Members of the first two classes, being knights, are entitled to the prefix "Sir." The G.C.B.'s are not to exceed 50 for military service, exclusive of the sovereign and princes of the blood, and such distinguished foreigners upon whom may be conferred the honorary dignity, and 25 for the civil service; of the second class there may not be more than 123 for military and 80 for the civil service, excluding in the former case those admitted as honorary members, and except in certain special circumstances when there is power to increase the numbers. Of Companions there may be 640, of whom 600 may be for military and 250 for civil service. An officer must have received 1 medal or some similar honour, or have been specially mentioned in despatches for distinguished service in action, before he can be nominated; and he must be of the rank of rear-admiral or major-general, and must have been appointed to the second class, before he can receive the Grand Cross of the order. The badge is a crimson ribbon, with motto "*Tria juncta in uno*" (Three joined in one). The Dean of the Order is the Dean of Westminster. Admiral the Hon. George Grey is Bath King of Arms; Sir Albert W. Woods is Registrar and Secretary, and Charles George Barrington, C.B., is Gentleman Usher of the Scarlet Rod. See **KNIGHTHOODS** conferred in '89.

Batoum. The chief mercantile outlet of the Russian province of the **Caucasus**; acquired from the Turks in 1878, and used as a free port until '86, when Russia repudiated the *porto franco* protocol of the Treaty of Berlin. The Russians have almost entirely rebuilt the town, which now contains 10,000 inhabitants; is defended by a series of batteries, and it being provided with a new harbour at a cost of half a million sterling. The Czar visited it Oct. 7th, '88, and laid the foundations of a new Orthodox Cathedral. Is not only the outport of the petroleum industry of the Caspian, with which it is connected by a railway 560 miles long, but also of the new **Transcaspiian Railway** (*q.v.*), extending from opposite Baku to Samarcand, nearly nine hundred miles, and tapping the trade of Central Asia. A regular service of thirty tank steamers now runs from Batoum to the ports of Europe, and the port is provided with storage accommodation for 20,000,000 gallons of oil, which is equal to twenty-five tank cargoes of 3,000 tons apiece. Export, '87, nearly 300,000 tons of petroleum products; besides wine, maize, and manganese ore. Is a second-class naval station, ranking next to Sebastopol, and possesses a direct military road to Kara.

Battenberg, Alexander, Prince of, and ex-Prince of Bulgaria, is the son of Prince Alexander of Hesse and Princess Julia of Battenberg, and was b. 1857. Being closely related to the Russian Imperial family through

his aunt, the late Empress Marie, wife of the late Czar Alexander II., the young Prince of Battenberg entered the Russian army and served with it in the Russo-Turkish war (1877-78). After the war he joined the German army as an officer of the Prussian regiment of the Garde du Corps. Elected by the unanimous vote of the National Sboranje, he entered upon his new duties July 1879. The history of the Prince from that time until his abdication and departure from Sofia (Sept. 9th, 1886) is chiefly a history of Bulgaria. Prince A. received the investiture of K.C.B. by Her Majesty on his visit to this country. His proposed betrothal to the Princess Victoria, the eldest sister of the present German Emperor, though understood to have been personally favoured by the late Emperor Frederick and the Empress Victoria, was opposed by Prince Bismarck for political reasons, and consequently was not formally sanctioned. The reason for the abandonment of the match was, it is believed, the objection of the Tzar. The Prince in Feb. '89 married the Frauline Loisinger, a celebrated actress (*q.v.*), and retired to his estate at Gratz, in Styria.

Battenberg, Henry Maurice, Prince of, son of Prince Alexander of Battenberg (Hesse) and the Countess Von Lauck, daughter of a former Polish Minister of War, who was raised to the rank of Princess on hermorganatic marriage with the ruler of Hesse, b. Oct. 5th, '58, married (July 23rd, '85) Princess Beatrice Mary Victoria Feodora, the ninth and youngest child of Queen Victoria, and has issue, a son, Alexander, b. Nov. 23rd, '86, a daughter, Victoria Eugenia Julia Ena, b. Oct. '87, and a daughter b. '89. Was received on his return from Archacon, April 4th, '89, by President Carnot.

Bavaria. See GERMANY; and for Ministry see DIPLOMATIC.

Bayard, Thomas Francis, U.S. Senator and Secretary of State, was born at Wilmington, Delaware, Oct. 29th, 1828. Mr. Bayard was educated for a mercantile career, but adopted the profession of law, and practised at the U.S. bar for several years. He was elected to the U.S. Senate as a democrat in March 1869, in succession to his father, and was re-elected in 1875 and 1881. On the succession of Governor Grover Cleveland to the Presidency, Mr. Bayard was appointed *Secretary of State* (March 15th, 1885). He is the fourth of his family in direct succession who has sat as Senator for Delaware, and claims to be a lineal descendant of the Chevalier Bayard, the knight *sans peur et sans reproche*. Mr. Sec. Bayard was *President of the Fisheries Commission*, which sat at Washington, Jan. '88, and which adopted the terms of the treaty, which the American Senate subsequently refused to ratify.

Beale, Lionel Smith, M.B., F.R.S., was b. in London, 1828, and educated at King's College, London, of which he is an honorary Fellow. He is Professor of the Principles and Practice of Medicine at the same institution, and physician to the hospital in connection with it. He is a member of a number of learned societies both at home and abroad, and is in the front rank of those scientists who have distinguished themselves by their *microscopical research* and their discoveries in the departments of *Physiology and Medical Chemis-*

ence upon Religious Thought," "The Mystery of Life: Acts and Arguments against the Physical Doctrine of Vitality," "The Physiological Anatomy and Physiology of Man" (published in conjunction with the late Dr. Todd and Mr. Bowman), and "How to Work with the Microscope," which has run through many editions.

Bechuanaland. The country of the Bechuana (pron. Betshwana). A region of S. Africa, extending from Cape Colony to the Zambesi, between the Transvaal and Kalahari. It now consists of three sections—*British Bechuanaland (q.v.)*, Northern Bechuanaland Protectorate, and the undefined portion beyond. The first has been formally annexed, and is ruled by an Administrator acting under the Governor of Cape Colony. A body of mounted police maintain order here and in the Protectorate. British Bechuanaland extends from the Griqualand and Transvaal borders to the Molopo river and Ramathlabama Spruit. The limits of the Northern Bechuanaland Protectorate are:—West of the boundary of the South African Republic as defined by Convention of Feb. 1884, to the 20th meridian of E. longitude, thus including part of Kalahari; north of R. Molopo as far as the 22nd parallel of S. latitude. Portions of these lands are thickly wooded and well watered, intersected here and there with open plains in the south, while in the north immense plains are dotted with numerous "vleys" of fresh water, and large salt "pans" or lakes. Gold, coal, and lead have been found in Bechuanaland; and as this vast country has not yet been scientifically prospected for minerals, it is reasonable to suppose that it is possibly not inferior in this respect to its neighbours, Matabeleland, the Transvaal, and Griqualand, countries rich in the precious metals, diamonds, and coal. In '83-4 bands of Boer filibusters had invaded what is now British Bechuanaland, had deposed certain chiefs and set up others, and were forming two so-called "republics," *Stellaland* and *Goshen*. At length their lawless proceedings obliged the British Government to interfere. Sir Charles Warren, with a force of 4,000 troops, was sent into the country. He suppressed the fighting and raiding that had been going on, restored order, arranged and delimited the Protectorate, which was declared in March '85, the annexation of British Bechuanaland being effected in September of the same year. It may be added that in '86 Boer raiders trekked in numbers into the country beyond the Protectorate and Matabeleland (*q.v.*). Bechuanaland possesses a wide extent of fairly fertile land, a splendid climate (suitable for Europeans), a sufficient rainfall, a peaceful native population, and means of access by railway; and time, patience, and steady rule are all that are needed to create in Bechuanaland a future outlet for the more respectable element of the surplus population of this country. Consult "Proceedings of Royal Geographical Society," Bechuanaland Blue-Book (Cape-town, '89); Mackenzie's "Austral Africa"; "Correspondence respecting the Affairs of Bechuanaland, South Africa, and the Adjacent Territories," with maps (Parliamentary Paper); "Further Correspondence" (Parliamentary Paper); "Bechuanaland," by a Member of the Cape Legislature; Rev. J. Mackinnon's "South African Traits"; Silver's "Handbook to South Africa"; Theale's "History of the Boers"; Petherick's "Catalogue of the York-Gate Library"; *The Torch*, etc.

Bedford, Rt. Rev. E. C. Billing, Bishop Suffragan of, b. 1836. Graduated at Worcester Coll., Oxon, 57; curate of St. Peter's, Colchester, 58-60, and of Compton Bishop, Somerset, 61; sec. Church Missionary Soc., Diocese York, 61-63; vicar of Holy Trinity, Louth, 63-73; and of Holy Trinity, Islington, 73-78, in which year he accepted the rectory of **Spitalfields**, which he held until his appointment as Bishop Suffragan of Bedford, in succession to Dr. Walsham How. Dr. B.'s appointment gave great satisfaction in the East End of London, where he worked for ten years earnestly amongst the poor, devoting his attention chiefly to the elevation of the degraded classes, and the rescue of fallen women. In '86 he was appointed **Frebendary** of Holborn in the See of London, and Commissioner under the Pluralities Act for the Archdeaconry of London. He was also Chaplain of the London Lay Helpers Association. Dr. B. is a Liberal Low Churchman, and works harmoniously with men of all schools of thought.

Bedford Grammar School, founded 1566; reorganised 1873. Annual income, £4,500. Two exhibitions to any place of higher education approved by the governors of £70 and £60 for four years, full vacant annually. The foundation of new buildings was laid Oct. '89. **Funds**, 800. **Head Master**, J. S. Phillpotts, M.A. **Bedfordshire County Council** for. See **COUNTY COUNCILS**.

Beecher-Stowe, Harriet Elizabeth, the daughter of Lyman Beecher, was b. 1812, at Litchfield, Connecticut. Married in '36 the Rev. Calvin E. Stowe, D.D., and soon afterwards wrote several tales and sketches which were published under the title of "The May Flower." In '50 she wrote for the *National Era*, an anti-slavery paper, a serial entitled "**Uncle Tom's Cabin**," published in book form ('52), and met with great success in the United States, 31,000 copies being sold in three years and a half. In Great Britain its sale was enormous. The work has been translated into twenty different languages, and it has been dramatised in various forms. Afterwards published "A Peep into Uncle Tom's Cabin for Children" ('53), "A Key to Uncle Tom's Cabin" ('53), "The Christian Slave," a drama founded on "Uncle Tom's Cabin" ('55). Visited Europe ('53), and soon afterwards produced "Sunny Memories of Foreign Lands" ('55), "Dred" ('56), "The Minister's Wooing" ('59), "The Pearl of Orr's Island" ('62), "The Chimney Corner" ('68), "Pink and White Tyranny" ('71), "Pogonuc People: their Loves and Lives" ('78). She is a sister of the late Rev. Henry Ward Beecher.

Begum, an Indian word signifying Princess or Queen.

Belgian Political Parties. The chief parties are two—viz., the **Clericals** and the **Liberals**—and there are, in addition, the minor groups of **Protestants** and **Socialists**. Neither of the two last named, however, wield an independent parliamentary influence, and both in the ordinary affairs of political life are anti-Catholic, and consequently vote with the Liberals. The **Catholics**, or **Clericals** as they are usually called, have now been in power for rather more than four years, the present ministry, under M. Beernaert, having, in October '87, succeeded the Liberal administration of M. P.ère-Orban, which had held office since June '78. At the present time the Catholics are in a considerable

majority, commanding 97 votes in the Chamber, against the 41 of the Opposition. The last election to the Chamber was in June '88, previous to which the strength of parties was—Catholics 98, Liberals 40. The ministerial party, consequently lost a seat at those elections, although at those held in June '86 it increased its numbers from 86 to 98, the electoral practice being for one-half the Chamber to retire every two years. The **Senate**, which is composed of exactly one-half the number of members of the Chamber of Representatives, viz., 59, contains 50 Catholics and 9 Liberals. At present, the chief source of political trouble in Belgium is the demand of the unfranchised for universal suffrage. The continued refusal of the Government to introduce a measure for this purpose having led to repeated demonstrations both in Brussels and elsewhere. The **Beernaert ministry**, however, steadily refuses to support any measure granting the suffrage to that section of the population which does not at present enjoy it, and which is, for the most part, exclusively Socialist and strongly anti-Clerical.

Belgium. A kingdom under Leopold II. of Saxe-Coburg. By constitution of 1831 Belgium is declared to be a constitutional and hereditary monarchy—executive power in King; legislative power jointly vested in King, Senate, and Chamber of Deputies. Deputies must be Belgians of twenty-five years of age, elected for four years (half the Chamber retiring every two years, except in case of dissolution, when all go out) by citizens of twenty-one years of age who have passed an elementary examination, belong to the professional classes, or who pay £1 12s. 6d. annually in direct taxes. One deputy allotted to each 40,000 of population; present number of Chamber is 138. Both senators and deputies are paid by State. Number in Senate half that of the Chamber; senators are elected by same electorate for eight years (half retiring every four years except on dissolution), to be forty years of age and pay taxes to annual amount of £84.

Area, 11,373 sq. m.; pop. 5,974,743. (For army and navy see **FOREIGN ARMIES** and **FOREIGN NAVIES**.) Estimated ordinary revenue for '89, 322,345,702 fr.; expenditure, 314,377,948 fr.; debt ('88-9), 1,915,846,574 fr., in addition to which there are various annuities to be met, amounting to 39,106,000 fr.; special imports, '87, 1,431,939,000 fr.; special exports, 1,240,624,000. No state religion. (For history '88 see ed. '89.)

'89. **POLITICAL.**—At the close of the old year an important question of International Law was decided by the Brussels Civil Tribunal. A company, established at Brussels, had undertaken to furnish to the Bulgarian Government several millions of cartridges. The Government was sued for non-payment, and pleaded that, in virtue of the principles of International Law, the Belgian tribunals had no jurisdiction over it. The company replied that the Belgian tribunals could enforce private contracts made by a foreign Government, and cited certain decisions of Sir Robert Phillimore. The tribunal upheld this argument, and drew a distinction between the case in which a foreign Government acts as a Sovereign Power, when it is independent of every other State, and that in which it makes a private contract; but, nevertheless, held that it could not entertain the claim, because the company had by a formal declaration accepted the jurisdiction of the Bulgarian tribunals.

The question of obligatory military service gradually coming to the front, the King (Jan. 4th), in his reply to the New Year's address by the Burgomaster of Brussels, expressed himself in favourable terms respecting it. The *Moniteur* (10th) contained a statement of the Anglo-Belgian Telegraph Convention having reference to the concession to the Submarine Telegraph Co.: the two existing cables to be taken over by the two countries. A Bill was brought in (20th) to prevent the adulteration of all kinds of food. Gille, a student, was sentenced (22nd) by the Brussels Assize Court to six months' imprisonment and a fine of 100 fr. for publicly insulting the Queen. In Feb. (28th) Mr. E. Grattan, for thirty years British Consul-General at Antwerp, retired, a testimonial being presented to him at a banquet held in his honour. The great State trial before the Assizes at Mons of twenty-seven men accused of having conspired against the safety of the State terminated (May 25th) in the acquittal of all of them except Laloi and André, *agents provocateurs*, and Hublet (accused of a minor offence). It was proved during the trial that the scheme was the work of *agents provocateurs*, some of whom had even been in direct communication with certain Ministers. In June the Belgian Ministry proposed to the Chambers a vote of 10,000,000 fr. as the subscription of the Belgian State towards the construction of the Congo Railway (q.v.). In answer to M. Janson (18th) the Premier said the Government would neither dissolve nor resign in connection with the trial of the Socialist leaders at Mons. The debate was continued (19th), but terminated without practical result. At the end of June the Shah was entertained by the King at Brussels. News was received (July 19th) from the Resident, M. Hancuse, that the political situation at Stanley Falls was most favourable. Count Brialmont was said to have elaborated a plan for completing the defences of Antwerp at a cost of 30,000,000 fl. Army manoeuvres commenced (Aug. 4th). The Brussels Procureur du Roi despatched to Paris a commission (16th), charged to examine Madame Adam as to the origin of the documents stolen at the Belgian Ministry of the Interior, and published in the *Nouvelle Revue*. It was stated that M. Foucard, or de Mondion, the contributor to the *Nouvelle Revue*, who received from General Boulanger 32,000 fr. Secret Service money for missions in Belgium and Germany, procured for Madame Adam the documents, which were published in a garbled form and supplemented with fictitious documents. Mme. Adam considered the theft of the documents a political action, and said it would be her object to combat Prince Bismarck's influence everywhere. A Congo Council of State, composed of eminent Belgian advocates, to be formed at Brussels. The Government (24th) invited the signatory Powers of the Berlin Treaty to a Conference on Suppression of the Slave Trade to be held at Brussels in October. The Belgian field artillery armed with Krupp guns, and the Belgian model of the Mauser magazine rifle adopted by the Belgian army. The Government to grant 500,000 fr. to the Belgian National Exhibition, to be opened in London on April 30, '90. In September the *Cologne Gazette* published a series of not very favourable articles on the Belgian military system, which were supposed to be a summary

of the report of the German military attaché at Brussels. Great Belgian military manoeuvres were held in the Walloon country. Preparations begun in October for celebrating in '90 the 25th anniversary of the accession of the King, the Communal Council at Brussels voting 100,000 fr. for the purpose. M. Nieter, a Belgian ministerial official, who was charged with stealing State papers and accepting bribes, absconded, but said he would present himself for trial. In the same month M. Frère Orban made a speech at Liège, calling for the formation of a truly national party by all the fractions of the diverse political parties of the State, which created a great sensation. The Brussels Crown Prosecutor decided in Nov. that the question of the documents published by Mme. Adam must be submitted to the Tribunal of First Instance. M. Georges Meter, a high ministerial official, was meanwhile suspended. A meeting of workmen was held (12th) to protest against the Electoral Reform Bill and demand universal suffrage. Meeting of Anti-Slavery Conference, presided over by Prince de Chimay, Belgian Minister of Foreign Affairs (18th). In addition to the representatives of the fourteen signatory Powers, plenipotentiaries from Persia and Zanzibar were present. Debate on the conduct of some of the Ministers who had held communication with the *agents provocateurs* at Mons before they had entered the service of the Administration of Public Safety.—GENERAL. Jacques Meyer, of the Rue Vivienne, Paris, who had absconded with 4,000,000 fr., arrested at Brussels (Jan. 19th). Meeting of Brussels Socialists to protest against emigration of workmen (20th). Railway accident at Grönendal: 14 killed, 50 injured (Feb. 3rd). Collision at the Namur station: two officials killed (4th). Remains of British officers removed from Waterloo to the Cemetery Evère (8th). Serious and fatal accident at the Mauray colliery (15th). Great fire at Marchiennes brick-works (27th). General Boulanger arrived at Brussels on his flight from Paris (April). Strike of colliers and quarrymen at Liège (May 23rd). Dowager Marchioness of Chastellier shot at the parsonage, Moulbain (June 5th). Railway accident at Ciney (26th). A return published this month gives the number of public-houses in Belgium as 150,000, two for every forty of the population, and the annual consumption of spirits 54,000,000 litres. An International Brewery Exhibition was held at Antwerp in August. Total destruction by fire (28th) of the Convent of the Alexins at Louvain; many injured. The first session of the newly-formed International Law Association opened at Brussels (7th). International Astronomical Congress opened at Brussels (Sept. 10th). Terrible explosion of large number of Spanish cartridges at Antwerp docks; 5570 barrels of petroleum, value 1,500,000 fr., fired; 135 killed, 100 seriously and 250 slightly wounded; damage to the extent of 500,000 fr. Subscriptions for the relief of the sufferers reached over 1,000,000 fr. Strike of engineers and stokers of Transatlantic steamers at Antwerp (Oct. 14th). Accident on the Southern Railway (16th). Strike of colliers at the Borinage coalfield (Oct.). A return published in July showed that there were expelled from Belgium between Feb. 6th, '88, and Feb. 6th, '89, 231 foreigners, three expulsions only being for political reasons.—SOCIAL. Death of Count van de Straten-tonthox, Grand Marshal

of the Court for the past thirty-one years, aged 80 (July 7th). Prince Baldwin, son of the Count of Flanders, was appointed Captain of Carabiniers (soth). Death of M. Van Ginderachter, of Brussels (Sept. 21st).—**COMMERCIAL.** The Nordenfeldt Company of London furnished 300 quick-firing guns for the fortifications of the Meuse (Jan.). The *Moniteur* published the convention between the Belgian Government and the German Australian Steamship Company at Hamburg for establishing regular communications between Antwerp and Adelaide, Melbourne, and Sydney. There is to be one departure every twenty-eight days from Antwerp, and the company engages itself to make at least six, and at most thirteen, return voyages to Antwerp annually. The vessels coming from Hamburg may call at Bremen, but at no other Continental port. The Belgian Government will pay a subsidy of 7500 fr. for every out and home voyage (Aug. 23rd). Company formed at Antwerp for purchase of large tracts of land in Madagascar (Sept. 3rd). A new Congo Company was formed at Ghent (Oct.), with the view of working tobacco plantations in the State (q.v.). The official returns show exceptionally good harvest for '89. It was also officially stated that during '88 1,218,481 tons of Belgian coal were raised, value 162,018,000 fr., employing 103,447 colliers. It was stated (Nov. 14th) that the industrial movement in Belgium had become extremely active. A considerable rise had been experienced in the shares of all industrial companies and collieries of good standing. Consult J. L. Motley's "The Rise of the Dutch Republic" and his "History of the United Netherlands"; *The Almanach de Gotha*; *Statesman's Year-Book*.

Belize (Bay-leez). Capital of British Honduras (q.v.) and a port. Formerly the name of the whole colony. Pop. 5,767 in 1881.

Bellamy, Edward, b. 1850, in the village of Chicopee Falls, Mass.; ed. Union Coll., New York State, and studied a year in Germany. On his return home he went to the bar, but did not practise, preferring to devote himself to journalism. In '71 he went on to the staff of the *New York Evening Post*; in '72 the *Springfield Union*, which he gave up in '76 for literature proper. Amongst his works are: "A Nantucket Idyll," "Dr. Heidenhoff's Process," "Miss Ludington's Sister," "The Blind Man's World," and that by which he is best known in this country—"Looking Backward," which has reached its 122nd edition.

Beluchistan. A British protectorate south of Afghanistan, extending to the Persian Gulf. Population, 255,000 tribesmen. Quetta, administrative centre. Railway to Candahar completed. The chiefs of Beluchistan are mere nonentities, and receive small pensions from the Indian Government.

Bengal. See INDIA; and for Ministry, etc., see DIPLOMATIC.

Benguela. A province of Portuguese West Africa. See ANGOLA.

Bennett, Sir James Risdon, M.D., F.R.S., b. at Komey, 1809. M.D. Edin. '31. President of the Royal College of Physicians ('76-80). Is consulting physician to Victoria Park Hospital for diseases of the chest, and hon. phys. and Governor of St. Thomas's Hosp. He was a commissioner to the Paris Exhibition '76, and Chairman of the Executive Committee of the International Medical Congress '81, in which year he

was knighted. His "Essay on Acute Hydrocephalus" obtained the Fothergill gold medal. He is also the author of "Lectures on Cancerous and Intra-Thoracic Growths," and is one of the most eminent living authorities on chest diseases.

Berbera. A town and port on the north Somali coast. Caravans from the African interior arrive here, and the trade with Aden is considerable. Has an excellent and capacious harbour.

Berbice. A county of British Guiana (q.v.). **Beresford, Lord Charles William Delapoor**, M.P., was b. 1846. Entered the Royal Navy (1859). In 1863, while a midshipman on board the *Defence*, he twice saved life from drowning, and received the bronze medal of the Royal Humane Society, and the gold medal of the Liverpool Shipwreck and Humane Society. To these distinctions was added the clasp of the Royal Humane Society (24th Feb. 1871). Accompanied the Prince of Wales to India (1875-76) as naval aide-de-camp. At the bombardment of Alexandria in 1882, commanded the *Condor*, and distinguished himself during the action by his bravery and naval skill. The *Condor* was largely instrumental in silencing the Marabout fort, and earned the honour of a special signal from the Admiral, "Well done, *Condor*." For these services Lord Charles was promoted to the rank of captain. Served in the Soudan campaign under Lord Wolseley for the relief of General Gordon, and was in command of the Naval Brigade in the expedition across the desert. Elected Conservative Member for Waterford '74-80, and for East Marylebone '85 to July '89. Appointed a Lord of the Admiralty Aug. '86; resigned Jan. 18th, '88. In discussion on Navy Estimates for '88 in the House, Lord Charles proposed an extra expenditure of £200,000 for new ships, and a portion of this programme was adopted by the Govt. in the Naval Defence Act (q.v.) of '89. Resigned (July '89) his position as M.P., in order to qualify for Admiral. Lord C. in his recent visit to Paris (Nov.) sustained a severe accident from the fall of his horse.

Berkshire, County Council for. See COUNTY COUNCILS.

Berlin and Baltic Ship Canal. A rumour came from Berlin under date Oct. 18th, '89, that serious attention was being paid in official circles to a well-known project of connecting the Baltic and Berlin by a ship canal. The idea, it is said, was a favourite one of the late Dr. Strousberg, and that Count Moltke thought it worthy of consideration. Admiral Botsch once discussed the matter in print, and between the rivers Elbe and Oder decided in favour of the deepening of the latter. On the date above named it was said that a committee had been formed to give effect to the Admiral's proposal.

Bermuda Islands. Called after Bermudez, a Spaniard, who discovered them in 1515. Also named **Somars Islands**, after Admiral Somers, whose ship was wrecked here in 1609. The "Bermoothes" of Shakespeare. Situated in the North Atlantic, 600 miles east of Cape Hatteras. For latest statistics see BRITISH EMPIRE, etc. (table). There is regular steam communication between Bermuda and New York.

Bernard-Bears, Mrs., a daughter of Mr. Wilby Whitehead, an artist, and the widow of Captain Dering, son of Sir Ed. Dering, Bart. She was trained for the stage by Mr. Herman

Vezin. She made her *début* at the Opera Comique. Has played leading parts in several high-class companies. In '86 she secured great popularity in the provinces by her powerful rendering of *Fédora*, a character in which some time previously Madame Bernhardt had made a great sensation in Paris. Mrs. Bernard-Beere played in "Still Waters Run Deep" at the Criterion last spring. At Mr. De Lara's vocal recital at Steinway Hall in March last she sang some old English ballads. She has been very successful in her impersonations in "As in a Looking Glass," as Julia in "The Rivals," Sanguaire in "Michael Strogoff," Princess de Boissac in "Adrienne Lacouivre," Bathsheba Everdene in "Far from the Madding Crowd," Mrs. Devenish in "Lords and Commons," Princess Zicka in "Diplomacy," and Ariane in Mrs. Campbell-Præd's play.

Bernhardt, Mlle. Rosine Sarah, was b. in 1844, at Paris; the most distinguished French actress of her day. She is of Jewish descent. She entered the Paris Conservatoire at the age of fourteen, where she studied tragedy and comedy. Joining the staff of the Théâtre Français, she made her *début* in Racine's "Iphigénie," and in Scribe's "Valérie," but was not very successful, and retired for a time from the stage. Her first grand success was as *Marie de Neuberg*, in Victor Hugo's play of "Ruy Blas." Becoming very popular by her representations in "Junie," in "Andromaque," and in "La Sphinx," she was placed on the staff of the Théâtre Français. Since that time her popularity has been constantly increasing. She visited London, in company with other members of the Comédie Française, and performed at the Valet Theatre in '79, '86, '88; and again in '89, when she appeared at the Lyceum in "La Tosca." She had previously made a most successful tour in Italy, Algeria, and South America. On 15th April last she appeared in "Iena" at the Paris Variétés, and in Sept. at the Porte St. Martin Theatre in the revival of "La Tosca." Mlle. B. married, in '82, M. Damala, who died last August. Has recently had the Order of the French Academy conferred on her. She is also the authoress of a one-act play entitled "L'Aveu," produced in '88.

Besant, Walter, was b. at Portsmouth 1838. Educated at King's College, Lond., and Christ's College, Camb., where he graduated in mathematical honours. After leaving the University he accepted the appointment of Senior Professor in the Royal College of Mauritius, which he resigned in consequence of ill health. He made his *début* as an author in '63 with "Studies in Early French Poetry," which was followed two years later by the "French Humorists." He subsequently contributed to the "Ancient and Foreign Classics," and "New Plutarch" series of publications. In conjunction with the late Mr. James Rice he commenced a successful career as a romance writer; the most popular production of their joint authorship was "Ready Money Mortiboy," which they also dramatised and put on the stage at the Court Theatre. Of the novels which Mr. Besant has published in his own name, the most popular are, "All Sorts and Conditions of Men," "All in a Garden Fair," and "Children of Gibbon." There is a charm of style about Mr. Besant's writings which marks his strong individuality; and the far-reaching influence he has exerted by his graphic delineations of the social life of the present day

has been manifested by the inauguration of various movements for relieving the dull monotony of the lives of the poor in our crowded cities. The most important of these movements was that for the establishment of the *People's Palace*, in the East End of London. Mr. B.'s recent books are "The World went very well Then" and "Katherine Regina" ('87), "Fifty Years Ago," "Herr Paulus," "Eulogy of Richard Jefferies," and "The Inner House" ('88), "Faith and Freedom," "The Bell of St. Paul's," and "To Call Her Mine" ('89). He has for many years been secretary to the Palestine Exploration Fund, and in '71 produced, jointly with the late Professor Palmer, a history of Jerusalem. Mr. B. has also interested himself in questions affecting the rights of authors, and was appointed first chairman of the executive committee of the Incorporated Society of Authors (q.v.).

Bessarabia. A Russian province bordering on the Danube, ceded by Turkey to Russia in 1812. Area 28,386 sq. m., pop. 1,369,775. It acquired political prominence at the close of the Crimean war from the surrender of a portion of it by Russia. The portion withdrawn from Russian rule was added to Moldavia, which coalesced in time with the adjoining province of Wallachia, and formed the principality of Roumania (q.v.). At the close of the last Turkish war (77-8), B. was restored to Russia, the Roumanians receiving in return the Dobrukscha, south of the Danube. Since the annexation, a considerable development has taken place in the trade of B., owing to the establishment of a subsidised line of Russian steamers on the Danube.

Betting, Law on, in '89. The question whether an agent can be sued by his principal for breach of duty in not making bets on horse-racing, was raised in the case of *Cohen v. Kettell*. A jury had found for the plaintiff, but on appeal to the Queen's Bench Division (March 11th) it was held that the action could not lie, and leave to go to the Court of Appeal was refused.

Bible Society, The British and Foreign, was established in 1804, its object being the circulation of the Scriptures. Up to '89 over 120,136,000 Bibles and portions of the Bible, in 290 languages and dialects, had been issued under its auspices. The expenditure of the Society in '88-9 was over £225,000. Work abroad is carried on not only through the missionary societies, but by some twenty-six agents in foreign countries, under whom a large staff of colporteurs is engaged in distributing the Scriptures. Subscriptions and donations should be made payable to Mr. C. Finch, at the Bible House, 146, Queen Victoria Street, E.C. Secretaries, Rev. J. Sharp, M.A., Rev. W. M. Paull.

Biblical Archaeology, '89. In our previous volumes we have indicated the constitution and scope of the Society of Biblical Archaeology, which has by its papers done much to supplement the want which has been felt in England of professorships for the archæological learning of Egypt and Mesopotamia, which is cultivated in so many of the universities of Continental Europe and the United States. The *Proceedings* of the Society for '89 announce an elaborate reproduction of the *Bronze Ornaments of the Palace Gates from Balawat*, of which Parts I., II., III., and IV., have now been issued to sub-

scribers; and the issue of *Records of the Past: being English Translations of the Ancient Monuments of Egypt and Western Asia*. The first volume of the new series, so long expected, has now been published; and, in the production of the entire work, Professor Sayce, the general editor, will be assisted by Mr. Le Page Renouf, Professor Maspero, Mr. Budge, Mr. Pinches, Professor Oppert, M. Amiaud, and other distinguished Egyptian and Assyrian scholars. The new series of volumes differs from its predecessor in several respects, more especially in the larger amount of historical, religious, and geographical information contained in the introductions and notes, as well as in reference to points of contact between the monumental records and the Old Testament. *Translations of Egyptian and Assyrian texts* will be given in the same volumes. The volume which has appeared, however, does not supply a translation of the texts the versions of which are given. The Society of Biblical Archaeology still continues to enjoy the prosperity to which it has been for many years accustomed; and its meetings and publications have presented hitherto only their recognised characteristics. An attempt, however, is about to be made to widen the scope and the basis of the Society in a particular direction; so, that, whilst still reserving for technical papers the severely learned consideration with which they can alone be competently treated, papers more generally attractive, and of more popular form and delivery, may be introduced into the programme. Many important papers have passed successively before the several meetings of the Society and into its *Proceedings*; to which Dr. Karl Fiehl has contributed various articles of interest and value, approaching the subject of Biblical Archaeology in every case by the path of Egyptology. Two papers on the *Legends concerning the Youth of Moses* have been furnished by Dr. A. Weidemann; and the Rev. C. J. Ball has carried on his expositions of the *Inscriptions of Nebuchadrezzar the Great* through several months of the *Proceedings*, in one of which he dilates upon Nebuchadrezzar's record of his rebuilding the great Tower at Birs Nimroud. The Rev. G. W. Collins has supplied a very interesting paper on *Ashtoreth and the Ashera*, in which he contends, in modification or rather in contradiction of various perversions of passages from the Old Testament, that "Ashtoreth and the Ashera have no connection whatsoever one with the other, and that the Ashera, so far from representing a goddess, is nothing but an instance of Phallic worship." Of organisations outside the Society of Biblical Archaeology, it should be mentioned with how much favour questions akin to its own objects are welcomed by the Council and members of the *Victoria Institute*, or *Philosophical Society of Great Britain*, at two of the recent meetings of which Professor Sayce read a specially prepared paper on the *Cuneiform Inscriptions of Tel-el-Amarna*, and M. Edouard Naville gave an elaborate estimate of the *Historical Results of the Excavations at Ebla*. The *Babylonian and Oriental Record* receives contributions to Biblical Archaeology in a like spirit, which it has frequently exemplified, and particularly in its discussion, at the practised hands of Mr. W. St. Chad Boscawen, of the analogies or affinities of the Hebrew narrative of the *Cherubim at the Gate of Eden* with the thought and the traditions of Chaldaea and

Babylonia. In America, the *Methodist Review* of September last contained an original and powerfully reasoned contribution from the Rev. J. Horner, D.D., of Pittsburgh, Pennsylvania, on the *Chronology of Israel and Assyria in the Reign of Shalmaneser II.*; the purpose of the article, in the words of the writer, being "to show the actual agreement of the Biblical and Assyrian chronology for the period embracing the first twenty-one years of the reign of Shalmaneser II. (B.C. 860-839). There will thus be established the general accuracy of both accounts. So far as may be necessary for this purpose, the events in the history of Judea, Israel, Assyria and Syria, or Damascus, will be synchronised." Of substantive works which have been issued, or the issue of which has been commenced during the past year, referring more or less directly to Biblical Archaeology, much is expected, on account of the well-known tendencies of the editor, from Professor Schrader's *Keilinschriftliche Bibliothek*—the first volume of which, already published, contains transliterations and translations of inscriptions of very considerable significance. In this important undertaking, Professor Schrader has the assistance of such collaborateurs as Dr. Abel, Dr. Peiser, Dr. Winckler, and other cuneiform scholars. There is every promise that the entire work, when completed, will be a most valuable and trustworthy book of reference, the usefulness of which will be appreciated at once by Assyriologists, historians, and students of the Old Testament Scriptures. Consult Dr. Samuel Birch's Inaugural Address on the "Progress of Biblical Archaeology," in vol. i. of the "Transactions of the Society of Biblical Archaeology"; Rev. A. H. Sayce's "Fresh Light from the Monuments"; Professor Schrader's "Cuneiform Inscriptions and the Old Testament"; "Transactions of the Society of Biblical Archaeology"; Rev. Dr. W. Wright's "Empire of the Hittites"; "Journal of the Victoria Institute"; Mr. Tyler's British Museum Lectures on the "Hittites," etc. **Bigamy, Law on, in '89.** It has always been doubtful whether a *bonâ-fide* belief in the death of a missing husband or wife will excuse a second marriage within seven years; but the Court for the Consideration of Crown Cases Reserved (May), by eight judges to five, decided that it will. In the case in question the husband had sailed for America, and it was believed that he had perished at sea. The wife waited for five years, and then remarried; but soon afterwards the husband appeared, and a prosecution for bigamy ensued.

Billiards. Slate tables were first played upon in this country in 1827, and our foremost players have now reached a point of excellence altogether unknown a few years back. John Roberts, jun., is the admitted best all-round player, and has retained the championship ever since '85. Records in the varying branches of the game are too numerous to specify, those credited to Roberts, W. Cook, W. J. Peall, W. Mitchell, T. Taylor, and J. Bennett being the most notable. The Pyramid shield remains in the possession of W. Cook, this brilliant player having won it the stipulated number of times. The following is a return of the most prominent matches played in '89. At Westminster Aquarium, on Jan. 5th, Peall attempted to concede White 4,500 points in an all-in match of 15,000 up, for £400, and although in the course of the contest Peall contributed a break of 2803

(being the largest ever made in a match for money), he was beaten by 923. At the same building on Jan. 13th, J. Roberts conceded M'Neil 4500 points in a spot-barred match of 12,000 up, and won by 980, the champion scoring remarkably fast, putting together 1842 points in two-and-a-half hours, and 3229 in four-and-a-half hours. On Feb. 13th, Mitchell won a championship tournament, also at the Aquarium; then followed a spot-barred match of 8000 up, on even terms, between Peall and Cook, in which the last-named proved successful by 2997 points; and shortly afterwards, in the same saloon, North, conceding 2000 points, defeated White in a spot-barred match of 10,000 up, for £400, by 395. Roberts, playing in brilliant form in his match with Cook at the Grafton Street Rooms, successfully conceded 4000 points in 12,000 up spot-barred, and won by 1796. In this contest he scored a second break of 690, and further contributed 108 consecutive cannons, and compiled the extraordinary total of 905 in forty-six minutes. North was the next to go down before the marvellous skill and precision of the champion, this being in a spot-barred match, also at the Grafton Rooms, in which North received half the game, and yet was beaten by over 500 points; at the Aquarium, on March 3th, Mitchell beat Taylor in their spot-barred match of 3,000 up, by 441, beyond conceding 1,000 points; Peall defeated North in a spot-barred match of 9,000 up, for £400, at the Aquarium, and the closing tournament of the '88-'89 season was credited to Lloyd. The '88-'89 season opened with a contest between Cook and Taylor, at the Aquarium, on Oct. 14th, and the latter, who received 500 start in 9000 up, spot-barred, won by 2553; and this was followed by another between Peall and M'Neil, of 9000 up, level, also spot-barred, which the former secured by the narrow majority of 193. The champion inaugurated the season at the Dudley Gallery, Egyptian Hall, Piccadilly, on Oct. 28th, with a spot-barred match of 4000 up against J. North, to whom he gave 1600 points, and beat him by 214; but a little later on North, in a similar match, defeated Roberts by 137 points. Contests of a kindred character continue to be played almost weekly at both the buildings mentioned. On Nov. 19th Roberts made a break of 526, in the course of a spot-barred match of 12,000 up with J. Dowland, this being the highest so far scored during the season.

Bill, Parliamentary. A Parliamentary bill is either (1) public or (2) private.—(1) If a public bill is to be introduced in the House of Commons, the first step is to move, after giving notice, that leave be given to bring in a bill. If leave be given, the Speaker asks, "Who will prepare and bring in the said bill?" and the member who has moved for leave mentions names. Subsequently the mover, on being called on by the Speaker, walks up from the bar and presents the bill, which is then read a first time and ordered to be printed. On a future day it is read a second time (and this is the occasion for discussing its principle); after which it is committed and its details debated by a committee of the whole house, or by a committee selected from the house, or by one of the two Grand Committees (q.v.). It is then reported with the amendments of committee, if any; it is next considered as amended, and is then read a third time. It is next taken to the Lords, where it goes through the same

stages, and if amended comes back to the Commons. If the houses cannot agree upon the amendments, the bill drops; but if they are accepted, then the bill goes back to the Lords with an announcement to that effect. If a public bill be commenced in the House of Lords, the stages are very similar, only that a peer can present a bill without first asking leave. The stages of a bill are introduction and first reading, second reading, committee, consideration as amended (if amendments have been made in committee), and third reading; and it is not the practice, except in case of urgency, to advance a bill more than one stage at a sitting.—(2) Private. An important branch of the business annually transacted by Parliament. The total number of bills deposited for the session of '89, which related to railways, canals, tramways, subways, and the supply of gas and water, amounted to 158, as against 168 in '88 and 143 in '87; in '86 the figure was 150, the number for '85 was 203, and for '84 it was 227. The total amount of money proposed to be raised in the session of '89 was £25,613,445, as compared with £29,317,842 in '88 and £20,525,080 in the previous year, £22,434,718 in '86, £54,527,189 in '85, £67,280,666 in '84, and £54,342,729 in '83. The Parliamentary work involved in this mass of business is performed partly by a paid staff of officials, and partly by peers and members, whose services are unremunerated. The procedure on a private bill differs from that on a public bill in some important particulars, among which are that the initial proceedings are taken at fixed dates, which do not depend upon the sittings of the Houses, and usually fall in the Parliamentary recess; that a private bill can only be introduced into the House of Commons on petition first presented, which shall have been deposited in the Private Bill Office; and that an inquiry by a small committee, which may hear counsel and witnesses, is substituted for a discussion in committee of the whole House. Another point of difference is that, while at a dissolution or a prorogation all public bills which have not received the Royal assent fall to the ground, it is customary to provide when a dissolution takes place in the spring that the private bills in progress shall be taken up by the new Parliament at the stage where they had been left by the old Houses. This course was taken by special resolution in '80; and Parliament went further in '86, when some of the bills in progress were not only renewed after the general election, but were kept alive during the short session of August and September, and through the prorogation and the recess until the commencement of the session of '87. Private bills are generally placed by promoters in the hands of gentlemen who make this branch of business their particular study, and who are known as Parliamentary agents. During recent years the system of provisional orders has been largely availed of by promoters. In the Queen's speech, delivered at the opening of the session '87, a bill was promised for improving and cheapening the process of private-bill legislation, but, owing to pressure of other business, it was never introduced. A joint committee investigated the question during the session of '88 (see Session '88, sect. 64), and reported in favour of the establishment of a Commission intrusted with the functions of private bill committees, the ultimate decision being reserved

to Parliament. Such a Commission must, they added, necessarily be an experiment, but it presented the best hope of an adequate solution of the difficulties of the situation. In their scheme of Local Government for Scotland ('89) the Government made certain proposals on this subject, which were subsequently dropped (see Session, sect. 87). On the question of the alteration of memorandums of association by private bills see Session, sect. 140. For detailed account of Private Bill procedure see ed. '87.

Bill of Exchange, Law on, in '89. A bill of exchange accepted by the South Shields Salt-water Baths Co. omitted the word "Limited," and, the bill being dishonoured at maturity, the directors of the company who had signed it were held to be personally liable, on the ground that the real name of the company did not appear on the bill. (*Atkins v. Wardle*, Court of Appeal, Aug. 9th.)

Bill of Sale. The statute law relating to bills of sale in England is contained in the Acts of 1878 and 1882. A bill of sale upon goods or chattels corresponds to a mortgage of real estate; and the above Acts are chiefly directed to prevent the fraudulent granting of bills of sale. Every bill of sale given by way of security for the payment of money is void unless made in accordance with the form in the schedule of the Act of 1882. It must be duly attested by one or more credible witnesses not being a party or parties thereto. It must be registered within seven days after making, and the registration must be renewed once every five years. When first registered, a copy of the bill, together with an affidavit of the time of such bill being given, of its due attestation, and of the residence and occupation of the person giving the same, and of every attesting witness, must be presented to the registrar and filed by him. If the bill of sale be given subject to any defeasance, condition, or declaration of trust, such defeasance, condition, or declaration must appear, if not in the body of the bill, at least on the same paper, and must be set forth in the copy filed. A transfer or assignment of a registered bill of sale need not be registered. Bills of sale comprising, in whole or in part, the same chattels, take priority in order of registration. Delays, omissions, or mistakes in the registration of bills of sale may be rectified by the order of any judge of the High Court. A bill of sale executed within seven days after the execution of an unregistered bill of sale will be held void, in so far as it affects the same chattels, unless it is proved not to have been executed for the purpose of evading the law. Any bill of sale not complying with the conditions of attestation and registration, is void as against the giver's trustee in bankruptcy, etc. A bill of sale given in consideration of a sum less than £30 is void. A bill of sale is void except as against the grantor with respect to any personal chattels acquired by him after its execution. But this provision does not apply to growing crops or fixtures or machinery subsequently acquired in substitution for fixtures or machinery specified in the bill. Chattels assigned under a bill of sale are not liable to be seized by the grantee unless (1) the grantor make default in paying the money thereby secured, or in fulfilling any condition necessary to the security; (2) the grantor become a bankrupt, or allow the goods comprised in the bill to be distrained for rent, rates or taxes; (3) the grantor fraudu-

lently remove, or suffer to be removed, from his premises the goods comprised in the bill; (4) the grantor refuse, without reasonable excuse, to produce to the grantee his last receipts for rent, rates, and taxes; (5) execution has been levied on the grantor's goods under any judgment.

Bills of Sale, Law on, in '89. Important questions under the Bills of Sale Acts continue to crop up. For instance, in the case of *Carpenter v. Dean* (Court of Appeal, July), a Surrey farmer had given a bill of sale, which included, amongst other things, twenty-one milch cows. Under the Act a schedule must be appended to every bill of sale, containing a specific description of the property affected by it. In the present instance the cows were merely described as being "at Greenrise Farm, Longley." Lord Justice Lopes was of opinion that the Act did not require a more exact description than ordinary business men would give, and pointed out that in large herds, cattle were identified neither by name nor by colour. Lords Justices Cotton and Fry, however, took a different view of the case, and the bill was held to be bad.—An important case relating to money lent to builders on mortgage came before the Queen's Bench Division (May). Such advances are frequently made while houses are in course of erection; but, until the building material has been used in such a way as to become attached to the freehold, it clearly remains a chattel, upon which money can only be lent by a bill of sale. In the present case (*Goles v. Climpson*), the mortgage deed contained a provision that the building materials were to be regarded as attached to the freehold from the moment they were brought on to the land; but the parties spoilt the effect of this by giving the lender power, in case his money was not repaid, to take them and sell them separately from the land. This showed that they were, in fact, still looked upon as being personal chattels, and the mortgage, not being registered as a bill of sale, was, so far as concerned them, declared void.—Another interesting case was that of *Bouchette v. The Consolidated Credit and Mortgage Corporation, Ltd.* (Chancery Division, July). The plaintiffs had given a bill of sale to the defendant in a form which was declared void in the case of *Kelly v. Kelland* (Court of Appeal, Feb. 6th, '88), on the ground that a bill of sale purporting to assign chattels other than those described in the schedule is void. The defendant company seem to have had a number of bills of sale which were in the invalid form, and they accordingly summoned some sixty or seventy persons to attend at their office, where, without any reason being assigned, they were, including the plaintiffs, compelled to renew the bills of sale in a form supposed to be in accordance with the law. In the new bill of sale in the plaintiffs' case, the 60 per cent. rate of interest charged under the bill again boldly appeared, and the plaintiff now applied to have this second bill of sale declared void, on the ground that he was induced to execute it by a trick. Mr. Justice Kekewich held that the substituted bill of sale was obtained by a trick, and ordered it to be set aside.—A bill of sale may be in proper form, but if at the same time a promissory note is given to secure the same amount, and the bill of sale may be affected thereby, it is rendered void (*Onn v. Fisher*, Chancery Division, May).

Bimetallism is the term currently used to denote a Double Monetary Standard of Value.

(For detailed discussion of the question see ed. '87.) A *Royal Commission* on currency appointed in '86 issued its report Nov. '88 (see ed. '89). It left matters very much as they stood previously on the question. A *Deputation of the Bimetallio League* waited on the Premier and Mr. Goschen at the Foreign Office, May 30th, '88, to urge the Government to consider the desirability of consulting the chief commercial nations as to their readiness to join in a conference for the re-establishment of an international bimetallic system. An *International Monetary Congress* was held at Paris in September.

Biology, '89. The importance of *M. Pasteur's* researches were fitly recognised by the Royal Society's invitation to him to deliver the annual Croonian Lecture. The distinguished *savant* was unfortunately prevented by illness from attending in person, and the lecture, the subject of which was "Les Inoculations Préventives," was given by his "chef de laboratoire," Dr. Roux. The visit of the Lord Mayor to the Pasteur Institute bore fruit in a meeting convened at the Mansion House, and the establishment of a *Mansion House Fund* in recognition of the indebtedness of the people of this country to M. Pasteur for his treatment of cases of rabies. Sir H. E. Roscoe gave an admirable account of M. Pasteur's life-work in chemico-biological science at Birmingham in October last, which might possibly be read with advantage by opponents of his methods of research. An event of great interest to biologists was the appearance of a new book by *Mr. Alfred Russel Wallace*—"Darwinism" (Macmillan)—in which, while contributing much new matter, he upholds the theory of natural selection. It has given point to the discussion of the vexed question of *variation*, and that of the *non-inheritance of acquired characters*, over which biologists have been much exercised. Prof. August Weismann's translated "Essays on Heredity and Kindred Biological Problems" (Clarendon Press), edited by Messrs. Poulton, Schönland and Shipley, was issued about the same time, and has been widely read. Mr. Shipley's article "Death," in the *Nineteenth Century* for '85, first called the attention of English biologists to Weismann's views, and the interest in the subject is now very general. Mr. Galton's work, however, in the same field upon independent lines should not be forgotten. In both the volumes above mentioned, Lamarck's theory of the *transmissibility of acquired characters* was controverted, and its unsoundness demonstrated. At the British Association (*q.v.*), papers upon the respective theories were read by Messrs. Poulton and Galton; Sir W. Turner's sectional address was almost entirely devoted to it; and a discussion was initiated by Prof. Lankester. The question will undoubtedly receive the earnest attention of biologists. Mr. Bateson's paper "On some Variations of *Oardium edule* apparently correlated to the Conditions of Life," a new and original contribution on the point of publication gives the results of observations made by Mr. B. in '86 and '87 upon the fauna of the lakes of Western Central Asia, where he has had the almost unique advantage of studying variation under natural conditions of life. Prof. Weismann's conclusions have been dealt with by Dr. Vines, who, while not refuting his arguments, recognises difficulties and inconsistencies in the theory. (Consult, in addition, Weismann on the *Inheritance of Injuries*, an

address at Cologne (Jena, '89.) Mr. Muybridge, representing the Univ. of Pennsylvania, has been busy delivering a series of lectures, notably before the Royal Society, College of Surgeons, and Royal Academy, on the *Phases of Animal Motion* as obtained by *Instantaneous Photography*. Mr. M. has a large number of photographs of men, women and children, and animals and birds, which have been taken by his electro-photographic apparatus.—The work at the laboratory of the *Marine Biological Association* makes satisfactory, if slow, progress. A grant of money from the British Assoc. now enables selected students to work there on particular researches. We seem at last to be near the end of the "*Challenger*" volumes. The biological series are completed. Three volumes are to appear—one physical and chemical, one on deep-sea deposits, and a summary volume by Dr. Murray, the editor.

Birkbeck Institution, The, was founded by Dr. Birkbeck in 1823, as a mechanics' literary and scientific institute. The foundation stone of the present building, Bream's Buildings, W.C., was laid by the Duke of Albany in 1883, and the building subsequently opened formally by the Prince of Wales.

Birmingham, King Edward's School, comprises three grammar schools for boys, four grammar schools for girls, a high school for boys and a high school for girls. Founded 1552, reorganised 1878; income, £25,000. Numerous scholarships and exhibitions both for boys and girls. The boys number over 1,200. Headmaster, Rev. A. R. Vardy, M.A. Sec., Mr. G. Ashford. Motto, *Domine, Saluum fac Regem*. Some alumni—the Archbishop of Canterbury (Dr. Benson), the Bishop of Durham (Dr. Lightfoot), Canon Westcott, Sir J. Johnstone, K.S.I., Mr. Burne Jones, etc.

Birmingham Liberal Association. See NATIONAL LIBERAL FEDERATION.

Birmingham, Proposed New Bishopric of. The capital of the Midlands having received from the sovereign a charter of incorporation as a city, new force was given to the demand of Birmingham Churchmen for a Bishop. Preliminary conferences were held under the presidency of the Bishop of Worcester (Dr. Phillpotts), and a provisional committee of clergy and laymen was substituted in Sept. '89 by an executive committee, empowered to receive subscriptions towards endowment of the new see. No decision has been arrived at on the question of title, a proposal having been made to revive the old episcopal title of *Coventry* in conjunction with that of Birmingham. The Bishop of Worcester, from whose diocese the new see will be mainly taken, surrenders £800 per annum of income; to this may be added the endowment of some wealthy parish church in Birmingham, say £1,000, and the remainder of stipend, the statutory minimum, being £3500, has to be raised by public subscription, extending over a period of five years.

Births, from Nov. 27th, '88, to Nov. 16th, '89. Where no mention is made of the year, the birth took place in '89:—

Abdy, w. of Capt. Anthony, R.A., d. (Jan. 2)

Aoland, w. of Theodore Dyke, M.D., F.R.C.P., d. (May 14)

Acton, w. of Capt. James Lowry Cole, Connaught Rangers, s. (April 25)

Alexander, Lady Emily, s. (Feb. 10)

- Allan, *w.* of Gordon, F.R.G.S., Surveyor-Gen. of British Honduras, *s.* (May 23)
 Anderson, *w.* of Lt.-Col. W. T., late 80th Regt., *d.* (April 18)
 Anson, Viscountess, *s.* (Nov. 7)
 Anstruther, Lady, *d.* (April 19)
 Arnott, *w.* of Surgeon-Major James, M.D., Bombay, *d.* (Oct. 9)
 Balfour, Lady Nina, *s.* (Feb. 8)
 Baring, *w.* of Capt. H., *d.* (May 12)
 Barker, Hon. Mrs., *s.* (June 6)
 Barlow, *w.* of Col., R.A., *d.* (June 9)
 Bawden, *w.* of Staff-Commander Clifford, H.M.S. *Warspite*, *s.* (March 31)
 Beatrice, Princess (Princess Henry of Battenberg), *s.* (May 21)
 Bellars, *w.* of Rev. William, M.A., vicar of Margate, *s.* (March 21)
 Bellew, *w.* of Hon. Richard E., *s.* (Feb. 6)
 Bennett, *w.* of Lt.-Col. F. Egerton, Army Service Corps, *s.* (Jan. 16)
 Bethell, *w.* of Hon. Slingsby, C.B., *s.* (July 22)
 Bethell, Hon. Mrs., *d.* (April 26)
 Bickersteth, Lady Margaret, *s.* (Oct. 13)
 Bird, *w.* of Capt., 8th Hussars, *d.* (May 8)
 Blair, *w.* of Capt. Hunter, R.A., *d.* (May 13)
 Blasgrave, *w.* of Capt. H. J., 13th Hussars, *s.* (April 3)
 Blencowe, *w.* of Rev. A. J., vicar of Christ Church, Chester, and Canon Residentiary of Chester Cathedral, *d.* (April 19)
 Blomfield, *w.* of Arthur W., A.R.A., *s.* (April 8)
 Blount, *w.* of Capt., *d.* (Feb. 12)
 Bond, *w.* of Mayston, M.R.C.S., L.R.C.P., *s.* (April 25)
 Bourne, *w.* of Rev. P. W. N., D.D., Christ Church, Doncaster, *d.* (April 26)
 Bowyer, *w.* of Capt., R.E., *s.* (March 15)
 Brace, *w.* of E. Hall, Chief Officer London Salvage Corps, *d.* (March 19)
 Bracken, *w.* of Major-Gen., *d.* (June)
 Bradshaw, *w.* of Lt.-Col., late 23rd Royal Welsh Fusiliers, *d.* (Jan. 21)
 Bretherton, Hon. Mrs. Stapleton, *s.* (Dec. 19, '88)
 Bright, *w.* of W. Leatham, M.P., *d.* (Jan. 8)
 Broderick, *w.* of Hon. and Rev. Canon Alan, *d.* (Feb. 2)
 Bruce, Hon. Mrs., *s.* (June 14)
 Buckle, *w.* of Rev. W. F. R., M.A., Chaplain of the Forces, *s.* (July 29)
 Bulkeley, Lady, *d.* (May 27)
 Burrell, *w.* of William Palfrey, H.B.M. Consul Port Said, *d.* (March 24)
 Butler, Lady Theobald, *d.* (April 24)
 Byam, *w.* of Col. W., C.B., *d.* (April 29)
 Campbell, Hon. Mrs., *d.* (Nov. 4)
 Campbell, *w.* of Col. L., Scots Guards, *d.* (May 6)
 Campbell, *w.* of Col. Colin G. L., Ordnance Dept., *s.* (Feb. 11)
 Cannop, *w.* of Woodham Arthur, Lieut. R.N., H.M.S. *Ganges*, *d.* (July 12)
 Carmarthen, Marchioness of, *d.* (Dec. 3, '88)
 Caralate, *w.* of Commander W. F., R.N., *s.* (May 4)
 Chandler, *w.* of Staff-Paymaster Richard G., R.N., of H.M.S. *Boscawen*, *s.* (Aug. 21)
 Chester, *w.* of Bishop of, *d.* (July 18)
 Chichester, Hon. Mrs., *s.* (April 4)
 Churchill, *w.* of Capt. Orford, R.N., *d.* (Feb. 11)
 Clifford, *w.* of Rev. Harry, M.A., Minor Canon of Worcester Cathedral, *d.* (July 8)
 Coates, *w.* of Alfred Lloyd, M.A., Precentor of Rochester Cathedral, *d.* (June 11)
 Cole, Major-Gen. Robert, *w.* of, *d.* (Sept. 30)
 Coleridge, Hon. Mrs. Gilbert, *s.* (Oct. 6)
 Colleton, Lady, *d.* (Jan. 9)
 Collins, *w.* of Capt. W., R.N., *s.* (Feb. 13)
 Combe, Lady Constance, *s.* (Aug. 4)
 Connolly, *w.* of Surgeon-Major, *d.* (Sept. 17)
 Cooke, Hon. Mrs., *d.* (April 25)
 Cooper, *w.* of Stanley, F.R.G.S., *s.* (Jan. 12)
 Crauford, *w.* of Capt. H. J., Grenadier Guards, *d.* (Jan. 9)
 Cunningham, *w.* of Capt. J. Smith, 2nd Life Guards, *s.* (May 18)
 Darwell, *w.* of Commander W. E., *d.* (May 11)
 Davies, *w.* of Commander R. W., *s.* (March 15)
 De la Poer, Hon. Mrs. de Poher, *d.* (May 2)
 Denison, *w.* of Lt.-Col. H., *s.* (Feb. 14)
 Denny, *w.* of Capt. C. J., B.S.C., *s.* (Jan. 13)
 Donoughmore, Countess of, *d.* (Nov. 27, '88)
 Drummond-Hay, Lady, *w.* of Henry John Maxwell Foot, *s.* (Oct. 16)
 Duost, *w.* of Major-Gen. Cyril, *d.* (Feb. 21)
 Duke, *w.* of Surgeon-Major Alexander W., Army Medical Staff, *s.* (May 24)
 Duke, *w.* of Surgeon-Maj. Joshua, *d.* (March 17)
 Dyer, *w.* of Sir Thomas Swinnerton, Bart., *d.* (June 27)
 Edwards, *w.* of Sir Henry Coster Lea, Bart., *s.* (July 7)
 Elgin, Lady Mary, *d.* (May 1)
 Elliot, Hon. Mrs. Arthur, *s.* (Sept. 19)
 Ewart, Hon. Lady, *s.* (Aug. 28)
 Eyre, Lady Alice, *s.* (June 11)
 Fairthorpe, *w.* of Capt. Howard, 3rd Batt. The Queen's Regt., *s.* (May 20)
 Featherstonhaugh, *w.* of Lt.-Col. R. S., *d.* (Jan. 23)
 Fegen, *w.* of Commander, H.M.S. *Hibernia*, *s.* (Sept. 19)
 Fergusson, Lady, *d.* (Feb. 18)
 Ferrier, *w.* of Capt. J. A., D.S.O., R.E., *s.* (April 28)
 Fildes, *w.* of Luke R. A., *s.* (May 30)
 Fitzgerald, Lady Alice, *d.* (Jan. 8)
 Floyd, *w.* of Walter C. L., Member Inst. C.E., *s.* (March 5)
 Forbes, *w.* of Capt. G. Wentworth, King's Dragoon Guards, *d.* (May 3)
 Frecheville, *w.* of R. J., Member Inst. C.E., F.G.S., *s.* (Jan. 20)
 Garton, *w.* of Col. W. H., Bengal Staff Corps, *s.* (Sept. 20)
 Gerard, *w.* of Col. Monk, C.B., *s.* (July 23)
 Gerger, *w.* (Lucy Lila) of Royal Chamberlain Karl von, and of Kt. Hon. Sir William A. White, G.C.M.G., G.C.B., Bart., Ambassador at Constantinople, *s.* (June 6)
 German, *w.* of Lt.-Col. R. C. H., J.P., late 9th Regt., *d.* (April 2)
 Godwin, *w.* of Lt.-Col. A. A., *s.* (April 19)
 Goodhart, *w.* of C. E., J.P., D.L., *s.* (March 18)
 Gordon, *w.* of Major-Gen. J. I. H., C.B., *s.* (July 24)
 Gosling, *w.* of Lt.-Col., late Scots Guards, *s.* (May 23)
 Gough, *w.* of Col. Hugh Sutlej, C.M.G., 10th (Royal) Hussars, *s.* (July 10)
 Graham, Lady Margaret, *d.* (Aug. 24)
 Griffith, *w.* of Capt. E. Hugh, Leicestershire Regt., *s.* (March 30)
 Grosvenor, Lady Henry, *d.* (Jan. 14)
 Grubb, *w.* of Sir Howard, F.R.S., *d.* (Aug. 30)
 Gruggen, *w.* of William, Governor of H.M. Prison, Wandsworth, *d.* (April 3)
 Gulland, *w.* of Surgeon-Gen. M. S., retired, *d.* (May 8)
 Hadfield, *w.* of Capt. C. A., (Prince of Wales's) North Staffordshire Regt., *s.* (Jan. 11)
 Hallstone, *w.* of Lieut. Walter, R.N., H.M.S. *Rupert*, *d.* (Sept. 22)
 Hall, *w.* of Edwin T., F.R.I.B.A., *d.* (May 15)

- Hardy**, Hon. Mrs. Gathorne, *d.* (Jan. 4)
Harmar, *w.* of Lt.-Col. C. D'Oyle, *d.* (Feb. 13)
Harris, Lady, *s.* (Sept. 3)
Harston, *w.* of Lieut. F. A., R.N., *d.* (March 14)
Hastings, *w.* of Commander William C. H., R.N., *s.* (Jan. 11)
Herkemer, *w.* of Prof. Hubert, *s.* (Sept. 25)
Hilditch, *w.* of George, *d.* (April 27)
Hill, *w.* of Capt. G. W., R.N., *d.* (April 30)
Hillier, *w.* of H. M., Deputy-Commr. Chinese Imperial Maritime Customs at Shanghai, *d.* (July 9)
Hogg, Lady Frederick, *s.* (June 29)
Home, *w.* of S., Registrar of the High Court of Justice and County Ct., Swansea, *d.* (Jan. 22)
Hood, Hon. Mrs. Aclan, *d.* (April 30)
Hopkins, *w.* of Rear-Admiral J. O., *d.* (Jan. 15)
Hopkins, *w.* of Capt., R.A., *d.* (April 17)
Hughes, *w.* of Capt. Arbutnot, R.A., *s.* (Jan. 31)
Hughes, *w.* of T. H., Commissioner of Imperial Chinese Customs, *d.* (Jan. 16)
Irby, *w.* of Hon. Cecil, *s.* (Aug. 24)
Jameson, *w.* of Capt. S. B., Adj. and Batt. Seaforth Highlanders, *d.* (July 20)
Jameson, *w.* of J. R., Capt. 3rd (Princess Victoria's) Royal Irish Fusiliers, *s.* (Jan. 2)
Johnstone, *w.* of Capt. Charles, R.N., H.M.S. *Volage*, *d.* (Feb. 9)
Jourdain, *w.* of Henry J., C.M.G., *s.* (Aug. 14)
Joy, *w.* of Percy H., J.A., District Inspector Royal Irish Constabulary, *s.* (Feb. 2)
Joyce, *w.* of Staff-Surgeon, R.N., H.M.S. *Hercules*, *s.* (Aug. 26)
Joynt, *w.* of Surgeon-Major H. W., Army Medical Staff, *d.* (March 17)
Kirby, *w.* of Commander Francis G., R.N., *d.* (May 12)
Lawton, *w.* of Herbert A., L.R.C.P., D.P.H., *s.* (Jan. 4)
Leonfield, Lady, *s.* (Dec. 4, '88).
Leggo, *w.* of Major Hon. H. C., Coldstream Guards, *s.* (Nov. 13)
Levinge, Lady, *s.* (Oct. 6)
Lisburne, Countess of, *d.* (Sept. 27)
Lownes, *w.* of Rev. Ernest C., Minor Canon of Chester Cathedral, *s.* (May 17)
Loyd, Hon. Mrs. Henry, *s.* (May 7)
Lumb, *w.* of Capt. A., Somersetshire Light Infantry, *s.* (April 18)
Luttrell, *w.* of Capt., Gren. Guards, *s.* (May 28)
Lyon, *w.* of Hon. Ernest Bowes, *d.* (July 6)
McOlement, *w.* of Frederick, M.D., Fleet-Surg. H.M.S. *Dreadnought*, *s.* (Feb. 16)
O'Connell, *w.* of Surgeon-Major, M.D., F.R.C.P., *d.* (Sept. 13)
McIntyre, *w.* of Major-Gen. Donald, V.C., (April 23)
Mahon, Hon. Mrs., *d.* (Aug. 24)
Malot, *w.* of Major G. E. Wyndham, *s.* (Jan. 2)

Wragg, *w.* of Clement L., F.R.G.S., Govt. Meteorologist of Queensland, late of Ben Nevis Observatory, *d.* (June 3)
Wynne, *w.* of Lt.-Col. Arthur Singleton, *s.* (April 27)
Yarborough, Countess of, *s.* (Dec. 17, '88).
Young, Lady Evelyn, *s.* (Aug. 21)

Bishop. See CHURCH OF ENGLAND, and DIOCESE.

Bishop of London's Fund, The. Instituted ('63) for a term of ten years, as a means of helping to provide for the spiritual wants of London and its suburbs. Since the foundation of the fund, £800,840 2s. has been subscribed. It was determined, at the commencement of '74, that the fund should be continued as a permanent diocesan institution for the following objects: (1) Missionary clergy and additional curates to work under the bishop's control, and to be confined in their work to particular parishes; (2) Scripture readers, mission women, and other lay workers; (3) The housing of the clergy; (4) Mission and school buildings; (5) In special cases assistance towards endowment; (6) Church building; and (7) Generally such other objects as it may be found desirable to promote from time to time. Last year £4,750 was given to maintain eleven mission clergymen and eighty-two lay agents, and £12,000 towards the building of churches and mission-rooms. **Offices**, 46a, Pall Mall, S.W. **President**, the Lord Bishop of London; **Hon. Secs.**, Messrs. E. Thornton and John E. Nelson. **Clerical Sec.**, Rev. H. Kirk, M.A.

Bishops, Terms relating to. **Bishoping**,

a term sometimes applied to Confirmation dating from the very earliest times, but now practically obsolete. **Bishop's Charge**, the instructions of a bishop to the clergy and laity at his Visitation (*v. infra*). **Bishop's Court** is held in the cathedral of each diocese, and dispenses the canon law. It is more generally called the **Bishop's Consistory**. The **Bishop's Chancellor** is the judge. In large dioceses Consistory Courts are held by the Bishop's commissaries. **Bishop's Pastoral**, a letter addressed by a bishop to the clergy and laity of his diocese on some special occasion. **Bishop's Ring**, worn by all bishops, signifies his spiritual marriage to his see. **Bishop's Visitation**, the summons to meet their bishop issued to his clergy and laity. (The canonical age for the consecration of a bishop is thirty years.)

Bisley Common. See WIMBLEDON, THE NEW.

Bismarck Archipelago. A group situated N. of the eastern part of New Guinea, including islands formerly called New Britain, New Ireland, and New Hanover. They are a German possession. See COLONIES OF EUROPEAN POWERS.

Bismarck-Schönhausen, Count Herbert von, son of Prince Bismarck, b. at Berlin Dec. 28th, 1849. Is a major in the German army, has served the German empire in various diplomatic capacities, and was embassy secretary in London, and Minister at the Hague. He sits in the Reichstag as one of the members for Schleswig-Holstein, and is the head of the **German Foreign Office**. Since his retirement from the secretaryship of the German embassy in London, his Excellency has paid several visits to England, presumably of a diplomatic character. His last visit was in March '89. In Jan. last the order of the Red Eagle, 1st class, was conferred on him by the German Emperor.

Bismarck-Schönhausen, Prince Otto Eduard Leopold; created Count Sept. 16th, 1865, and Prince (Fürst) von Bismarck March '71, the most powerful statesman of Europe in modern times; b. of an old noble family of the "Mark" (Brandenburg) at Schönhausen, April 1st, 1815. He led a somewhat tempestuous youth, in the course of which he studied and fought duels at the universities of Göttingen and Greifswald, spent some time in the army, and subsequently settled down as a country gentleman, managing the family estates and discharging the office of inspector of dykes. Brought up in the political faith of the **Junkers**, or Prussian Tory squirearchy, he became ('46) a member of the Provincial Diet of Saxony, and of the Prussian Diet, in which he first attracted attention by his fiery speeches in defence of the old monarchical party. During the revolutionary period of 1848 the services he rendered in the public debates to the Conservative cause so impressed the Prussian Ministry that he suddenly found a diplomatic career opened to him. The representation of Prussia in the Diet of the old German Bund at Frankfort falling vacant, the Premier introduced Herr von Bismarck to the King, who, not without misgiving, appointed him to that important post. Here he remained for several years, discharging the arduous duties of his office with an ability which won for him the admiration of the Prussian court. The remarkable series of private despatches which he addressed to the Prussian Premier, and which have recently been given to the

world, are models of diplomatic skill and statecraft. Austria was then all-powerful in the German Bund; and, supported by nearly all the other German states, had systematically prevented Prussia from exercising that influence in the councils of the Confederation to which, from her position as by far the greatest of the purely German states, she was justly entitled. From the time of Bismarck's appearance, however, the voice of Prussia began to have increasing weight. The successful audacity with which he checkmated Austrian intrigue at Frankfurt was the source of constant irritation at Vienna, and naturally tended to produce some estrangement between the Austrian and Prussian courts. Herr von Bismarck was sent as ambassador to St. Petersburg (59-62). In May '62 he was promoted to the then most difficult and important post in the diplomatic service—that of Prussian ambassador at Paris, where Napoleon III. was then in the plenitude of his power. Five months later he was summoned to Berlin, and made First Minister of the Prussian Crown. The first ten years after Herr von Bismarck assumed power are amongst the most remarkable in modern European history. Within that brief period he had humbled the Austrian empire, destroyed the French empire, and created the new German empire. He remodelled the map of Europe, dismembering Denmark and France. He enlarged the frontiers of Prussia by the annexation of various provinces, including the dominions of three dethroned German princes; and succeeded in placing Germany, which had previously been the weakest and least respected of the great powers, at the head of all the states of Europe. His first task as Minister President was, however, one from which a statesman of less resolution and of less firm belief in the rights of the Crown, might well have recoiled. The Chamber of Deputies had refused to pass the military budget, as it demanded increased grants, which were required to carry out the reorganisation of the army in accordance with the ideas of the King. The House uniformly refused these supplies, and for several sessions heated debates and violent scenes, in which the Minister President and the Liberal leaders were the principal antagonists, were of constant occurrence. In spite of the rejection of the budget by the Chamber the Government spent the money, and the House threatened Von Bismarck with impeachment for violating the Constitution. In the midst of this quarrel a Congress of all the Princes of Germany was invited to meet at Frankfurt to reorganise the German Bund; but the King of Prussia, by advice of his minister, refused to appear; and the project, although discussed and approved by five-sixths of the German sovereigns, came to nothing. The German Bund having, at Herr von Bismarck's instigation, resolved to invade the Elbe duchies in support of the claims of the Duke of Augustenburg, Austria, Prussia and Saxony were intrusted with the execution of the task; and a war broke out in 1864 with Denmark, resulting in the loss to her of the duchies of Schleswig-Holstein and Lauenburg. Instead of giving them up to the Duke, Von Bismarck, now created Count, determined, if possible, to annex them to Prussia. The Austrian and Saxon troops were recalled, and the quarrel eventually led (in '66) to a war between Prussia and Austria, who was joined by Bavaria, Hanover, Hesse Cassel, Hesse

Darmstadt, and Nassau. The arms of Prussia were victorious: Austria suffered a crushing defeat at Sadowa (Königgrätz), in Bohemia. Hanover and the South German states were likewise vanquished; and the war, which was over in seven weeks, led to the treaty of Nikolsburg, by which Austria was permanently excluded from the German Bund, and Hanover, Nassau, Hesse-Cassel, and Frankfurt, as well as Schleswig-Holstein and Lauenburg, were annexed to Prussia; and the North German Confederation, with Prussia at its head, was established in place of the old Bund, while with the South German states an offensive and defensive alliance was concluded, giving the King of Prussia supreme command of all their troops in time of war. Of the North German Bund Count von Bismarck was created Chancellor, and President of the Federal Council. In addition to these successes, in consideration of which the Prussian House of Deputies passed a bill of indemnity, forgiving his former breaches of the Constitution, Count von Bismarck obtained great popularity for creating a representative branch of the new Federal Government, on the basis of manhood suffrage. The Diet, which first assembled in 1867, consisted of delegates representing a nation of 29,000,000 Germans. Napoleon III., jealous of the growing power of Prussia, attempted to obtain some compensation for France by the annexation of the Grand Duchy of Luxemburg, which Holland had consented to cede to him. But in this scheme the French Emperor was thwarted, chiefly by the energetic attitude of Count von Bismarck; and in the end the Duchy was declared neutral territory, and the fortifications of the capital were demolished. In 1868 Count von Bismarck withdrew for some months from active public life, but he was in power again before the end of the year. Already for some time the biography of Count von Bismarck had practically been the history of his country; and, great as were the events through which he had conducted Germany, he was destined to lead her shortly through greater events still: notably by the defeat of the French in 1870, the dispute growing out of the offer of the crown of Spain to Prince Leopold of Hohenlohn. The King of Prussia, as the head of the family, had consented to his acceptance of the honour, afterwards revoked. After a campaign consisting of an unbroken series of victories, largely due to the strategic genius of Count von Moltke (q.v.), King William was able, through his Chancellor, to dictate terms of peace to his helpless assailant. Of the events in Prince Bismarck's life subsequent to the Franco-German war, it may be mentioned that he presided at the Congress of Berlin (78), the Berlin Conference (1880), and the Congo or Colonial Conference (1884). In his domestic legislation Prince Bismarck has been far less fortunate than in his diplomatic negotiations. In his economical policy, after beginning as a Free Trader he has become a Protectionist. He first largely reduced the customs tariff, and ten years later imposed heavier duties than ever. While he thus alienated the Liberals, his May Laws, interfering to an unwise extent with the religious liberty of the Catholic priesthood, led to a long and bitter struggle with the Roman Church, and made all its adherents his bitter enemies. Equally unfortunate was his policy with regard to the Social Democrats, his Draconic measures against whom have

produced the profoundest discontent among the working classes of the large cities. The measures he has sanctioned against the Polish settlers in the eastern provinces of Prussia, formerly belonging to Poland, savour of harshness. In the course of his career Prince Bismarck has given utterance to expressions which have since become familiar in every civilised tongue. In the heat of the controversy with the Catholics he once said, "We shall never go to Canossa"; but, like the Emperor Henry IV. to Pope Hildebrand (Gregory VII., the Great), he has since found it expedient to send an ambassador to the Vatican (Feb. '86), and to repeal the harshest portion of the May Laws. He had previously (Dec. 31st, '85) received the decoration of the Order of Christ from the Pope. Prince Bismarck is often called the man of "iron and blood," because in one of the first speeches he delivered as Minister President (in '62) he said that "it was not by speeches and majority votes that the great questions of the time would be settled, but by *iron and blood*." The Danish, the Austro-German and the Franco-German wars form a significant commentary on this expression. Other phrases attributed to him are that "Might goes before Right," the definition of a journalist as "a man who has failed in his profession in life," and many others. Prince Bismarck's name was, three years ago, very prominently before the public mind in connection with the Triple Alliance between Germany, Austria, and Italy, which is understood to be directed against a possible alliance between Russia and France against the German Powers. Subsequently Europe was profoundly moved by the official statement in a Berlin paper that during an interview between Prince Bismarck and the Tzar, on the latter's return from Copenhagen to St. Petersburg, the German Chancellor informed His Majesty that he had been the dupe of some Orleans clique, who had forged a diplomatic correspondence and forwarded it to the Tzar, the object of which was to show that Prince Bismarck was intriguing against Russia in Bulgaria. Since the death of the Emperor William I. in March, '88, Prince Bismarck has repeatedly sought to conciliate Russia. During the brief reign of the Emperor Frederick he successfully opposed the contemplated matrimonial alliance between the Princess Victoria, daughter of the Emperor, and Prince Alexander of Battenberg, late Prince of Bulgaria, on the ground that it would be objectionable to the Tzar. It was doubtless on the advice of Prince Bismarck that the present Emperor, immediately after his succession, arranged an interview with the Tzar at Peterhof. A few weeks later (*viz.*, in August) an interview took place between the Chancellor and Signor Crispi, the Italian Premier. This interview following immediately upon the dispute between Italy and France over the Massowah question, gave rise to much speculation, it being generally believed that the object of it was to strengthen the Triple Alliance, and especially to emphasise the understanding between Germany and Italy, in view of a possible rupture of either of those Powers with France. The general aim of Prince Bismarck's overtures to Russia, and his policy with regard both to the Triple Alliance and to Great Britain, is evidently to effect the isolation of France. The publication of the late Emperor Frederick's Diary, in September '88,

put a new light upon some of the Imperial transactions in which Prince Bismarck has been engaged. Much sensation was created both in Germany and elsewhere by the revelation of the diary respecting the authorship of the idea of German Unity. The late Emperor claimed to have proposed this policy, and to have experienced great difficulty in persuading Prince Bismarck of its practicability. Since Queen Victoria's visit to Potsdam, in '88, when she had an interview with Prince Bismarck, German policy towards England has been of a very conciliatory character, and the Chancellor's organ, the *Norddeutsche Zeitung*, has recently strongly urged the desirableness of a good understanding between the two countries, especially with regard to East African affairs. The Queen, in August '89, presented Prince Bismarck with a full-length portrait of herself. The degree of D.D. was conferred on him by the University of Giessen (Dec. '88). Two attempts have been made on the Chancellor's life: the first by a lunatic named Blind, on May 7th, '66, at Berlin; the second on July 17th, '74, by Kullmann, at Kissingen. A Bismarck museum, containing all sorts of objects relative to the Chancellor's career, has been founded at Berlin, and will be opened on April 1st, '90, the Chancellor's 74th birthday. Of the extensive literature on Prince Bismarck the chief original sources in German are Poschinger's edition of Prince Bismarck's Frankfurt Letters and Despatches; his Correspondence, by Köppen; his Political Life and Labours, and his Speeches, by Hahn; his Biography, by Hezekiel, and the works of M. Busch entitled "Bismarck and his People." There is an excellent English work, "Prince Bismarck," by Mr. Charles Lowe, the *Times* correspondent at Berlin.

Bissao and Casamenza. Portuguese stations on west coast of Africa, between Gambia and Sierra Leone. Bissao was the great stronghold of the Portuguese slave trade. See COLONIES OF EUROPEAN POWERS.

Black, William, novelist, b. at Glasgow 1841. Commenced his career as a journalist, and was successively connected with the London *Morning Star* (acting as special correspondent during the war between Prussia and Austria in 1866), and the *Daily News* (of which he was assistant editor). He is the author of "A Daughter of Beth," "A Princess of Thule," "Madcap Violet," "Adventures of a House Boat," ('88) "In Far Lochaber," in *Harper's Magazine*, and "The Penance of John Logan," '89.

Blackie, John Stuart, b. at Glasgow, 1809; son of a banker at Aberdeen; educated at Göttingen, Berlin, and Rome; appointed Professor of Humanity at Marischal College, Aberdeen (1842), and Professor of Greek in the University of Edinburgh (1851). He was one of the most energetic advocates of the reforms in the Scottish Universities in 1860. Author of a number of poems and prose works, of which the most popular, perhaps, is "Self-Culture." An unconventional style, with ready wit, characterise the Professor both as a lecturer and a writer. He retired from his professorial duties in '82. His recent works are a "Life of Burns" ('88) and "Scottish Song" ('89). The Professor has recently lectured in London and elsewhere on the subject of *Home Rule for Scotland*.

Blackie's Modern Cyclopedia. A handy book of reference on all subjects and for all readers, giving a great amount of information in numerous concisely written articles. It will be

completed in eight vols. in Nov. '90, the first four volumes having been published in '89. Each volume comprises 512 pp. (sq. 8vo). Editor, Charles Annandale, LL.D. Office, 17, Stanhope St., Glasgow.

Black-Letter Saints' Days. See COMMEMORATION, DAYS OF.

Black Mountain War. See BURMAH.

Black Rod, Gentleman Usher of the. An officer of the House of Lords appointed by the Crown, who assists at the introduction of peers, has charge of the arrangements for the maintenance of order below the bar, near the Throne, and in the strangers' gallery, and who summons the Commons whenever their attendance is required in the House of Peers. When he, or his deputy, the Yeoman Usher, performs the last-mentioned duty, he knocks thrice at the door of the House of Commons with his rod of office; and on being announced and admitted, "commands" the immediate attendance of the honourable House, if Her Majesty is personally present in the House of Peers, but only "desires" their immediate attendance if they are to wait upon the Lords Commissioners. Present holder of the office, Admiral Hon. Sir J. E. Drummond, G.C.B.

Black Sea (Port of Novorossisk). The new harbour works here are expected to be completed by the end of '88, the total cost being estimated at 3½ millions of roubles. The protection embankment will be 3,500 feet long, consisting of heavy hewn stones in cement; the length of the mole 2,800 feet, and its height from 16 to 24 feet, while at the end will be a lighthouse. A railway is to be laid along the mole and the embankment. These works in great measure owe their existence to the opening up of the fertile Kuban district. In March '89 the directors of the Vladikavsk Railway Co. issued a circular in the English language for the guidance of shippers using that port, especially in respect to the grain trade. At the beginning of September it was reported in this country that the construction of the port was almost at a standstill, that the contractors were in St. Petersburg seeking fresh capital, and that the general opinion was that the first part could not be finished for at least two years.

Blackley, Rev. William Lemery, M.A., b. at Dundalk, '30; ed. on the Continent, and Trin. Coll., Dublin; B.A. '50; M.A. '54; rector of North Waltham, Hants., '67; vicar of King's Lomborne, '83; Hon. Canon of Westminster, '83. Canon B. is an author of repute, amongst his works being the "Critical English New Testament" ('67); "How to Teach Domestic Economy" ('79); "The Social Economy Reading Book" ('81); and "Thrift and Independence: a Word to Working Men" ('83). Canon B. is, however, better known in connection with the question of National Insurance, on which he wrote an article for the *Nineteenth Century* in '78, which was followed by a remarkable sermon in Westminster Abbey on "Our National Providence," Sept., '79. The National Provident League was formed in '80 to further his views, and Canon B. lectured in many places on the subject. Movements on the same lines have been started in France, Italy, Switzerland, Germany, and New Zealand. Canon B. has recently accepted a London living.

Blackwall Tunnel. As far back as 1882, amongst the plans before the Metropolitan

Board of Works towards a settlement of the vexed question of providing communication across the Thames below London Bridge, was a tunnel between Blackwall and the vicinity of Greenwich and Woolwich. (For subsequent details see last ed.) The bill for the present tunnel scheme was read a third time in the House of Lords and passed on June 21st, and received the royal assent on June 28th, '83. At the meeting of the Metropolitan Board of Works (Dec. 21st, '88) two tenders were received for the construction of a footway tunnel of cast iron, lined with brickwork, across and under the river Thames at Blackwall, between Northumberland Wharf and Ordnance Wharf, with approaches thereto on both sides of the river, partly in tunnel, and partly in cut and cover and open cutting, together with temporary landing steps and other works,—a portion of the work to be executed under compressed air. One contractor tendered for £357,604, and another for 357,513, while a third asked for a fortnight more time to complete the calculations. After what may be described as a wrangle, the tenders were referred to the Works and General Purposes Committee. In the House of Commons on March 14th, '89, Mr. Lawson raised the question of the propriety of the Metropolitan Board of Works—in view of the creation of the London County Council—opening tenders for this work, and Mr. Ritchie, President of the Local Government Board, promised to communicate with them. Another discussion took place in the House on the following day on the action of the Board in accepting a tender of £318,840 instead of leaving such an important work to be dealt with by the County Council. A meeting was held at Poplar on the 18th, when the whole question was considered, and it was agreed that the matter should be urged upon the new County Council; Mr. S. Buxton, M.P., was present. The question came under discussion at the meeting of the Provisional London County Council on March 19th, when a motion was passed to the effect that the Council did not feel itself bound to the above-mentioned tender. At the meeting of the London County Council on April 16th the Bridges Committee brought up a report to the effect that—having considered the foot-tunnel for which a tender for £318,840 had been accepted by the late Metropolitan Board of Works; also as to the construction of two tunnels for vehicular traffic, which, together with the foot-tunnel, would cost about £1,500,000; further, a scheme of sufficient dimensions to accommodate two lines of vehicles and foot passengers at an estimate of about £1,200,000—they had come to the conclusion to recommend that all the plans be submitted to an eminent engineer. After a discussion the report was approved. At the meeting of the County Council on June 18th the Bridges Committee recommended that the tunnel take precedence of any other scheme for crossing the Thames. This met with strong opposition, but was at last agreed to.

"**Blackwood's Magazine**," founded 1817. Conservative in politics, it includes in its pages original articles and reviews on the social and political questions of the day, notices of travels, biographies and subjects of general interest, with a serial novel. Amongst the contributors to its pages have been Prof. Wilson (Christopher North), De Quincey, Lord Lytton, George Eliot, and other distinguished writers.

Offices: 45, George St., Edinburgh, and 37, Paternoster Row, London, E.C.

Blaine, James Gillespie, American statesman; b. at West Brownville, Penn., '30. Educated at Washington Coll., where he graduated with distinction. He was for a short time Professor of Mathematics in the Kentucky Military School, but subsequently became editor of the *Portland Daily Advertiser*. Mr. B. since his marriage ('53) has resided in Augusta, Maine, and ('58-62) was a prominent member of the legislature of that State. In '62 he was elected to Congress, and was Speaker of the House of Representatives ('69-74). In '76, '80, and '84 he was an unsuccessful Republican candidate for the Presidency. On the last occasion Mr. B. polled 4,845,022 popular votes to 4,910,975 recorded for Mr. Cleveland (*q.v.*); but of the electors' votes in the several States he polled only 182 against Mr. C.'s 219. Mr. B. lost the election through the opposition of a section of his own party known as the "Mugwumps" (see AMERICAN POLITICAL PARTIES). Mr. B. is the author of "Twenty Years in Congress." He is a confirmed Protectionist. He declined to be nominated for the Presidency in '88, but strenuously supported General Harrison, the successful Republican candidate, and accepted the office of Secretary of State in his Cabinet. Mr. B., in company with Mr. Carnegie (*q.v.*), made a coaching tour through England in '88.

Blake, Sir Henry Arthur, K.C.M.G., entered the Royal Irish Constabulary in '59, and was a resident magistrate from '76 to '82, when he was appointed one of the five special resident magistrates to concert and carry out measures for the pacification of Ireland. He had executive charge of the E division. In '84 he was appointed Governor of the Bahamas, and three years later Governor of Newfoundland. On the death of Sir Anthony Musgrave, Governor of Queensland, in Sept. '88, Sir H. A. Blake was selected as his successor, his appointment causing much opposition on the part of the colonists, especially the Irish section of them. Sir H. B., owing to this opposition, requested to be relieved of the appointment. During the debate on the subject in the House of Peers, Lord Derby spoke of Sir H. Blake as one of the ablest men his lordship had ever met.

Blantyre. A mission-station in Africa, founded in 1876 under auspices of Established Church of Scotland. Situated on highlands between Lake Shirwa and Shiré river. Is becoming the centre of much independent British settlement and trade. Progress rapid. Already has longer and better roads than exist in the old Portuguese colonies on the coast. Communications by steamers up Zambesi and Shiré, and by newly opened overland route to Quillimane. See NYASSA, ZAMBESI, etc.

Blind, Deaf, and Dumb, Royal Commission on the, was appointed in '85, and reported in July '89 (Parliamentary Blue Book C. 5781, price 1s. 1d.; Eyre and Spottiswoode). The original Commission was issued July 21st, '85, to the Duke of Westminster (Chairman), the Bishop of London, the Rt. Hon. A. J. Mundella, M.P., Dr. Campbell, Dr. Armitage, and the late Sir Tindal Robertson, M.P. Its terms of reference were to investigate and report upon the condition of the Blind in the United Kingdom, the various systems of education of the blind, elementary, technical and professional, at home and abroad, and the existing

institutions for that purpose, the employments open to and suitable for the blind, and the means by which education may be extended so as to increase the number of blind persons qualified for such employments. On Aug. 13th Admiral Sir E. S. Sotheby and Mr. E. C. Johnson, and on Oct. 30th Mr. W. A. Arrol and the late Dr. R. McDonnell, F.R.S., were added to the Commission. On Jan. 20th, '86, a fresh Commission was issued in lieu of the above. Its terms of reference were extended by the inclusion of the deaf and dumb, and of such other cases as from special circumstances would seem to require exceptional methods of education. Lord Egerton of Tatton was appointed Chairman in the place of the Duke of Westminster, resigned, and the following new members were added to the Commission, viz., the Rt. Hon. Sir Lyon Playfair K.C.B., M.P., the Rt. Hon. Sir H. J. Selwin-Ibbetson, Bart., M.P., and Mr. B. St. John Ackers. The following gentlemen were subsequently appointed as Commissioners: on March 4th, '86, the late Mr. C. Few, and Mr. W. Woodall, M.P.; on April 27th, '86, Rev. W. B. Sleight; on June 28th, '86, Rev. C. M. Owen; and on June 11th, '87, Mr. L. Van Oven. The importance of the inquiry conducted by the Commission may be estimated from some of the statistics given in their report. According to the Census of '81, the number of blind persons in the United Kingdom was 32,296, and the number of deaf mutes 19,518.

Bloemfontein. Cap. Orange Free State (*q.v.*).

Blomfield, the Rt. Rev. Alfred, D.D., youngest son of the late Dr. C. J. Blomfield, Bp. of London, was b. at Fulham, Aug. 31st, 1833. Educated at Harrow and Balliol Coll., Oxon.; 1st class in classics '53, and in Lit. Hum. '54; also Chancellor's prizeman for Latin verse. Fellow of All Souls', and B.A. '55; M.A. '57. Ordained priest '58; curate of Kidderminster '57-60; perpetual curate of Stepney '62-5; vicar of St. Matthew's, City Road, '65-71, and of Barking '71-82. Select preacher at Oxford '69. Archdeacon of Essex, '78, of Colchester '82, and Bishop of Colchester '82. Hon. D.D. Oxon. Author of memoirs of his father, 2 vols., '63, and "Sermons in Town and Country," '71. At the Diocesan Conference, held at Colchester, Oct. '89, the Bishop of St. Albans, announcing his intention to retire, paid a high tribute to Bishop Blomfield's energy and successful administration.

"**Blue Books**" are the official reports, papers and documents printed for Government, and laid before the Houses of Parliament. They are uniformly stitched up in dark blue paper wrappers. Germany, white; France, yellow; Italy, green; Spain, red; Portugal, white. Consult article B.B. *Chambers' Encyclopædia*. See also PARLIAMENTARY PAPERS.

Blue Ribbon Army. See GOSFEL TEMPERANCE MOVEMENT.

Blum Pasha, C.B. Austrian subject; was a banker's clerk, and subsequently manager of the Austro-Egyptian Bank at Alexandria; became Secretary to Ismail Pasha Muffetish, Egyptian Minister of Finance '73-76, and subsequently Secretary of Finance '76-78. On the fall of the European ministry under Ismail's coup d'état in '78, he followed Sir Rivers Wilson out of office. On the accession of Tewfik he was named Under-Secretary of State for Finance.

Blumenthal, Field-Marshal Leonard von. A great strategist; b. 1810 at Schwedt-on-the-Oder. He studied at the Military Academies of Culm and Berlin. Was successively appointed Second Lieutenant in the Guard (Fusilier Guards) '27; Adjutant to Landwehr ('37); Premier Lieutenant of the General Staff (Topographical Division) '46; and Captain of the General Staff '49. He was made Chief of the Staff of the Army in Schleswig-Holstein in recompense for his services in that war ('40); Major in the Grand General Staff ('53); Chief of the General Staff of the Mobile Army Corps against Denmark ('62); Major-General ('64); Chief of the General Staff of the second army, which invaded Bohemia ('66); Chief of the General Staff ('70), a post he has since held; and Field Marshal ('88).

Board of Agriculture Act, '89. See SESSION, sect. 69.

"Board of Trade Journal." A journal issued about the middle of every calendar month, under the authority of the President of the Board of Trade. It contains Board of Trade notices, and extracts and translations from the official documents of the Home, Colonial and Foreign Governments, relating to changes in Customs tariffs, the operation of commercial treaties, fluctuations of trade and industry in various parts of the world, and other valuable information of importance to merchants, shippers and manufacturers. To be had of Messrs. Eyre & Spottiswoode, East Harding St., E.C. First number issued August '86.

Board of Trade Returns. See TRADE, '89.
Boat Race, Oxford and Cambridge. See AQUATICS.

Boehm, Sir Joseph Edgar, Bart., R.A., is of Hungarian extraction, and was b. in Vienna in 1834. Has resided in England since '62. He was appointed sculptor in ordinary to the Queen '81, elected R.A. '82, and created a baronet '89. Executed a colossal statue of the Queen ('67), and produced, among other works, recumbent statues of the late Princess Alice and her daughter, and of the late Prince Imperial; the statue of Lord Beaconsfield for Westminster Abbey; busts of Mr. Gladstone, Mr. Bright, Lord Idlesleigh, and Mr. Ruskin; the equestrian statue of the Duke of Wellington for Hyde Park Corner; a colossal statue of the Queen for Sydney; the recumbent statue of General Gordon in St. Paul's Cathedral; an effigy of the late Prince Leopold, in Highland costume, for the Albert Chapel, Windsor; a statue of Prince Albert Victor, and another statue of the Queen for the House of Convocation of the London University. He designed the Queen's effigy on the Jubilee coinage. At the Royal Academy Exhibition, '89, Sir J. B. exhibited "The British Guardsman of 1818," and the "Inniskillen Dragoon of 1815," being two of his statues at the base of the Wellington Monument, Hyde Park Corner; also busts of the late Frank Holl and Mrs. Arthur Sassoon. He is engaged on a statue of the Prince Consort.

Bokhara. A feudatory Central Asian State attached to the Russian province of Turkestan. Conquered in '68, it has been rapidly losing all independence since, and the completion of the Transcaspian railway to Samarcand practically incorporates it with the Tsar's dominions. Is the most populous khanate of Turkestan, possessing 2,000,000 inhabitants, while Bokhara (70,000) is the principal trade centre of the region. The railway station of B. is situated

ten miles from the city, and here the Russians have built a "New Bokhara," allowing the older city, for political reasons, to fall into decay. The Russian Political Resident, M. Tcharykoff, removed to this point '89, and a Russian garrison is established there. The Ameer is allowed to maintain an army of 30,000 troops for administrative purposes, and these are being drilled by Russian instructors. Russian imports into B. in '87 were 16,675,000 roubles, and B's exports into Russia 15,040,000 roubles (over three millions sterling together), showing a surplus in Russia's favour of 1,635,000 roubles. The yearly import of green tea, chiefly from India, alone amounts to 288,000 lb., valued at 6,720,000 roubles (£672,000). Most of the Caspian steamboat companies have agencies in B., and the trade is rapidly passing into Russian hands. An embassy from Bokhara was received at St. Petersburg (March 10th, '89), the chief object of the mission being to request the Russian Government to organise means of transit across Russia and her Asiatic possessions for Bokharan products, to relieve the industry of that country from the drawbacks caused by the Customs authorities on the Afghan frontier. It was stated from St. Petersburg (April 8th) that the Emir proposed to send his eldest son to Russia to complete his education. It was also added that the Russian Government contemplated the establishment in Bokhara of a branch of the Russian State Bank. There was an outbreak of deadly epidemic in Bokhara (July), causing many deaths, accentuated by the phenomenal heat. Consult Curzon's "Russia in Central Asia," '89.

Bolivia. Bounded on the north by Peru and Brazil; on the east by Brazil and Paraguay; on the south by the Argentine Republic and Chili; on the west by Chili and the Pacific Ocean. Capital La Paz, pop. 26,000. It is ruled over by a President with a Congress of two Chambers, elected by universal suffrage, as were the three preceding Presidents. Area is 2,150,000 square kilometres; pop. 2,000,000. Estimated revenue '87-'88, \$3,665,700; expenditure, \$4,500,225. Average value of imports, £1,200,000; exports, £1,800,000. Foreign debt '88, \$6,397,032. Only one loan was made in London, and has been settled with the shareholders. The standing army is fixed at 1,500 men, commanded by four Generals and 305 officers. This is a very rich country, with great variety of climate. It abounds in mines of all kinds of metals, especially copper and silver; its production of the latter-named metal takes the third place in the whole world—namely, after the United States and Mexico. It produces potatoes, barley, grapes, coffee, cacao, etc.; and it exports wool and minerals. But industry is wanting in the country, which offers a wide field to European labourers. For Cabinet, etc., see DIPLOMATIC.

Bombay. See INDIA; and for Ministry, etc. see DIPLOMATIC.

Bombay New Graving Dock. In the House of Commons, on Dec. 17th, '88, Lord G. Hamilton in reply to Mr. J. Maclean stated that Sir John Coode's last design for this dock included the following dimensions:—Length of floor 500 ft.; width at entrance 85 ft.; depth on sill at high water, neap tides, 35 ft.; depth of approach channel at high water, neap tides, 42 ft. The estimated cost was £221,000, and the time for construction four years.

Bonaire. Otherwise Buan Ayre (q.v.)

Bonapartists. See FRENCH POLITICAL PARTIES.

Bonghi, Ruggiero, distinguished Italian statesman and writer, b. at Naples 1828. He was exiled from his native city for the part he took in the Revolutionary movement of '48. In '49 was appointed Professor of Philosophy at Milan, and in '64 accepted the chair of Greek literature at Turin. Subsequently accepted the Professorship of Latin at Florence, and that of Ancient History at Rome. He entered Parliament in '60, and in '74 was appointed Minister of Public Instruction. He is now the leader of the Right (Conservative Party). He is the author of the *Guarantee Laws*, regulating the present position of the Pope. He attended the opening of the Italian Exhibition in London, '88, and acted as president of the Room Committee. He has translated the *Metaphysics* of Aristotle, and brought out in '88 an edition of the works of Plato.

Bonheur, Rosa, d. of a talented French artist, was b. at Bordeaux 1822. Her artistic studies were directed by her father, and her first two pictures, "*Chèvres et Moutons*," and "*Les Deux Lapins*," which were exhibited in '41, attracted much attention. Mdle. B. was one of the first ladies to receive the *Légion d'Honneur*. In '55 "The Haymaking Season in Auvergne" was hung at the Universal Exposition in Paris, and in the same year she sent the "*Horse Fair*" to the French Exhibition in London, where it was the centre of attraction for the season. Received first-class medal of Salon, '48. In '49 a fine work, "*Labourages Nivernais*," by her, attracted much attention, the French Government purchasing it for 3,000 fr. In '80 the *Leopold Cross* was bestowed on Mdle. B. by the King of the Belgians, and at the *Siege of Paris* the Crown Prince of Prussia directed that her residence should be left unmolested. She exhibited ('69) "*A Foraging Party*" (shown at Mr. McLean's gallery), and "*On the Alert*" at the Antwerp Academy, having been admitted a member of the *Institute of Antwerp* ('68). As a painter of horses, Rosa Bonheur has had few rivals. A fine specimen of her work is hung in the *National Gallery*. Consult "*Rosa Bonheur*," by Rene Peyrol; the *Art Annual* for '89.

Bonzes. Name given to the priests of Buddha in China, Burmah, Japan, etc. They live in monasteries, and are unmarried. There are also female bonzes, who resemble nuns.

"**Book of the Dead.**" See EGYPTOLOGY.

Booth, Edwin, American tragedian, b. near Baltimore, 1833. He was early trained to the stage by his father, who was also a distinguished actor. In '51 he played Richard III. for his father, who was prevented by illness from sustaining the part. Mr. Booth visited England in '61, and again in '81, when with Mr. Irving (*q.v.*) he alternately played *Othello* and *Iago*. As a tragic actor Mr. B. has had few rivals. He has devoted himself almost exclusively to the impersonation of leading *Shakespearian characters*. In '83 he played with great success both at Berlin and Hamburg. Mr. B. commenced in '68 the erection of the theatre in New York which bears his name, and in which he sunk a considerable fortune.

Booth, Rev. William, better known as General Booth, the founder of the Salvation Army, was b. at Nottingham, 1829. Entered the Methodist New Connexion Ministry '50. He resigned, however, when the Conference

of that body in '61 desired him to settle down to regular circuit work, as he preferred that of an evangelist amongst those who never attended a place of worship at all. In '65 he established in the East End of London the *Christian Mission*, out of which grew the great organisation known as the *Salvation Army*, which has not only invaded almost every town of England and Wales, but has sent missionary contingents into various foreign countries. General B. is the author of "*Orders and Regulations for the S. A.*"; and in conjunction with Mrs. Booth, who possesses great powers of organisation, has published various other works for the guidance of the members of the Army, and for attracting recruits. His eldest son is the chief of the staff, and his eldest daughter has greatly aided the progress of the movement in Switzerland and France. Other members of his family have also co-operated with him in his missionary enterprise; the Clapton Institutions, for the training of both men and women officers, respectively being under the direction of his third son and second and third daughters. Another son is at the head of the *Colonial contingent* of the Army. General B. in '88 paid a visit to Switzerland, where the progress of the Army has met with much opposition from the local authorities. During the great strike of dock labourers in London, September '88, General Booth and his officers rendered great service in relieving the distress amongst the families of the strikers. The official organ of the Army is the *War Cry*.

Borneo. A large island of the Malay archipelago, divided into various States. Estimated total area 290,000 sq. m., estimated pop. 1,846,000.—Holland claims as a possession 203,714 sq. m. of territory on the south, east, and west of the island. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. Of the interior little is even known. The principal Dutch settlements are at Sambas, Pontiana, Banjarmasin, and Koti. On the north-west coast is the State of Sarawak; area 40,000 sq. m., pop. 280,000. It is under British influence, though not a British dependency, being ruled by an English rajah (H. H. Charles J. Brooke). North-east of Sarawak is the independent State of Brunei, or Borneo Proper, a territory of less extent. Beyond it lies British North Borneo, area 30,000 sq. m., which is not an official dependency, but is the property of an English trading company, to whom a royal charter has been granted. In '83 a virtual Protectorate was proclaimed over British N. Borneo. Between this and the Dutch territories on the east is the native state of Sulu. (Political and other details will be found under SARAWAK, BRITISH NORTH BORNEO, etc.). Borneo is rich in valuable timber, woods, fruits, spices, drugs and gums, and has a varied fauna. Minerals, coal, iron, gold, diamonds, antimony, quicksilver, etc. Soil exceedingly fertile, and well adapted for the cultivation of all tropical products. Principal exports, sago, bees-wax, edible birds-nests, camphor, hides, rattans, tortoise-shell, cinnaabar, tripan, antimony, coal, gold, diamonds, pepper, indigo, arrow-root, caoutchouc, gutta-percha, spices, drugs and dyes, etc. The people belong to various races—Malays, Dyaks, Kyans, Negritos, Bugis, and Chinese. Tattooed races, Kanowits, Pakatans and others, inhabit the interior. Consult

St. John's "Life in the Forests of the Far East," Wallace's "Malay Archipelago," Hatton's "North Borneo," Penny's "Ten Years in Melanesia."

Borough English. A singular local custom by virtue of which the youngest son is heir to his father. Abolished in Scotland in the eleventh century; it still survives in some parts of England.

Bosnia and Herzegovina. Two Turkish provinces situate south of the Danube, with Servia on the east and Dalmatia on the west. They were placed under Austrian rule by virtue of the Treaty of Berlin. Their united area (including the Sandjuk of Novibazar) is 23,571 sq. m., and the population 1,504,091, of whom two-fifths are Mohammedans, two-fifths Russo-Greek, and one-fifth Roman Catholic; but the races and religions are so mixed in the various districts that it would be almost impossible to create from the medley a single harmonious state of any size. Austria occupied the provinces with very little difficulty, and with the exception of a slight seething in 1882, rapidly quelled, the 14,000 troops garrisoning the country have had no serious difficulties to contend with. Consult "An Official Tour through Bosnia and Herzegovina," by J. de Asbóth, '89.

Bosphorus. A channel, nineteen miles long, connecting the Sea of Marmora with the Black Sea, and separating Europe from Asia. About seventeen miles long, and from half a mile to a mile and a quarter wide. It has no equal in the world for the depth of its bed, and the numerous bays with which its steep cliffs are furrowed afford everywhere such a safe anchorage that the whole channel may be regarded as a continuation of the roadstead of Constantinople. Men-of-war can approach close to the shore. The channel is defended by a series of strong forts, so well placed and powerfully armed as to render the passage of a hostile fleet practically impossible, even without taking into account the strings of torpedoes that would bar the waterway in time of war. Constantinople stands on the west side, at the outlet, and partly on the Sea of Marmora, opposite Scutari. Also called the Thracian Bosphorus, to distinguish it from the Cimmeric Bosphorus, now called the Straits of Yenikale.

Boucicault, Dion, actor and dramatist, b. in Dublin 1822. Educated at London University. His first important play, *London Assurance*, was brought out at Covent Garden '41. Mr. Boucicault has attained great celebrity as the author of several Irish dramas—notably, "The Colleen Bawn" (Adelphi, London, '60); "Arrah-na-pogue" (Dublin, '64); and "Shaughraun" (Drury Lane, '75). During the first runs of these popular plays Mr. Boucicault personally took the leading parts. He is a most prolific writer; but "Flying Squad" ('66), "After Dark," and "Fermosa" ('68), may be said to be his last most popular productions outside of his Irish plays. Mr. Boucicault is resident in America, but in '89 visited this country, taking part in one of his plays, "The Sitt," at the Prince's. He has recently inaugurated a movement for establishing a *historical conservatoire* in New York.

Boughton, George Henry, A.R.A., b. 1833, spent his early years in studying alternately at New York, London, and Paris. In 1861 he opened a studio in London, and has since chiefly resided in that metropolis. His works,

which have been numerous exhibited at the Royal Academy and the National Academy of New York, include "Winter Twilight," "The Lake of the Dismal Swamp," "Passing into the Shade," "Coming into Church," "Morning Prayer," "The Sealed Letter," "The Idyll of the Birds," and "The Return of the Mayflower." At the exhibition of '86 his "Omnulotte of Peter the Headstrong" attracted much notice. He exhibited "A Salmon River: the Beanley, Inverness-shire," at the Royal Academy, '88, and "A Morning in May, Isle of Wight," at the New Gallery, '89.

Boulanger, George Ernest Jean Marie, French ex-Minister of War, was b. at Rennes (1837). His mother, who is still alive, is a native of Wales. Her maiden name was Grif-fiths. Boulanger entered the Military College of St. Cyr (1855), and was made sub-lieutenant (1857). He served under Marshal Randon in the Kabyle campaign. He also took part in the Franco-Italian war, and was wounded at the battle of Turbigo. He obtained his full lieutenancy in 1860, and two years later was promoted to a captaincy, having in the interim seen service in Cochinchina. In 1870, just before the declaration of war, he became major. He was with Bazaine at Metz, but, by some means, escaped the fate of Bazaine's army, and made his way back to Paris. He was promoted to a lieutenant-colonelcy by the Government of National Defence (Oct. 1870), and fought at Champigny (Nov. 30th to Dec. 2nd). While leading his troops against the Communists he was wounded. After the suppression of the Commune his newly attained promotion was quashed by the Grade Revision Committee, but was restored to him in 1874. In 1880 he became brigadier-general, as is alleged, through the influence of the Duc d'Aumale, whose name General Boulanger was, six years later, to strike from the Army List. Appointed to the command of the army of occupation of Tunis, General Boulanger had a disagreement with M. Camille, the Resident-General, and was recalled. He then held the War Office appointment of Director of the Infantry Division, and became Minister of War in the De Freycinet Cabinet, Jan. 7th, 1886. When M. de Freycinet resigned, and was succeeded by M. Goblet (Dec. 9th, 1886), General Boulanger retained his portfolio; but on the fall of M. Goblet, Boulanger's name did not appear in the Cabinet of M. Rouvier. The General was soon after despatched to Clermont-Ferrand to take command of an army corps, receiving a great ovation at Paris on his departure. When the Limousin scandal broke upon Paris like a thunderclap, it was at one time thought that General B. was implicated; and in an indignant letter denying the accusations levelled against him he made some rather free remarks about General Ferron, War Minister, who immediately ordered him under close arrest for thirty days at his own headquarters. Just prior to this M. Jules Ferry, in a public speech, spoke of Boulanger as a safe concert hero, a sarcasm which led to a challenge from the ex-War Minister; but no hostile meeting took place. In November the period of the General's arrest expired. He came to Paris to take part in the deliberations of a Military Commission of which he was a member, and returned soon after to Clermont-Ferrand. The Government having decided, in March '88, to cashier the General by placing him on the retired list, he

decided to take advantage of his growing popularity to inaugurate a vigorous campaign against the Ministry. Vacancies shortly after occurred in the representation for the Dordogne and the Nord. Though he declined to stand for the former, his supporters insisted upon working for him, and, to the General's surprise, he was returned by 59,500 votes to 35,750 polled by the Opportunist candidate. In the Nord, where he personally conducted the campaign, his triumph was still more remarkable, the number of votes polled for him being 172,528 against 75,901 for M. Foucart, and, 9,647 for M. Moreau. This was on the 15th of April, '88, which, in a manifesto he issued to the electors, he declared would be marked in the annals of the country as a date of true deliverance. He became the hero of a series of demonstrations, and received ovations wherever he went. He was idolised by the populace as the coming man who was to save France from the blunders of incompetent statesmen and frauds of immoral political combinations, and as the possible leader of her hosts to victory in a war of revenge. Subsequently his popularity waned for a time, and his candidature, M. Paul Déroulède, in the Charente Department, suffered defeat. The General's appearance in the Chamber of Deputies, in July '88, to demand the Dissolution of the Chamber, gave rise to a stormy scene. M. Floquet made a vigorous attack upon the General, and in the altercation between them General Boulanger exclaimed "You lie." This led M. Floquet to demand satisfaction, and on July 13th a duel was fought between them, in the grounds of Comte Dillon's property at Neuilly. Rapiers were the weapons chosen. M. Clemenceau and M. Georges Perin were seconds to M. Floquet, and M. Laisant and M. le Hérissé acted in a similar capacity for the General. The combatants fought with great determination, with the result that the General received a deep wound in the neck. After his recovery he appeared ('89) as a candidate at bye elections in Paris, at the Nord, the Somme, and Charente Inférieure, and was returned by large majorities. The Patriotic League, of which he was the head, was subsequently suppressed, and the General was tried by the Senate on a charge of having, while Minister of War, appropriated £10,000 of public money for purposes of his own propaganda. He was found guilty. To avoid arrest, he fled first to Belgium, then to London, where he arrived April 24th. The General was elected at the General Election (Sept.) for Montmartre, by a small majority over M. Joffrin, but the election was annulled (see FRANCE). Some of his prominent supporters found seats, but the total strength of the Boulangist party in the Chamber is only a fraction (see FRANCE and FRENCH POLITICAL PARTIES). The General is at present (Nov.) resident in Jersey. Consult his "Life," written by his secretary.

Bourse, The Paris. See STOCK EXCHANGE.
Bowen, The Rt. Hon. Sir Charles S. C. one of the Lord Justices of Appeal, was b. in 1835, and was educated at Rugby and Balliol Coll., Oxford, where he won the Hartford and Ireland Scholarships, and was elected a Fellow of his College. He also distinguished himself as an athlete. He was called to the bar at Lincoln's Inn in 1861. He was senior member of the Truck Commission in 1870, and junior counsel to the Treasury in 1872, but never took silk. In 1879 he was appointed a

Judge of the Queen's Bench Division, and in 1882 a Lord Justice of Appeal, being at the same time sworn of the Privy Council. Lord Justice Bowen, who has proved himself one of the most able members of the Court of Appeal, is the author of an historical essay entitled "Delphi," and of a pamphlet on the Alabama question. Has also published a translation of the *Elogues* and *First Book of the Æneid* of Virgil. He is one of the very few judges who have passed direct from the Junior Counsel's Bar to the Bench.

Boycotting. A system of "sending to Coventry," or refusing to have dealings with, a person who for some reason or other has displeased a considerable section of the community. The practice prevails extensively in Ireland, where a farmer who takes a holding from which a tenant has been evicted is promptly "boycotted" by his neighbours. No one will buy stock from him or sell him the necessities of life, and he is regarded as having "moral leprosy." The excuse offered by the boycotters is that, without such combinations to make a "land-grabber's" life unendurable, the Irish tenants would have absolutely no means of protecting themselves against the landlords. It was for a long time declared impossible to stop boycotting, but clauses aimed at its suppression were included in the *Crimes Act of '87*, and under them two convictions were obtained in December last. In the one case a tradesman was imprisoned for refusing to supply goods, and in the other a blacksmith was sent to gaol for declining to shoe a horse. The word had its origin in the fact that the system was first applied to **Captain Boycott**, an Irish landowner.

Braddon, Mary Elizabeth, daughter of Mr. H. Braddon, b. in London in 1837. She is a prolific writer, for besides many sound contributions to general literature, she is the author of nearly forty novels, the best known of which are, "Aurora Floyd," "Lady Audley's Secret," "Eleanor's Victory," and "Henry Dunbar," whilst her more recent works are "Flower and Weed," "Ishmael," "Wyllard's Weird," "The Mohawks," "Like and Unlike," and "The Fatal Three." Miss Braddon formerly edited *Belgravia* magazine, to which many of her stories were contributed. Her drama, "Griselda," was produced at the Princess's Theatre, 73. Her latest novel is "The Time will Come," '89. Her husband is Mr. John Maxwell.

Bradlaugh, Charles, M.P. was born in London, 1833, and educated at elementary schools in the East End. In his youth he was brought under religious influences, and was for some time a Sunday-school teacher. In '50 he enlisted in the 7th Dragoon Guards, and on obtaining his discharge three years later, became a solicitor's clerk. Under the pseudonym of "Iconoclast" (Image-breaker), he wrote regularly for the *National Reformer*, which he founded for the advocacy of free-thought principles, and which he still conducts. He was prosecuted for his articles in that journal by the Attorney-General in '68, and successfully defended himself. After many unsuccessful attempts to enter Parliament as member for Northampton, he was returned for that borough with Mr. Labouchere (q.v.) in '80. His refusal to take the oath of allegiance in the prescribed form led to a long and exciting controversy in and out of Parliament. He claimed the right to affirm, but a select com-

mittee decided that the claim was inadmissible. He then decided to take the oath, but the House refused to allow him to do so. Later he administered the oath to himself, and was removed by the Sergeant-at-arms and committed to the Clock Tower. An Affirmation Bill was subsequently introduced by the Government and lost by a majority of three. Three times during the dispute Mr. B. resigned his seat and was re-elected. He also brought an action for "maintenance" against Mr. Newdegate, M.P., which, after losing in the courts below, Mr. B. carried to the House of Lords, where he obtained judgment. At the general election of '85 he was again returned for Northampton, and was permitted to take the oath. He was instrumental in securing the adoption of an **Affirmation Bill**, the establishment of a Bureau of Labour, and the appointment of a Royal Commission on Market Rights and Tolls (*q.v.*). When in '86 a select committee was appointed to inquire into the alleged corruption by the City Corporation in promoting opposition to Sir Wm. Harcourt's London Government Bill, Mr. Bradlaugh conducted the case in support of the charge. He has recently distinguished himself by his opposition to Socialism. A **testimonial** of over £2000, principally subscribed for by members of the House of Commons, to recoup him to some extent for the heavy loss he had sustained in the law courts, was presented to him in '88. In the libel case *Peters v. Bradlaugh*, arising out the Trafalgar Square meetings, Mr. Peters obtained a verdict for £300. The pressure of over-work and anxiety, aggravated by a sad domestic bereavement, caused a temporary breakdown of his extraordinary physical powers after the rising of Parliament last year.

Brahms, Johannes, b. at Hamburg 1833, An eulogistic critique of Schumann's brought Brahms into prominence. In 1861 he went to Vienna, where he has since resided, and devoted himself to composition. His great "**German Requiem**" (1868) established his reputation. Brahms is the composer of many symphonies, "Rinaldo," "The Song of Destiny," songs, cantatas, etc. His unrivalled settings of "Hungarian Dances," and his own "Liebeslieder" dances with choral accompaniment, are the most graceful classical compositions of the kind since Chopin. His latest work is a **Sonata in D minor**, Op. 108, for piano and violin, produced for the first time in London, May '89.

Bramwell, Sir Frederick, D.C.L., F.R.S., was b. 1818, and served his time as a mechanical engineer to John Hague. He was elected **Associate of the Institute of Civil Engineers** in '56, a member of the Council of that body in '67, and its **President** in '84. He has also been **President of the Institute of Mechanical Engineers** in '74. **Hon. Sec. to the Royal Institution** since '85. **Chairman of the Executive Council of the Inventions Exhibition '84**, and is **Chairman of the Executive Council of the City and Guilds of London Institute for the Promotion of Technical Education**. Sir Frederick was **knighted** in '81, and was, '88, elected **President of the British Association** for the advancement of science. Received hon. D.C.L. of Durham in '89. He is a brother of Lord Bramwell, and son of the late George Bramwell, banker.

Bramwell, George William Wilshire **Bramwell**, P.C., 1st Baron (creat. 1882); son of George Bramwell, Esq., banker; b. in London 1808. Called to the bar at Lincoln's

Inn (1838); appointed a Q.C. (July 1851); a Baron of the Exchequer (Jan. 1856); a judge of the High Court of Justice, Exchequer Division (1875); a Lord Justice of Appeal (1876); retired from the bench 1881. Lord Bramwell is a frequent contributor to the debates in the House of Lords, where his common-sense remarks always secure him the ready ear of the peers. He is an active member of the Liberty and Property Defence League. Under the familiar signature "B" Lord Bramwell has frequently written to the *Times* on questions of the hour. When Mr. Henry George published his famous "Progress and Poverty," Lord Bramwell replied to it.

Brazil. An empire in Central South America, occupying the west coast from 5° N. lat. to 29° S. lat., and comprising the vast valley of the Amazon and its affluents, as well as the watershed of other great rivers. Its present ruler is the Emperor Pedro II., of the house of Braganza. By the constitution of 1824 the executive power in imperial affairs is confided to the Emperor, and the legislative to a Senate and Chamber of Deputies. Senators are chosen for life by the Emperor, each from one of three candidates nominated by the people; the deputies are elected directly for four years. The Chamber has the initiative in taxation, and in the choice of the sovereign if necessary. Provincial affairs are dealt with in the provincial assemblies. State religion is Roman Catholic, but all others are tolerated. Education not in a very forward state, 84 per cent. of population being illiterate. Area 3,218,082 sq. miles; pop. 14,000,000. Estimated revenue ('89), 147,200,000 milreis; expenditure 173,087,441 m.; debt, foreign and home, including paper-money, 102,776,000 milreis; estimated exports, 16,040,000 m.; estimated imports, 84,000,000 m. (milrei = 278d.). Capital **Rio Janeiro**, pop. 357,332. (For previous history see earlier eds.)—'89. The abolition of slavery last year (see ed. '89) caused a marked increase in the number of immigrants. In '87, previous to the abolition of slavery, the number of immigrants landing in southern Brazil was 59,586; in '88 the total for the two ports of Rio and Santos alone was 130,056. On Nov. 16th a revolution broke out, and was supported by the army. The **Ministry resigned**, and a **Provisional Government** was formed, under the presidency of General Deodoro da Fonseca (*q.v.*). The Provisional Government, on the same day, declared the monarchy abolished, and on the 17th the Emperor and the Imperial family left for Europe. The following new constitution was published Nov. 19th:—1. That a Republic is proclaimed; 2. That the provinces of Brazil, united by federation, compose the **United States of Brazil**; 3. That each State shall form its own local Government; 4. That each State send a representative to Congress, which will soon be convened, and the final decision of which the Provisional Government awaits, pending which decision the Governors of each State shall adopt means to maintain order and protect the rights of the citizens; 5. That in the meantime the nation's internal and external relations shall be represented by the Provisional Government. Consult A. Gallenga's "South America," Agassiz's "Journey in Brazil," Burton's "Exploration of the Highlands of Brazil," Hadfield's "Brazil and the River Plate," *The Statesman's Year Book*, etc. For Ministry see DIPLOMATIC.

Breach of Promise Actions, '89. An action for breach of promise of marriage brought by

Miss Phyllis Broughton, an actress, against **Viscount Dangau**, was settled out of court, for judgment entered for the plaintiff (Oct.) for £2500.—In the case in which **Miss Wiedemann**, a governess, sued **Mr. Robert Horace Walpole** for breach of promise of marriage, and for libel, and in which the case was stopped by the judge because the plaintiff refused to answer a question, the Court of Queen's Bench (May) ordered a new trial.

Brewing Industry of the United Kingdom. According to last returns respecting brewing, the number of licensed brewers-for-sale on the 30th September, '88, was 12,506. One of these brewed 400,000 and under 450,000 barrels of malt liquor, one 450,000 and under 500,000, one 500,000 and under 550,000, one 550,000 and under 600,000, one 600,000 and under 1,000,000, and one 1,000,000 and over. The amount of licence duty paid and beer duty charged to the last-named brewer was £463,436. From later returns issued by the Commissioners of Inland Revenue the number of barrels of malt liquors charged with duty for the year ended 31st March, '89, was as follows: viz.—

| | Brewed by Brewers for Sale. | Brewed by other Brewers. | Total. |
|--------------|-----------------------------------|--------------------------------|-------------------|
| England | 14,732,304 | 80,098 | 24,812,402 |
| Scotland | 1,485,644 | 65 | 1,485,709 |
| Ireland | 2,346,618 | 64 | 2,346,682 |
| Total | 28,564,566 | 80,227 | 28,644,793 |

The gross receipts from beer duty during this period were £8,938,438, while the repayments on beer exported amounted to £168,143, leaving a net receipt of £8,770,295, which exceeded that of the corresponding period of the previous year by £58,762. The quantity of ingredients used by licensed brewers-for-sale for the year ending Sept. 30th, '88, was, malt and corn, 51,896,336 bushels, and the quantity of sugar (including the equivalent of syrups) was 1,523,870 cwt. 0 qrs. 4 lb. The quantity of beer exported from the United Kingdom for the year ended 31st March, '89, was 537,168 barrels. Compared with '87-8 there is a decrease of 717 in the number of licences issued. These figures show a continued decrease in the number of brewers for domestic use occupying premises of a yearly value exceeding £8. Others are exempt from licence duty by the Customs and Inland Revenue Act of '86. Several public brewers, in addition to carrying on the aerated water, engage in the wine and spirit trade. The extension of the latter business by brewers is advocated by the *Country Brewers' Gazette*, and especially by those who have "tied" publichouses to serve with malt liquors. Consult: "Noted Breweries of Great Britain and Ireland," by Alfred Barnard '89.

Bribery, Law on, in '89. A gentleman who sent a post order for ten shillings to an officer of excise, stating that he usually paid this amount privately and confidentially to the holder of that office in lieu of dog and dog-cart taxes, was fined £25 at Luton, in the month of July, for attempted bribery.

Bribery (Public Bodies) Prevention Bill. See Session, sect. 60.

Bridge, John Frederick, Mus. Doc., organist Westminster Abbey, was b. at Oldbury 1844.

Educated at the Cathedral School, Rochester. He subsequently became a pupil of the late Sir John Goss. In '69 he was appointed organist of the Manchester Cathedral, and in '71 Professor of Harmony at Owens College. He has been connected with Westminster Abbey since '75, and is also Professor of Harmony and Counterpoint at the Royal College of Music. His "Hymn to the Creator" was produced at the Worcester Festival of '84; "Book of Ages" at the Birmingham Festival '85; and "Callirhoe" at Birmingham Festival, '88.

Bridgetown. Capital of Barbadoes (*q.v.*), pop. 20,947.

Brisbane. Capital of Queensland (*q.v.*), on river Brisbane, about 25 miles from its mouth, in Moreton Bay; pop. 50,000.

Brisson, Henri, was b. at Bourges, '35. He entered his father's profession of the law, and also cultivated journalism. After the Revolution of Sept. 4th, '70, he was appointed Deputy Mayor of Paris by the Government for the National Defence. Elected a Deputy for the Seine department '71. He was the President of the French Chamber of Deputies when the Ferry Ministry was overthrown (by 308 to 161 votes) on March 30th, '85. On the assembling of the new Chamber, Nov. 10th, a scene arose on the Tonquin question with respect to alleged military mismanagement; and on the 14th M. Brisson's statement did not appear to have any effect in allaying the excitement. At the conclusion of the debate, the Government only had a majority of 4. M. de Freycinet was again requested to form a cabinet, and the Brisson Government ceased to exist after a term of office extending over barely nine months. He was put in nomination for the Presidency on the resignation of M. Grévy, but received practically no support.

Bristol and English Channels Ship Canal. During '88 some attention was called to a project of Mr. Owen, of London, for the union of the Bristol and English Channels by a ship canal, running from Stolford, near Bridgwater, which has the advantage of being opposite Cardiff, *via* Bridgwater, Taunton, and Exeter to Langstone Point, on the west side of Exmouth Bight, where would be formed the southern harbour. This route is described as offering every facility for the work, the chief elevation, White Ball Hill, which is 536 feet high, being turned by following the course of the old Great Western Canal. As much of the existing canals, or their remains, and the floating basin at Exeter, with its 5½ miles of canal to the Exc, are intended to be acquired, and the deepest cutting of the whole scheme will not exceed 200 feet. The canal will be on the level of the sea, taking its supply chiefly from that source, with sea-locks only at each end. The dimensions will be: length, 62 miles; width at surface, 125 feet; at bottom, 36 feet; and depth, 21 feet. These are the figures of the Grand Ship Canal of Holland from Amsterdam to the Helder, which admits loaded vessels of 1,000 to 1,500 tons, drawing 18 feet. A large and remunerative trade is looked for—coal alone from South Wales and adjoining fields offering, it is thought, a large revenue for a short cut to the English Channel, and thence to London, say 355 miles, thus competing with the North of England. The cost of the scheme is set down at £3,080,000, and the estimated profits from coal alone at about 12 per cent.

British and Foreign Anti-Slavery Society. Founded 1833, its first president being Thomas Clarkson. The objects of the Society, which carries on the work of previous Anti-Slavery Societies, the need for which had ended in the emancipation of slaves in British colonies, are: "The universal extinction of slavery and the slave trade; and the protection of the rights and interests of the enfranchised population in the British possessions, and of all persons captured as slaves." There is a large number of distinguished corresponding members in various parts of the world, who supply the Society with information. A great proportion of its work is carried on gratuitously. The Society has this year obtained the carrying of an address to the Queen for the convening of a conference of the Powers to consider the best means of stopping the slave trade by sea and land. Patron, the Prince of Wales; *Journal, The Anti-Slavery Reporter*; Sec., Chas. H. Allen; Office, 55, New Broad Street, E.C.

British Association. Founded at York in 1831, at the suggestion of Sir D. Brewster, for the purpose of stimulating scientific inquiry and for promoting the intercourse of scientific men. The Association meets annually for a session of one week, each year in a different town, but never in London. The only occasion on which a meeting has been held out of the United Kingdom was in 1884, when the Association visited Montreal. It was formerly the practice to elect occasionally as the president a man of high social position, but since 1867 this custom has been dropped, and the chair is now invariably occupied by a man of scientific eminence. The Association issues an annual volume, containing not only the addresses and abstracts of papers communicated to the several sections, but also reports on the state of science, prepared by committees specially appointed, and often assisted by grants of money for conducting researches. The Association is now divided into eight sections, distinguished by letters as follow: A, Mathematics and Physics; B, Chemistry; C, Geology; D, Biology; E, Geography; F, Economic Science and Statistics; G, Mechanics; H, Anthropology. Each section is governed by a president, vice-presidents, secretaries and committee. (For list of the successive presidents of the whole Association see ed. '87). The last meeting was held at Newcastle-on-Tyne in September '89, under the presidency of Prof. W. E. Flower, the Director of the Natural History Department of the British Museum, whose introductory address dealt mainly with the subject of scientific museums. The evening lectures were by Prof. Roberts-Austen, on the Hardening and Tempering of Steel; and by Mr. W. Gardiner, on Plants, and their Struggle for Existence. Mr. Baker discoursed to the working men concerning the Forth Bridge. The section for *Mathematics and Physics* was presided over by Capt. Abney, whose address was on Photography, in commemoration of the introduction of the art by Daguerre and Fox Talbot exactly fifty years ago. In the section on *Chemistry*, Sir Lowthian Bell, the president, spoke on the Metallurgy of Iron; and a committee presented an important report on the Teaching of Chemistry. In *Geology*, Prof. J. Geikie opened the work by a discourse on the Glacial Theory; and Dr. Nansen described the geological bearing of his journey across the Greenland ice; Mr. Dorsey gave an account of the Goldfields

of the Witwatersand; Dr. A. Geikie described the results of a recent visit to Norway; and Prof. Bonney his researches in the Lepontine Alps. In *Biology*, Prof. Burdon Sanderson discussed some of the fundamental endowments of living matter; Mr. Poulton read a paper on the Transmission of Acquired Characters; and Prof. Romanes one on the Utility of Specific Characters; while Sir J. Lubbock (q.v.) discoursed on the Origin of the Shapes of Certain Leaves, as those of the Oak. In *Geography*, Sir F. de Winton drew attention to the Science of Applied Geography, and gave a review of recent explorations. Dr. H. R. Mill spoke on *Commercial Geography*; while Capt. Hore described L. Tanganyika; Gov. Moloney, the Yoruba Country; and Dr. Guppy, Java. In the section for *Economic Science*, Prof. Edgeworth discussed the points at which mathematical reasoning bears upon political economy; while, in *Mechanics*, Mr. Anderson delivered an address on the Molecular Constitution of Matter in its Relation to Engineering, and on the Origin of Petroleum. Mr. Preece discussed the possibility of establishing telephonic communication between London and Paris. In *Anthropology*, Sir W. Turner discoursed on Heredity, and Mr. Du Chaillu (q.v.) argued that the English are descended from the Northmen or Vikings, rather than from the Saxons, Angles, and Jutes. The next meeting will be at Leeds, under the presidency of Sir Frederick Abel (q.v.), commencing on Sept. 3rd, '90. Offices: 22, Albemarle Street, W.

British Bechuanaland. A portion of Bechuanaland (q.v.) south of the Molopo river. It has been annexed, and is distinct from the Northern Bechuanaland Protectorate. The extension of a railway from Kimberley into it has been proposed. The Report of the Acting Administrator of British B. (issued '89), stated that the condition of the colony was generally satisfactory. There was a marked improvement in the maintenance of law and order, and crime had decreased throughout the territory; but the absence of an extradition treaty with the Transvaal and Orange Free State was regretted. The sale of liquor to natives still continues, and the law restricting it is still evaded. The harvest of '88 was stated to have been excellent. The Protectorate, which makes heavy demands upon the Government, as yet yields no corresponding revenue. Education and the sanitation of the larger towns are in consequence in an unsatisfactory condition. Consult "Affairs of Bechuanaland" (Blue-book, Capetown, 1889), and Mackenzie's "Austral Africa." For Governor, etc., see DIPLOMATIC.

British Columbia. A province of the Dominion of Canada which lies between the Rocky Mountains and the North Pacific Ocean, and from the United States boundary to 60° N. lat. Mineral resources vast, especially coal and gold. (See CANADA and BRITISH EMPIRE.) Consult pamphlets obtainable at High Commissioner's office, 9, Victoria Chambers, London, S.W. For Ministry see DIPLOMATIC.

British Guiana. A British colony in north of S. America. Coast extends from Orinoco to Corentyn river, 300 miles, and inland 400 miles. Divided into three counties—Essequibo, Demerara, and Berbice (pron. Berbees?). Capital, Georgetown (Demerara), pop. 49,000, a picturesque, well-built city and port, provided with various excellent modern institutions; second town and port, New Amsterdam

(Berbice), pop. 9,000. Rich alluvial low-lying plains extend forty to seventy miles from the coast, and are the seat of cultivation and settlement. Beyond rise mountains, covered with forest, and scarcely explored. Sundry fine rivers, the Essequibo, Demerara, Berbice, Corentyn, Cuyuni, Rupununi, Massaruni, Siparuni, etc., navigable for boats, but broken by cataracts. Flora and fauna very rich. Staple article cultivated is sugar-cane. Cotton, coffee, indigo, ginger, have at times been grown; coconut, cacao, tobacco, occupy attention. Iron and gold exist. Gold mining is now attracting considerable attention. Resources great, but enterprise deficient, except as regards the sugar industry. Government representative; constitution unique. Executive in hands of Governor; legislation conducted by Court of Policy of ten members, five nominated by elected College of Seven Kiezers. To pass finance six elected representatives added, forming Combined Court. Civil law is modified Roman-Dutch; criminal law is English. Clergy of Churches of England and Scotland have charge of eighteen parishes. Garrison of small detachment of troops (West Indian), two companies volunteers, and a nominal militia. (For latest statistics see BRITISH EMPIRE, table.) Exports consist of sugar, rum, molasses, gold, timber, shingles, charcoal, and cocoa-nut. To Oct. 23rd '89, 62,756 hhd. of sugar were exported. Population includes West Indians, white, coloured, and black, some Portuguese, Chinese, and 60,000 Hindu coolies. The aboriginal Indians of various tribes number perhaps 10,000. Colonies taken from the Dutch in 1803, and united as one in 1831. The boundary dispute with Venezuela still remains unsettled, but without prejudice to claims beyond Schomburg's line the Government exercises full magisterial and police functions in the north-western territory within that line, and is pledged to retain them. During the year the auriferous character of the north-western districts has been further tested, and the gold exported from Jan. 1st to Oct. 23rd was 21,932 ounces as against 11,853 ounces in the corresponding period of '88. The total number of labourers registered for the gold placers on Oct. 23rd was 4145. The mining is carried on by local effort only, and by primitive methods, no machinery being employed. The local Government is cutting roads through the north-west and endeavouring to render the cataracts of the rivers less dangerous for passage. Much disappointment was felt in the colony at the refusal of the Combined Court (which with the exception of the officials is composed almost exclusively of the planting interest) to agree to the appointment of a mineralogist to regulate and advance the gold industry. The Yuruarí Co. has taken up a grant of 500 square miles of territory within 30 miles of these Yuruarí concessions, the area of which concessions is claimed by both Venezuela and Great Britain. The Company, it is stated, will explore this territory and work for gold, and the practicability of cutting a road from Georgetown right into the Yuruarí territory is claimed to have been demonstrated. The sugar industry continues prosperous; and though the failure of the Government to carry the bill to give effect to the Bounties Convention gave disappointment to the planters, the better prices realised for sugar since its introduction, and incessant improvement in plant and labour organisation,

has enabled them to hold their own against bounty-fed beet sugar. At the time of writing (Nov.) important measures were submitted by the Government to the Court of Policy for giving greater facilities for the opening up of the country, and for the acquisition of interior lands beyond the mud-flats of the coast where the sugar plantations are situated. During the year there was rioting by the negroes in Georgetown against the Portuguese, and some damage to property caused. This led to the appointment of Lieut.-Col. Cotton to the command of the police. The Governor is Viscount Gormanston, K.C.M.G. Consult Bates' "South America" and "Her Majesty's Colonies," and Raleigh's "Discovery of Guiana."

British East African Association. A company recently constituted by Royal Charter to exploit certain territories on the Suahili coast of Africa. By the treaty concluded in '86 between Great Britain, Germany, and Zanzibar, the former's "sphere of interest" was declared to extend from the Tana river north and east to Somaliland. Mombasa is now virtually a British port, and the centre of this territory. Late in '87 the Seyyid of Zanzibar ceded to the Association all his rights over the coast from Port Wanga to the German port of Vitu. In '89 a new charter, conferring further powers on the Company was granted.

British Empire, Colonies, Dependencies, and Protectorates. We furnish a table of the British empire throughout the world, showing the geographical distribution of the various parts of it, their respective capitals, area, population, public revenues and expenditure, imports and exports, the dates at which they were acquired, and their political status and government. The dependencies are classified thus:—(a) Colonies possessing a full constitution, with responsible government; (b) colonies in which the legislature is partly elective and partly controlled by the governor, styled representative government; (c) Crown colonies, which are ruled directly by the Imperial government, through their respective governors and local officials; (d) dependencies subordinate to the government of others, provinces and parts of colonies, administered by functionaries appointed by the governments on which they are dependent; (e) protectorates, internally independent, but more or less subject to British control, by treaty and otherwise; (f) places nominally belonging to Great Britain, but either unoccupied or not under authority. Territories occupied by troops, but not declared to be actually British possessions (e.g., Egypt, Suakim), have not been included in this table. During '88 protectorates were proclaimed over Christmas Island, Rarotonga, Pehang, and British North Borneo (q.v.). A virtual protectorate over Brunei and Sarawak was also proclaimed. In '89 the Suwarrow Islands, north-west of the Cook Islands, were annexed. The details of the various dependencies will be found under their respective headings elsewhere. The figures given in the Table are the latest received in England. The population is, generally speaking, that of the census of '81, except in the responsibly governed colonies and some others, where it is the estimate up to June '89. Financial figures are generally those for '88-9, the year ending in June in most cases. (See following pages, and BRITISH EMPIRE, TRADE OF.)

Table of the British Empire

| | Name and Date of Acquisition. | Capital. | Area, Square Miles. | Population. |
|-------------------------|--|-----------------------------------|------------------------|--------------------|
| In The North Sea . . . | The United Kingdom of Great Britain and Ireland . . . | London . . . | 121,115 | 37,453,574 |
| | (b) Isle of Man, or Mona (1765) . . . | Castletown . . . | 220 | 53,558 |
| | (b) Jersey I. (1066) . . . | St. Heliers . . . | 45 | 52,445 |
| | (b) Guernsey, etc. Is. (1066) . . . | St. Pierre . . . | 32 | 35,257 |
| | (c) Heligoland I. (1807) . . . | "Oberland" . . . | 2 | 2,001 |
| In The Mediterranean. | (c) Gibraltar (1704) . . . | Gibraltar . . . | 1 $\frac{1}{2}$ | 24,467 |
| | (b) Maltese Is. (1800) . . . | Valetta . . . | 117 | 122,423 |
| | (b) Cyprus I. (1878) . . . | Nicosia . . . | 3,584 | 186,173 |
| In The Gulf of Aden . . | (d) Aden (1839) . . . | Aden . . . | 70 | 35,165 |
| | (d) Perim I. (1855) . . . | | 7 | 150 |
| | (d) Kuria-Muria Is. (1854) . . . | | 21 | 34 |
| | (d) North Somali Coast (1885) . . . | Berbera . . . | | |
| | (d) Socotra I. (1886) . . . | Tamarida . . . | 3,000 | 4,000 |
| In The Indian Ocean . . | (c) Mauritius I. (1810) . . . | Port Louis . . . | 708 | 368,163 |
| | (d) Rodrigues I. (1810) . . . | | | 1,830 |
| | (d) Seychelles & Amirante Is. (1810) . . . | Port Victoria } Diego Garcia } | 350 | 16,000 |
| | (d) Chagos and Oil Is. (1810) . . . | | | |
| | (b) Ceylon (1795) . . . | Columbo . . . | 25,364 | 2,763,501 |
| | (c) Maldive Is. | | | |

British Dairy (Farmers' Association). See DAIRY FARMING.

British Empire, Trade of, is estimated to amount at present to about £1,200,000,000 sterling per annum, which is nearly equal to the combined trade of France, Germany, Austria, Russia, and the United States; and the shipping required to carry on this gigantic traffic exceeds 125,000,000 tons. The United Kingdom takes as its share of the business 61·4 per cent., and India 16 per cent., leaving 23 per cent. to be divided among all the rest of the empire. **New South Wales and Canada** stand next in order to India, but far below it, with 3·8 per cent. each; the **Straits Settlements** have 3·4 per cent.; **Victoria**, 3·2; **New Zealand**, 1·3; **Queensland** and the **Cape**, 1·1 each; **South Australia**, 1; and all the other possessions considerably less than 1 per cent. each. The contribution of India and the colonies to the trade of the United Kingdom is a little over 26 per cent.: India contributing 9 per cent.; **Australasia**, 8; **British North America**, 2·9; the **Cape and Natal**, 1·3; the **Straits Settlements**, 1·1; the **West Indies** 1; and all the rest less than 1 per cent. each. As regards the trade of the United Kingdom, a survey of the returns for the thirty-four years (1854-87) shows a steady advance. The tonnage entered in '54 was 7,900,000, and in '87 it was 26,000,000, an increase of some 3½ times. In '54 the value of the imports was £152,400,000, and in '87 it was £361,900,000, an increase in value of less than 2½ times. These figures show that we are, as regards imports, getting a good deal more for our money now than we did in '54; while, on the other hand, we are receiving much less money for what we have to sell. Side by side with the increase of the trade of the empire has been a marvellous development of our shipping. Prior to '53, the foreign passenger vessels engaged in the passenger traffic beyond Europe were much larger in size, and carried a much greater number of passengers out of England than British vessels. Now the case is far otherwise; for while British passenger tonnage has grown from 285,000 tons on the average of the years '60-62 to 1,781,000 on the average of '85-87, foreign tonnage has decreased from 187,000 to 28,000 tons. At the present moment there are owned in the United Kingdom about 340 steamers over 2,000 tons, and averaging 4,000 tons each, as against 190 vessels over 2,000 tons owned by all foreign countries. There is a much smaller proportion of foreign vessels engaged in the trade of the United Kingdom than is the case with any other country; while British vessels have a large share of the carrying trade of other countries. British ships carry the following proportion of the trade of the countries named:—Portugal, 56 per cent.; Holland, 52; the United States, 50·7; Italy, 48·4; Russia, 48; France, 41·7; and Germany, 34. The total amount of British tonnage engaged in the trade of the nine great commercial countries in the year '86 was 50,487,000 tons, or nearly 9 per cent. more than the total amount of British tonnage employed in the trade of the United Kingdom. These facts are derived from a valuable statistical report, drawn up by Sir Rawson Rawson for the Imperial Federation League (q.v.).

British Honduras. A colony in Central America, bounded by Yucatan on N., Guatemala W. and S., and Caribbean Sea E. Exports, mahogany, logwood, dyewoods, and caoutchouc, Sugar-cane, coffee, cacao, coconut, tobacco,

and fruits cultivated; cochineal, indigo, fustic, sarsaparilla, tortoiseshell. For statistics see BRITISH EMPIRE, etc. (table). Crown lands sold at 48. per acre, leased at 5d. per acre. White immigrants are desired. Consult Bates "Central and South America," and "Her Majesty's Colonies."

British Museum. The establishment of the Museum dates from the acquisition in 1753 of the Sloane collections, which were bequeathed by Sir Hans Sloane to the nation on condition of a payment of £20,000. The Museum and Library were established in **Montague House**, and opened in 1759. Since that time many valuable libraries and collections have been acquired by gift or purchase, and the accumulations have so outgrown the space in Great Russell Street that it has been necessary to remove the natural history collections to a handsome and extensive building erected for their reception at South Kensington, which was opened in April 1881. The departments still remaining in Bloomsbury include, in addition to the department of printed books and maps and that of manuscripts, those of prints and drawings, Egyptian and Assyrian antiquities, Greek and Roman antiquities, British and mediæval antiquities, and ethnography and coins and medals. The Library contains not only the finest and most extensive collection of English literature in the world, but also the best library in each European language existing out of the country in which that language is spoken, as well as extensive collections of Hebrew and Oriental books. The department of MSS. is worthy of the collection of books, and in particular contains the most valuable materials for our national history. The number of printed books is about 2,000,000 and of MSS. over 50,000, besides as many charters. The annual accessions, from all sources, about 45,000 volumes, under the Copyright Acts alone are about 10,000 volumes. In consequence of the inconvenient extent to which the manuscript catalogue of the printed books had attained, (altogether nearly 3,000 large folios), it is now being put into print as rapidly as the funds will permit. It is hoped that the new printed catalogue will be complete in about 600 volumes by the year 1900. In 1883 a new wing was added to the building, from funds bequeathed by the late Mr. William White; and part of the space thus gained has been devoted to separate accommodation for newspapers and parliamentary papers. The natural history collections are now situated at South Kensington. A reader's ticket is granted to persons over twenty-one years of age on producing a recommendation from a householder. Consult "Museums and Art Galleries" (T. Greenwood).

British North Borneo. A territory in the north of the island of Borneo (q.v.). Mineral resources said to be immense. The country was originally ceded in 1877-8 to a private company of Englishmen by the sultans of Brunei and Sulu. Efforts were then made to obtain a royal charter, and, in spite of much opposition from the Governments of Spain and the Netherlands, this was granted by her Majesty in 1881. In Oct. '88 an announcement was made of the establishment of a virtual protectorate over British North Borneo, Brunei, and Sarawak. By this arrangement British influence is now supreme over the whole of the N.W. and N. coast of Borneo. The total area of this united protectorate is about 70,000 square

miles. Administration is in the hands of a Governor, who is assisted by a Council, and by Residents appointed to preside over provinces and districts; the machinery being similar to that in Crown colonies. On March 23rd, '89, the flag of the British North Borneo company was peacefully hoisted over the Padas Damit territory, which was shortly before the subject of conflict between the Company and the Pangeran Shahander. For latest statistics see *BRITISH EMPIRE*, etc. (table). Consult Hatton's "North Borneo," Penny's "Ten Years in Melanesia."

Broad Church. See CHURCH OF ENGLAND.

Brock, Thomas, A.R.A., b. 1847. Educated at the Government School of Design at Worcester. Studied at the Royal Academy. Becoming a pupil of the late Mr. J. H. Foley, the sculptor, he completed that artist's unfinished works, including the O'Connell monument in Dublin. Among Mr. Brock's works are "Salmacis," "Hercules strangling Antæus," statues of Paris and Enone, and a large equestrian group, "**A Moment of Peril**," purchased for the nation by the Royal Academy. His portrait statues are well known. He exhibited at the R.A. exhibition, '89, "**The Genius of Poetry**." Elected A.R.A. '82.

Brooks, Rev. A. Stopford, M.A., was b. 1832. Educated at Trin. Coll., Dublin, where he graduated (1856), winning the Downe Prize and Vice-Chancellor's medal for English verse. Minister of Bedford Chapel, Bloomsbury (1876), he now officiates. He was formerly Chaplain to the Queen and Chaplain to the Empress Frederick of Germany. In 1830 Mr. Brooke seceded from the Church of England in consequence of his not holding the orthodox views on miracles. Is the author of several works, among which are "Life and Letters of the late F. W. Robertson," "Primer of English Literature," an able review of which is to be found in Mr. Matthew Arnold's "Miscellaneous Essays," "The Early Life of Jesus," several volumes of sermons, and a volume of poems issued '88. He is at present engaged on a "**History of English Poetry**."

Brooks, Rev. Phillips, D.D., Rector of Trinity Church, Boston, U.S., was educated at Harvard University, where he graduated with distinction. He is a member of its *Senatus Academicus*. He is a Broad Churchman. At the request of the late Dean Stanley he preached in Westminster Abbey. Dean Stanley also preached in Dr. Brooks's Church in Boston. Archdeacon Farrar has also preached for him. Dr. Brooks is an active philanthropist as well as a popular preacher.

Brotherhoods, Anglican. In Canterbury Convocation, July '89, the Ven. F. W. Farrar, D.D., Archdeacon of Westminster, brought forward a proposal to found certain **brotherhoods of clergy** in the Church of England. The inception of the movement may be traced to a speech by the same eminent dignitary delivered at Burlington House in '87, in which he demanded some sort of brotherhood to cope with the needs of poor parishes. Subsequently the **Bishop of Rochester** appealed to Convocation on the subject, and a joint committee from both Houses was appointed, with the **Bishop of London** as chairman. Eight bishops, and a number of deacons and archdeacons, were upon the committee, which drafted a unani-

mous report recommending the proposal. Three resolutions were appended, one of which was proposed by Dr. Farrar in Convocation and passed with enthusiasm *nemine contradicente*. The remaining two resolutions—one relating to the imposition of vows, and the other to the maintenance of episcopal authority—are set down for discussion at the spring session of Convocation, '90. The vows approved in the report are of temporary duration, and dispensable by the bishop, enforcing poverty, celibacy, and obedience. It is a vital characteristic of the scheme that no appeal of any kind is to be made for funds or for public support. Small and **unauthorised brotherhoods** of clergy are not unknown in the Church of England—e.g., the "Cowley Fathers," Oxford, established about twenty years ago.

Broughton, Rhoda, a native of North Wales, has achieved notice as a clever novelist. Her first work, "**Cometh up as a Flower**," which was published about twenty years ago, at once made her name; and was closely followed by "**Not Wisely but too Well**," "**Red as a Rose is She**"; and these, with her latest novel "**Doctor Cupid**" (1887), are generally considered to be the best of the novels she has published.

Brown, Ford Madox, painter, b. 1827. Educated on the Continent. Exhibited (48) his "**Wickliff Reading his Translation of the Scriptures**," at the Free Exhibition, near Hyde Park; his "**King Lear**" (49). At the Royal Academy (51) he produced his third large picture, representing "**Chaucer at the Court of Edward III.**" and (82) "**Christ washing Peter's Feet**." Opened an exhibition in Piccadilly (61), his picture "**Work**" being considered his chief work at that time. His subsequent productions include "**The Coat of Many Colours**," "**Cordelia's Portion**," "**Elijah and the Widow's Son**," "**Romeo and Juliet**," "**The Entombment**," "**Don Juan**," and "**Jacopo Foscari**," as well as a painting representing Cromwell dictating the famous protest to the Duke of Savoy. Mr. Madox-Brown has recently been engaged in illustrating the history of Manchester in the Town Hall of that city.

Brown-Séguin, Edward, Prof. of Physiology, Ecole de Médecine, Paris, b. 1818 in the Island of Mauritius, where he was educated. Took the degree of M.D. at Paris '30. Devoted himself to the study of experimental physiology, the functions of the constituents of the blood, animal heat, and the spinal column. In '64 he visited the United States, after delivering a series of lectures in England, and was elected to the professorship of Physiology and Pathology of the Nervous System at **Harvard University**, which post he held for four years, when he returned to France; and in '69 was elected to the chair of physiology at the Ecole de Médecine, Paris. In '73 he returned to America and practised medicine in New York, during which period he edited, in conjunction with Dr. Séguin, "**The Archives of Scientific and Practical Medicine**." In '78, having again returned to Paris, where he now lives, he was elected to the chair of medicine in the French Academy of Sciences. Dr. B.-S. has recently startled the world with the astounding announcement that he has discovered a means of making the old young—in other words, that he has discovered the "**Elixir of Life**." The new elixir seems to be merely a development of the well-known hypodermic injection system of medication; but the Doctor holds that, by so injecting certain

essential constituents of the blood of a youthful animal into that of one of more advanced years, the life-giving properties of the former are assimilated by the latter, resulting in the renewal of youth.

Browning, Robert, poet and "writer of plays," was b. at Camberwell 1812. Educated at Univ. Coll. London, M.A., Hon. Fellow of Balliol, Oxford, LL.D. Cambridge ('79), D.C.L. Oxford ('82), LL.D. Edinburgh ('84). His first poem, "Pauline" ('33), was written at the age of twenty, and attracted the attention of Rossetti, who was much struck by its many beauties and originality. In '34 Browning visited St. Petersburg, and spent many months in Italy, studying Italian art and life. In '35 "Paracelsus" appeared; and Macready having accidentally suggested the writing of a play, *Strafford* was written, and produced at Covent Garden in '37, Macready and Helen Faucit (now Lady Martin) playing the chief parts. This was followed ('40) by *Sordello*, together with the series called "Bells and Pomegranates," including "Pippa Passes," "King Victor and King Charles," "Dramatic Lyrics," "The Return of the Druses," "The Blot on the Scutcheon," "Colombe's Birthday," "Dramatic Romances," "Luria," and "A Soul's Tragedy" ('41-46). Between '46 and '68 Mr. Browning published many of his greatest works: "Men and Women," "Christmas Eve and Easter Day," "Dramatis Personæ," and many shorter poems. In '68-69 appeared the "Ring and the Book." His best known poems are "Balaustion's Adventure" ('71), "Fifine at the Fair" ('72), "Red-cotton Nightcap Country" ('73), "Inn Album" ('75), "Pacchiarotto" ('76), "La Saisiaz" ('78), "Dramatic Idylls" ('79-80), "Jocoseria" ('83), "Dramatic Poems" ('84), "Ferihtah's Fancies" ('85), "Parleyings with certain People of Importance in their Day" ('87). A complete list of Browning's works has been issued by the **Browning Society**. Mr. Browning married ('46) the poetess Elizabeth Barrett (d. '61).

Browning Society, The. Instituted (1881) for the study of the works of the poet. Among its vice-presidents are Sir F. Leighton and Mr. Henry Irving. Of Browning's plays, "Colombe's Birthday," "The Blot on the Scutcheon," and "Strafford," have been performed. The society issues to its members the best papers read at its meetings, with abstracts of the discussions thereon. It has also issued free to its members, the various books published as handbooks to Browning's works. The meetings of the Society are held at University College, Gower Street. Hon. Sec., Walter B. Slater, 39, Wolsey Road, Crouch End, London, N. There are sixteen recognised Browning societies in the various provincial towns of England.

Brugsch, Heinrich Karl, Ph.D., a distinguished Orientalist, b. at Berlin 1827. While yet a student at the Gymnasium, he distinguished himself by his researches in Egyptology, and with the assistance of King Frederick William IV. was enabled to prosecute his studies in that subject in the principal European museums. He first visited Egypt in '53, and on his return was appointed keeper of the Egyptian museum in Berlin. On the death of Baron Minutoli, whom he had accompanied to Persia, he was appointed Prussian Ambassador to that country. He was subsequently appointed Professor of Oriental Languages in the Univ. of Göttingen, and in

'69 succeeded the French archaeologist, M. Mariette, as keeper of the collection of Egyptian antiquities at Boulak. He returned from Egypt in '81 with the titles of *Boy and Pasha*, and communicated the results of his researches in a course of lectures delivered at the Univ. of Berlin. Dr. B. is a voluminous writer on Egyptian antiquities, and has compiled a "Demotic Grammar" and a "Demotic and Hieroglyphic Dictionary." His well-known "History of Egypt under the Pharaohs," derived entirely from the monuments, has been translated into English.

Brunel, Otherwise known as "Borneo Proper," is a state in the north of Borneo (q.v.). Area about 25,000 sq. m. Capital Brunel. It is ruled by a sultan, who, however, is not vested with despotic authority, certain officers of his court having powers similar to a constitutional ministry. A virtual protectorate was proclaimed over Brunei by England in '88.

Brunel, Sir James, sen., b. 1816, at Kelso, who was the engineer of the *Mersey Tunnel Railway* (q.v.), received the honour of knighthood (May 7th, 1886). In the course of a long and varied experience at home and abroad, Sir James built the *San Paulo Railway*. He is a past president of the Institution of Civil Engineers, a member of the French Society of Civil Engineers, a Fellow of the Royal Society of Edinburgh, besides other learned societies, and was created a Knight of the Order of the Rose of Brazil by the Emperor in acknowledgment of his engineering works in that country.

Buchanan, Robert, poet, essayist, and playwright, b. 1841. Educated at Glasgow University. Some of Mr. Buchanan's poems, stories, and plays, notably the "Shadow of the Sword," "A Nine Days' Queen," and "Sophia," have secured for him considerable popularity. His play of "Sophia," founded on Fielding's "Tom Jones," had a run of several hundred nights at the Vaudeville. At the same theatre Mr. B.'s play "Joseph's Sweetheart" was produced early in '88, and reproduced in September. "That Doctor Cupid" was also produced at the Vaudeville Jan. '89, and had a long and successful run. His latest novel, "Rachel Dene," was first published in *Bow Bells*. Mr. B. composed the inaugural ode for the *Glasgow Exhibition*, and published in Oct. '88 an epic poem entitled "The City of Dream." His recent articles on "Modern Chivalry and Pessimism" gave rise to much controversy.

Buckhounds, Master of the. Has control of the royal hunts, and charge of the royal inclosure at Ascot. The office is in the department of Master of the Horse. See **MINISTRY**.

Buckle, George Earle, son of the Rev. George Buckle, rector of Weston-super-Mare, b. near Bath 1854. He is editor of *The Times*, to which post he was appointed in '84, having previously been connected with the editorial staff of that journal. Mr. B. was educated at Honiton Grammar School, Winchester, and New Coll., Oxford, of which he was a scholar. He won the *Newdigate Prize for English Verse* in '75, took a First Class in *Liberal Humanities* '76, and a First Class in *Modern History* in the following year. He was subsequently elected to a *Fellowship of All Souls' Coll.*, and was called to the bar at Lincoln's Inn in '80. Mr. B.'s name has recently been prominently before the public in connection with

the Farnell Commission (*q.v.*). He married a daughter of Mr. Jas. Payne, the novelist.

Buen Ayre, or Bonaire. An island on the coast of Venezuela, belonging to Holland. See COLONIES OF EUROPEAN POWERS.

Buckinghamshire, County Council for. See COUNTY COUNCILS.

Building, Law on, in '89. In the case of the *Queen v. The Mayor of Newcastle-upon-Tyne* (Queen's Bench Division, May), it was laid down that a corporation has not a general or absolute power to approve or to disapprove intended buildings, but only a power to disapprove of new buildings which contravene any statutory provision or byelaw.—It has been decided that a steam roundabout and appliances is a movable structure, and consequently cannot be set up in London without a licence from the London County Council, the object being to protect against fire. The convicting police magistrate said his decision ought not to be used as a side wind for doing away with fairs.

Building Societies. These societies may be divided into two sections—the Proprietary and the Mutual Societies; the latter dividing the whole of the profits amongst the members *pro rata*. Some are permanent, and others terminable. A favourite development of the latter is the *Star-Bowkett*—named after the founders of the system—a society which allots its capital among the members, according to the number of shares they nominally hold, by ballot. The subscriptions, generally a small sum per share, are paid weekly or monthly; and on securing an "appropriation" the member repays this sum very much as he would pay his rent, over a term of ten or twelve and a half years, at the end of which the house or land becomes his own. He also maintains his small subscription, and at the winding-up of the society he is entitled to a share of the profits. A further development of the ballot system is the arrangement by which the member may sell his appropriation and his subscription book, thus realising an immediate premium. According to the annual official return up to Dec. 1888, issued '89 (latest return), there were in the United Kingdom 2,234 societies, of which 2,146 were in England and Wales, 44 in Scotland and 44 in Ireland; total membership, 604,144. The total liabilities in societies making returns amounted to £51,341,772. The liability on shares of this total was £36,116,749; to depositors and other creditors, £15,225,023; and for balance of unappropriated profit, £2,019,995. Much difficulty was experienced in ascertaining the particulars required for the return, in consequence of the great variety of forms in which societies draw up their balance-sheets. The whole system of building societies accounts is generally somewhat complicated, and the different societies vary very much in their mode of stating them.—Law on. It was decided ('88) that if a building society is being wound up, the creditors may force the borrowing members to pay up the whole of their debts to it at once instead of by instalments. The contract to pay by instalments is regarded as binding among members themselves, but as not remaining in force against creditors.—'88. The cases of *Davis v. The Second Chatham Permanent Building Society*, and of *MacKenzie v. The Everton and West Derby Permanent Building Society* (Queen's Bench Division, Nov.) both raised an important

question. The plaintiffs had been members of building societies, and had given notice to withdraw their money. Subsequently they sued to recover it by process at law, and the question raised was whether they were entitled to do this, or whether they were bound to submit the matter to arbitration, in accordance with the rules of the society. It was contended for the plaintiffs that they were not bound to do this, because, when they gave notice to withdraw the money, they ceased to be members of the societies, and ceased also to be bound by the rules. The Court, however, held that the plaintiffs did not, upon giving notice to withdraw, cease to be members of the societies, but continued subject to the rules which bound them to refer disputes to arbitration.

Bulgaria. By Treaty of Berlin, 1878, Bulgaria was constituted an autonomous and tributary principality under the suzerainty of the Porte, the executive power being vested in the prince, assisted by council of ministers, and the legislative power in a single chamber, the National Assembly, elected for three years by manhood suffrage in the proportion of one member to every 10,000 of population. In '83 a second chamber was formed, and it was enacted that every law must be examined and voted by both chambers and sanctioned by the prince. In '85 Eastern Roumelia was united to B. (For history '78 to '86 see ed. '88.) By the treaty the amount of tribute and the share of the Turkish debt to be assumed by Bulgaria was to be fixed by agreement between the Powers, '89. Area (including Eastern Roumelia, now also known as Southern Bulgaria: area 13,500 sq. m., pop. about 975,000, former capital Philippopolis, pop. 33,442), 37,860 sq. m.; pop. ('88) 3,154,375. Capital, Sofia, pop. 30,438. Budget for '89: revenue, 63,000,000 lei (lei = about 18s.); expenditure, 75,000,000 lei. Imports ('87), 46,036,362 fr.; exports, 41,332,864 fr. Chief imports, textile manufactures, iron, coals; chief exports, corn, wool, tallow, and other agricultural and pastoral produce. The bulk of the trade is with Turkey, Great Britain, and Austria. Railways connect Sofia with Constantinople and Belgrade, and Rustchuk with Varna. Of the population over two-thirds are of the Greek Church, and less than one-third Mohammedans, Jews, Gipsies, Armenians, etc.

—'89. **POLITICAL.** The conflict entered into by M. Stambouloff with the Bulgarian Synod resulted in the dissolution of the Assembly by the Premier (Jan. 11th), and the Metropolitan Simeon, Constantine and Clement, were by order of the Government, sent back to their dioceses, for, amongst other things, refusing to celebrate the festivals of St. Ferdinand and St. Clementine, unknown to the Greek Calendar. The dispute was ultimately settled by the re-convoocation of the Holy Synod and the concession by the Exarch that two bishops not of requisite seniority to sit in the Synod should be replaced, the condition that nothing should be discussed at the Synod but purely ecclesiastical questions, and that it should make a declaration in favour of the election of the Prince by the people. Difficulties also arose with the general staff of the army. Some friction was caused by Prince Ferdinand hoisting a new flag on the roof of his *konak*, but by the advice of his Council the old flag was restored.—Much excitement was caused (Feb.) by the arrest at Sofia, by order of the Premier, of the sixty persons who signed an address to the

Exarch which contained insulting expressions towards the Prince. Those arrested included several ex-ministers and persons of distinction. The utterances of the Exarch at his interview with M. Zankoff, in which H.I.M. expressed his hostility to Prince F., produced an unfavourable impression and some uneasiness.—The news (March) of Prince Alexander's marriage was received with much regret by his partisans in Bulgaria. Strained relations caused between Prince Ferdinand and the Premier in connection with the conduct of the bye-elections.—The Austrian Government (April 1st) closed the last of its post offices in Bulgaria (Philippopolis). Prosecutions of ex-Ministers Radoslavoff and Ivantchoff, and leaders of the Opposition, for sending a telegram to the Prince complaining of the ill-treatment of voters by M. Stambouloff during the last elections. Condemned by Court of First Instance to a year's imprisonment, with liberty to petition the Prince for reduction of the sentence to four months. Appeal made. In reply to a telegram of congratulation sent to the Sultan, on the occasion of his birthday, by Prince F., the Sultan, who had hitherto ignored the Prince, requested the Grand Vizier to convey his thanks. This was the first time that the Turkish prime minister had put himself into direct communication with Prince Ferdinand. Final protocols for postal and telegraph Convention between Bulgaria and Turkey signed by the Bulgarian and Ottoman delegates at Constantinople (29th). A police order was issued (May 1st) requiring recently returned Bulgarian emigrants to return to their homes in three days, and also one calling upon foreign residents to present their passports at the Prefecture of Police within twenty-five days. Second anniversary of the accession of the Prince celebrated with great festivities. Suspicion excited by the conduct of the Serbian Ministry in distributing arms amongst the border population (July). Precautionary measures were taken by the Government. Reports spread (Aug.) to the effect that Bulgarians were about to proclaim the independence of the country. It was also stated that the Government were making earnest representations to the Porte to persuade it to recognise Prince F. Anniversary of the union of the two Bulgarias celebrated (18th). Requiem mass in Sofia cathedral for M. Zacharia Stoinoff, President of the Sobranje. The Government ordered the expulsion of the Greek Bishop Gavril for persuading the people not to elect an ecclesiastical council (Sept.). Appointment by the Pope of Canon Antoino Stillemans, Bishop of Ghent, (Oct.). The Bill for the organisation of the Bulgarian army provides for standing force of 30,000 men, and two classes of Landwehr each of 50,000; length of service in regular army to be two years, five years in first class, and ten years in second class of the Landwehr. Prince F. visited Paris, Brussels, Vienna, and Germany during the month. A loan of 25,000,000 fr. concluded with the Linder Bank, guaranteed by a mortgage on the receipts and rolling-stock of the Bulgarian railways. The interest is 6 per cent., and 10,000,000 fr. are to be advanced forthwith, the remaining 15,000,000 fr. in quarterly instalments. The credit of Bulgaria, financial and political, will be considerably raised by this loan, to which the sanction of the Ottoman Government, though not yet actually given, has been virtually promised. Sobranje opened (Nov. 3rd), when the Prince

delivered a statesmanlike speech from the throne, which met with unanimous praise from the Austro-Hungarian press. **GENERAL.**—Execution of the Rilo brigands (May 9th) at Sofia. Bourgas-yambell Railway inaugurated by the Prince (13th). Grand review of troops on Prince's nameday (30th). The Government adopted the plans of the English engineer, Sir Chas. Hartley, for the enlargement of the ports at Varna and Bourgas (July 11th).

Bulgarian Political Parties and the Sobranje. The party divisions in the Bulgarian Sobranje or National Assembly may be generally described as **Ministerialists** and **Opposition**. The present Sobranje was elected in Oct. '87. The elections resulted in a decided victory for the Government, which has some 250 supporters out of a House of less than 300. The chief members of the **Governmental party**, which is also the **anti-Russian party**, are M. Stambouloff, Premier and Minister of the Interior, Dr. Stransky, Minister of Foreign Affairs, M. Solobatcheff, Minister of Finance, M. Touthcheff, Minister of Justice, M. Ziokoff, Minister of Public Instruction, and Col. Moutkouroff, Minister of War, also members of the Ministry. The chief **Opposition leaders** are MM. Karaveloff and Radoslavoff, M. Zankoff, a former leader of the **pro-Russian party**, having left Bulgaria in July '88. He is now living at Belgrade, whither he recently removed from Russia.

Bülow, Hans Guido von, b. at Dresden, '30. Was originally designed for the law, but adopted music as his profession. He played before Mozart as a boy, and also took lessons from Haydn. When a student at the University of Berlin, he contributed to *Die Abendpost*, a democratic journal, in which he defended the musical doctrines of Liszt and Wagner. He became a pupil of Liszt in '51, and from '55 to '64 he held the post of Master of Piano-forte at the Conservatoire of Professors Sterne and Marx at Berlin. He became Director of the Conservatoire at Munich, where he organised performances of Wagner's principal works. In '78 he was appointed *Königlicher Hofkapellmeister* at Hanover. He has given performances with distinction in most of the European capitals, and in June, '88, gave a series of Beethoven recitals at St. James's Hall, London. He is characterised by the intellectual grasp of his subject as well as by remarkable technical skill. He has composed, among other works, music to Shakespeare's "Julius Cæsar," and to "Nirvana," "Des Sängers Fluch," "Vier Charakterstücke für Orchester," and "Il Carnovale di Milano."

Bundesrath. See GERMANY and GERMAN POLITICAL PARTIES.

Burglars, Proposal to Flog. See SESSION, sect. 85.

Burial Laws Amendment Act, '80. This is an Act to enable the burial of Nonconformists and others in Church of England burial-grounds without the service of the Church of England, and in some cases with other services. It was long opposed by churchmen on the ground that its advocates had no real grievances, but regarded it as a stepping-stone towards Disestablishment. It provides that any one responsible for the burial of a deceased person may give forty-eight hours' notice in writing, and in the form prescribed in the first schedule to the Act, to the incumbent of any place or his substitute, that it is intended to bury

the deceased in the churchyard of such place without the rites of the Church of England, and that the incumbent or his substitute shall then be free to permit such burial. The burial shall take place in accordance with such notice, and the public are to have free access to such burial, which may be carried out either with the service of any Christian Church or without any service. But the proceedings are not to be made the occasion of bringing into contempt any church or denomination. Ministers of the Church of England are empowered to use the burial service of the Church of England at a burial in unconsecrated ground. In cases where that burial service is not allowed to be used, or when requested so to do by the person responsible for the burial of the deceased, they are empowered to use such service, consisting of prayers taken from the Book of Common Prayer and portions of Scripture, as may be approved of by the Ordinary. The Act extends to the Channel Islands, but not to Scotland or Ireland. Consult, for laws relating to burial, "The Law of Burial," by J. B. Little.

Burial Reform. Much discussion has recently taken place respecting improvements for the disposal of the dead, the etiquette in connection with funerals, and the reduction of the expense of such. These desirable objects have with good results been advocated by the **Church of England Burial, Funeral, and Mourning Reform Association**, whose presidents are the Archbishops of Canterbury and York, while its patrons include nearly all the bishops and a great number of the leading laymen. The reforms recommended by the Association are:—(1) The interment of the body as soon as possible in sufficient and suitable soil for burial. (2) The use of coffins which will rapidly perish after interment. (3) The disuse of vaults and bricked graves. (4) The encouragement in the interests of health of the removal of the body in crowded districts to a mortuary instead of retaining it in houses occupied by the living. (5) The exercise of simplicity and economy relating to funerals by the use of plain hearses or wheeled biers, the discontinuance of crapes, hatbands, scarves, feathers, velvet trappings, and the like, the avoidance of excessive floral decoration, and the discouragement of inordinate eating and drinking at funerals. (6) The meeting in the church or cemetery instead of at the house of mourning. (7) And showing Christian fellowship in deeds as well as in words at the interment of the poorest. The co-operation of the leading men and the press of every shade of opinion in Canada and the United States in favour of burial reform, as recommended by the Association, has recently been gained. Papers were read in support of the movement at the **Church Congress**, at Manchester in Oct. '88, by Mr. Seymour Haylen, Mr. A. Sington, and the Bishop of Nottingham, and their remarks were discussed at the meeting. Last year ('89) the council of the Association memorialised the **Home Secretary** for the appointment of a **Royal Commission** to inquire into the conditions and the modes of burial with a view to legislation. The council now propose to approach Lord Salisbury with a view to prevailing upon the Government to introduce a Bill amending the Burial Acts. Sec. of the Association, Rev. F. Lawrence. Office, 16, King St., Cheapside, E.C.

Burmah comprises a vast tract of country in southern Asia, bounded on the north and west

by the mountainous ranges of Thibet, Assam, and Manipur, on the east by Chinese territory, and partly on the south-east by Siam. The whole of the southern and part of the south-eastern sides form the Burmese shores of the Bay of Bengal. There are three great tribal families in the country, the chief of which is the Mran-má (from which the word Burmah is derived); and while distinct from the Aryans in India and the Chinese on the other side, the natives to some extent partake of the peculiarities of both. The origin and early history of the people are lost in obscurity, but the country is covered with the traces of a past civilisation, and it is known that from remote times the land has been the scene of prolonged internecine warfare, and at least two Chinese invasions. The country is fertile, especially in the valley of the great river Irrawaddy, which is navigable for river boats for six hundred miles from the Bay of Bengal; and many valuable minerals are found, including the rubies which excited the cupidity of early navigators, and a good supply of petroleum. Buddhism is the religion of the people, and in Burmah it is of a peculiar type, which allows perfect tolerance to all other creeds, but prevents proselytism. Every boy enters a temple or pagoda at an early age, and being taught to read and write, develops into a bonze or monk (sec BONZI), but he can leave or stay as he thinks fit. The country is covered with these temples, which, with the clergy, are all supported voluntarily. The position of the Burmese women will compare favourably with any other Eastern nation. (For a concise history of the country, including the Burmese wars, see eds. '87-9.) Here it may be stated that by the treaty of Yendabu (1826) the British annexed Aracan and Tenasserim; and at the close of the second war (1852) the remainder of the coast-line, including Rangoon and the whole province of Pegu, fell into our hands. Inland from this time an imaginary frontier divided Independent from British Burmah. The seat of government in the former was removed from time to time, till, on the outbreak of the third and last Burmese war, which occurred towards the end of '85, the capital was Mandalay, which was entered by the British forces under General Prendergast on Nov. 28th of that year. **Upper Burmah** was annexed by proclamation on Jan. 1st, '86. Although since that time the new possession and portions of the old have been much troubled with dacoity, and trade has been unsettled, the whole land is known to be teeming with natural wealth, Lower Burmah having already proved a rich possession. The *Times* of Dec. 17th, '88, gives a summary from a recent report of Dr. Neesling, of the Geological Survey of India, who discovered a veritable mountain of iron among the Shan Hills of Upper Burmah, at Singaung. He estimates that the hill covers at least an area of about a square mile, and that it rises about 200 feet above the level of the Twiunge valley. The ore is hematite-proxide of iron. In December the rice crop was reported from Rangoon to be a very full one, the Government estimating the quantity available to be 1,100,000 tons; while early in '89 it was reported that the India-rubber trade of the Chindwin river had largely and rapidly developed. An important point of policy with regard to the Shan States was announced (Dec.) on the recommendation of Sir C. Crosthwaite, Chief Commissioner of Burmah.

In consequence of the great disparity in the power and influence of the various *Tawbwas*, it was found inconvenient to govern them as feudatory states in India direct from Calcutta, and therefore it was decided to cause them to be immediately subordinate to the local Government in Burmah. It was reported from Rangoon, Dec. 31st, that the insurrectionary movement among the Ohins in the Yan country was spreading rapidly under the direction of the Shway-gyobin Prince—a person it appears who, before the annexation of Upper Burmah, was employed as Government Vaccinator in Lower Burmah. From Rangoon, Jan. 19th, '89, it was stated that the revenue of Upper Burmah showed satisfactory signs. In '86-7 it was 202 lakhs of rupees, next year it was more than doubled, for the year '88-9 was estimated at 454 lakhs, while for '89-90 it was anticipated to touch 75 lakhs. From Rangoon, under date Feb. 2nd, it was reported that the salary of the Chief Commissioner had been increased by 1000 rupees per month. It was reported from Rangoon, Feb. 10th, that great financial pressure prevailed in Burmah owing to scarcity of silver coin, the rates at the Rangoon branch of the Bank of Bengal being from 11 to 15 per cent. On Feb. 15th, Mr. G. Shelton Streeter read a paper before the Society of Arts, on the Burmah Ruby Mines, which he had explored. The lease of the mines to the Streeter Syndicate was signed at the India Office on Feb. 22nd; it is for seven years, and is renewable. The *Times* of March 19th announced the arrival of a consignment of rubies from the Burmah mines containing some five stones averaging over three carats. A great fire occurred at Rangoon Jan. 6th, and upwards of 100 houses (wooden structures) were destroyed. News of another expedition, that against the Red Karens, was received on Jan. 7th, when a force under Brig.-Gen. Collett encountered the enemy under Sawlawpaw's son, near Loweku, killing about 150; he reported soon afterwards that the enemy had been entirely dispersed, the capital Sawlon falling on Jan. 8th. Early the following month it was reported that as Sawlawpaw had disappeared, his nephew and heir-apparent Sawnee had been appointed ruler of Karennie in his stead. Two more great fires, declared to be of accidental origin (but afterwards denied), occurred at Mandalay on Feb. 3rd; in one case a monastery and 622 houses were destroyed, besides the cantonment bazaar, while in the other between 200 and 300 houses were burnt. Sayin, the capital of the Taashon-Chin tribe, was captured on Feb. 7th. Under date March 31st (Calcutta), it was stated that Burmah had been constituted a first-class military district, and divided into three second-class districts subordinate to the supreme military authority of the Madras Commander-in-chief. But the officers will report direct to the army headquarters of the Government of India all matters relating to the field service operations and the disposition of the troops in Burmah. It was further reported (Mandalay, March 31st) that on General Sir George White relinquishing the command in Upper Burmah, the whole of Burmah would be under Major-General Gordon, Brigadier-General Wolseley commanding at Mandalay, Brigadier-General Faunce at Myingyan, and a staff-colonel at Bhamo. From Rangoon, April 1st, it was stated that, owing to continued disturbances in the Bhamo district, it had been decided to

despatch a column under Brigadier-General Wolseley against the Toukan Kachyens, the column to concentrate at Mansee, which place had been almost destroyed by the Dacoits; the Bhamo garrison had been reinforced by 350 men. This expedition proved completely successful. From Rangoon (April 7th) it was reported that Sawlawpaw had returned to Sawlon, and had practically deposed his nephew. The new administrative report for Burmah ('87-8) was issued in April; and, speaking generally, the Chief Commissioner remarked that in Upper Burmah the results of the second year of its administration as a British province and of the subsequent months have surpassed expectation. A lengthy summary of the report appeared in the *Times*, April 25th. A telegram from Rangoon, May 5th, stated that the year's imports of salt into Burmah up to date showed a falling off of about 20,000 tons. On May 2nd it was stated that it had been determined to send a strong military force to the Ruby Mines district as early as possible, and that several officers at home on leave had been ordered to join their regiments in Burmah without delay for the purposes of this expedition. According to intelligence from Rangoon, May 11th, it had been decided to pension five ministers of the Hlootdaw, who since the annexation had been retained at Mandalay as a consultative committee. Their services were purely nominal, but the entire change in the administration rendered even these unnecessary; the records of the Hlootdaw were removed to Rangoon. Under date Simla, May 11th, we learn that the official despatches regarding the expedition against the Karens, under General Collett, had been published, and the whole affair described as a brilliant success. It was reported from Rangoon, May 18th, that definite news had been received to the effect that the Taiping trade route between Bhamo and Yunnan was blocked by Kachyens, a matter about which there had previously been many rumours more or less well authenticated. It was reported on May 18th that the local government at Rangoon had decided to impose a tax upon all timber arriving by the Salween river, in spite of the protests of the Moulmein timber merchants. According to a telegram dated Rangoon, May 26th, much attention had been attracted in Burmah to the telegraphic report of certain questions asked by Mr. Bradlaugh in the House of Commons, and the answers given by Sir John Gorst, as to alleged widespread discontent and distress in Upper Burmah. From Calcutta, June and, we learnt that at a meeting of the Legislative Council at Simla a bill to amend the law relating to the Courts of Lower Burmah was passed. A report on violent crime in Burmah during the first quarter of '89 shows a considerable improvement in the state of the country. In the whole country there were 315 cases against 595 in the corresponding period of '88; dacoities fell from 233 to 130, robberies from 196 to 111, and murders from 30 to 11. In detection there was but little improvement. In a despatch from Major-General Sir George White, K.C.B., V.C., late commanding the Upper Burmah force, to the Adjutant-General in India, and dated Simla, July 6th, '89, the following is given as the list of casualties which have occurred to the expeditionary force between May 1st, '87, and March 31st, '89. Killed or died of wounds: British officers, 6; native officers, 2; British soldiers, 10; native soldiers,

as; total, 60. Wounded: British officers, 6; native officers, 4; British soldiers, 35; native soldiers, 97; total, 142. In addition to this list, however, Sir George White points out that since Nov. '85 over 6000 officers and soldiers have been invalided. The vexed questions arising out of the "consolidating" of villages and the deportation of villagers were much modified later in the year by the local government of Upper Burma, who issued circulars regulating these administrative acts. The *Rangoon Gazette* and the *Mandalay Herald* were particularly outspoken against the policy of grouping villages. In July another wise regulation was instituted, by which no judicial officer was allowed to try dacoits he had been pursuing. In August it was reported that the French Consulate at Mandalay had been closed, the Vice-Consul at Rangoon taking over charge of French interests. In September Sir C. Crosthwaite, Chief Commissioner, left for India on sick leave, his *locum tenens* being Mr. A. P. Macdonnell, C.S.I. In a military despatch (Simla, Sept. 7th) General Sir G. S. White spoke in high terms of Sir C. Crosthwaite's energetic administration, and regretting systematic local misrepresentations. Another and larger expedition against the Chins commenced serious operations in October, being aided this time by the Tashons. Early in November arrangements were made for the visit of Prince Albert Victor during the cold season; he is expected to stay three days in Rangoon and two in Mandalay. According to a telegram dated Rangoon, Nov. 17th, it was estimated that for '89-90 the revenue of Lower Burma would be 3 crores 20 lakhs, and for Upper Burma 88 lakhs. The actual receipts showed increases. From the official report on education in Lower Burma, during the official year '88-9, there appeared to be a considerable increase in both pupils and schools. The latter increased from 538 to 567, and the former from 117,341 to 121,672. Consult Balfour's "Cyclopædia of India," Hunter's "Imperial Gazetteer of India (Rangoon)," "Encyclopædia Britannica (Burmah)," also Colquhoun's "Burma and the Burmans," Yule's "Embassy to Ava," etc., and for Chief Commissioner, etc., see DIPLOMATIC.

Burma and Siam Railways. (For history and earlier details, see previous editions). In December it was reported that the *Toung-hoo-Mandalay* line might be opened for both passengers and goods in the following February, but a delay had arisen at the bridging of the Snithay river. The railway was, however, opened on Feb. 27th, '89, when Sir Charles Crosthwaite, Chief Commissioner, and Sir Charles Elliott, Minister of Public Works, joined the special train from Rangoon at Kyaukse and accompanied it to Mandalay. Here Sir C. Crosthwaite drove the last spike and declared the line open, and the municipality of Mandalay presented an address. Mr. Buyers, chief engineer of the line, was complimented on the occasion on the excellence of his work. On April 5th, Mr. Holt S. Hallett, C.E., addressed the members of the Manchester Chamber of Commerce and other bodies on "The Necessity of the Extension of Indian Railways for the Development of British and British Indian Trade." He said a railway could be constructed at a reasonable cost, which would tend to greatly enhance the commerce of Great Britain and India with Siam, the Shan States, and the

western half of China. The *Rangoon Gazette* of the 6th stated that, owing to the disturbed condition of the country, no night trains were allowed to run on the Toung-hoo-Mandalay line. Under date, Rangoon, April 7th, it was announced that an expenditure of 20 lakhs had been sanctioned towards the construction of the *Mon Valley Railway*, which will eventually extend to Bhamo *via* Mogueng. It was reported from Rangoon, Sept. 8th, that the Government of India had sanctioned a deputation of two executive engineers to report on the construction of a railway to the Salween frontier during the cold season. According to a Rangoon telegram (Nov. 17th), the receipts from the Mandalay line had already exceeded expectations.

Burnand, F. C., the editor of *Punch*, was b. 1836. Educated at Eton and Trin. Coll., Cambridge. Called to the bar (1882). Has been a voluminous dramatic writer, principally devoting himself to burlesque, of which "Ixion" and "Black-eyed Susan" may be said to have inaugurated the era of "long runs." Among the travesties of the works of living novelists those on "Ouida" and Rhoda Broughton are the most popular, and "Strepson" is the best specimen, has also produced burlesque on "Ariane," entitled "Aisy-Annie," '88. Author of "Happy Thoughts" in *Punch*. Became, after some years' connection with *Punch*, its editor ('80).

Burne-Jones, Edward, A.R.A., b. at Birmingham 1833. Educated at King Edward's Grammar School of that town, and Exeter Coll., Oxford, of which he is an Honorary Fellow. He received his inspiration as an artist from Rossetti, and has developed his originality and power independently of the schools. He was elected President of the Royal Birmingham Society of Artists in '85, and Associate of the Royal Academy in the same year. Mr. Burne-Jones' pictures were, until recently, amongst the chief attractions at the Grosvenor Gallery (*q.v.*), but owing to a dispute with Sir Coutts Lindsay, he in '87 severed his connection with that institution, and took a prominent part in the establishment of the *New Gallery*, to which he contributed "Lord Raleigh at Work in his Laboratory," and "Mr. Watts, R.A., at Work on his Colossal Statue, 'Vital Energy.'" He exhibited twenty-five finished studies in pencil and black chalk at the *New Gallery*, '88.

Burnett, Frances Hodgson, was b. in Manchester, 1849. In '65 her parents left England, and settled in Tennessee. Mrs. B. published her first story, entitled "Surly Tim's Trouble," in *Scribner's Magazine*, in '67. Her popular story, "That Lass o' Lowrie's," appeared subsequently in the same magazine. On her marriage with Dr. Luan M. Burnett, she removed to Washington. She achieved great success with "Little Lord Fauntleroy," which was dramatised in '88. In October '88 Mrs. B. was presented with a half-hoop diamond bracelet by many eminent literary comrades in token of the successful issue of the copyright law case *re* "Little Lord Fauntleroy." Her most recent work is "Sarah Crews." In '89 it was announced that Mrs. B. had joined an American syndicate, by which her various stories will be brought out simultaneously in a number of magazines.

Burns, John, was b. in very humble circumstances in 1758 at Vauxhall, and attended

Christ Church school at Battersea till he was ten years of age, when he went to work at a local candle factory. He then became a rivet boy in an engineer's workshop at Vauxhall, and later apprenticed himself to an engineer at Millbank, and served till he was twenty-one. Throughout youth he was an omnivorous reader, and during his apprenticeship got into trouble with his employers because of an open-air address. He imbibed his Socialistic theories from a fellow-workman in an engineering shop, this man, a Frenchman, being a refugee from Paris since the Commune. He worked as foreman engineer for twelve months on the Niger (West Africa), and on his return spent his savings in a six-months' tour through Europe. He first attracted public attention by his speeches on Socialism at an Industrial Remuneration Conference in London, and since then has constantly addressed working-class audiences. He became prominent in his own trade society (the Amalgamated Engineers). At the General Election in '85 he stood as a Socialist candidate for the western division of Nottingham, but obtained only 558 votes. He played a leading part in the unemployed agitation of '86, and was the leader of the mob which, Feb. 8th, '87, broke from the control of its leaders and caused a riot in the West End. He contested the right of public meeting in Trafalgar Square, and suffered six weeks' imprisonment for resisting the police ('87). He is a member of the London County Council (q.v.) for the Battersea Division, and also social democratic candidate for the parliamentary representation of the division. During the recent dock strike (q.v.) he enjoyed much popularity, and wielded considerable influence. See STRIKES.

Burns, Sir George, Bart. (b. 1795), founder of the Cunard line of steamers, is a son of the late Rev. Dr. Burns, of the Barony Parish, Glasgow. Sir G. and his brother James commenced business in Glasgow as general merchants in '18. Subsequently they became shipowners; and on the successful application of steam to navigation, the Government invited tenders for carrying the American mails, for which Sir George, with the assistance of Mr. Cunard, Mr. MacIver, and Mr. Napier, secured the contract. This laid the foundation of the famous Cunard line. The first ship, despatched by the

company was the *Britannia*, which sailed July 4th, '40. In '85 the business was converted into a limited liability company. Sir George retired from the management of the line in '59. He was created a baronet, '89.

Butler, Lady (née Miss Thompson), b. at Lausanne, Switzerland. At the age of five she began to handle the pencil, and continued her studies in Florence. In 1870 her family returned to England, and remained at Ventnor until the unprecedented success of Miss Thompson's "Roll Call" necessitated a removal to London. Her first picture, "Missing," was exhibited at the Royal Academy in 1873, "Roll Call," ('74), which was purchased by the Queen; and the artist subsequently painted "The 28th Regiment at Quatre Bras," "Balaclava," and "Inkerman." Her other pictures include "Listing for the Connaught Rangers," "The Defence of Rorke's Drift," "Floreat Etona," and "The Charge of the Scots Greys at Waterloo." Lady B. is unrivalled as a painter of military scenes.

Butler, Rev. Henry Montague, D.D., Master of Trin. Coll., Cambridge, was b. 1833. Educated at Harrow and Trin. Coll.; Ball Univ. Scholar ('52), Battie Univ. Scholar and Browne Medallist ('53), Porson Prize, Camden Medal, Members' Prize ('54), B.A. (Senior Classic), and was Fellow of his college ('55). Head master of Harrow ('59), of which school his father, the Rev. George Butler, D.D., had also been head master. Hon. Chaplain to the Queen ('75-7), Dean of Gloucester ('86), but only a few weeks after his installation resigned his Deanery to accept the *Mastership of Trinity*. Married August, '88, to Miss Ramsay, of Girtton Coll., who distinguished herself by taking the first place in the Cambridge Classical Tripos '87. He is a brother of Canon Butler, husband of Mrs. Josephine Butler.

Butt, Sir Charles Parker, was born 1830, called to the bar in '54, and created a Q.C. ('68). After unsuccessfully contesting Tamworth, he sat as M.P. for Southampton, in the Liberal interest ('80-83), when he was appointed a Judge of the Probate, Divorce, and Admiralty Division, a vacancy being caused by the resignation of Sir Robert Phillimore.

Bye-Elections. See COMMONS, CONSTITUENTS.

C

Cabinet, The Present British. See MINISTRY.

Cabinets, Colonial and Foreign. See DIPLOMACY.

Cabul. The capital of Afghanistan (q.v.).

Cadicos Islands. Southern islands of the Bahama group. With Turk's Island are under government of Jamaica.

Caird, Mrs. Mona, b. at Ryde. Is the only child of John Alison, an Australian colonist. From an early age Mrs. C. turned her thoughts to literary efforts, writing many novels, etc., which remained unpublished, until the issue of her novel "Whom Nature Leadeth," followed in '87, by "One That Wins," which was favourably received. In the *Westminster Review* for Aug. '88, she wrote an article on the *Marriage Question*, which gave rise to an extraordinarily copious correspondence in the *Daily Telegraph*

(q.v.), which received the title "Is Marriage a Failure?" In the November number of the same magazine, Mrs. C. completed the statement of her views on this subject. She published in the spring of '89 a new three-vol. story, "The Wing of Arael." Is an active promoter of the movement for starting "Neighbours' Clubs." Her husband is a son of Sir James Caird.

Caird, Very Rev. John, D.D., LL.D., b. at Greenock 1820; Principal of Glasgow University; one of the most scholarly and eloquent preachers of Great Britain; was ed. at Glasgow University, where he graduated after a distinguished career; ordained '45; appointed to the charge of Lady Yester's Established Church, Edinburgh, in '47, where he attained considerable popularity as a preacher. Subsequently he became minister of Errol, Perthshire; chaplain in ordinary to H.M. ('55); minister of Park

Chapel, Glasgow ('57); Professor of Divinity, Glasgow Univ. ('64), of which university he was appointed Principal and Vice-Chancellor ('73). His principal works are: "Sermons" ('58), "Philosophy of Religion" ('80), "Spinoza" ('88). Principal C., as leader of the Broad Church party in Scotland, has exercised great influence on the philosophical thought of that country.

Calvins', Lord. *Acot.* See AGRICULTURAL HOLDINGS, ed. 88.

Calvrol, Benedetto, Italian statesman, was b. at Pavia in 1826. He took part in the Milan rising of '48, and in the succeeding war against Austria. He also joined the Garibaldian Legion, and fought in all the chief engagements of '59-60. At Palermo he was severely wounded. Again, in '66, he was fighting for Italy in the Trentino. In '68 he became a member of the Chamber of Deputies and one of the leaders of the Extreme Left. Was President of the Council ('78). In November of the latter year he was badly stabbed in protecting King Humbert against the dagger of a would-be assassin. Was again Prime Minister ('79-81). Died at the Royal Villa of Capo di Monte, Naples, Aug. 8th, '80.

Calais and Boulogne Improvements. In May '87 attention was called to the considerable improvements which were being carried out at and near Calais; and it was then calculated that within two years the whole place would be metamorphosed. Besides connecting Calais and St. Pierre by one continuous main street, it was intended to widen the St. Omer Canal, by which access is gained to Holland, Belgium, and the North, by 12 metres. Then there are new wet docks, of 27 acres space, and of considerable depth, in course of construction. The amount being laid out on the improvement works is estimated at 70,000,000 francs; and what with new bonded warehouses, docks, and other waterways, besides widened and beautified streets, old Calais in a year or two will be practically obliterated. (For further description of the alterations see previous editions.) On Dec. 6th, '88, the *Journal Officiel* published the new law, the object of which was to increase the harbour dues, and enacts an increase of the poll-tax from 1 fr. to 1 fr. 75 c. It is estimated that nine-tenths of the passengers crossing the Channel are British subjects. In '87 the numbers landing and embarking at Boulogne, Calais, and Dieppe reached 425,000; there must have been a very considerable increase during '89 in consequence of the Paris Exhibition (*q.v.*) alone, and therefore a very handsome revenue for the improvement scheme. The sea was let into the new harbour at Calais on Feb. 28th, '89, preparatory to the opening fixed for May. On April 29th a sad fatality occurred in connection with the dredging operations in the harbour, No. 2 steam-dredger, one of five, being blown to pieces by a boiler explosion. Nine persons were on board at the time, three of whom were killed and four badly injured. M. Carnet, President of the Republic, visited Calais on June 3rd, and opened the new harbour. At the time of his visit it was calculated that the new works had already cost 40,000,000 fr. The outer harbour was to be increased at entrance from 328 ft. to 430 ft., the depth allowing mail boats to enter at all states of the tide.

Calderon, Philip H., R.A., b. (1833) at Poiriers. Began to exhibit in the Royal Academy ('58) after studying at Paris; an A.R.A. ('64),

R.A. ('67). In '78 Mr. Calderon was one of the English artists selected to exhibit an extra number of works at the Paris Exhibition, at the close of which he received a "rappel" of first-class medal, and was created a Knight of the Legion of Honour. He is well known as a painter of domestic and other subjects. His "Bath and Maoni," in the Academy, '86, was highly spoken of. Appointed ('87) Keeper of the Royal Academy in place of Mr. Pickersgill. He exhibited ('89) a pathetic picture entitled "Home" at the Academy Exhibition.

Calendar, "Old Style" and "New Style." Pope Gregory XIII., finding that the civil year was in arrear of the solar year, after great consideration, having been formally charged by the Council of Trent with the task of correcting the Julian Calendar, issued in 1582 a new calendar, in which ten days were omitted, the 5th of October becoming the 15th. This was immediately adopted in Italy, Spain, Denmark, Holland, Flanders, and Portugal. Two months later, by an edict of Henry III., it was adopted in France, the 9th December being changed to the 10th. Germany and Switzerland adopted the new calendar in 1583, Hungary in 1587, Great Britain in 1751 (in 1752 the 3rd of September being altered to the 14th). In Russia, Greece, and throughout the East the old style is still retained. The change caused popular tumults in many countries.

Cambodia. A province of Indo-China and a French protectorate. See COLONIES OF FOREIGN POWERS.

Cambridge, H.R.H. George William Frederick Charles, and Duke of K.G., P.C., K.P., G.C.M.G., G.C.H., G.C.B., G.C.S.I. (creat. 1801), grandson to George III. and first cousin to the Queen, was b. at Hanover March 26th, 1819. He became a colonel in the British army in '37, and succeeded his father Adolphus Frederick, 1st Duke of Cambridge, in '50. Four years later ('54) he was raised to the rank of major-general, on his appointment to command the two brigades of Highlanders and Guards united to form the first division of the army sent against the Tzar Nicholas of Russia in the Crimean war of '54-6. In '56 he was promoted to the rank of General; in '61 appointed Colonel-in-chief of the Royal Artillery and Royal Engineers; and in '62 raised to the rank of Field Marshal, and subsequently appointed Commander-in-chief of the British army, and appointment perpetuated by letters patent '87. He is Ranger of Hyde Park and Richmond Park. H.R.H.'s action in giving the Volunteers notice to quit Wimbledon Common, in the neighbourhood of which he owns large estates, and his opposition to the proposal that their summer outing should be held in Richmond Park, created much comment in '88. H.R.H. married Miss Featherstone, an actress, by whom he has several children, who take the name of FitzGeorge. His mother, the Duchess of Cambridge, died April 6th, '89, at the age of 92.

Cambridge University. About the middle of the thirteenth century students began to collect in hostels. Its first known charter is dated 1231 (25 Henry III.). The endowed colleges gradually absorbed the hostels, the last of which was annexed to Trinity in 1540. The legislative bodies are the Senate, which consists of graduates, and the Council, a smaller body elected therefrom. Like Oxford, the University received a new code in 1862, as did also many of the colleges in both univer-

sities. The following is the list of colleges: *Founded (1257)*, *Petebonhoe—Head*, J. Porter, D.D.—*Undergraduates*, 92; (1266), *Clare Hall*, E. Atkinson, D.D., 165; (1247), *Pembroke*, C. E. Searle, D.D., 120; (1248), *Geowille and Olaus*, N. M. Ferrera, D.D., 162; (1250), *Trinity Hall*, H. Latham, M.A., 238; (1252), *Corpus Christi*, E. H. Perowne, D.D., 91; (1242), *King's*, A. Leigh, M.A., 91; (1248), *Queens*, G. Phillips, D.D., 80; (1272), *St. Catherine's*, C. K. Robinson, D.D., 51; (1296), *Jenna*, H. A. Morgan, D.D., 205; (1265), *Christ's*, John Peile, Litt.D., 158; (1217), *St. John's*, C. Taylor, D.D., 257; (1259), *Magdalen*, Hon. and Rev. L. Neville, M.A., 60; (1240), *Trinity*, H. M. Butler, D.D., 63; (1284), *Emmanuel*, S. G. Phear, D.D., 127; (1295), *Sidney Sussex*, Robert Phelps, D.D., 60; (1800), *Downing*, Alex. Hill, M.A., D.D., 79. *Hostels* (1876), *Overlandish*, J. H. Flather, M.A., 24; (1882), *Salwyn*, Hon. A. I. Lytton, M.A., 25; (1884), *Ayerst*, W. Ayerst, M.A., 31; *Non-Collegiate*, 126. Total, 2971. The examinations necessary for degree of Bachelor are the Previous ("Little-G") ; General, and Special examinations. Candidates for Honours have to pass an additional examination in Mathematics, French or German with their Previous. The *Kriposse*, which for Honour candidates take the place of the General and Special, are Classical, Mathematical, History, Law, Theology, Moral Science, Natural Science, Indian Languages, Semitic Languages, and Mediæval and Modern Languages. Women are admitted to the examinations, and reside mostly in Newham College and Girton College. Vigorous efforts have been made to secure the advantages of degrees for women by resident and non-resident members of the University, but hitherto without success. Students of not less than two years' standing at an affiliated college, on being admitted members of the University, may be deemed to have already kept three of the terms required for any degree; it is the same with adult students under a committee working in concert with the University in places where there is no affiliated college. *Affiliated colleges* are:—University College, Nottingham; St. David's, Lampeter; Firth, Sheffield; University of New Zealand, and University of Calcutta. *Affiliated centres*:—Hull, Derby, Scarborough, Newcastle-upon-Tyne, and Sunderland. *Degrees*.—D.D. (*hood* scarlet cloth lined with dove-coloured silk); B.D. (*h.*, plain black silk); M.A. (*h.* black silk lined with white silk); B.A. (*h.* black stuff lined with white fur); M.D. (*h.* scarlet cloth lined with pink silk); M.B. (*h.* black silk lined with white silk); M.Ch. (*h.* same as M.A.); LL.D. (*h.* scarlet cloth lined with pink silk); LL.B. (*h.* black stuff lined with fur); LL.M. (*h.* black silk lined with white silk); Muz.D. (*h.* puce silk lined with white silk); Muz.B. (*h.* black stuff lined with fur). *Chancellor*, His Grace the Duke of Devonshire, K.G. *Vice-Chancellor*, Rev. H. M. Butler, D.D. (Trinity). *Parliamentary representatives*, Rt. Hon. H. C. Raikes, and Prof. G. G. Stokes (q.v.). *Senior Proctors* '89-90: Rev. W. T. Southward, M.A., and H. W. Fulford, M.A. *Consult*: *Camb. Univ. Calendar*, '89.

Camden Society, The. Founded (1838) for the publication of documents relating to English history. Its publications number some 120 volumes. Among the latest are: "Visitations of the Diocese of Norwich, A.D. 1492-1532," edited by Dr. A. Jessopp, published '88; "Pococke's Travels," published '88, edited by J. J. Cartwright; "Impeachment of the

Duke of Buckingham," edited by J. R. Gardiner, LL.D.; and "Memoirs of Lord Torrington," edited by J. K. Laughton, M.A., R.N., in 70. *Pres.*, the Earl of Crawford; *Hon. Sec.*, Mr. J. Gairdner, 25, Parliament Street, S.W.

Camel Corps, raised for fighting in the Sudan campaigns of '84-85. Consisted of the British infantry or sailors mounted on camels.

Cameron, Commander Verney Lovett, C.B., D.C.L., a distinguished naval officer and African traveller, was b. 1844. Entered the Royal Navy ('57); lieutenant ('65); commander ('76); retired ('83). Took part in the Abyssinian campaign; served on the East Coast of Africa; accompanied Sir Bartle Frere's special mission to Zanzibar; went to the relief of Livingstone; and has made important explorations in Central Africa, laid down the watersheds between the Nile, the Congo, and the Zambesi, etc., and was the first European who had ever succeeded in crossing tropical Africa from east to west. Has also visited Syria and Mesopotamia. Commander Cameron is a gold medallist of the Royal Geographical Societies of London, Paris, and Lisbon, and has received a gold medal from King Victor Emmanuel. Created C.B. ('76), is Hon. D.C.L. of Oxford, and possesses several foreign decorations. Has, during '89, been active in drawing attention to the horrors of the slave trade as at present existing in Central Africa. Is the author of "Across Africa," a work on Steam Tactics; "The History of Arthur Penreath," etc.

Cameroons. A territory on the Bight of Biafra, West Africa, annexed by Germany in 1884. See COLONIES, FOREIGN POWERS. During '89 several incursions were made by German sailors and towns and villages burnt.

Canada, Dominion of (from the Indian *Kanata*—i.e., "Place of Huts"), British North America. Consists of the Provinces of Ontario, Quebec,—formerly styled Upper and Lower Canada,—Nova Scotia, New Brunswick, Prince Edward Island, Manitoba, the North-West Territories, and British Columbia. The four first-mentioned provinces were united under one federal government in 1867; in 1870 Manitoba and the Territories were formed and admitted; British Columbia and its appanage Vancouver Island joined in 1871; Prince Edward Island in 1873. *Newfoundland* remains independent. Dominion capital *Ottawa*, pop. 30,344, a handsome city on the river of the same name. Largest city Montreal, Quebec, pop. 200,000; the next, Toronto, Ontario, 140,000; Quebec, 65,000; Halifax, Nova Scotia, 40,000; Hamilton, Ont., 35,000; the capital, Ottawa, Ont., 30,344; Winnipeg, Manitoba, 30,000; St. John, New Brunswick, 30,000. Having from 10,000 to 20,000 are London, Ont.; Portland, New Br.; Kingston, Ont.; Charlotte-town, Prince Edward Island; having from 8,000 to 20,000 are Guelph, Ont.; St. Catherine's, Ont.; Brantford, Ont.; Belleville, Ont.; Trois-Rivières, Qu.; St. Thomas, Ont.; Stratford, Ont.; having between 7,000 and 8,000 are Chatham, Ont.; Brockville, Ont.; Lewis, Qu.; Sherbrooke, Qu.; having between 6,000 and 7,000 are Hull, Qu.; Peterborough, Ont.; Windsor, Ont.; St. Henri, Qu.; Fredericton, New Br.; having between 5,000 and 6,000 are Victoria, British Columbia; St. Jean Baptiste, Qu.; Sorel, Qu.; Port Hope, Ont.; Woodstock, Ont.; St. Hyacinthe, Qu.; Galt, Ont.; Lindsay, Ont.; Moncton, New Br.—*Chief natural features*

of Eastern Canada are the river St. Lawrence and the great lakes Ontario, Erie, Huron, Superior, with the various affluents and smaller lakes forming an immense extent of waterway. The Laurentian basin is narrow in proportion to its length, and remarkably low. The land presents glorious scenery, rich forest, and an amazingly fertile soil. Summer begins in April and lasts into November; characterised by great heat, causing luxuriant vegetation. Seasons sharply divided. Winter severe, but surprisingly healthy. To the north is Hudson Bay (q.v.), a great inland sea nearly as large as the Mediterranean. Ice stops navigation the greater part of the year, but experiments are being made with a view to find out the duration of the open passage. Around it, eastward through Labrador to Atlantic, northward to Arctic regions, and westward to Alaska, extends a more or less frozen region, profitable as yet only to the hunter, though not without wealth for the woodsman and the miner. Westward of Lake Superior is the rugged district of *Kewatin*, and beyond it the great fertile belt of prairie lands interposing between the frozen north and the desert of the north-central United States. Here are Manitoba and the North-West Territories, regions that may be termed a farmer's paradise. The dominion of frost recedes farther and farther to the north as we go west. This country is watered by noble navigable streams—Red River, Assiniboine, Saskatchewan, Athabasca, and studded with lakes—Winnipeg, Manitoba, etc. The great chain of the Rocky Mountains shuts off British Columbia, a region enjoying a mild climate, rich in minerals, and of abundant fertility. The Pacific coast is broken and indented, fringed with islands, among these *Vancouver* and *Queen Charlotte Islands*. The flora and fauna of Canada are far too extensive for detail in this place, and the mineral kingdom includes the precious metals, iron, coal, and almost all necessary and useful minerals.—The Executive is in the hands of a Governor-General, appointed by the Crown, and assisted by a Privy Council, composed of heads of departments, similarly to the Imperial Ministry. Parliament consists of a Senate and House of Commons. Senators are called from the various provinces by the Governor-General, and sit for life; there are 78. Members of the House of Commons, at present 215, are elected quinquennially on a low suffrage. Both senators and members are salaried, and receive traveling expenses. Ontario seats 24 senators and 93 members; Quebec, 24 and 65; Nova Scotia, 10 and 21; New Brunswick, 10 and 16; Prince Edward Island, 4 and 7; Manitoba, 3 and 5; British Columbia, 3 and 6; North-West Territories, 3 and 4. An Act was passed in '86 giving representation to the North-West Territories. The several provinces have each a local parliament and administration under a Lieutenant-Governor. They dispose of their own revenues, and legislate for internal affairs, but are restricted from interference with the action or policy of the central government. There is no state church. Roman Catholics are the prevailing sect, numbering about 40 per cent. of the population; Anglicans are about 12 per cent.; Presbyterians and Methodists each rather more; Baptists, 6 per cent. In each of the old provinces are one or two universities, with colleges, medical schools, high schools, public elementary schools, normal schools, etc.

Government support and compulsion vary in the provinces.—The Imperial army in Canada consists of a force of 2,000 men, stationed at Halifax, Nova Scotia, which, as also Esquimaux, British Columbia, is strongly fortified. The two places are Imperial naval and military stations, with arsenals and dockyards. The Dominion militia numbers about 40,000 men, who are volunteers, are called out for drill a few days every year, and are paid. There is legislative power to keep up its strength by ballot if necessary, but this has never been required. The whole of the male population, between the ages of 18 and 60, may be called to arms in case of emergency.—For latest financial statistics see *BRITISH EMPIRE*, etc. (table). Shipping cleared ('86), 13,969,232 tons. Capital invested in manufacturing industries, £33,000,000 (in '81); annual value of resulting manufactures, £62,000,000. The Dominion has about 12,000 miles of railway and 30,000 miles of telegraph. The natural waterways and constructed canals are of immense extent. The river and lake communications in Manitoba and the Northwest are also extensive. A railway is now in course of construction from Winnipeg to Hudson Bay (q.v.). The staple exports are grain and flour, timber, cheese, butter, cattle and sheep, minerals, coal, furs, etc. Export of gold, 1886, was 65,000 oz., valued at £246,000. The farming industry includes the raising of wheat in immense quantities, much pastoral and dairy farming, and general agriculture. Agricultural exports ('86), £4,402,406; animals and their products, £4,469,216. Apples and other fruit grown largely for export. A little wine is made. The fisheries are of vast importance, the yield being about £3,425,000. The timber trade employs 100,000 hands; export ('86) £4,718,000. Mining exports £900,000. The collection of furs is also large. Manufacture is rapidly attaining a high standpoint. Land is to be had on almost nominal terms, but these vary in the several provinces. Remnants of aboriginal Indian tribes are mostly gathered into reserves, are under surveillance, are loyal and peaceable, and under civilising influences.—Canada, limited then to Quebec and Ontario, was a French possession until 1763, when it was ceded to England, the fortress of Quebec having been stormed and taken by Wolfe in 1759. The history of the "Dominion," as such, begins in 1867, when its present constitution was created by the "British North America Act" of the Imperial Parliament. Canada has loyally offered troops to the mother-country on several occasions. Recently troops were employed in suppressing a revolt of Indians and half-breeds, known as *Riel's* insurrection, '85. Principal historic event since federation has been the construction of the *Canadian Pacific Railway* (q.v.) across the continent (open '86), and the consequent opening up of the immense North-West Territory. There have been continual differences between the United States and Canada about the Fisheries, due to disputed interpretations of the Treaty of 1818.—**POLITICAL.** During '86 public attention was concerned chiefly with the religious and social disputes consequent upon the anti-Jesuit agitation, and the Dominion's relations with the United States. The Jesuits were incorporated by the Quebec Legislature in '87, and in '88 an Act was passed voting 400,000 dollars as compensation for their confiscated estates held by the Crown. The Federal

Government was petitioned to disallow the Act, but declined. A motion for disallowance was thrown out by the Dominion Parliament by a vote of 188 to 13. Then an agitation arose, maintained largely by adherents of the Orange body in Ontario. A convention met in Toronto, and formed an *Equal Rights Association*, to resist what was termed Roman Catholic aggression. A deputation waited upon Lord Stanley of Preston, the Governor-General (Aug. 2nd), asking him to disallow the obnoxious measure. He refused, as the law officers of the Home Government had pronounced it constitutional, and declared it within the powers of the Quebec Legislature. The agitation, however, continues to be somewhat actively promoted, and, while the *Jesuits Act* is now law, it is proposed to bring the matter up in Parliament the coming session. In Ontario opposition sprang up to the public schools in the French districts, which are French and Catholic in character, and the Ontario Government appointed a Commission to inquire into their condition, which was condemned, and which the Government has undertaken to reform. In Manitoba the local Government has announced its intention of abolishing Roman Catholic denominational schools and the official use of the French language. In November the North-West Territories Assembly resolved to abolish official use of French language there.—*Relations with the United States*: The rejection of the Fishery treaty by the United States Senate left that vexed question open, but the Canadian authorities, acting in concert with the Newfoundland Government, agreed (March 25th) to continue the *modus vivendi*, and grant licences to American fishermen. There have been few seizures during the year, and no further trouble has arisen. The continued seizure of Canadian sealing vessels by United States revenue cutters in *Bahing Sea* roused deep indignation throughout Canada. The vessels seized during '89 were the *Black Diamond*, 82 tons; *Pathfinder*, 66 tons; *Minnie*, 46 tons. Enforcement of the alien labour law by the United States Government, to prevent Canadians living on the frontier from doing any work beyond their own borders while residing in Canada, affected a large number of persons, and caused irritation. Protests have been made, but no settlement reached. Another source of annoyance was the attempt by United States railways to have duty charged on Canadian railway cars, which would practically stop the traffic on several important lines doing business in both countries, notably the Grand Trunk. The Washington legal officials decided that no duty should be charged, and the demand has been abandoned. The United States Senate committee has lately visited the border States, inquiring into their relations with Canada, and the desirability of a reciprocity trade treaty.—*COMMERCIAL*: Dominion Parliament met Jan. 21st, and passed measures forbidding the formation of commercial trusts or combinations in trade, an amendment to the extradition law, to prevent United States criminals from taking refuge in Canada, and a copyright law providing that English books may be republished in Canada on payment of royalty to author if they are not copyrighted in C. within one month after being published in England. If republished in C. by native publishers on these terms, other editions will be excluded. Annual subsidies of £25,000 to a steamship line between Canada and Australia,

and £15,000 for a line to China and Japan, and 500,000 dollars to an Atlantic fast line, were voted. House of Commons rejected motion of Sir Richard Cartwright to petition Her Majesty the Queen for permission to allow Canada to negotiate her own treaties. A motion of the Opposition in favour of *Unrestricted Reciprocity* in trade, or commercial union with the United States, was also voted down (March 6th) by 121 votes to 77. Government has called for tenders for four different steamship services—to Cuba, Jamaica, Demerara, and Buenos Ayres—all the lines to be subsidised by Parliament. Hon. Mr. Abbott, a cabinet minister, has been commissioned to visit Australia next March, and confer with the various governments with a view to open up trade with Canada.—*GENERAL*: April 4th. Fifteen counties and two cities repealed the *Scott Act*, or local option law, after three years' trial, having found it unworkable. Subsequently the *Temperance Alliance* met, and resolved to begin agitation for total national prohibition. Four serious disasters occurred during '89: Feb. 27th, the Grand Trunk train broke through a bridge at St. George, Ontario, and ten persons were killed and thirty wounded; April 28th, a train at Hamilton left the track, and twenty persons were either fatally crushed or burned to death by the cars taking fire; Sept. 19th, at Quebec, a mass of rock under Cape Diamond fell, and demolished thirty houses and killed fifty people; and Nov. 13th, the destructive bursting of a dam at Alton, Ontario, which flooded surrounding country. Consult current pamphlets obtainable from the High Commissioner in London, 9, Victoria Chambers, S.W.; the Emigrants' Information Office, 31, Broadway, Westminster; "The Canadian Almanac" for 1889; Hayden and Selwyn's "North America"; Fleming's "England and Canada"; Grant's "Picturesque Canada"; Tuttle's "Our North Land"; Selwyn and Dawson's "Physical Geography and Geology of Canada"; "Statistical Abstract and Record of Canada"; "Canada," a statistical and descriptive handbook by J. Biggar; etc.

Canada Temperance Act. A form of local option in Canada passed by Dominion Parliament in '78, and providing that on receipt of petition from at least one-fourth of the electors of any county or city a vote may be taken on the measure. A majority of votes adopts the Act. It provides that no liquor may be sold in city or county adopting the Act, except (1) wine for sacramental purposes; (2) liquor for medicinal purposes or for use in the arts, trades, and manufactures. Certificates in both cases have to be presented to the licensed vendors, who are generally druggists. Penalties for violation are 50 dollars for first offence, 100 dollars for second offence, and imprisonment for third offence. After the Act has been in force for three years a test vote as to its repeal may be demanded. After a trial it has been repealed in a number of counties in Canada, as its provisions are found difficult to enforce. See CANADA. *Canadian Pacific Railway*. Under date Philadelphia, Dec. 23rd, '88, it was reported that on the previous day the Canadian Supreme Court at Ottawa, in the Canadian Pacific Railway crossing dispute (see ed. '89), decided unanimously that the province of Manitoba had a right to charter the Portage Extension of the Red River Valley Railway, including the right to cross the Pembina branch of the Canadian Pacific, free of all dominion control

save as to the plans of the crossing—this virtually settling a matter of much irritation, and the result causing rejoicing at Winnipeg. On Jan. 26th, '88, the Railway Committee at Ottawa granted to the Northern Pacific and Manitoba Railway leave to cross the Canadian Pacific line at Morris. It was reported from Winnipeg, Feb. 4th, that the Minister of Railways in the Manitoba Legislature had introduced a bill regulating the crossing of one railway by another. The object of the bill, it was believed, was to retaliate for the difficulties raised by the Canadian Pacific at Ottawa. It was announced on March 12th that the Canadian Government had agreed to subsidise an Atlantic line of steamers in connection with the railway, the subsidy to be arranged on the basis of £110,000 per annum for a fortnightly service, and there to be no restriction as to the British port of departure. It was stated in April that the railway would get access to the systems of the United States by means of a link connecting with the Delaware, Lackawanna, and Western Railway. The Buffalo, Lackawanna, and Pacific Railroad Co. had been organised to build the connecting line from Buffalo, N.Y., crossing the Niagara river at Lewiston, the capital stock being \$250,000. The annual meeting of the Canadian Pacific Railway Co. was held at Montreal on May 8th. The report showed the gross earnings for the year to have amounted to \$13,195,535, the working expenses to \$9,324,760, and the net earnings to \$3,870,775. All the retiring directors were re-elected with the exception of Mr. Du P. Grenfell, who was replaced by Mr. Thomas Skinner, of London. On May 10th Mr. Van Horne, president of the line, appeared before the Senate Committee on Inter-State Commerce at Philadelphia to give evidence. He denied certain exaggerated statements as to the subsidies given by the Dominion Government, and said that the Canadian Pacific had actually received but \$35,000,000 in cash and 18,000,000 acres of land. Money borrowed from the Government he did not consider a subsidy, and their subsidy was less than the United States subsidies to the Pacific railroad companies. His company had strictly observed the Inter-State Commerce Law, even local Canadian rates being fixed in accordance with its "long and short haul" clause.

Canary Islands. Off N.W. African coast. Belong to Spain, and ruled as an integral province of the kingdom. The Canaries (the "Fortunate Islands" of the ancients) have belonged to Spain since 1493. See COLONIES, FOREIGN POWERS. Total trade of the island for '88: £757,973, of which £476,793 was the value of imports, Great Britain securing half the trade and more than half the imports. Consult Keith Johnston's "Africa," and Storie's "Teneriffe."

Candahar. It has become an established principle of Indian defence that if the Russians advance to attack India a stand shall be made at Candahar, or rather along the line of the Helmand river, 70 or 80 miles to the west of it. To prepare for this, the Indian railway system has been completed to the Quetta side of the Kwaia Amran range, and a tunnel, two miles long, is being pushed through it to the Candahar side. Here there are no more engineering obstacles, and the 80 miles of rails (already stored at Quetta) can be laid down at leisure. Candahar contains 60,000 people, and does an increasing trade with India. Is 300 miles from Cabul, 369 from Herat, and 145 from Quetta.

Candia. See CRETE.

Canonical Hours. A term usually applied to the hours within which marriages may be legally solemnised. In '88 the hours were extended from 12 to 3 p.m. Special supplementary canons were enacted by Convocation and promulgated, after having received the royal assent, declaring and authorising the change.

Canonisation. The ceremony whereby a deceased person is raised to the order of the saints—a privilege now exclusively vested in the see of Rome. It cannot be made until at least fifty years have elapsed from the date of death.

Canon Law. It is of the essence of canon law that it may never be abrogated, and in some cases custom acquires the sanction of canon law. Learned canonists, therefore, appeal for authority in matters ecclesiastical to a whole literature of canonical lore, from the so-called Apostolical Canons to those of last year's Convocation. The most ancient repositories of ecclesiastical law are the three volumes of "Decrees" (now known as the "Decrees of Gratian," who edited them), by Ivo, Bishop of Chartres, comprising, besides decrees of councils, provincial constitutions, synodals, glossaries, sentences of Popes, summaries, and rescripts. Besides these, the *ius canonium* included many foreign canons and decretals, together with particular laws and constitutions made in England for the government of the Church—all which are, in a sense, now in force. But even from the Conquest to the Reformation no canons or constitutions made in any synods here were suffered to be executed, if they had not the royal assent. These canons were all collected and explained by Lyndwood, Dean of the Arches, in the reign of Henry VI., and by him divided into sixteen historical sections, ranging from the canons of Stephen Langton, at the Council of Oxford, 6 Henry III., to the *Reformatio Legum*. The authority to make canons, and to promulgate them with the royal assent, is vested in the clergy by the statute 25 Henry VIII., commonly called the "Act of Submission." The canons of 1603-4 alone bear the sanction of statute law in England, and are of equal authority with the Book of Common Prayer. These canons were, for the most part, collected out of ordinances dispersed in several injunctions published in former reigns. An Act of Parliament may nullify any canon, unless it enjoins some moral duty; but a canon not confirmed by an Act of Parliament cannot alter any other law. Unestablished branches of the Anglican Church (*q.v.*), being autonomous Churches, make their own canons irrespective of statute law, but these are binding only within their own spiritual jurisdictions, and bear only the same relation to the canon law of the Church as is borne by, say, the "Decrees of Gratian." Consult Wilkin's "Concilia"; Landon's "Councils"; Owen's "Institutes of Canon Law"; Stubbs' "Councils and Ecclesiastical Documents Relating to Great Britain and Ireland" ('60).

Canon of Scripture. The Book of Holy Scripture as received by the Church and incorporated in the canon law. Consult Wordsworth "On the Canon of Scripture" ('48).

Canons, Various Kinds of. *Canon Capitular* (*v. infra*, *Canon Residentiary*). *Canon Horary*, appointed in some cathedrals. He keeps no residence, and receives no emolument. *Canons Minor* are the junior clergy connected with cathedrals, being chiefly charged with the duty

of saying or intoning the daily prayers. **Canon Prebendary**, a canon of a cathedral invested by the bishop with the duties of penitentiary to the diocese. **Canon Regular**, a regular conventual canon. **Canons Residentiary** (also termed **Canons Capitular**), the senior canons who keep residence and receive emolument from their stalls. **Canons Secular** were not conventual, but kept the hours.

Canterbury, Right Hon. and Most Rev. Edward White Benson, P.C., D.D., 93rd Archbishop of (founded 596); b. 1849. Educated at King Edward's School, Birmingham, and at Trin. Coll., Cambridge (B.A., 1st class classics, senior Chancellor's medalist and senior optime '52); Fellow of Trin. Coll. ('53). Ordained deacon ('53), priest ('57). Formerly one of the masters of Rugby School; and head master of Wellington Coll. ('58-72). A prebendary in Lincoln Cathedral ('69), and chancellor and canon residentiary ('72). Hon. chaplain to the Queen ('73-75), and chaplain ('75-77). Examining chaplain to Bishop of Lincoln ('873-77). Consecrated 1st Bishop of Truro ('77). Translated to Canterbury ('83). Is Primate of All England and Metropolitan. Patron of 187 livings. Presided at the Lambeth Pan-Anglican Synod (q.v.) July '88, and at the trial of the Bishop of Lincoln (q.v.), which commenced at Lambeth Palace Feb. 12th, '88. See ECCLESIASTICAL COURTS (Archbishop's Court) and ECCLESIASTICAL LAW.

Cape Breton Island. A portion of **Newa Scotia** (q.v.), once itself a distinct colony. See BRITISH EMPIRE.

Cape Colony. The Cape of Good Hope is a promontory on the extreme south of Africa, and has given its name to the Cape Colony, whose boundaries now are: West, the Atlantic Ocean; north, the Orange River and Bechuanaland; east, the Orange Free State, Basutoland, and Natal; south, the Indian Ocean. The area of the whole colony is 213,626 sq. miles, with pop. 1,250,000. Capital Cape Town, pop. 60,000; other chief towns, Port Elizabeth, pop. 18,000, the chief commercial port; Grahamstown, pop. 10,000, the capital of the eastern province; Kimberley, pop. 25,000, the seat of the diamond trade; Queenstown, King Williamstown, and Panmure, or East London. Simon's Bay is an Imperial naval station 22 miles south of Cape Town. Divided into two great districts, Eastern and Western, which are subdivided into a number of provinces, fiscal districts, and magisterial divisions. **Grigoland West**, the **Transkeian Territories**, and **Walfisch Bay** (q.v.), have some separate provincial status.—The **Nieuwveldt Mountains** divide the colony, running east and west. To north and west the country consists of open plains, more or less sterile. To the south and east are fertile plateaux, the **Karoo**s, and regions of great fertility. In these parts is much splendid forest. Both flora and fauna are extremely rich and varied. Minerals worked in the colony comprise copper, coal, gold (on the **Krystna**), lead, manganese, alum, salt, nitre, crocidolite, and diamonds. Rivers, including the Orange, the largest, are not navigable. The climate of the Cape is noted for its beneficial effect upon consumptive, asthmatic, and rheumatic patients. The eastern districts are dry, the winter season fine, rains falling in summer; while in the western districts the reverse is the case. The scenery among the mountain ranges, Lower Albany, British Kaffraria, and in the Transkei,

is exceedingly grand. The principal exports are wool, Angora hair, ostrich feathers, sheep and goat skins, diamonds, wines, spirits, hides and skins, copper ore, and aloes. **Executive** in hands of a Governor and responsible Ministry of five principal ministers. Parliament consists of a Legislative Council of twenty-two members, and a House of Assembly of seventy-six members. Members of the Legislative Council are elected for seven years, and of the Assembly for five years. The electors are the same in each case, and are qualified as occupiers of property worth £50, or receiving £50 salary, or £25 with board and lodging. The laws are founded on a modification of the Roman-Dutch Law. Both English and Dutch languages are used in Parliament and the Courts. There is a University at Cape Town (Royal Charter, 1877), and there are a large number of state-aided elementary schools, besides private and religious institutions. The principal denominations are Dutch Reformed, Episcopalian, Presbyterian, and Roman Catholic, which, until recently, received some State aid. For defence there is a force of Cape Mounted Rifles, 760; Volunteers, 4,000; and every able-bodied man between 18 and 50 is liable to be called out for military service. Whites number about a third of the entire population, and the greater number of them are of Dutch descent. The **Transkeian Territories** are ruled by resident magistrates under the Governor of the Cape Colony, **Walfisch Bay**, an isolated port on the coast of **Damaraland**, is administered by a Resident.—For latest financial statistics see BRITISH EMPIRE, etc. (table). The most valuable exports are wool, £1,380,600, and diamonds, over £4,000,000. The colony possesses 1,693 miles of railway open, and extensions are being laid. Kimberley now has railway communication with Port Elizabeth and Cape Town. The lines are Government property. There are 8,981 miles of telegraph wires in operation. About 84,000,000 acres are in occupation, of which 600,000 under cultivation. Vineyards occupy 20,000 acres, producing 4,500,000 gallons of wine and 1,000,000 gallons of brandy. Ostriches number some 25,000; sheep 11,000,000; cattle 1,112,000; goats 3,000,000. Wheat crop about 1,700,000 bushels, other grain 3,000,000 bushels, tobacco 3,000,000 lb., aloes 340,000 lb., dried fruit 2,500,000 lb. Cotton and rice are grown in certain regions. Government lands are granted, leased, or may be rented on easy terms. Natives, Hottentots and Kaffirs, number over two-thirds of the population. Where they are not in a position of equal citizenship with whites their affairs are controlled by a Minister for Native Affairs.—The Cape was first settled in 1652 by the Dutch, and in 1814 became an English colony. The Hottentot and other slaves of the Dutch settlers or "Boers" were liberated in '33 by the general Emancipation Act of the Imperial Parliament. This, and other things, caused much dissatisfaction among the Dutch, and large bodies from time to time *trekked* (i.e. migrated) northward, and formed what have since become the Orange Free State, the Transvaal, and Natal. In 1820 England sent out the first body of British settlers. There have been five great Kaffir wars on the eastern frontier—in 1811, '18, '35, '46-53, and '57-63—devastating and laying waste whole regions of land; but the last of these was concluded in '65. Since then, in

79-80, the Basuto rebellion occurred, which spread also to the Transkei. The civilising influence of schools, industrial institutions, frequent intercourse between the races, the construction of railways and other public works, are producing admirable changes for the better among the tribes. The colony has been gradually enlarged by annexations, the latest of which are Griqualand West, annexed '80; the various Transkeian Territories, '75-87; and Walvisch Bay, '84.—Amongst the incidents of '89 were the visit of the *English cricketers* (Jan.). The trial of the *Zulu leaders* (23rd) Dinizulu, Undabuko, and Tshingana for high treason, when they were all found guilty and sentenced, Dinizulu to ten years' imprisonment without hard labour, Undabuko to fifteen years', and Tshingana to twelve years'. The rising was primarily directed against Dinizulu and Undabuko's hereditary enemy, *Uabepu*, but when a British force intervened Dinizulu's attitude became one of contumacy towards the authorities, and he finally drifted into revolt. Sympathy with the three chiefs was widely expressed in England, a *Defence Fund* being raised, and interrogatories addressed to ministers in Parliament on the question. With respect to the establishment of commercial relations between Cape Colony and the *Orange Free State*, at an official dinner given (March 27th) to the delegates to the Customs Conference, the Premier of Cape Colony announced that a Customs Union had been established between them; but he regretted that Natal had withdrawn from the Union. At a subsequent official dinner (April 3rd) he said: "So far as Cape Colony and the Orange Free State were concerned, a Customs Union had been established and would shortly come into operation. The immediate effect of that Union would be the construction of a railway from the Orange River to Bloemfontein, which railway would be opened for traffic before the end of '90; and when the railway had reached so far he was certain that it would be continued to the Vaal, to Johannesburg, to Pretoria, and probably thence to auriferous regions; beyond the utmost bounds of the Transvaal." Sir Hercules and Lady Robinson left Cape Town (May 1st) amid universal tokens of admiration and respect, Lieut.-Gen. H. A. Smyth being administrator pending the arrival of a new governor. Both Houses of the Cape Parliament passed (June) the convention tariff, giving the Government power of rebating on exports. See *GRIQUALAND WEST, KIMBERLEY, WALFISCH BAY, TRANSKEIAN TERRITORIES, BRITISH EMPIRE*, etc. For Ministry, etc., see *DIPLOMATIC*. Consult "The Cape of Good Hope General Directory and Guide Book," '87; Gresswell's "Our South African Empire"; Noble's "Cape and South Africa"; Theal's "South African History and Geography," and "History of the Boers in South Africa"; *The Statesman's Year-Book; The Torch*; etc.

Cape Verde Islands. Lie 350 miles from Cape Verde, the westernmost point of Africa. Belong to Portugal, and form her most valuable dependency. Coaling station, St. Vincent. Imports about £30,000; exports about £50,000. Principal productions, cotton, sugar, indigo, raised and manufactured; tamarinds, coconuts, fruits, salt, red coral, also exported. People, Portuguese and Negro. See also *COLONIES OF FOREIGN POWERS*. Consult "Re-

ports of H.M.'s Consuls, 1882, Part vii. (Cape Verd Islands)."

Carlisle, Right Rev. Harvey Goodwin, D.D., 58th Bishop of (founded 1729); b. 1828. Educated at Caius Coll., Cambridge; B.A. ('40); Wrangler and Smith's prizeman, and subsequently Fellow of Caius. Ordained deacon ('42), priest ('44); became incumbent of St. Edward's, Cambridge ('48); Dean of Ely ('58); consecrated Bishop of Carlisle ('69). He is the author of Goodwin's "Course of Mathematics" and other works. He published "The Foundations of the Creed" ('80). He was the original proposer of the scheme for establishing a "Church House" (q.v.) to commemorate H.M.'s Jubilee.

Carlos, Don, Duke of Madrid, claimant of the Spanish throne as heir to his father, Don Juan, successor to Carlos VI., b. March 30th, 1848. His mother is the Archduchess Maria Teresa, Princess of Modena. He was educated in Austria. Don Carlos married the niece of the late Count de Chambord. In July '73 he instigated a rising in the north of Spain, taking the personal command. He continued the struggle during the Republic, but was defeated by Marshal Serrano after Alfonso XII. came to the throne, and retired (March '76) to England. He resided in France, but was expelled in '81.

Carlyle Society, founded in 1879, consists of "Students admiring Carlyle's works and desirous of extending his influence." Members are admitted by paying a yearly subscription, and they meet once in every month (at present), at Anderson's Hotel, when papers "suggested by Carlyle's works" are read and discussed; some of them are also published. Number of members, 82. The society has erected a memorial tablet on Carlyle's house. It has a library and a branch at Montreal. Pres., Dr. Eugene Oswald; Sec., H. E. West, Park-field, Willesden, N.W.

Carnegie, Andrew, the "Iron King" of America, where he owns rich mineral territory beyond the Alleghany Mountains, is a frequent visitor to England; and ('88), in company with Mr. Blaine and other friends, he made a four-in-hand coaching tour from London to Cluny Castle, Scotland. Mr. C., who is an ardent politician, has assisted in floating several Radical newspapers, and in '87 published "Triumphant Democracy," a work which has had a large sale.

Carnot, Marie Francois Sadi, President of the French Republic, born at Limoges August 1837. He is a grandson of Carnot "the organiser of victory" under the French convention, and is a civil engineer by profession. When only twenty years of age he entered as a student the Ecole Polytechnique, and passed with distinction to a school for special instruction in the building of roads and bridges. During the siege of Paris (Jan. '71) he was appointed Prefect of the Seine Inférieure and as Commissary General gave valuable assistance in organising the defences of that Department. A month later he took his seat in the National Assembly as deputy for Côte d'Or, ranging himself in line with the Republican Left, with which he consistently voted. On the 16th of May, '77, he opposed the vote of confidence in M. De Broglie. Since first elected he has sat continuously in the Chamber of Deputies, at first for the Côte d'Or, and later for Beaune. In '86 he took office in

the **Brisson Cabinet** as **Finance Minister**, the duties of which he also filled when M. de Freycinet formed his Government in Jan. '87. On the resignation of M. Grévy (Dec. 2nd, '87), M. Carnot was elected President of the Republic. His personal popularity, which greatly increased during the exhibition year ('89), has undoubtedly done much to foster the attachment of the French people to the Republic.

Caroline Islands. This archipelago, or group of islands, in all numbering five hundred, lies to the east of the Philippines, in the Pacific Ocean, between lat. 30° and 12° N., long. 130° and 170° E. These islands, first discovered in 1543 by Lopez de Villalobos, were named after Charles V. of Spain, but they seem never to have been settled by the Spaniards. See **COLONIES OF FOREIGN POWERS**; and for history of dispute between Germany and Spain respecting C. I., see previous eds.

Cassagnac, Paul Granier de, was b. at Paris Dec. 2nd, 1843. Journalist and politician; is a chief supporter of the Victorian Bonapartist group. His rhetoric is of the intemperate order, and has frequently involved him in duels. He fought in the Franco-German war, and was present at Sedan, where he was taken prisoner. He sits in the Chamber for the department of Gers, for which he was re-elected at the general election in Sept. '89.

Castelar y Rissoll, Emilio. Spanish statesman and orator, b. in 1832; one of the most eloquent living public men of Europe. In the revolutionary movement of '68 Castelar joined the Republicans. Serrano quelled the rebellion, and Señor Castelar narrowly escaped with his life, taking refuge in Geneva. At the elections of '68 Señor Castelar found himself in a hopeless minority in the Constituent Cortes. He opposed a return of the monarchical government. On the abdication of King Amadeo he became Minister for Foreign Affairs, and in '73 he was chosen President of the Cortes, and subsequently President of the **Executive Power**. At this time war was raging in the Biscayan provinces of Spain, and Castelar provoked the Cortes, and constituted himself a sort of dictator. The Cortes, when it reassembled, declined to pass a vote of confidence in him, and he withdrew. At the accession of Alfonso XII. Castelar left Spain for a time; but in '76 he obtained a seat in the Cortes as deputy for Madrid, though he has not held office since. Señor Castelar is a writer on historical, literary, and political subjects.

Castletown. Capital of the Isle of Man (*q.v.*).

Castries. Capital of St. Lucia (*q.v.*), pop. 4,550.

Cathedrals, English. The cathedral is the mother church of the diocese, in which the bishop's seat is fixed. In many cases English cathedrals were originally monastic or collegiate churches, over which a bishop was set; in others, the bishop having been set over a district, chose his own church. English cathedrals were of two classes—(1) Where the clergy were monks; (2) where the clergy were secular canons. Gradually the dean grew to exercise greater power in his cathedral than the bishop, and many quarrels ensued in consequence. After the suppression of the monasteries by Henry VIII., the monastic cathedrals (Canterbury, Carlisle, Durham, Ely, Norwich, Rochester, Winchester, and Worcester), were remodelled, and the bishoprics founded by Henry (Bristol, Chester, Gloucester, Oxford, Peterboro', and Westminster) were provided

with cathedrals. The last lost its bishop, but kept its dean and its position as a cathedral. The cathedrals of Liverpool, Manchester, Newcastle, Ripon, and St. Albans are of recent translation, and like other new bishoprics, notably Southwell and Wakefield (the latter constituted in '88), take as their cathedrals ancient parish or collegiate churches. Progress has been made during the year '89 with the restoration of Peterborough cathedral, and St. Alban's Abbey; and Llandaff cathedral was reopened, after effective restoration, in September.

Caucus, The, is a nickname applied in the first instance by Lord Beaconsfield to the system of political organisation of which the Birmingham Liberal Association is a type, and in particular to the organisation called the National Liberal Federation (*q.v.*).

Cave, Sir Lewis William, b. 1832. Called to the bar ('59), Q.C. ('75). After a successful professional career, he was appointed a judge of the High Court ('81). He was joint editor of the reports of the Court for the consideration of Crown cases reserved ('61-65), and of Stone's "Practice of Petty Sessions." He also edited the editions of Addison on "Contracts," and the same author's "Law of Torts."

Cayenne. A French colony in Guiana, South America. Exports to France about £750,000 annually. C. was selected as a station by the R. Astron. Soc. as a point of observation of the total solar eclipse, Dec. 21st and 22nd, '89. See **COLONIES OF FOREIGN POWERS**.

Caymans, The, a group of three islands in the British West Indies, 150 miles north-west of Jamaica, of which they are politically a dependency. The islands (Grand Cayman, Little Cayman, and Cayman Brae) are well wooded and produce much turtle. Area 225 sq. m., pop. 2,500, mostly on Grand Cayman.

Celebes. A large island of the Asiatic archipelago. Area 72,000 sq. m.; pop. about 2,000,000. Part of the island is an "Outpost" of Dutch India, containing the towns of Menado, Fort Rotterdam, and Vlaardingen or Macassar. The remainder broken up into native states. The native princes recognise the authority of the Dutch, who expelled the Portuguese from Celebes in 1660. Consult Wallace's "Malay Archipelago," Penny's "Ten Years in Melanesia."

Centigrade (from *centum* = a hundred, and *gradus* = a degree). The name of one of the three scales used in thermometers. The freezing-point of water is on this scale denoted by 0°, the boiling-point by 100°. The space on the scale between freezing-point (0°) and boiling-point (100°), is divided into 100 equal parts, each of which is called a *degree*. This thermometric scale was invented by Anders Celsius, a Swede (b. at Upsala 1701, d. 1744). It is in use among almost all Continental nations, and is the only thermometric scale used in scientific investigations. To turn the Centigrade record into the corresponding **Réaumur** record, the number on the former scale is multiplied by 4 and divided by 5: *e.g.*, 100° C. are equivalent to 100 × 4 ÷ 5 = 80° R. To turn Centigrade into **Fahrenheit**, multiply by 9, divide by 5, and add 32: *e.g.*, 100° C. are equivalent to 100 × 9 ÷ 5 = 180 + 32 = 212° F.

Central America comprises Costa Rica, Guatemala, Honduras, Nicaragua, and San Salvador (*q.v.* under alphabet).

Central Asia. An almost obsolete general political designation for the Kirghiz, Bokharan, Khivan, and Tarcoman regions which Russia conquered and annexed between '58 and '85. Previously it had been known as Independent Tartary. Russia has divided it into two large provinces: Turkestan and Transcaspia, and a small one called the Government of the Steppe, embracing the Semiretchinsk district, on the Chinese frontier. The former comprises the Kirghiz deserts, the old Khanate of Khokand, the country conquered from Bokhara, and, in addition, it controls the vassal states of Bokhara and Khiva. **Administrative centre,** Tashkent. The latter consists of the Turkoman region between the Caspian and Oxus; **administrative centre,** Askabad. Turkestan was conquered from the Orenburg base, and until the completion of the Transcaspian railway (*q.v.*) in '88 maintained communications with Russia solely by means of the Orenburg-Aral caravan route, 1,700 miles from the Orenburg railway terminus to Samarcand. **Transcaspia** (Russian Zakaspie) or the "country beyond the Caspian," was conquered from the Caspian Sea base, and the whole of it is now traversed by the Transcaspian railway, which connects Samarcand with that sea, thereby superseding the Orenburg route altogether. Consult "Russia in Central Asia," by Hon. G. Curzon, '80.

Central Provinces (India). For Ministry, etc., see DIPLOMACY.

Century Dictionary, The, of the English Language, is intended to include all words which have been in regular or occasional use since English literature has existed, especially all that wealth of new words and of applications of old words which has sprung from the development of the life of the nineteenth century; and to include abbreviations and such foreign words and phrases as have become a familiar part of English speech. It will give the pronunciation and the etymological history of all the words recorded, and it will define them with encyclopædic fullness. It will be a reference-book not only for the casual reader, but for the specialist, who will find in it full definitions of all the terms peculiar to his special studies; and the definitions given will often be found accompanied with quotations, explanatory cuts, and cross-references to other words, which throw much additional light upon the subject. **Editor-in-Chief:** Benjamin E. Smith, M.A. **Offices:** New York; and T. Fisher Unwin, 11, Paternoster Bldgs., Paternoster Sq., E.C.

"Century Magazine, The," originated Nov. 1881, previously existed under the name of *Scribner's Monthly*, which was edited by Dr. Holland. Present editor **Mr. Richard Watson Gilder.** The magazine, which has a large circulation in America and England, contains one or more serial tales, with articles on travels and subjects of general interest by eminent writers, profusely illustrated with excellent engravings. "**St. Nicholas,**" an illustrated magazine for the young (monthly), published in connection with the above, is edited by Mrs. Mary Mapes Dodge. **London office:** 11, Paternoster Bldgs., Paternoster Sq., E.C. **Conarewiton Stakes.** See TURF.

Ceylon. An island almost joined to the southern extremity of India by a chain of reefs and sandbanks called Adam's Bridge. It is a British Crown colony. Area 25,365 sq. m., pop. 2,850,000. Divided into seven administrative provinces. Capital Colombo, pop. about 120,000.

Chief production for export has been coffee till recently; now more attention is paid to tea, cinchona, cocoanut and other palms. Grain and rice are cultivated, with cacao, cinnamon, caoutchouc, etc. Manufactures limited to native requirements, including ironware, cordage, etc. (For latest financial statistics see BRITISH EMPIRE, etc., table). Railways 182 miles. Crown lands are sold at an upset price of Rs. 10 per acre, but often realise much more. **Bulk of population** Singalese, then Tamils, Moormen (Arabs), Eurasians, and Malays. Europeans about 5,000. A degraded race, the Veddahs, occupies the interior, but is not numerous. **History** commences about 500 B.C., when the Singalese, an Aryan race, first migrated to Ceylon from the Ganges valley. They were followed by the Tamils later. Buddhism introduced 306 B.C. Portuguese factories established in 1505, seized by the Dutch 1656, who were dispossessed by the British in 1795. In 1815 the Singalese kingdom of Kandy was overthrown, and the whole island formed into a Crown colony. Ceylon is crammed with antiquities. It was stated from Bombay (April 6th, '89) that the pearl fishery in the Bay of Condatchy had been unfruitful, involving a loss to the Government estimated at four lakhs of rupees. Consult Tennent's "Ceylon," Haeckel's "Ceylon," Ferguson's "Ceylon," "Ceylon Handbook and Directory," and *The Statesman's Year-Book*, etc.

Chadwick, Sir Edwin, K.C.B., b. 1800, early devoted himself to the study of economic and sanitary questions. Has been engaged on a number of **Royal Commissions** in connection with the administration of the **Poor Law** and the improvement of the **sanitary condition of the people.** Throughout a long and laborious life he has devoted himself to hygienic science, in its application to local administration. He was **secretary** to the local **Poor Law Commission**, from which he retired on the reconstruction of that body in '54. **Author** of works collected under title "**Wealth of Nations,**" edited by Dr. B. W. Richardson (*q.v.*). A banquet, at which Dr. Richardson presided, was given to Sir Edwin at Fifth Avenue Hotel, on March 3rd, '89, to celebrate his attainment to his 90th year, and his promotion by the Queen to K.C.B.

Chagos Archipelago. A large scattered group of coral islands in the Indian Ocean, being a southward extension of the Maldivé group, 1,200 miles from Mauritius, and 800 from Ceylon. A dependency of the former, which supplies a Resident Magistrate and police force. Chief of the group are the **Oil Islands**, of which **Diego Garcia** is the largest and most important. It possesses a spacious harbour, now used as a watering station for Australian and Red Sea steamers. Whole group fertile, abounding in cocoanuts, fruit, pigs, poultry, and vegetables. **Chief product,** cocoanut oil.

Challu. See DU CHAILLU.

Chairman of the Committee of Ways and Means. A member of the House of Commons who performs important functions in connection with both the public and private business of parliament. He is elected when the House goes into Committee of Ways and Means, or Supply, for the first time in a new parliament, and he holds office until the dissolution of that parliament. Although he is nominated by the Government, he is not a member of the Government, any more than the Speaker, but an officer of the House. The salary of the office is £2,500 a year. The Chairman

of Ways and Means usually presides when the House is in committee, whether on financial business or on a bill, but he may request one of several temporary or deputy chairmen nominated by the Speaker at the commencement of each session to act for him (see PARLIAMENTARY PROCEDURE). His place is not in the chair of the Speaker, but at the table where the Clerk, who retires with the Speaker, has sat. When the House is informed of the unavoidable absence of the Speaker, the Chairman of Ways and Means performs his duties, and exercises his authority in relation to all proceedings of the House as Deputy Speaker until the next meeting of the House, and so on from day to day on the like information being given to the House. He may also take the chair as Deputy-Speaker, when requested to do so by the Speaker, without any formal communication to the House. Among the recent holders of the office are Mr. Raikes (now Postmaster-General), '74-80; Sir Lyon Playfair, '80-83; Sir A. Otway, '83-85; Mr. Courtney, since '85. The Chairman of Committees in the House of Lords is appointed at the commencement of every session. The late Lord Redesdale was first appointed to the office in '51, and was reappointed in every subsequent session until his death in '86. The Duke of Buckingham and Chandos was chosen to succeed him, and was re-appointed in '87, '88, and '89. On the death of the Duke of Buckingham, the Earl of Morley was elected.

Chamberlain, Lord Great. A State office of great antiquity entirely distinct from that of Lord Chamberlain of the Household. The Lord Gt. Chamberlain assists, in company with the Earl Marshal, at the introduction of new peers, issues tickets for the opening and prorogation of Parliament, and orders of admission to view the House of Lords when Parliament is not sitting, and sees to the fitting up of Westminster Hall for a coronation, the trial of a peer, or for any other great public ceremony. He walks on the right of Her Majesty when she opens Parliament in person. The office is hereditary, and the duties are at present performed by Lord Willoughby de Eresby.

Chamberlain, The Lord. In mediæval times offices in the household of the sovereign ranked in dignity with offices of state, and were held by persons of the highest rank. The chamberlain was one of the most important of these domestic officers, having the general supervision of the royal household above stairs. The Lord Chamberlain of England still exercises this supervision, and has the control of the establishment attached to the chapels royal, and of officers and servants attached to the royal chambers, except those of the bed-chamber, over the medical men of the household; and he appoints the royal tradesmen. He directs all great royal ceremonies, hands the Queen to and from her carriage; all applications to attend drawing-rooms and levees must be sent to him; he superintends the royal wardrobe and the jewel house at the Tower. But he is oftenest heard of as a licenser of theatres and plays. His power of licensing theatres extends to the cities of London and Westminster, and certain other parts of the metropolis, and to those other places within which the sovereign may occasionally reside. Elsewhere the power of licensing theatres belongs to the justices.

But the patent theatres (that is, theatres licensed by letters patent from the Crown) do not, even in the above places, require a licence from the Lord Chamberlain. One copy of every new play, prologue or epilogue, or new addition to an old play, prologue or epilogue, intended to be produced at any theatre in Great Britain must be sent to the Lord Chamberlain at least seven days before it is first acted or produced, with an account of the theatre where and the time when it is to be acted or produced, signed by the manager. Should it, either before or after the expiry of the seven days, be disallowed by the Lord Chamberlain, it must not be presented. It is lawful for him to disallow it, if he thinks fitting "for the preservation of good manners, decorum, or the public peace" so to do. Every person engaged in presenting any piece before it has been allowed or after it has been disallowed makes himself liable to a fine of £50; and the licence of the theatre in which the offence is committed becomes void.

Chamberlain, The Rt. Hon. Joseph, P.C., M.P. for West Birmingham, b. in London, July '36. Educated at University College; and in '54 his father joined the firm of Nettlefold, the well-known screw makers of Birmingham. He also, in course of time, joined the firm, and for many years devoted himself almost exclusively to business, his spare time being given up to the study of politics. His first introduction to public life was in '70, as one of the leaders of the defeated secular candidates for the School Board of Birmingham. But in '73 Mr. Chamberlain was elected chairman of the Board. During this period he was also a member of the Town Council, and was elected Mayor ('73). His tenure of office was remarkable for the expeditious despatch of the corporate business. On the death of his father he retired from the firm, in order to devote all his energies to public life. To him also was due the transfer of the gas and water works to the borough authorities. He opened a sanitary exhibition in the town, and was the author of the improvement scheme which has entirely transformed the face of central Birmingham. He was re-elected Mayor in '74, and again in '75. In '74 he opposed Mr. Roebuck in Sheffield, but was defeated by a large majority. About this period his name was brought prominently before the public by several articles he wrote for the *Fortnightly Review*, promulgating very advanced political and educational views. He was chairman of the Education League, and a member of the famous Liberal Association nicknamed later on "The Caucus" (*q.v.*), though not so closely identified with its origin and growth as is popularly supposed. In '76, on the retirement of Mr. Geo. Dixon from parliament, Mr. Chamberlain was elected for Birmingham without opposition, and has represented the town ever since. From '76 his career is to be traced in parliament and on the public platform. In '77 he laid before the house an exposition of the Gothenburg licensing system, which he had personally seen in operation in Sweden. His advocacy of the scheme, however, produced no impression upon members, and Mr. Chamberlain never revived the subject. At this period he sat below the gangway, among the Home Rulers, with whose aspirations he was supposed to have some sympathy. Mr. Chamberlain's career in opposition was not a marked success, but he was acknowledged

as the leader of the Radical party, and much of the Liberal success at the general election of 1880 was due to the organisations established all over the country on the model of that in Birmingham; and when the Liberals returned to power at the head of a large majority, it was felt that ministerial distinction should reward the man whose influence had not a little aided the victory. Mr. Gladstone offered Mr. Chamberlain the *Presidentialship* of the *Board of Trade*, with Cabinet rank. Mr. Chamberlain worked hard at this department of work. He passed a Patents Bill, and a Bankruptcy Bill, but an attempt to grapple with the question of merchant shipping was met by a formidable and successful opposition. Mr. Chamberlain, during the land agitation in Ireland, did not take such a prominent part in the debates as was expected from a man who was believed to have strong sympathies with the minor objects of the Irish members. Nor when great foreign questions were being discussed did he often enter the arena of debate. But whenever he spoke he went straight to the point, and early acquired a reputation as a hard hitter, and stands in the front rank of public speakers. On his exit from office ('85) he increased his reputation as a political leader considerably more than during the three previous years, his freedom from office giving him greater latitude; and he attacked Conservatives and Whigs with almost equal bitterness. He made a political tour in Scotland, and by his remarks on disestablishment there raised a storm which had doubtless much influence on the general election. At *Victoria Hall*, in London, he declared that he would take no post in any government which did not include in its programme free schools and the creation of small tenants and yeomen farmers. This speech created a great sensation, and was looked upon as a direct challenge to the Whig element of the Liberal party. Mr. Chamberlain was elected for Birmingham at the general election of '85, along with six Liberal colleagues. He held the office of *President of the Local Government Board* until his divergence of views on the Irish policy of Mr. Gladstone caused his resignation (March 27th, '86). He has since been a steady member of the party of Liberal Unionists. Mr. Chamberlain was the originator of the *Round Table Conference*. His speeches on the Irish Question were published in '87 under the auspices of the National Radical Union, Birmingham. On the occasion of the Queen's visit to the Prime Minister at Hatfield House, in '87, Mr. Chamberlain was amongst the distinguished guests invited by Lord Salisbury to meet Her Majesty. He was subsequently appointed *British Commissioner* to the Conference at Washington for the settlement of the dispute between the United States and Canada on the Fisheries Question, and agreed to the terms of the treaty, which has been rejected by the American Senate. Previous to his departure for America he visited Ulster, and delivered a series of speeches on the Home Rule problem. Revisited United States on the occasion of his marriage with Miss Endicott (Nov. 15th, '88). By using his influence to secure the selection of Mr. Philip Bright as candidate for Central Birmingham (on the death of his father) in preference to Lord E. Churchehill, Mr. Chamberlain provoked an attack by his lordship in a letter to the *Times*. Mr. C. replied in the same journal on April 24th, '89. In September

last he delivered a series of speeches at Huddersfield, the most remarkable of which was a vigorous defence of the old Radicalism against the new Radicalism or Socialism. In November Mr. C. proceeded on a tour to Egypt.

"Chambers' Encyclopedia," begun in '59 and completed '68, under the editorship of the late Dr. Foadlatter, is to appear in a new edition (which will comprise ten volumes), of which Vol. IV. appeared in Oct. '89. The high reputation of this well-known work will be enhanced by the revision and rewriting of its existing articles, and its scope extended by the addition of many fresh subjects, contributed by men eminent in various branches of knowledge. Special attention will be paid to Colonial and American subjects. Physical maps and new illustrations are also to be included. The primary idea of the original work—information imparted in non-professional language—is to be strictly adhered to. Editor, Mr. D. Patrick, M.A. Office, 339, High Street, Edinburgh.

"Chambers Journal" was established in '32 by the brothers William and Robert Chambers. It publishes papers on literature, science, applied art, travel and adventure, and works of fiction; but political and religious subjects, as also controversial topics in general, are excluded. Office, 339, High Street, Edinburgh.

Championship of England, The, is a very ancient office, said to have been instituted by William I. It has been in the family of Sir John Dymoke from the coronation of Richard II. (1377), when it was decided against another claimant of the post in favour of him as lord of the manor. The duties of the Champion consist only in appearing at a coronation, openly challenging a denial of the monarch's right and title to the throne, and holding combat with the denier of such right.

Chancellor, Lord High, who is appointed by mere delivery of the Great Seal to him by the sovereign, is principal legal adviser of the Crown, is by prescription Speaker of the House of Lords, and may act in that capacity even though he be not a peer; he is by virtue of his office a privy councillor, and as the first existing great officer of state he takes precedence of all but royal dukes and the Archbishop of Canterbury. He presides, if present, when the House of Lords is sitting as an appellate court. He is president of the Chancery Division of the High Court and of the Court of Appeal, and is one of the Judicial Committee of the Privy Council. In the absence of the sovereign he reads the Queen's Speech at the opening and prorogation of parliament, and he is always one of the Commission for giving the royal assent to bills. He is visitor of all hospitals of royal foundation, the general guardian of all infants, idiots, and lunatics, and has the general supervision of all charitable trusts. His patronage is very extensive. He nominates the puisne judges and county court judges; and, except for Lancashire, he appoints the county magistrates, generally accepting the nominations of the lords-lieutenant and the borough justices. He is the patron of twelve canonries and over six hundred livings. On retiring from office he receives a pension of £5000 a year, but in such case he commonly assists the Lord Chancellor and the Lords of Appeal in Ordinary in the transaction of the judicial business of the House of Lords.

Chancellor of Exchequer. See **TREASURY.**
Chancellor of Ireland, Lord, is head of

the Irish judicial establishment, principal legal adviser of the Lord Lieutenant, and exercises in Ireland many of the powers which in England are vested in the Lord High Chancellor. The office may be held by a Roman Catholic. See MINISTRY.

Chancellor of the Duchy of Lancaster is head of the office by which the Duchy estates, the revenues of which are paid over to the privy purse, are managed. He appoints the magistrates for Lancashire (see footnote to ROYAL FAMILY).

Channel Bridge. This extraordinary proposal received another revival at the autumn meeting of the Iron and Steel Institute at Paris towards the end of Sept. '89, when an elaborate paper was forthcoming from Messrs. Schneider & Co., Creusot Works, and M. H. Hersent. The route proposed was from Folkestone to a point south of Cape Gris Nez, the cost is given as £34,400,000, the metal to be provided for the construction of the bridge would represent an aggregate weight of 1,000,000 tons, and the time for construction be ten years. The matter appeared to excite much interest among those present.

Channel Islands. The, lie in the southern part of the English Channel, 10 to 30 miles from the French coast. Anciently an appanage of the Duchy of Normandy, they have belonged to England since the Conquest. Total area about 76 sq. m.; pop. 87,702.—Divided into two separate governments, called *Bailiwicks*, that of *Jersey*, and that of *Guernsey*.—Granitic rock is the foundation of the islands. They are extremely fertile and picturesque. Agriculture is largely carried on, fruit and vegetables being raised for export. Industries are farming, market gardening, and fishing. Much cider is made. Dairy farming is a great feature, and the breed of cattle is celebrated. The fisheries are important, embracing lobster, oysters, and cod. Minor manufactures are carried on, and intermediary trade between Britain, France, and other countries is considerable, exports and imports reaching £1,500,000 in British produce alone. The climate is moist and mild.—Each *Bailiwick* enjoys a kind of autonomy. The Crown appoints a Lieutenant-Governor and a Bailiff to each, and each has its representative legislature called the *States*. The English Church is the established religion, and the islands are included in the see of Winchester. Relics of Norman custom survive in the administration. Taxation is exceedingly light.—The People are an intermixture of French and English. Both languages are spoken, but the former is official.—*Jersey* has no appendages. Its area is 28,717 acres, or about 45 sq. m., with pop. 52,445. It is divided into 12 parishes. The capital is *St. Helier* (30,000), situated on *St. Aubyn's Bay*, on the south. It is hilly, and the most fertile of the group. Some shipbuilding is carried on, and syenite is quarried and exported. Iron and manganese exist.—*Guernsey*, 30 miles north of *Jersey*, has attached to it the small isles of *Alderney*, *Sark*, or *Sercq*, *Herm*, *Jethou*, *Brecon*, etc. Together the area of all is 19,605 acres, about 31 sq. m.; pop. 35,257. They are divided into 10 parishes. The capital is *St. Pierre*, on the east, with a good harbour. *Guernsey* is level on the north, hilly to the south. It is somewhat less fertile than *Jersey*. *Alderney* is elevated on the south-west. It has no good harbour, and is separated from *Cape La Hogue* by the dangerous *Race of Alderney*.

Its area is only some 1,900 acres, and its village is called *St. Anne*. The pasturage is very rich. The *Channel Islands* (especially *Alderney*) are strongly fortified, and their defence in time of war has to be wholly defrayed by Britain. Their separation from the French mainland is very recent. The work of destruction is still going on, and it is argued that they must, in the not distant future, entirely disappear. Consult *Ansted's* and *Inglis's* "Channel Islands." For *Lieut.-Governors*, etc., see DIPLOMATIC.

Chant, Mrs. Ormiston, the well-known temperance advocate and public speaker, was b. 1848, near *Chepstow*. As a successful teacher, a nurse in the *London Hospital*, the manager of a lunatic asylum, Mrs. Chant's work has partaken of a widely diversified nature, while her popularity as a speaker is shown by the fact that during the space of eighteen days she has addressed thirty-one meetings and travelled 2600 miles. She takes an ardent interest in various political and social movements, being a *Vice-President of the Peace Society* and a member of the executive of both the *Women's Suffrage Society* and the *National Vigilance Association*. She has lectured with great success recently in America, and is the authoress of "Verona, and other Poems." Mrs. C. is married to a London surgeon.

Chapter. See DEAN AND CHAPTER.

Charges d'Affaires. See AMBASSADORS.

Charities. The following is a list of the principal charitable and philanthropic institutions having offices in London, and being wholly or in part dependent upon voluntary contributions. The figures indicate the last reported annual receipts. Institutions from which returns for '89 have not been received are indicated by a *. The list does not include charities with an income under £2000 a year, or those connected with the *City of London* (see CITY GUILDS).—*Aborigines Protection Society*, 6, Broadway Chambers, Westminster, S.W.; *Actors' Benevolent Fund* (£2193), C. G. Colston, 8, Adam St., Adelphi; *Additional Home Bishops' Endowment Fund*, Canon Ingram, Arundel Hse., Arundel St.; *Aged Pilgrims' Friend Society and Asylums* (£6870), Sec. Society, J. E. Consult, for further and fuller information, Low's "Handbook to the Charities of London," or "The Classified Directory to the Metropolitan Charities."

Charity Commissioners for England and Wales, The. The Charity Commission was created by the *Charitable Trusts Act 1853* (16 & 17 Vict. c. 137). Four commissioners were appointed, three of them being paid; and two at least of these three (one of the two being the Chief Commissioner) must be barristers-at-law of not less than twelve years' standing at appointment. No paid commissioner can sit in the House of Commons during tenure of office. The Board are empowered, "from time to time, as they may see fit, to examine and inquire into all or any charities in England and Wales, and the nature and objects, administration, management, and results thereof, and the value, condition, management, and application of the estates, funds, property, and income belonging thereto." Certain large exceptions, however, are specified: the Universities of Oxford, Cambridge, London, Durham, and all colleges or halls of any of them; all cathedral or collegiate churches, all buildings registered as places of worship, with the Registrar-General of Births, etc., and *bona fide* used as places of meeting for religious worship; Queen Anne's Bounty, the British Museum, friendly or benefit societies, savings banks, institutions or societies for religious or other charitable purposes, funds or property of missionary or similar societies, and generally all undertakings (independent or dependent) wholly maintained or carried on by voluntary contributions. But this exemption "shall not extend to any cathe-

dial, collegiate, chapter, or other schools"; the colleges of Eton and Winchester, however, were exempted by the amending Act of 1855. The secretary to the Commission for the time being is a corporation sole, by the name of **The Official Trustees of Charity Lands**, for taking and holding charity lands; and the Lord Chancellor may appoint any persons to be jointly with the secretary "The Official Trustees of Charitable Funds," who must lay their accounts before parliament yearly. The original jurisdiction of the Commissioners has been greatly extended. In 1874 the Endowed Schools Act transferred to them all the powers and duties of the Endowed Schools Commissioners. In 1882 the Prison Charities Act empowered them to make schemes respecting prison charities. In 1883 the Municipal Corporations Act empowered them to hold, manage, and enjoy the property of certain dissolved corporations until they should make schemes for its administration. In 1883, also, the City of London Parochial Charities Act empowered them to inquire into the nature, tenure, and value of all the property and endowments belonging to the charities mentioned in the "Digest of Parochial Charities of the City of London," referred to in the thirteenth report of the Charity Commissioners for England and Wales, and every one of them, and every other charity the property or income of which is applicable or applied to, or for the benefit of, any parish or part of a parish within the City of London, or of any inhabitant or inhabitants thereof, and the purposes and trusts for or upon which the same have heretofore been or are now held or enjoyed, and to which the income thereof has been or is now applied, and to classify the said property in two schedules—"Ecclesiastical Charity Property" and "General Charity Property"; and to frame schemes for the future application and management of the charity property and endowments, under prescribed directions. An account of their proceedings under the above-mentioned Acts will be found in their annual report for '89 (Eyre and Spottiswoode). The present Chief Commissioner is Henry Longley, Esq., C.B.; the second, C. H. Alderson, Esq.; the third, Edward Stanley Hope, Esq.; the fourth (unpaid), James William Lowther, Esq., M.P. Sec., Daniel R. Fearon, Gwydyr House, Whitehall, S.W. See more fully for functions of the Charity Commrs. ed. '87.

Charity Organisation Society. The, was established with the object of improving the condition of the poor—(1) by promoting co-operation among existing charities and between charities and the poor law; (2) by securing due investigation and fitting action in all cases; and (3) by repressing mendicancy. The Bishop of London is president of the Society, and there is a very influential list of vice-presidents, which includes H.R.H. the Princess Louise (Marchioness of Lorne), the Dukes of Norfolk, Northumberland, and Westminster, the Marquis of Salisbury, the Earl of Derby, Mr. Gladstone, and other leading members of both political parties. The Society consists of a federation of district committees, one or more in each of the poor-law divisions of the Metropolis, and of a central council at which every committee is represented. The primary objects of the local committees are to afford to charitable institutions and individuals an easy means of ex-

changing information and of working together, to prevent overlapping in relief, and to secure the investigation of cases with a view to referring them to the proper quarter for assistance. In suitable cases assistance is given in the form of loans supplies information in regard to charitable institutions and questions connected with the administration of relief. **Special committees** appointed by it report on such subjects as "Charity and Food," "Exceptional Distress," "Medical Reform," etc. It also investigates cases of begging-letter writing. **Organ of the Society, Charity Organisation Review**, and other papers are issued. Sec., C. S. Loch. **Central Office**, 15, Buckingham Street, Adelphi, W.C.

Charles I. (Charles Eitel Frederick Zepherin Louis), **King of Roumania**, b. 1839. When '66 Prince Alexander John had been expelled from the sovereignty of Roumania, King Charles ascended the throne. He had formerly served as an officer in a regiment of Prussian dragoons. In '81 the Roumanian representatives unanimously proclaimed him King of Roumania; he had previously borne the title of Prince. His Majesty wears the Russian cross of St. George, which he received from the Emperor Alexander II. In '69 he married the **Princess Pauline Attilie Louise of Wied**, a lady of literary capacity, who writes under the *nom de plume* of "**Carmen Silva**."

Charles I. (Charles Frederick Alexander), **King of Wurtemberg**, b. 1823. He succeeded his father William I., and ascended the throne in '64. In the Austro-Prussian war, he fought on the side of Austria. In '66 he acknowledged Prussia as the head of the North German Confederation, and signed a treaty of offensive and defensive alliance with that power. In the **Franco-German war** ('70-'71) King Charles joined the other German armies, and took an active part in the struggle. He is connected with the Russian Imperial family by his marriage ('46) with the Grand Duchess Olga Nicolajewna, daughter of the Tzar Nicholas I.

Charlestown. Capital of **Nevis** (q.v.).

Charlotte Amalia. Cap. of **St. Thomas** (q.v.).

Charlotte Town. Capital of **Princ Edward Island** (q.v.), pop. 11,500.

Charterhouse School, Godalming. Founded 1611, and until 1872 situated near Smithfield, London, on ground that belonged to the Carthusian Monastery. One of the nine great public schools of the Public Schools Commission. Twenty exhibitions to the Universities, each of the annual value of £80, tenable for four years. **Chairman**, Archbishop of Canterbury. **Pupils**, 500. **Head Master**, Rev. W. Haig Brown, LL.D. **Motto**, *Deo dante dedit. Alumni* (some), Thackeray, Grote, Blackstone, Wesley, Addison, John Leech, Havelock, Thirlwall, Lord Liverpool, Ellenborough, Steele, Milner Gibson; Sir George Bowen, G.C.M.G.; Sir Richard Webster, Attorney General; Prof. Jebb, Professor of Greek at Cambridge; Prof. Nettleship, Professor of Latin at Oxford; F. T. Palgrave, Professor of Poetry at Oxford; Edwin Palmer, Archdeacon of Oxford; G. Manners-Sutton, Archbishop of Canterbury; T. Manners-Sutton, Lord Chancellor of Ireland.

Cheltenham College, Gloucester. Founded 1841. It is a proprietary college of six hundred and fifty shares, each share entitling the holder to nominate one pupil. There are **three departments**—the classical, the military and civil, and the junior. Numerous scholarships are attached

to the College. The pupils number about 500. **Principal**, the Rev. H. A. James, B.D. (Jan. '89). Among the **alumni** of Cheltenham College are the Rt. Hon. Sir Henry James, Q.C., M.P.; the Rt. Hon. John Morley, M.P.; the Rt. Hon. and Rev. Lord Plunket, D.D., Archbishop of Dublin; the Very Rev. Francis Pigou, D.D., Dean of Chichester; Rev. W. W. Merry, D.D., Rector of Lincoln College, Oxford, and Public Orator to the University of Oxford; the Rev. R. J. Wilson, M.A., Warden of Keble College, Oxford; the Rev. F. J. A. Hort, D.D., Lady Margaret Professor of Divinity at Cambridge University; Major-Gen. Sir T. D. Baker, K.C.B.; Major-Gen. Sir C. Warren, G.C.M.G., K.C.B.; Col. Sir C. W. Wilson, K.C.B., K.C.M.G.; Col. Sir F. Carrington, K.C.M.G.; the Hon. Sir J. D. Barry, Chief Justice of the Eastern District, Cape Colony; C. I. Elton, Esq., Q.C., M.P.; R. T. Reid, Esq., Q.C., M.P.; F. T. Dames-Longworth, Esq., Q.C.; W. E. H. Lecky, Esq., historian; R. E. Francillon, Esq., novelist; Briton Riviere, Esq., R.A.; and Prof. J. I. Middleton, M.A., Slade Professor of Fine Art in the University of Cambridge.

Chemistry, '89. The celebrated Russian chemist Prof. Mendeleef delivered the Chemical Society's Faraday lecture in June, on the "periodic law of the chemical elements." The committee of the British Association dealing with the present methods of teaching chemistry, in continuance of their work, presented a second report at Newcastle. It embraces a general scheme for instruction in elementary branches of chemistry, chiefly for the guidance of teachers. The report amounts, it may almost be said, to an instruction to the State as regards science teaching as a whole in our schools. The report upon the **Influence of Silicon on the Properties of Steel** was also read. Silicon up to 6 p.c. does not destroy the malleability of iron, and experiments by Mr. Hadfield show that silicon by itself does not produce a steel that will harden by water-quenching. Dr. Laurie gave some results of his in connection with researches on **artists' colours**. Like anthropology (*q.v.*), chemical science has held its **International Congress**. That at Paris in the autumn decided upon forming an International Committee to promote **uniformity of chemical nomenclature**. Prof. Armstrong represents England. The **Webster sewage process** was publicly demonstrated at experimental works erected at Crossness by Mr. Webster. The process is an **electro-chemical treatment**—i.e., certain chemical actions are produced by an electric current in order to render the sewage under operation harmless. The method appears to be a successful solution of an important problem; the question of cost, however, is not satisfactorily settled. Prof. J. W. Mallett has supplemented the work done by Messrs. Thorpe and Laurie in his revision of the **atomic weight of gold**. A revised and entirely rewritten edition of **Watts' Dictionary of Chemistry** is in progress; the second appeared recently, carrying the work as far as "Indigo." It will be the standard of reference for all chemists. "Service Chemistry," by Vivian Lewes, dealing with matters in relation to the naval and military services, is well spoken of. (For abstracts of chemical papers published in various journals during the year consult *Journal of the Chemical Society*.)

Cherif Pasha, statesman, b. at Constantinople, of an old and noble Mussulman family. He studied at Paris as a pupil of the Egyptian

Mission maintained in France by the Egyptian Government, and passed through the Military School of Saint-Cyr. He returned to Egypt in 1844. At the accession of Said Pasha he entered the army, and was successively promoted to the rank of Pasha. In '57 he entered the administration, and became Minister of Foreign Affairs. Under the Government of Ismail Pasha he filled the posts of Minister of the Interior, Foreign Affairs, and Public Instruction. In '67 he was raised to the post of **President of the Grand Council of Justice**. In '68 he took the portfolio of the Interior, with the Presidency of the Council of Ministers; in '65, '67, '68, he was made Regent of Egypt by Ismail Pasha, when this Prince went abroad. Under the government of Tewfik Pasha, Cherif Pasha became **Prime Minister of Egypt**, but resigned ('84), in consequence of his disapproval of the abandonment of the Sudan. He is a Grand Officer of the Legion of Honour.

Chess. Some doubt exists as to the origin of this ingenious game; and whilst several authorities attribute its invention to the Chinese, others ascribe it to the **Hindoos**; and Sir William Jones says, "We may be satisfied with the testimony of the **Persians**, who unanimously agree that it was imported from the west of India in the sixth century. It seems to have been immemorially known in Hindostan by the name of **chaturanga**—i.e., "the four angas, or members of an army." It was introduced into Spain by the **Saracens** in the eighth century, and gradually came into play throughout Europe; but the date of its introduction into England is not precisely known, although it is recorded that Canute took part in a game in 1028. Tamerlane is said to have greatly improved it in or about the year 1400; and in 1474 Caxton published "**The Game and Playe of the Chess**." For the promotion of Chess, which by its many enthusiasts is deemed rather a science than a pastime, clubs are in existence all over the three kingdoms, the parent society being the **British Chess Association**, which was originally formed under the title of the **Yorkshire Chess Association**, and took its present name on Aug. 5th, 1867. The first congress under its auspices was held at St. James' Hall in June '62, and the laws of the game were revised in the following July. Dr. Zukertort won the first prize at the **International Congress** held at Paris in '78. Mr. Blackburne gained a similar honour at Berlin in '81, and Dr. Zukertort was equally successful at London in '83; but in his great match with Mr. Steinitz, in America, in '86, for the **championship of the world** and a stake of 2,000 dollars, he was beaten by ten games to five, the remaining five of the contest being drawn. In the **Masters' Tournament of the British Chess Club**, which followed in the same year, Mr. Blackburne was victorious with a total of 64 games; Captain Mackenzie, New York, was awarded first prize of 1,000 marks at the **International Chess Congress**, at Frankfort-on-the-Main, in Aug. '87; Mr. Burn and Mr. Gunsberg shared first and second prizes at the **Masters' Tournament** in December of the same year; and the latter gentleman was successful in the '88 tournament held at Bradford in August, with a total of 144 games. The following may be mentioned amongst the most interesting features of '89:—The **City of London Club Tournament** began on March 17th, and finished on the 18th in favour of Mr. Loman

Mr. Smith; the Sussex championship was won by **Mr. W. Andrews**; the East of Scotland won 4 out of 6 games against the West; the Dublin Congress met on March 5th, and attracted three of the English masters and a strong team of local players, the former of whom were beaten; **M. Rosenthal** won 21 games at the Grand Circle, Paris, on Feb. 22nd, lost 2, and drew 3. On May 15th, **Mr. J. H. Blake**, Southampton, won 20 out of 22 games played. The New York Tournament ended, after extending over a long period towards the end of May, in a tie for honours between **M. Tschigorin** and **Herr Weiss**; the meeting between the British Chess Club and the Athenæum on May 28th ended in a draw; a draw was also the result of **Brighton v. Rest of Sussex** contest on May 25th; the Bristol and Gifford Club Tournament Prize was carried off by **Miss Budge**; and on Sept. 16th, **Mr. Blackburne's Blindfold Exhibition** at the City Club resulted in his winning five games out of eight, the remaining three being drawn. Consult "Staunton's Chess Players' Handbook," one of Bohn's Scientific Library Series.

Chester, Rt. Rev. Francis John Jayne, D.D., Lord Bishop of. The see, anciently part of Lichfield, was made a separate diocese by Henry VIII. in 1541, and has an income of £4,500. His lordship, the 33rd Bishop, was b. 1844, and educated at Wadham College, Oxon. Was a Double First in the Final Schools in '68, when he was elected Fellow of Jesus College. Ordained '70. Curate of St. Clement, Oxford. Subsequently Tutor of Keble College, and in '79 appointed Principal of St. David's College, Lampeter. In '86 he was presented to the Vicarage of Leeds, which he held until his elevation to the episcopal bench, '88.

Cheyne, Rev. Thomas Kelly, D.D., b. in London 1841. Educated at Merchant Taylors' School and Worcester Coll., Oxford. Elected ('66) Fellow of Balliol Coll., and in '31 was appointed rector of Tendring, Essex. In '84 the University of Edinburgh conferred upon him the degree of D.D., and ('85) he became Oriel Professor of the Interpretation of Holy Scripture at Oxford, and a Canon of Rochester. Professor C. is one of the most eminent authorities on Biblical exegesis. Canon C.'s *Bampton Lecture*, '89, on the Psalter excited much controversy in consequence of his seeking to show that the later Psalms, Books IV. and V., were of a Post-Exilian origin. He was a member of the New Testament Revision Company, and is the author of several works on the Prophets, and of "The Book of Psalms, New Version." He has also contributed articles to the *Encyclopædia Britannica*.

Chichester, Rt. Rev. Rd. Burnford, D.D., Lord Bishop of. The see was founded in 1070, out of the old Saxon see of Selsey, founded in 687. The present income is £4,200. His lordship, the 71st bishop, was born at Sandford, Berks, in 1802. He was educated at Eton and at Magdalen Coll., Oxford, where he graduated first class in classics '26, and gained a fellowship '30, in which year he was ordained deacon, and the year following priest. His lordship was formerly rector of Middleton, Lancashire, '35-70; Hon. Canon of Manchester '54-6; Archdeacon of Manchester '67-70; Canon of Manchester, '68-70; and Bp. of Chichester '70.

Children, Custody of Law on, in '89. The case of *Steel v. Steel* (Court of Appeal, Aug. 6th) raised an important question with respect

to the guardianship and custody of infants. Under the old law the father had practically an absolute right to the custody of his children, but the Act of '86 provides that the mother may apply to the court to have the children intrusted to her. In this case there had first been a separation order, and then a divorce, between the parties. There were two children of the marriage, a boy and a girl, the former of whom was with the father, and the latter, who was only five years of age, with the mother. Mr. Justice Stirling decided to continue this arrangement; but, on appeal, he was reversed. The Lords Justices pointed out that the wishes of the parents were directly contrary, and were therefore, inoperative; as to conduct, the faults were equal down to the separation; while the divorce was urged on by the wife, in spite of her husband's efforts at reconciliation, so here the balance was against her. But the decisive point was the welfare of the child. The father's house, it seems, is in Scotland, and there he keeps up a large establishment; while the mother lives in a small house at Putney, and under the same roof as an aunt, who was believed to be at the bottom of the family troubles. The Court of Appeal, therefore, decided that the child should reside with the father; but that for six weeks every year the father should provide a home at the seaside, where the mother might have both children with her. The point of the case apparently is that the court can have regard to the whole situation, and put the welfare of the child in the foreground.

Children, Insurance of. See SESSION, sects 62 and 129.

Children in Theatres. See SESSION, sect. 72.

Children, Prevention of Cruelty to. See SESSION, sect. 72.

Chili. A republic governed by a President elected for five years, to whom the executive power is confided, and a Senate and Chamber of Deputies, who form the legislature. The Senate, of 37 members, is elected by the provinces for six years; the Chamber, of 109 members, by the departments for three years, by electors possessing a small property qualification. The Roman Catholic is the state religion, but all others are tolerated; universal and gratuitous education is given at the national charge. Area 293,970 sq. m.; pop. in '85 about 2,527,000; capital, *Santiago* (pop. 236,412); estimated revenue '89, 46,000,000 pesos; expenditure, 53,000,000 p.; debt (latest returns) 88,435,072 p. Imports in '87, 48,630,862 p.; exports, 59,549,958 p. (peso = 3s. 2d.). Tobacco growing and the production of raw silk have been attempted of late years, but only with indifferent success. Cattle breeding and sheep raising might both be profitably carried on in Chili. By law passed in '87, the army is not to exceed 5885. There is a national guard, composed of citizens, on duty to assist the regulars, who number 47,774, making a grand total of 53,659 effectives. (For navy see FOREIGN NAVIES.) Consult "The Progress and Actual Condition of Chili," by G. Rose-Innes; "South America," by H. W. Bates; *Statesman's Year-Book*, etc.

"Chiltern Hundreds." See PARLIAMENTARY PROCEDURE.

China. The most populous, and, excluding Siberia, the largest empire in Asia. China Proper still more remarkable as the most com-

squ. nationality in the world: area 1,298,000 sq. m., with a pop. of 380,000,000—the higher figures being a moderate computation, and 30,000,000 less than the returns for 1842. The rest of the empire (Manchuria, Mongolia, Thibet (*q.v.*), Jungaria, East Turkestan), covering 2,887,560 sq. m., contains about 21,000,000 souls. China has other claims to rank high in the family of nations besides her extent of territory and the multitude of her people. The industry of the latter and the antiquity of her history afford valid reasons for placing this country high among the nations of the earth. The government of China is most carefully organised. A number of boards or councils conduct business at the capital, Peking; while the eighteen provinces are divided among a certain number of governor-generals, who are assisted by governors of provinces and the "taotais" of the cities. A nineteenth province has been recently formed, out of the Central Asian territory, having its seat of government at Suidum, near the Russian frontier, in Semiretchia. The Manchu, or Tartar garrison, allotted to each important town, has a separate organisation, while the Green Flag Chinese army corresponds to our militia or the Turkish *redif*. The Manchu army is computed to number 324,000 men, and the Chinese as many as 650,000. The most efficient force is, however, Li Hung Chang's garrison of Pechihli, the nucleus of which was formed by the men who served under General Gordon against the Taepings. There are arsenals at Nankin, Shanghai, Tientsin, and other places, besides a dockyard at Kiangnan. The marine of China consists of a number of powerful gunboats named after the letters of the Greek alphabet (see FOREIGN NAVIES). The greater part of China is only very partially developed, and much benefit is anticipated to native and foreign trade by the introduction of railways, to which the Chinese government seems at last to have reconciled itself. (For history '86-88, see ed. '89.) The leading event in the Imperial history of this country during the last year was the marriage of the Emperor. It was announced in Dec. '88 that the Dowager Empress had made the choice, the consort being her own niece, her Manchu name being Ye hoh-na-la—thus securing the union of her own nephew and niece. The propitious day for the ceremony was fixed by the astrologers for Feb. 23rd, '89. It was telegraphed from Peking (Feb. 22nd) that the Empress Regent on retiring issued a decree ennobling three generations of the ancestors of Sir Robert Hart, Inspector-General of Chinese Customs, in recognition of his distinguished services, and also eulogising all the Foreign Ministers and inviting them to a banquet at the Tsung-li-Yamen. The Emperor's marriage took place at Peking on Feb. 26th. The *Times* of Dec. 20th published a lengthy article, explaining the peculiarities of the French claims (set up by Napoleon III.) to exercise suzerainty in China over Roman Catholic missionaries of all nationalities, and even over converts. Recent direct communications between the Vatican and Peking have led to Italy and Germany at last entering into conventions with China to act for their own countrymen. By the mail to hand early in Feb., it was reported that Mr. Little's pioneer journey up the Yangtze had been postponed, entirely through local opposition. Quong Tart, a well-known Chinese merchant, of Sydney, arrived at Hong Kong early in '89, on a semi-

official visit to the Viceroy of Canton and the Peking Government, and to put them in possession of the views of the Chinese in Australia, upon emigration. The only part of the Australian laws to which he appeared to seriously object was that restricting free intercolonial travel for Chinese. Nothing in the way of negotiation with foreign countries on the question has taken place during the year. From the last report of the British consul at Swatow, one of the principal ports for Coolie emigration, 68,747 Chinese left, and 58,040 arrived in foreign vessels as passengers during '88, against 72,018 departures and 52,590 arrivals in '87. The mail which arrived about the middle of April reported that the famine in Shantung and Manchuria continued to be of a heartrending character; but the Shanghai press were complaining that a portion of the relief fund raised in London had been handed over to the Viceroy free from European control. The *Times* of April 23rd published an explanation as to the alleged handing over of British famine subscriptions to the Viceroy, to the effect that the £20,000 of the subscriptions which had found their way to that dignitary were from the Chinese themselves, at home or abroad, who had requested that this course be taken. On May 20th the final meeting of the Mansion House Committee was held, when it was reported that in all £30,000 had been sent to the Shanghai Committee, and that the fund had been closed because the urgent need for relief on a large scale had ceased. An article on Protestant Missionary Work in China was published in the *Times* on May 25th. From this it appeared that, in Dec. '88, there were 1123 foreign missionaries and 34,555 communicants. News reached England in April that Prince Tun, commonly known as the Fifth Prince, had died, leaving only two brothers of the late Emperor Hien Fung alive, one being Prince Kung, long Prime Minister of China, and the other the present Prime Minister and father of the Emperor. A telegram from Berlin, April 9th, stated that a new Chinese ambassador to London and Paris had been appointed in the person of Chen-Kin-Ming, who formerly acted as Under Secretary of State for Foreign Affairs at Peking, and was at present a Tao-tai, or sub-governor. The *Times* of April 18th and 24th published extracts from a descriptive account of the Emperor's wedding. On May 3rd Mr. S. Smith in the House of Commons, on the motion for going into committee of supply, moved a resolution in favour of the suppression of our opium trade (*q.v.*) with China, which, after a long discussion, was rejected by 165 votes to 88. In the House of Commons on May 6th, Sir J. Fergusson (Under Foreign Secretary), in answer to questions on Emigration, said that the communications which were going on last year were not broken off, but they had arrived at a stage when it was necessary to refer to the colonial governments, and the answers were only now beginning to come in. On June 17th the *Times* devoted a long article to the discussion of the administration of the Empress Dowager of China, who handed over the reins of power to the Emperor in the previous February. — General. With reference to the awful destruction caused by the bursting of the banks of the Yellow River, it was reported in London, in Dec. '88, that the Government were believed to be feeding 1,177,000 refugees, and that the misery caused passed all com-

prehension, at least a million having perished. Early in Jan. '89 it was reported that a famine was feared in an extensive territory, including a section of the southern part of Chili, northern Honan, and western Shantung, the local exports of grain had therefore been prohibited. By a later mail it was stated that the Emperor was personally interesting himself in the welfare of the sufferers from the Yellow River catastrophe, and was following the (for him) extraordinary course of telegraphing to the local officials. In the *Times* of Jan. 11th a descriptive article of the distress in China, owing to the floods and famine, was given, including an account from Dr. Nevins, a missionary who had been traveling in the north. It was announced in the same journal, on Jan. 16th, that a relief committee had been formed at Shanghai, and an appeal for help was published from Sir T. F. Wade. A deputation waited on the Lord Mayor of London on Jan. 21st, and asked that a Mansion House Fund should be opened, which, on the following day, he consented to do. The Archbishop of York published an appeal on the 29th, pointing out that "as would save a life." A description of the agricultural district of Chekiang, including the most southern of the famine-stricken regions, appeared in the *Times* of March 2nd. It was subsequently reported that the breach of the Yellow River was closed on Jan. 20th. Intelligence reached Shanghai, Feb. 6th, to the effect that a serious riot had occurred at Chiu-Kiang on the Yangtze, and that the British consulate and seven houses had been burnt. Early in Feb. it was reported that the further extension of the Tientsin Railway to Tung Chow had been prejudiced by a fire at the Imperial Palace at Peking, which had been declared "an evil omen and warning against the approach of Western invention." It was subsequently stated, however, that the Hong Kong and Shanghai Bank had lent the Government £450,000 at 5% for the completion of the line. The mail arriving early in July reported a terrible rainstorm at Hong Kong, causing immense mischief. In his last report the British Consul at Hankow gives a table of analyses of Chinese and Indian teas, made by Professor Dittmar, F.R.S. From this it appears that the quantity of tannin in Indian tea is 9.68 per cent., and in Chinese 6.01. After twenty minutes' infusion of 100 grains of each, there is present 2.76 grains tannin in the Indian, and 3.37 grains tannin and 3.86 grains tannin in the Chinese. The teas in question," concludes the consul, "were both high-class teas, and the analyses given above certainly tend to show that there is an excess of tannin, with all its astringent and deleterious qualities, in the Indian tea." A Yellow Book on the tea trade of China, was issued (see *Times*, June 10th) by the Chinese Maritime Customs, containing detailed reports from the Commissioners at the ports from which tea is shipped to foreign countries, and also a special report on the whole subject from Sir Robert Hart to the Tsung-li Yamén. The general results of the Commissioners' reports are that there are faults of preparation to be remedied, and that the internal taxation on tea should be revised. In an interesting article in the *North China Herald*, published in the late autumn, the writer discusses the growth of the population in China, remarking that the latest statistics give the total at 380,000,000.

By the mail arriving at Queenstown on Nov. 20th, *via* San Francisco, it was reported that on Oct. 11th another terrible flood had occurred on the upper Yangtze. The country had been swept for miles, 1,000 persons at least drowned, and 15,000 rendered houseless.—Commercial. In an interesting article (Dec. 26th, '88) a *Times* correspondent pointedly refers to the decline of the Indian opium trade with China, and arrives at the following general conclusion: "The total and compulsory cessation of the Indian opium trade to-morrow could have no other effect on opium consumption in China than to increase that of the native drug, to raise its price, and to throw more land under the poppy." On June 13th it was announced that a telegram had been received in London, to the effect that permission to attempt to ascend the Upper Yangtze by steamer from Jehang to Chung-King would be immediately granted to Mr. A. Little (for concise history of this enterprise see *Times*, June 14th). In his last report the British Consul gives some details respecting the railway between the Kaiping Mines and Tientsin, which were completed in '88, and is now open. It is 85 miles long, and the average cost was £4,250 per mile, including rolling stock and money spent on stations, wharves, etc. Nearly all the materials are of British make, but rolling stock was built on the spot. As already stated, the extension to Tunchow, near Peking, had for the present been dropped. In July it was reported that Li Hung Chang had accepted the control of the railways in the north of China, and recommended Chang Chi Tung for the same position in the south. An interesting item of intelligence was published on the 5th of the month to the effect that, in order to start and encourage cotton spinning in the country, the Government had determined to erect and furnish a mill of 12,000 spindles with motive power for 20,000. Messrs. Soutar, Lehman & Co., of Manchester, received the order for the whole equipment, with instructions to send out skilled labour. It was reported in April that, in a memorial to the throne by one of the censors against the extension of railways in China, the argument used was one that railways had been found so dangerous in Europe that they were being taken up, and that foreigners therefore wanted the Chinese to buy their old rails. In the early autumn it was announced that the Emperor had issued an edict for the Tung Chow Railway to be constructed, the Marquis T'seng being appointed General Director of all the Chinese railways, the extensive development of which was anticipated. The Chékiang consular report, published in the press early in September, says:—"The trade in foreign opium has now passed entirely into Chinese hands. Before the new Article came into force a considerable portion was done by Europeans. The *likin* in this neighbourhood being more favourable than round Shanghai, it suited the Chinese dealers to purchase the drug here instead of going to Shanghai for it and paying there the higher *likin*. The import of '87 was increased by the very heavy stocks imported just before the new Article of the Chefoo Convention came into force, and the prospects for the present year point to a considerable further diminution on the import of '88. From a return published in the autumn by the statistical secretary of the Chinese Maritime Customs, the silk crop of this year appears to be a very good one, the

Chinese silkworm having apparently thrown off the disease which threatened it. In September the report was circulated that the Emperor had authorised the construction of a great trunk line from Peking across the country to Hankow, a treaty port on the Yangtze, 700 miles long. The *Times* dealt with the matter at length on Sept. 11th. From the report of the Chinese Maritime Customs for '88 we learn that for the first time in its history the foreign trade of the country exceeded £50,000,000, while the customs receipts were £6,000,000. Consult "The History of China," by Demetrius Boulger (3 vols.); Archibald Little's "Through the Yangtze Gorges" ('88); "The New Far West and the Old Far East," by W. H. Barneby ('89); *The Statesman's Year-Book*.

Chitty, Sir Joseph William, is the second son of the late Mr. Thomas Chitty, well known as a legal author. Born in 1828, he was a distinguished athlete when at Oxford, rowing for his university, and acting as umpire at the annual contest until his elevation to the judicial bench. He was called to the bar in '56, and, devoting himself to Chancery work, soon acquired a large practice. Q.C. ('74), and was the acknowledged leader of the Rolls Court. At the general election of '80 he was returned for Oxford City with Sir W. Harcourt in the Liberal interest. Elevated to the bench in '81.

Christian IX., King of Denmark, was b. 1818. He is the son of the late Duke William of Schleswig-Holstein-Sonderburg-Glücksburg, and father of the Princess of Wales, the Empress of Russia, and the King of Greece. He succeeded his brother Ferdinand VII. in '63. In the beginning of his reign arose the famous dispute about the duchies of Schleswig, which by the Treaty of Peace of Vienna ('64) he had to surrender. Recent attempts on the part of His Majesty to act in defiance of the popular party in the Danish Parliament has seriously strained his relationship with that body. He visited the Emperor William II. at Berlin, in Aug. '88, and was visited by the Emperor of Russia and his family last autumn ('89).

Christian Era, The. This dates from the year in which Christ was born. According to Greek chronology, it was the fourth year of the 194th Olympiad; by the Roman Calendar it was 753 A.U.C.

Christian Evidence Society. Founded in 1870 by the Bishop of London, Earl of Harrowby, and others, Churchmen and Nonconformists, with the conviction that it was necessary to do something to counteract the progress of unbelief amongst various classes. With this view sermons and lectures are delivered in various parts of the country, tracts are circulated, classes and examinations on Christian Evidences are held, and grants of books are given. In '89, 313 indoor and 574 open-air lectures were given. Last year's income about £1,100. Pres., Archbishop of Canterbury; Vice-Pres., Sir G. G. Stokes, Bart., P.R.S.; Chairman of Council, Earl of Carnarvon; Secs., Rev. T. T. Waterman, B.A., C. L. Engström, M.A.; Offices, 13, Buckingham Street, W.C.

Christianstadt. Capital of Santa Cruz (q.v.).

Christie, William Henry Mahony, F.R.S., Astronomer Royal, b. at Woolwich 1845, is a son of the late Professor S. H. Christie. Educated at King's Coll. School, London, and Trinity Coll., Camb., and became a Fellow of his college. Graduated B.A. ('68)

as fourth wrangler. Appointed ('70) chief assistant at the Royal Observatory, Greenwich. He contrived and introduced several valuable improvements in the scientific apparatus there in use, including a new form of spectroscope. On Sir G. B. Airy's retirement ('81), Mr. Christie was appointed **Astronomer Royal**. He is the author of the "Manual of Elementary Astronomy," and has contributed valuable papers to the Proceedings of the Royal Society and the Royal Astronomical Society.

Christmas Island. A small island, lat. 11° S., long. 106° E. Situated midway between the Sandwich Islands (N.) and the Society Islands (S.). On June 6th, '88, Captain May, H.M. *Imperieuse*, by authority from the Admiralty, annexed this island.

Christ's Hospital (Blue Coat School), London. Founded 1547. Gross income over £70,000, about £45,000 of which is devoted to education. At Hertford there is a junior school and a girls' school. Admitted at age of from eight to ten. Pupils in all 1,200. They are fed, clothed, lodged, and educated free, and as a condition of admission it is required "that their parents (if one or both be living) have not adequate means of educating and maintaining them." Hospital exhibition funds provide exhibitions to universities; there are also the *Times* scholarship, the "Moses," "Thomson," "Rowed," and "Pitt Club" exhibitions. **Head Master**, the Rev. Richard Lee, M.A. **Alumni**: among a numerous list may be noted Bishop Stillingfleet, Coleridge, the poet; Leigh Hunt, Charles Lamb, Thomas Barnes, a late editor of the *Times*, James Scholefield, Regius Professor of Greek for Cambridge, Sir Henry Sumner Maine, K.C.S.I., author of "Ancient Law."

Church, Richard William, D.C.L., Dean of St. Paul's, was b. at Lisbon. Educated at Oxford, where he graduated with much distinction ('36). Fellow of Oriel ('38); rector of Whitley, Somerset ('53); appointed by Mr. Gladstone to the Deanery of St. Paul's ('71). Dean Church has contributed to *Essays and Reviews*, the *Saturday Review*, the *Guardian*, and other contemporary papers, and has also written important works on *Anselm and Dante* (50-79), besides sermons, amongst which are his well-known *Advent Sermons* ('85), etc. Dean Church is a prominent leader of the High Church party, and his recent erection of the *vestibles* (q.v.) in St. Paul's Cathedral has given rise to much controversy and litigation.

Church and Stage Guild, The (founded 1879), is a society of members of the dramatic profession, clergymen, and others, who feel it their duty to endeavour, as far as possible, to remove the prejudices widely felt by religious people against the stage, and by theatrical people against the Church. It seeks to promote religious and social sympathy between members of the Guild and others, and to assert and vindicate the right of religious people to take part in theatrical amusements, whether as performers or spectators. **Organ, Church Reformer**. Sec., Rev. S. D. Hearnim, 31, Upper Bedford Place, W.C.

Church, Anglican. See ANGLICAN CHURCH.
Church Army. A working-man's Church Mission to working-men, founded in 1882, directed by a committee acting under the Council, amongst whom are the four arch-

bishops and nineteen other English bishops. There are 170 officer evangelists and 40 mission nurses continually labouring for the Society. The C. A. has 12,000 regular communicant members. Over 90,000 meetings are held annually, attended by over 7,000,000 persons; 6,000 adult converts have been confirmed, and over 1,000 are waiting to be confirmed; over £4,500 has been received in subscriptions and donations, and over £13,000 locally, mostly in working-people's pence. Officer evangelists are sent to any parish for a period of not less than one week nor more than one year; the usual stay being six months. *Organ of the Society, Church Army Gazette.* Hon. Sec., Rev. W. Carlile. Headquarters and Training Home, 128 and 130, Edgware Road, W.; *Mission Nurses' Home*, 95, Edgware Road. Central Sec., Rev. J. J. Chambers.

Church Association, The. Instituted in 1865, to maintain the principles and doctrines established at the Reformation, and to preserve the purity of Protestant worship in the Church of England; to resist all innovations on the order of the service as prescribed by the joint authority of the Church and State, whether these innovations consist in vestments, ornaments, gestures, or practices borrowed from the Church of Rome; and especially to prevent "the idolatrous adoration of the Sacrament of the Lord's Supper"; to resist all attempts to restore the use of the confessional, and every exercise of that priestly authority which was put down at the Reformation. The C. A. also seeks to vindicate for the laity their rightful share in all departments of Church life, and aims at the restoration to the parishioners of the election of churchwardens, giving to them a veto upon the appointment of incumbents by patrons, and the absorption of the ecclesiastical courts into the general judicature of the country. During '89 the C. A. has given its support to the prosecution instituted with regard to the erection of the *reveries* in St. Paul's Cathedral, and the alleged illegal ritualistic practices of the Bishop of Lincoln. There is no permanent President, but among the *Vice-Presidents* are the Marquis of Abergavenny, the Earl of Bandon, Lord Ebury, Sir Thomas Chambers, Q.C., the Dean of Bristol, the Dean of Ripon, the Rt. Hon. Lord Robert Montagu, J. D. Allcroft, Esq., etc. *Organ of the Association, The Church Intelligencer.* Chairman, Capt. Cobham. Sec., Henry Miller. *Offices*, 14, Buckingham Street, Strand.

Church Congress, The, '89. Twenty-ninth session, held at Cardiff, from 1st to 4th October. Opening services were conducted at St. John's, St. Andrew's, and St. Mary's Churches—the respective preachers being the Archbishop of Canterbury, the Bishop of Lichfield, and the Bishop of Derry. A striking feature of the services was the character of that conducted at St. Mary's, a noted Ritualistic Church, the function being described as a *High Celebration of the Holy Eucharist*, with crucifixes, flowers, incense, vestments, altar lights, and all the accessories of advanced ritual. Some party strife was occasioned by this service, and the permanent honorary secretary of the Congress (Archdeacon Emery) communicated to the press an explanation from the Bishop of Llandaff, stating that it was unauthorised by the committee, and offering regrets for any pain it might

have caused. The first day's proceedings began with a discussion upon "The Church's Mode of dealing with Rapidly Growing Populations"—in respect (a) of the division of parishes, (b) of the use of mission rooms and lay co-operation, and (c) of community life for the clergy. Mr. Richard Foster, Rev. Charles Mackeson, Canon Tebbutt, and Canon Medd; were the principal contributors. The Dean of Manchester read a paper comparing incidents of the establishment of religion in 1689 and 1889, being followed on the same subject by Rev. T. Hancock (read by Rev. H. C. Shuttleworth). "Establishment in relation to Religious Equality and Spiritual Independence" was treated by the Right Hon. H. Cecil Raikes, Mr. Gascodine, and the Dean of Llandaff. "Church Finance and Clergy Pensions" attracted little interest; and "Missions to Seamen" were discussed with languid attention in the smaller Colonial Hall. The most important session was that which considered the position of the Church in Wales, with relation to its history, its present needs, and its probable future. Mr. J. T. D. Llewelyn read a graphic survey of the recent progress of the Welsh Church; Mr. W. S. De Winton appealed for an increase of its Episcopate; Parochial Missions were urged by Rev. J. P. A. Bowers; the Bishop of Chester (Dr. Jayne) spoke on the training of the clergy; and Mr. Stanley Leighton, M.P., read a short history of the organisation of the Church in Wales. "Literature of the Day and its Attitude towards Christianity" was a popular subject. Sir G. G. Stokes, Bart., P.R.S., commended the moderation of tone now manifested alike by scientists and theologians; Rev. J. M. Wilson (Clifton College), deprecated the *non possumus* attitude of Churchmen towards Biblical criticism; Mr. W. Leonard Courtney contributed a brief analysis of recent philosophical research. Other speakers were Rev. H. C. Shuttleworth, Mrs. de Courcy Laffan ("Mrs. Leith Adams"), and Rev. J. J. Lias. "Sunday Observance" and "Home Reunion" were the subjects at the Colonial Hall on Oct. 2nd. On the 3rd, at Park Hall, "Elementary Education" was the theme of papers by Lord Norton, Rev. J. R. Diggle (Chairman London School Board), Prebendary Roe, Canon Evan Daniel, and Canon Gregory. The first two speakers pronounced emphatically against gratuitous state education; and the latter insisted mainly upon the importance of maintaining voluntary schools. Canon Luckock (Ely), Revs. C. Gore, J. J. Lias, and the Dean of Peterborough, dealt with the "Ministry of the Christian Church." Mr. J. Trevarthen (Redhill Reformatory), the Dean of Worcester, Mrs. Henry Kingsley, and Rev. W. S. Carter spoke on "The Church's Care of Children." "The Church's Duty with regard to the Temporal Well-being of the Working Classes" was also a popular subject. Other themes were "Intermediate Education," "How to meet the Spiritual Needs of Young Men," "Missions," and "The Linguistic Condition of Wales."—the Congress concluding, as usual, with a devotional meeting. In former years the Mayor of the borough visited has entertained members of the Congress at a conversation; but on this occasion the Mayor of Cardiff declined, and the conversation was given by the President, the Bishop of Llandaff.

Church of England, The Established. By "established" is meant the group of legal privileges and restraints imposed upon the Church of England by its connection with the

State. The word *Established*, however, is somewhat misleading. The Church, which from its relation to the State is called National, and from its doctrines (*vide* the Creeds), Catholic and Apostolic, recognises no establishment by legislative enactment. It is in no sense a creation of parliament, having existed long before parliament. It is established simply by its antiquity, and as being the accepted Church of the nation.—Its **History and Constitution**. It claims an apostolic foundation, asserting for its bishops an unbroken line of descent, in the laying-on of hands, from the Apostles themselves. Tertullian speaks of Christianity being widely disseminated in England as early as A.D. 202; and that the Church was from the first under episcopal supervision we find by the fact of three English bishops being present at the great Council of Arles in A.D. 314. Moreover, as the Roman missionaries under Augustine did not come over until A.D. 596, the English Church has always maintained its independent origin. Its **Government** is by its three Orders of Bishops, Priests, and Deacons. Its **Doctrine** is embodied in the three Creeds of Western Christendom—the Apostles', the Nicene, and the Athanasian. The Apostles' Creed is required of candidates for Baptism; the Nicene is recited at Holy Communion; and the Athanasian at certain special services. The clergy are also required to subscribe the Thirty-nine Articles. The form of worship of the Church is set forth in the Book of Common Prayer. Its **Clergy** number, in round figures, a total of about 24,000, divided as follows:—Archbishops, 2; Bishops, 32; Suffragan Bishops, 15; Deans, 30; Archdeacons, 86; Residuary Canons, 131; Rural Deans, 613; Beneficed Clergy, 13,600; Unbeneficed, 9,000. The Archbishops and 24 of the Bishops have seats in the House of Lords.—**Progress**. No. of Dioceses in '76, 28; in '89, 34, with two more sees (Bristol and Birmingham) in course of endowment. The six new bishoprics are Truro, St. Albans, Liverpool, Newcastle, Southwell, and Wakefield. No. of Benefices in '31, 10,718; in '86, 13,600. No. of Parsonages in '31, 5,947; in '86, 11,000. No. of Clergy in 1801, 10,307; in '41, 14,613; in '89, some 25,700. **Money raised for Church Building** alone, from '40 to '87 (purely by voluntary subscriptions, with the exception of one State grant of £1,500,000—*vide* Lord Hampton's Parliamentary Report '74)—£46,000,000; for Endowments, £3,771,000. **Amount annually raised**, by purely voluntary means: for Church Building and Restoration, £1,000,000; for Foreign Missions, £500,000; for Elementary Education, £500,000; for Home Missions, Temperance Work, Clubs and Charities, at least another £500,000. The **Revenues** of the Church, from endowments in tithes, land, etc., amount to between four and six millions sterling: the exact amount is not known. In '88 the tithe average reached a lower point than it has ever done for some fifty years. Every £100 of rent-charge is worth now less than £84 (see **TITHES**). The **Church population** also is not accurately known, but the Church claims over 60 per cent. of the entire population. The **Church accommodation** is represented by about 6,200,000 sittings. Spiritual supervision is provided for the whole country, which is divided, first into **Provinces** (Canterbury and York), presided over by the Archbishops; which are subdivided into **Dioceses**, presided over by Bishops; these again being broken up into **Archdeaconries**, the heads

of which are the Archdeacons; these again into **Rural Deaneries**; and these into **Parishes**, which are in the charge of the minor clergy. The **Educational work** of the Church is represented by (in round figures) 11,600 efficient schools, under Government inspection. These schools have been built at a cost to the Church of not less than £12,500,000. There are also, in connection with the Church of England, thirty training colleges for school teachers, erected at a cost of £195,000, towards the maintenance of which the Mother Church annually contributes £10,000.—**Church Parties**. The three great party divisions in the Church of England may be said to be representative of the various types of mind which will be found in any large society. The "**High Church**" or historical party attach great importance to the historical position of the Church in the succession of her clergy. They uphold her authority in matters of doctrine and discipline; and value her rites and sacraments, not only as devotional aids and convenient symbols, but as peculiar and special means of grace, of which she is the only authorised administratrix. The "**Low Church**" or Puritan party think comparatively little of these things, but set the greatest value on conversion, justification by faith, without the works of the law. They consider themselves rather as members of the Church invisible than of the Church visible, and disregard niceties of ceremonial, as distracting the soul from true worship, and as unduly exalting the priestly office, or tending to false (chiefly Popish) doctrine. The "**Broad Church**," on the other hand, pay but little attention to either ceremony or dogma. They are for extending the liberty of belief within the Church to its utmost possible limits—as some assert even, to the borders of Unitarianism. They attach great importance to the social Christian virtues, to living a wholesome and cleanly life, adopting the precepts rather than the theology of religion. The three have been said to show forth respectively the body, the spirit, and the soul, of the Church. Recent years have witnessed several remarkable developments in the relations of the three parties. Since the judgment in the last Ritual trial before Lord Penzance, a **Royal Commission** has reported ('83) against the existing state of ecclesiastical law, particularly in respect of its administration. In the **House of Lords** two or three bills of a tentative character have been introduced, with the object of giving **statutory effect** (1) to the main recommendations of the Royal Commission on Ecclesiastical Courts, and (2) to the repugnance of Churchmen at the spectacle of clergymen being imprisoned for contumacy. These bills, however, were dropped one after another. Meanwhile, as Ritualism was evidently spreading, there grew up among moderate Evangelicals and Broad Churchmen a disposition to be tolerant. This policy advanced so far in '89, that the Dean of Peterborough (Perowne) issued an **edict** on behalf of his party, declaring for a permissive interpretation of the **Ornaments Rubric** (*q.v.*), practically conceding to the so-called Ritualists all their demands in respect of ritual usage. "The Dean of Peterborough's Plan," as it was called, found immediate favour among moderate Churchmen of all sections, and it serves to mark an epoch in the relation of parties. Consult *The Official Year-Book of the Church of England*, '90.

The following is a list of the territorial prelates of the Church of England:—

| Cathedral. | Archbishop or Bishop. | 18— | Income. |
|-----------------|-----------------------|-----|--------------------|
| Canterbury ... | Benson ... | 83 | £15,000 |
| York ... | Thomson ... | 63 | 10,000 |
| London ... | Temple ... | 85 | 10,000 |
| Durham ... | Lightfoot ... | 79 | 8,000 |
| Winchester ... | Browne ... | 73 | 6,500 |
| Bangor ... | Campbell ... | 59 | 4,200 |
| Bath and Wells | Hervey ... | 69 | 5,000 |
| Bristol ... | Ellicott ... | 63 | Attached to Glouc. |
| Carlisle ... | Goodwin ... | 69 | 4,500 |
| Chester ... | Jayne ... | 88 | 4,200 |
| Chichester ... | Durnford ... | 70 | 4,200 |
| Ely ... | Compton ... | 86 | 5,500 |
| Exeter ... | Bickersteth ... | 85 | 4,200 |
| Gloucester ... | Ellicott ... | 63 | 5,000 |
| Hereford ... | Atlay ... | 68 | 4,200 |
| Lichfield ... | MacLagan ... | 78 | 4,200 |
| Lincoln ... | King ... | 85 | 4,500 |
| Liverpool ... | Ryle ... | 80 | 3,500 |
| Llandaff ... | Lewis ... | 83 | 4,200 |
| Manchester ... | Moorhouse ... | 86 | 4,200 |
| Newcastle ... | Wilberforce ... | 82 | 3,500 |
| Notwich ... | Pelham ... | 57 | 4,500 |
| Oxford ... | Stubbs ... | 88 | 5,000 |
| Peterboro' ... | Magee ... | 68 | 4,500 |
| Ripon ... | Carpenter ... | 84 | 4,200 |
| Rothester ... | Thorold ... | 77 | 3,100 |
| St. Alban's ... | Cloughton ... | 77 | 4,500 |
| St. Asaph ... | Edwards ... | 89 | 4,200 |
| St. David's ... | Jones ... | 74 | 4,500 |
| Salisbury ... | Wordsworth ... | 85 | 5,000 |
| Sodor and Man | Bardesley ... | 87 | 2,000 |
| Southwell ... | Ridding ... | 84 | 3,000 |
| Truro ... | Wilkinson ... | 83 | 3,000 |
| Wakefield ... | How ... | 88 | 3,000 |
| Worcester ... | Philpott ... | 61 | 5,000 |

Church House. Originated early in '86 by a few clergy meeting at Westminster, who had observed the urgent need of such a building. Subsequently the **Bishop of Carlisle**, in a letter to the *Times*, suggested that the erection of such a House should be the Church's method of celebrating the **Queen's Jubilee**. An **executive committee** was appointed and funds have been collected to the amount of £68,000. On Feb. 23rd, '88, a **charter of incorporation** was granted. The committee acquired in July, for a sum of £26,500, as a site the freehold of a block of buildings, about an acre in extent, which is bounded by the south side of Dean's Yard, Westminster, by Tufton Street, Little Smith Street, and to a large extent by Great Smith Street. They have also expended or agreed to pay a further sum of £15,431 (making a total of £41,931), in buying up leasehold and other interests; the result being to give the corporation possession of Nos. 10 and 11, **Dean's Yard**, and a rental of £963 per annum for eight years and a half, and of £490 for the seven subsequent years. As regards Nos. 12-15, **Dean's Yard**, and 2, 4 and 4A **Tufton Street**, the leases of which expire at Christmas 1932, no steps have been yet taken to acquire the property. In No. 10 rooms have been furnished as **secretary's offices** (Mr. Percy Crosse, sec.), and three large rooms were used as committee rooms for the **Lambeth Conference, '88**. **Membership** of the corporation (open to all members of the Church

of England) may be obtained by the annual subscription of one guinea. The Rev. J. Julian, vicar of Wincobank, Sheffield, has presented to the council of the C. H. his very valuable collection of books and MSS., accumulated during the preparation of the "Dictionary of Hymnology." Professor Mayor, of Cambridge, has also presented a large number of valuable books, the library at present including over 5,000 volumes. During the autumn of '89 extensive alterations of the premises were undertaken, and the C. H. reopened with ampler accommodation for its members.

Church of Ireland. See IRELAND.

Church of Scotland, The. The Scotch jealous of their liberty and rights, recognised the same orders as other Christians, but never acknowledged any supremacy of jurisdiction in the Episcopal order. In the earliest times all abbots were subordinate to the successor of St. Columba, the Abbot of Iona being Primate; but the Mediæval Church down to the fifteenth century had no Metropolitan; the chief government of the Church under the Pope devolving upon a Synod in which bishops, abbots, priests, and other ecclesiastics sat. In 1472, however, Sixtus IV. raised St. Andrews to an Archiepiscopal and Metropolitan see; and in 1492, Innocent VIII., Glasgow was raised to a similar rank. When the Reformation began two parties arose, the bishops and the State being opposed to all change, and a party of reformers, known as the Congregation, demanding great changes. The latter party triumphed, and in 1560 the jurisdiction of the Pope was abolished by a Parliament sitting at Edinburgh. A **General Assembly** then governed the Reformed Church. Doubts arose as to the desirability of abolishing the bishops, and men of tried Protestantism were elevated to the sees. A contest between Episcopacy and Presbyterianism succeeded, ending in the triumph of the latter. At the Restoration bishops were reappointed, but as they sided with James II., upon the accession of William and Mary, the prelates were abolished. Presbyterianism was then re-established, and the **Westminster Confession of Faith** adopted as the national standard of belief. The right of patrons to nominate to vacancies had been taken away, but was given back in 1712, and the exercise of that right led to much discussion, which resulted in 1843 by the dissentients leaving the General Assembly and forming the **Free Church of Scotland**. The **Act of Queen Anne** was repealed by Lord Beaconsfield.

Church Rates. Originally, like tithes (*q.v.*), a charge upon the land of a parish for the maintenance of the church fabric. In later years levied as a rate, and paid by occupiers. Nonconformists having objected to them, they were abolished in 1868. The churches and services are now provided and maintained solely by Churchmen and Church endowments, whereby all apparent injustice to Nonconformists is entirely removed, and the rights of Nonconformist parishioners in the church fabric are not impaired. The **Act of 1868**, however, did not abolish church rates in cases where, at the time of the passing of the Act, money had been borrowed and remained due on the security of the church rate, or where the rate was applicable to purposes other than "ecclesiastical purposes," as defined by the Act, or had been originally authorised to be levied by special legislation in consideration of the abolition of

tithes or for other valuable consideration. The most important case in which church rates continue to be levied, under the two last-mentioned exceptions, is that of the parish of Saint Marylebone, London, in which church rates to the amount of £5,580 (which is nearly two-thirds of the total amount of church rates appearing in the returns as having been levied in the whole of England during the year) are annually raised by the vestry under powers conferred by two local Acts (51 Geo. III., c. ciii., and 1 and 2 Geo. IV., c. xxi.). In several other parishes church rates are levied, principally for the purpose of paying the interest and principal in respect of loans raised on the security of that rate prior to the passing of the Act of 1863.

Churchill, Rt. Hon. Lord Randolph, M.P., second son of the sixth Duke of Marlborough and of Lady Frances, daughter of the Marquis of Londonderry, was born at Blenheim Palace, Feb. 13th, 1849; entered Merton College, Oxford, where he graduated in 71. Hon. LL.D. Camb. '87. Married in 74, Jennie, daughter of the late L. Jerome, New York. In the same year he entered Parliament as Conservative member for Woodstock. He made his maiden speech the first year he sat in parliament, and was complimented by his future antagonist Sir William Harcourt. Next year he took part in the debate on unreformed boroughs. Later on he was sharply criticised by members of his own party for rebuking what he considered the somewhat stingy policy of the Government regarding the visit of the Prince of Wales to India. From '75 to '79 Lord Randolph rarely addressed the House. The collapse of the Conservative party at the general election of '80, acted, however, as a spur to Lord Randolph, who soon distinguished himself as an audacious and powerful debater, almost as ready to strike at the Opposition as at the Treasury bench. He was not quite alone in the independent course he had marked out for himself. Mr. (now Sir John) Gorst and Sir Henry Drummond-Wolf acted with him. These three sat together, and soon became known as the **Fourth Party**. Mr. Arthur Balfour and Earl Percy occasionally associated themselves with the three. Lord R. C. was the life and soul of this combination. He never lost an opportunity of damaging the Government, or of dragging his own leaders further than they wished to go. He took a prominent part in the **Bradlaugh debates**. In spite of the castigations he received from his opponents, and the cold looks he got from the leaders of his own party, his influence increased session by session. Liberal journals laughed at him, and the *Standard* violently attacked him. Mr. Gladstone declared that he had "smashed, pulverised and demolished" either the noble lord or his arguments. Lord Randolph spoke of "the party with which I am associated"—that is, the party of three—with an air at once so superior and so audacious as almost to take the breath of the House away. His persistence and ability won at last the admission that he was a man who must in future be reckoned with. His lordship was a thorn in the side of his own party. In a letter to the *Times*, Lord Randolph fell foul of the whole party except Lord Salisbury, who was held up as the only leader. The rank and file were wroth at this manifesto, and an address was signed by two hundred Conservative members, and presented to Sir Stafford Northcote, assuring him of their fidelity. Angry letters from

numerous Conservatives flooded the papers, to all of which Lord Randolph replied in the *Times* that he was happy to be "the scapegoat on which doomed mediocrities might lay the burden of their exposed incapacity." The Conservative party was by this time like a house divided against itself. Lord Randolph was frankly recognised as a new and powerful political force, which might either make or mar the party. He was elected chairman of the **National Union of Conservative Associations**, but resigned soon after, owing to a schism between the Union and the Central Conservative Committee. Lord Salisbury, Sir Stafford Northcote, and the recognised leaders of the party siding with the latter. The quarrel, if quarrel it could be called, only lasted a few days; and on the 9th of May, 1884, at a meeting of Conservative members of the House of Commons, held at the Carlton Club, Lord Randolph consented to withdraw his resignation, and the threatened split was averted. The result was a victory by Lord Randolph over his own leaders, who agreed to adopt the policy of organisation which he recommended. From this point Lord Randolph rose steadily to the position of a recognised leader of the Conservative party. In a few years he had risen from Parliamentary obscurity to a foremost place in the House of Commons, and was recognised as, next to Mr. Gladstone, the most formidable debater in that assembly. When the Liberal Government was overthrown on the Budget, in June '85, it resigned, and in the new Conservative administration Lord Randolph Churchill received the **Indian Secretaryship**. This entailed the resignation of his seat, to which he was re-elected by a majority of 127 over Mr. Corry Grant. The most important changes in the Government were the elevation of Sir Stafford Northcote to the House of Lords, and that of Sir Michael Hicks-Beach to the position of leader of the Lower House. The general election took place in November 1885, and though the position of the Conservatives was somewhat improved, they were in a considerable minority in the House of Commons. Lord Randolph Churchill was defeated at **Birmingham**, where he opposed the Rt. Hon. John Bright, but was elected for **South Paddington**. In the following January the Government were overthrown on the motion brought forward by Mr. Jesse Collings, and immediately resigned. Mr. Gladstone succeeded Lord Salisbury; but a coalition between the Conservatives and the followers of Lord Hartington and Mr. Chamberlain succeeded in defeating the Government on the second reading of Mr. Gladstone's Home Rule Bill. Mr. Gladstone appealed to the country, which answered his demand by returning 315 Conservatives against less than 200 followers of Mr. Gladstone. Lord Salisbury was again called to the helm, and in the new Ministry, formed in July '86, Lord Randolph Churchill was appointed leader of the House of Commons and Chancellor of the Exchequer. His most remarkable speech during the recess was made at Dartford, where he unfolded a programme which his opponents declared to be Liberal, if not Radical, and which some of his friends felt to be anything but Conservative. The resignation of Lord Randolph, on Dec. 23rd, '86, took both friends and opponents by surprise. The announcement in the *Times* gave as his lordship's

reasons for taking this unexpected course differences with his colleagues on the subject of the naval and military estimates. The attitude which his lordship assumed in advocacy of financial reforms led to the appointment of a Royal Commission of Inquiry into the civil administration of the great spending departments. The report of this Commission on the expenditure by the Admiralty was issued in '87. After his retirement from office Lord Randolph travelled for some time on the Continent, and on his return delivered a speech to his constituents, in which he defended the policy of Lord Salisbury's Government in Ireland; and subsequently, in the debate in the House of Commons on the conduct of the police in firing upon the crowd at Mitchelstown, his lordship came to the assistance of Mr. Balfour in defending that proceeding. In October '87, after Mr. Gladstone had enunciated the new Liberal programme at the National Liberal Conference at Nottingham, Lord Randolph delivered a speech at Bradford which indicated an increased tendency on the part of his lordship to proceed on democratic lines. In Jan. '88 Lord Randolph visited St. Petersburg, where his presence gave rise in the foreign press to many wild *canards*, imputing political significance to his journey. On the death of Mr. Bright, in March '89, his lordship declined an invitation to contest Central Birmingham. He did this at the request of Mr. Chamberlain, with whom he subsequently had an acrimonious controversy in the public press.

Churchmen in Council. A small body of influential evangelical clergymen, including Dean J. Stewart Perowne, and Revs. T. Teignmouth Shore, Edgar Jacob, and C. J. Ridgeway, formed in June, '89. **Object.**—To unite Churchmen of all parties on questions at present or at any time disturbing the Church upon a basis of wide tolerance. The Dean of Peterborough has proposed a permissive interpretation of the *Ornaments Rubric* (*q.v.*), towards the attainment of this object, but it has been partially disclaimed by the Council.

Cinque Ports, The. A group of seven ports (originally five, whence the name) situated on the south coast of England (in Sussex and Kent). **Hastings, Romney, Hythe, Dover and Sandwich** were the original ports; **Winchelsea and Rye** being added afterwards. The original Cinque Ports were created by William the Conqueror and were endowed with various important privileges in consideration of their furnishing a certain quota of ships of war, for the king's use, when demanded. The Lord Warden-ship is now only an honorary dignity. Its holders have no special jurisdiction. Earl Granville was nominated in '65.

City and Guilds Institute. See TECHNICAL EDUCATION.

City and Southwark Subway. This is a scheme promoted by a company early in 1886 (under an Act granted in 1884) to construct a subway from King William Street, City, adjoining the Monument station of the Metropolitan and Metropolitan District railways, under the river Thames to the Elephant and Castle, and to work a railway between the points mentioned on the endless cable system. Two tunnels were to be formed, one for the up and the other for the down lines; and there were to be three stations—at King William Street, Borough High Street and Dover Street, and at the Elephant—and lifts would be provided for the

convenience of passengers. (For further details see ed. '88.) A bill was lodged for the session of '87 to enable the Company to extend the subway from the Elephant to Kennington and Stockwell, the suggested gauge of the lines being 4 ft. 8 in. In July it was read a third time in the Lords and passed. The half-yearly report which was published at the beginning of Aug. '89 stated that the tunnels had been made from the City to a point considerably beyond Kennington Oval station, about 2½ miles, while the main underground works at King William Street, Great Dover Street, and Stockwell were finished, and those at the three other stations well forward. The rails were laid between Great Dover Street and King William Street. £75,000 in ordinary share capital had been placed during the half-year, making £500,000 in all. Parliamentary notices for an extension at Glapham, and another scheme connecting Islington with the King William Street terminus of the City and Southwark Co., were published in November.

City Commercial Museums. See COMMERCIAL MUSEUM.

City Companies. See CITY GUILDS.

City Guilds, The. There have been 109 companies founded, but the latest return only gives a total of 75, as follows:—The Worshipful Companies of Apothecaries, Armourers and Brasiers, Bakers, Barbers, Basketmakers, Blacksmiths, Bowyers, Brewers, Broderers, Butchers, Carmen Carpenters, Clockmakers, Clothworkers, Coachmakers, Cooks, Coopers, Cordwainers, Curriers, Cutlers, Distillers, Drapers, Dyers, Fanmakers, Farriers, Feltmakers, Fishmongers, Fletchers, Founders, Framework Knitters, Fruiterers, Girdlers, Glass-sellers, Glaziers, Glovers, Gold and Silver Wyre Drawers, Goldsmiths, Grocers, Gunmakers, Haberdashers, Horners, Innholders, Ironmongers, Joiners, Leather-sellers, Loriners, Makers of Playing Cards, Masons, Mercers, Merchant Taylors, Musicians, Needle-makers, Painters, Patten-makers, Pewterers, Plasterers, Plumbers, Poulterers, Saddlers, Salters, Scriveners, Shipwrights, Skinners, Spectacle-makers, Stationers, Tallow-chandlers, Tylers and Bricklayers, Tinplate-workers, Turners, Upholders, Vintners, Wax-chandlers, Weavers, Wheelwrights, and Woolmen. The twelve principal companies are those of the Mercers, Grocers, Drapers, Fishmongers, Goldsmiths, Skinners, Merchant Taylors, Haberdashers, Salters, Ironmongers, Vintners, and Clothworkers; but two of the largest liveryies are those of the Loriners and Spectacle-makers, both of which, however, like several of the minor companies, have scarcely any income except such as arises from the fees and fines paid by the members. In '80 it was estimated that the trust and corporate income of the livery companies of London was between £750,000 and £800,000, and the capital value of their property £15,000,000. The value of their plate and furniture was returned at about £270,000. On the whole it is estimated that the trust income is about £200,000 a year, and the corporate income from £550,000 to £600,000. Several of the companies possess a considerable amount of real property in the county of Londonderry. The total rent of the real property is above £600,000, and there is a further source of income exceeding £100,000 a year from investments. The contributions of existing members are from £15,000 to £20,000 a year. Of the £200,000 which forms the charitable or trust

income, about £75,000 a year is expended on the support of almshouses and the relief of poor members, another £75,000 on education, and about £50,000 on charitable objects of a general character. Many of the charities of the companies are for the benefit of the inhabitants of provincial towns and villages where they possess land. The cost of the *hospitality* annually given by the companies is estimated at £100,000. Technical education (*q.v.*) has within the last few years been taken up by the Guilds. The Clothworkers' Company has promoted the establishment of Yorkshire College, at Leeds, where instruction is given in the manufacture of woollen goods, and similar institutions at Bradford, Ilkley, and other places. The City and Guilds of London Institute, for the advancement of technical education, has also been formed. There is a technical college at Finsbury and a central institution at South Kensington. On July 26th, 1880, a Royal Commission was appointed to inquire into the circumstances and dates of the foundation of the City Livery Companies, the objects for which they were founded, and how far those objects are now being carried out. On May 28th, '84, the Commission issued its report, in which it recommended that the companies should be placed by act of parliament under such restrictions as regards the alienation of their real and personal estate as would remove all danger of the loss of any portion of their property; that the accounts of the companies should be open to public inspection; that no future admission to the livery of a company should confer the parliamentary franchise; the appointment of a commission which should undertake the allocation of a portion of the corporate incomes of the companies to objects of acknowledged public utility, the better application of the trust incomes, and should it prove practicable, the reorganisation of the constitution of the companies. A dissenting report was, however, issued by three members of the Commission.

City of London Police. This force is under the control of a Commissioner, who is appointed by the Mayor, Aldermen, and Common Council, subject to the approval of Her Majesty. He is assisted by a chief superintendent. The strength of the force is 804, consisting of 1 superintendent, 1 chief inspector, 13 inspectors, 92 sergeants, and 786 constables. The force has also a receiver, a chief clerk, several assistant clerks, and a surgeon. The police area contains six divisions, each of which is under the immediate care of two inspectors, who are assisted by two station-house sergeants. The detective department consists of 1 inspector, 12 sergeants, and 23 constables attached to the chief office at the Old Jewry, and 42 constables distributed among the divisions. The most competent men are selected for this service. They are chiefly concerned in the prevention and detection of commercial frauds. If, however, a banker or merchant requires a City police detective to be sent abroad, or for a long distance from London, for the arrest of an absconding criminal, he is obliged to pay the expenses of this mission. The Superannuation Fund is mainly provided partly from stoppages of the pay of the force, which are not to exceed a fortieth, and partly from fines inflicted on the police or persons who assault them. The balance is provided

from the City cash. No member of the City police is legally entitled to a pension. All pensions are granted at the discretion of the Corporation, subject to the recommendation of the Commissioner. The total expenditure of the City police is about £107,000 per annum. Of this amount £75,000 is received from a rate of 8d. in the pound on the assessable rental of the City, one-fourth of the total expense is paid from the City cash, and the remaining £8000 by those who employ the police in their private service. **Headquarters:** Old Jewry, Cheapside. **Chief Clerk:** J. W. Whatley, C.C.

City of London School, Thames Embankment. Established by the Corporation of London in 1834. Tenable at the Universities or other places of higher education are 26 scholarships varying from £80 to £200; and about 20 others tenable at the school. Pupils admitted between the ages of 7 and 15. **Head Master,** Mr. A. T. Pollard, M.A. Some alumni: J. R. Seeley, Senior Classic and 1st Chancellor's Medallist, '67; E. A. Abbott, same honours, '61; W. S. Aldis, Senior Wrangler and 1st Smith's Prize-man, '61; J. S. Reid, Senior Classic and 1st Chancellor's Medallist, '60; W. F. Barker, Senior Classic, '83. **Sec.,** George R. Renwick.

Civil Establishments, Royal Commission on. To inquire into their administration at home and abroad. Appointed in '86, as the result of a resolution moved by Lord Randolph Churchill, then Chancellor of the Exchequer. In a Treasury minute, which disclosed the grounds for the initiation of this comprehensive inquiry, it was stated that the duty of the Commissioners would be to examine into the numbers, salaries, hours of labour, superannuation, cost of staff as well as the administration, regulation, and organisation; and to report whether, in their opinion, the work of the different offices is effectually and economically performed; whether it can be simplified; whether the matter of procedure can be improved; and whether it is deficient or unnecessarily elaborate. The Commissioners have published several reports, but their labours are not yet completed. The following are the names of the Commissioners:—Sir M. W. Ridley, Bart., chairman; Earl Brownlow; Lord Lingen; Lord Rothschild; the Right Hon. Lord Basing; Right Hon. H. H. Fowler, M.P.; Sir C. E. Lewis, M.P.; Mr. R. W. Hanbury, M.P.; Mr. H. L. W. Lawson, M.P.; Mr. J. W. Maclean, M.P.; Mr. J. Cleghorn, director of the North-Eastern Railway Company; Mr. A. S. Harvey, secretary to Glyn, Mills, & Co.; and Mr. A. B. Milford, C.B., late Assistant Commissioner of Public Works. Mr. Walpole, Permanent Under-Secretary for India, is the secretary to the Commission.

Civil Law. The word "civil" in this connection is highly ambiguous. Civil law is opposed sometimes to criminal, sometimes to martial, and sometimes to ecclesiastical law. But the epithet "civil law" is commonly used to describe the Roman law and the various modern systems of law based thereupon, as contrasted with the English common law.

Civil List, The, is the annual grant of parliament to the monarch, the yearly sum now being £385,000, the whole of which is devoted to Her Majesty's household and personal expenses, with the exception of £1,200, which may be granted in pensions (*v.i.*). The grant originated in the reign of William and Mary, and covered the payment of civil offices and pensions, when the amount was £700,000

£400,000 being derived from the Crown revenues and £300,000 from excise duties). Since this resulted in debt on the part of the king, the Court of Exchequer decided that, if he chose, the king could alienate his whole revenue. The List, after having reached £800,000, and in 1777 (George II.) £900,000, was, on the accession of William IV., cleared of all salaries, etc., upon it, and placed at £510,000, including a pension list of £75,000. The purposes to which the pensions were applied were, in 1834, limited to the deserving and needy; and in 1838, the year of Queen Victoria's coronation, it was provided that, in place of a grant of £75,000 for civil list pensions, "Her Majesty should be empowered to grant in every year new pensions on the civil list to the amount of £1,200, all such pensions to be in strict conformity with the House of Commons' resolutions of 18th February, 1834" (1 Vict., c. 2).

Civil List Pensions Grants 1886-Nov. 1889.—1886. Tulloch, Mrs. Janeanne Sophia, widow of the late Dr. Tulloch, Senior Principal in the University of St. Andrews, in connection with Theology, Philosophy, and Literature (£150); Gibbons, Mrs. Grace, widow of the late Mr. James Robert Gibbons, Royal Irish Constabulary, County Inspector (45); Schmitz, Dr. Leonard (in addition to the Civil List Pension of £50 per annum which he already receives) (50); Bolton, Mr. T., in recognition of his services as a naturalist and microscopist (50); Farnborough, Lady, for distinguished parliamentary and literary services of her late husband (250); Mongredien, Mr. Augustus, for the merits and public utility of his literary work (100); Brett, Mr. Jacob, in recognition of his services in connection with the introduction of submarine telegraphy (100); Trollope, Mr. Thomas Adolphus, in consideration of the value of his literary work, his straitened means, and his advanced age (200); Waters, Mr. Edmond Chester, for his long and arduous labours as a writer on genealogy (100); Bolton, Mr. Thomas, for services which he has rendered to science by his investigations in connection with microscopic fauna (50). 1887. Kent, Mr. Charles, for his contributions to biographical and other literature (£100). Massey, Mr. Gerald, in consideration of his literary merit, and of the smallness of his means of support (30); Palliser, Lady (additional), for services of her late husband, Sir William Palliser, as an inventor of munitions of war, etc., and of her destitute condition, and to enable her to provide for her daughters (150); Clerk, Mrs. Jessie, in consideration of the literary merits of her late husband, the Rev. Archibald Clerk, LL.D., as a Celtic scholar, and of her destitute condition (120). Neild, Mrs. Mary L., in consideration of the death of her husband, Major Neild, R.M., from the effects of a wound received while on duty at Charlestown, and of her destitute condition (£100); Tulloch, Miss Frances, Miss Blanche, and Miss Amy, in consideration of the distinguished services of their late father, Principal Tulloch, of St. Andrews University, in connection with theology, philosophy, and literature, and of their destitute condition (25 each); Jefferies, Mrs. Jessie, in consideration of the literary attainments of her late husband, Mr. Richard Jefferies, and of her destitute condition (100); Steel, Sir John, in consideration of his merits as a sculptor, and of his destitute condition (100); Hutchinson, Mrs. Mary, in

consideration of the services of her late husband, Mr. Thomas J. Hutchinson, M.D., of H.M. Consular Service, and of his literary attainments (20); Leech, Miss Mary, Miss Rose Jane, and Miss Adeline Amy, in consideration of the eminence of their brother, the late John Leech, as an artist, and of their destitute condition (20 each). 1888. Pinkett, Mrs. Kate, in recognition of the services of her late husband as Crown Solicitor, Chief Justice, and Acting Governor of Sierra Leone, and of her destitute condition (50); McClatchie, Mrs. Isabella Sarah, in consideration of the long and valuable services of her late brother, Sir H. Parkes, and of her destitute condition (75); Morris, Rev. F. O., in recognition of his merits as a naturalist, and of his inadequate means of support (100); Cumming, Miss Constance Frederica Gordon, in consideration of her merits as an author, and of her destitute condition (50); Moira, Mrs. Eugenia, in recognition of the eminence of her late husband as a miniature painter, and of her destitute condition (25); Hughes, Mrs. Ceiriog, in recognition of the merits of her late husband, Mr. J. C. Hughes, as a Welsh poet, and in consideration of her destitute condition (50); Barnes, Miss Laura Liebe, in consideration of the merits of her late father, the Rev. W. Barnes, as an author and linguist, and on account of her destitute condition (50); Baynes, Mrs. Spencer, in consideration of the eminence of her late husband, Professor T. S. Baynes, as an author and scholar, and of her destitute condition (75); Parker, Mr. William Kitchen, F.R.S., in recognition of his services to science as an investigator, of his old age, and of his inadequate means of support (100); Seldon, Mrs. Barbara, in consideration of the services of her late husband, Mr. Samuel Seldon, principal of the statistical department of H.M. Customs, and of her destitute condition (100); Stewart, Mrs. Balfour, in recognition of the services rendered to science by her late husband, Professor Balfour Stewart, and of her destitute condition (50); Bell, Mr. John, in recognition of his merits as a sculptor, and of his destitute condition (50); Hewett, Miss Evelyn Lucy and Miss Jane, in consideration of the distinguished naval services of their late father, Admiral Sir W. N. W. Hewett, K.C.B., K.C.S.I., and of their destitute condition (75 each); Palgrave, Mrs. Katherine, in consideration of the literary services of her late husband, of his long service in trying climates, and of her inadequate means of support (50); Proctor, Mrs. Sallie Duffield, in consideration of the service rendered to the cause of science by her late husband, Mr. R. A. Proctor, B.A., and of her inadequate means of support (100); Guthrie, Mrs. Blanche Gertrude, in consideration of the eminence of her late husband, Professor F. Guthrie, F.R.S., as a physicist, and of her inadequate means of support (50); Faithfull, Miss Emily, in consideration of her services as a writer and worker on behalf of the emigration, education, and employment of women (50); Roekstro, Mr. William Smyth, in consideration of his services to musical literature, and of his inadequate means of support (50); Shairp, Mrs. Eliza, in consideration of the services rendered by her late husband, Professor Shairp, to literature, and of her inadequate means of support; Graves, Mrs. Maria Jane, in consideration of the services of her late husband, the Rev. James Graves, to archeology and to the early history

of Ireland, and of her inadequate means of support (50). **Fennell**, Dr. C. A. M., in consideration of his eminence as a classical and philological scholar, of his services to literature, and of his inadequate means of support (50); **Birch**, Miss Elizabeth Gertrude, in consideration of the services of her late father, Dr. S. Birch, as an archaeologist, and of her destitute condition (50); **Birch**, Miss Juliana Frances, in consideration of the services of her late father, Dr. S. Birch, as an archaeologist, and of her destitute condition (50); **Thomas**, Mr. W. Cave, on account of his personal service to the Royal Family, and in consideration of his services to art, and of his destitute condition (50); **Patey**, Mrs. Helen, in consideration of the services rendered by her late husband, Mr. C. H. B. Patey, in the improvement of the telegraph services of this country, and of her inadequate means of support (200); **Porter**, Mrs. Margaret Rainey, in recognition of the services of her late husband, Dr. J. L. Porter, to education and literature, and in consideration of her inadequate means of support (50); **Watts**, Mrs. Sophie, in recognition of the services of her late husband, Mr. Henry Watts, to chemistry, and in consideration of her inadequate means of support (75); **Sowerby**, Mrs. Elizabeth, in consideration of the botanical works of her late husband, and of her destitute condition (75); **Stirling**, Dr. James Hutcheson, in recognition of his services to philosophy and literature, and in consideration of his inadequate means of support (50).

Civil List, Savings on. See SESSION, sect. 47.

Civil Service. One of the oldest institutions of the country, and probably dates from the earliest monarchical times. It is only within perhaps the last hundred years that the English Civil Service has assumed its present vast proportions. The Civil Service comprises all persons who serve the Queen in a civil capacity, as opposed to those employed in the military and naval services. The total number of persons so employed cannot be far short of half a million. The chief department of the Civil Service is the **Treasury**, which exercises a control over all other departments, and from whom alone authority is obtained for all expenditure. Perhaps next in importance is the **Exchequer and Audit Department**, which is charged with the audit of the accounts of all other departments, and is required to see that the expenditure of each is in accordance with the authorities received from the Treasury. The **Foreign Office** (including the diplomatic service), the **India Office** and the **Colonial Office**, together with the **Home Office**, probably rank next amongst the numerous departments of the Home Civil Service. The three revenue departments—namely, the **Post Office**, **Inland Revenue**, and **Customs**—are of course important branches of the service; there are also, among what is known as the spending departments, the **War Office**, **Admiralty**, **Board of Trade**, **Office of Works**, **Education Office**, **Privy Council Office**, the **Stationery Office**, and many other smaller offices.—Most of the clerkships in the Civil Service are now thrown open to public competition, and the various offices are grouped into two grades. The recommendation of the **Playfair Commission** which sat in 1874 to inquire into the Civil Service—namely, that the Service should be divided into a **Higher** and a **Lower Division**, with a specified scale of salaries irrespective of office

for each division—has never been fully carried out. Most of the better-class offices are grouped under Grade I., and the remainder under what was formerly known as Grade II.; in these latter, however, most of the vacancies are being filled up by the appointment of Lower Division clerks under the Playfair scheme. The scale of salaries for these clerks is uniformly throughout the service £80 rising by £15 triennially to £200; while duty-pay not exceeding £100 may be paid to clerks of the Lower Division who are performing superior duties. In those offices where the hours of attendance are seven instead of six the salaries of the Lower Division clerks are increased by about one-sixth. Although it was one of the objects of the Playfair scheme to abolish a numerous class of civil servants known as **writers**, who receive tenpence an hour, and whose appointments are of a purely temporary character, there still exists a considerable body of these men in the Civil Service. A Royal Commission has recently been appointed to inquire into the present state of the Civil Service. The first sitting took place last November, and it will probably take a considerable time before the inquiry closes.

There is of course a considerable difference in the examinations for the two grades of the Service; and that for the higher grade is what is popularly termed a "stiff" one. Very good prizes are offered to the successful candidates in this examination, which therefore attracts candidates from amongst university men. The Lower Division examination is of a simpler character, and at the prizes offered are not so great, a different class of men is attracted. Full particulars of all examinations for the Civil Service, and of the situations to be competed for, can always be obtained on application to the **Civil Service Commission**, at Cannon Row, S.W. The permanent Civil Service Commissioners are Sir G. W. Dasent and Mr. W. J. Courthorpe. (Annual report is published by Eyre and Spottiswoode.) For details see **FINANCE, NATIONAL**. Consult "Civil Service Directory."

Civil Service Commission. A Royal Commission to inquire into the administration of the civil establishments at home and abroad was appointed in '86, as the result of a resolution moved by Lord Randolph Churchill, then Chancellor of the Exchequer. In a Treasury minute, which disclosed the grounds for the initiation of this comprehensive inquiry, it was stated that the duty of the Commissioners would be to examine into the numbers, salaries, hours of labour, superannuation, cost of staff, as well as the administration, regulation, and organisation; and to report whether, in their opinion, the work of the different offices is effectually and economically performed; whether it can be simplified; whether the matter of procedure can be improved; and whether it is deficient or unnecessarily elaborate. The Commissioners have published several reports, of which the last was issued in Oct. '89, but their labours are not yet completed. The following are the names of the Commissioners:—Sir M. W. Ridley, Bart., chairman; Earl Brownlow; Lord Lingen; Lord Rothschild; the Right Hon. Lord Basing; Right Hon. H. H. Fowler, M.P.; Sir C. E. Lewis, M.P.; Mr. R. W. Hanbury, M.P.; Mr. H. L. W. Lawson, M.P.; Mr. J. Cleghorn, director of the North-Eastern Railway Company; Mr. A. S. Harvey, secretary to Glyn, Mills, & Co.; and Mr. A. B.

Midford, C.B., late Assistant Commissioner of Public Works. Mr. Walpole, Permanent Under-Secretary for India, is the secretary to the Commission.

Clark, Sir Andrew, Bart., M.D., F.R.S., b. 1826. Educated at Aberdeen and at Edinburgh. In the extra-academical medical school of the latter city he gained the first medals in anatomy, physiology, chemistry, botany, materia medica, surgery, pathology, and practice of physic. For four years Dr. Clark had charge of the pathological department of the *Royal Naval Hospital at Haslar*. M.D. Aberdeen ('84). He is senior physician to the *London Hospital*, and was re-elected President of the *Royal College of Physicians* April 15th, '89. Dr. Clark is the author of numerous essays, lectures and reviews, and has for some time been Mr. Gladstone's medical attendant. Baronet ('83). In Nov. '88 a somewhat novel medical consultation was held between Sir A. C. and Lord Ennismore's physicians at Vancouver, by means of the electric cable, the consultation lasting three hours.

Clarke, Sir Edward, Q.C., M.P., was b. 1841. Educated at the City Commercial School, Lombard Street, and Crosby Hall. Gained the Society of Arts prize for English Literature (1856); History (1857); A.A. Oxford (1858), being first in order of merit in first division. Obtained writership in India Office by open competition (1859), retired Oct. 1860. Tancred Law Student (1861); created Q.C. (1880); elected a bencher of his Inn (1882). Returned as Conservative member for Southwark (Feb. 1880); Plymouth (1880-85); re-elected 1885 and 1886, when he was made *Solicitor-General* in Lord Salisbury's administration, and received the honour of knighthood. Sir E. C. is a man who sprang from the ranks, and in his earlier days relied upon journalism for his support. He was for some time a reporter in the House of Commons, and was on the literary staff of the *Morning Herald* and *Standard*. He made his mark in the celebrated *Fengo case*, and successfully defended Mrs. Bartlett in the notorious *Fimble poisoning case*. On the question of the Government's proposed compensation to the publicans he made a speech in which he attempted to show that a legal right to compensation was well established. In a letter addressed to the public press on this question he also contended that the justices had no right to refuse to renew a license provided the applicant's house had been well conducted, an opinion which was subsequently upset by a judgment delivered by Mr. Justice Field, which was upheld on appeal. In Nov. '89 Sir E. Clarke defended the Rev. E. Hoskyns in the libel case, *Bessant v. Hoskyns*.

Clayden, F. W., author and journalist, has been connected as a leader-writer with the *Daily News* (q.v.) ever since its reduction in price to one penny, and is now associated in the editorship of that newspaper with Mr. J. R. Robinson (q.v.). Has been an unsuccessful candidate for Parliamentary honours on three occasions—viz., at Nottingham ('68), Norwich Division of Lambeth ('85), and North Islington ('86). Is the author of "England under Lord Beaconsfield" ('80), "Samuel Sharpe, Philanthropist and Translator of the Bible" ('83), "The Early Life of Samuel Rogers" ('87), "Rogers and his Contemporaries," 2 vols. ('89), and of articles in the *Edinburgh Review*, *Fortnightly Review*, and *Cornhill Magazine*, as well as pamphlets

on various political and metropolitan questions. Mr. C. was elected Chairman for '88 of the London branch of the *National Association of Journalists*, and is a Vice-President of the *Institute of Journalists* (q.v.).

Clémenceau, Georges Benjamin, was b. at Mouilleron-en-Pareds, in the Vendée, Sept. 28th, 1841. He studied medicine in Paris, is an M.D., and practised at Montmartre. Elected mayor of the 18th arrondissement (Montmartre) in Sept. 1870, and in 1871 a deputy for the Seine, and formed part of the Extreme Left party. M. Clémenceau was still mayor when Generals Lecomte and Clément-Thomas were shot. He soon after resigned the positions of mayor and deputy. He then became a member, and afterwards president, of the *Paris Municipal Council*. He was re-elected to the Chamber of Deputies at the elections of Feb. 1876, and again voted with the Extreme Left. During the latter years of Gambetta's life, Clémenceau was the political adversary of the "dead tribune." He dexterously forced Gambetta into taking office, and was instrumental in securing his fall. He has since, as chief of the *Radical party*, frequently imposed his will upon the Chamber, particularly in making and unmaking ministries. He sits for the department of the Var, having been also elected, at the general election of Oct. 1885, as one of the deputies for Paris. He is proprietor of the *Justice*, an important Paris journal, and is regarded as one of the most expert swordsmen in France. It was a resolution moved by M. Clémenceau, and insisting on a thorough investigation of the *Wilson scandal*, that led to the overthrow of the Rouvier Government, and the consequent fall of M. Grévy. M. Clémenceau was asked by the President to form a Ministry, but declined, and told the President plainly that the crisis was not a political but a presidential one. He acted as one of the seconds to M. Floquet in his duel with General Boulanger, July '88.

Clemens, Samuel Langhorne ("Mark Twain"), b. at Florida, Missouri, U.S., 1835; was apprenticed in his youth to a printer, and subsequently served as a pilot on the Mississippi (he adopted his *nom de plume* from the cry of the leadsmen when his line "marked" two fathoms of water; the term varies with the depth, but for two fathoms it is "mark twain"). Afterwards obtained an appointment as reporter on a paper in California, whence, after some years' service, he removed to edit a paper at Buffalo. He is undoubtedly the most original and popular of the American humorists; his best known works are "The Jumping Frog," "The Innocents Abroad," "The Gilded Age," "Roughing It," "Adventures of Tom Sawyer," "Life on the Mississippi," "The Stolen White Elephant," "Adventures of Huckleberry Finn," etc. His letter to the Queen on the subject of his assessment to the income tax on account of his books published in this country, is among the most recent of Mark Twain's contributions to humorous literature. He is about to publish "A Connecticut Yankee in King Arthur's Court."

Clergy, Deceased (Dec. 1st, '88, to Nov. 20th, '89). See OBITUARY.

Clerk of the Parliaments. See PARLIAMENTS, CLERK OF THE.

Cleveland, Stephen Grover, Ex-President of the United States, b. at New Jersey, March 18th, 1837. The son of a Presbyterian minister, he rose from a humble clerkship in Oneida to be

Governor of the State of New York, defeating his opponent (Judge Foulger) by 199,000 votes. He thus became the prominent candidate for the presidency, and was so nominated by the National Democratic Convention, which met at Chicago in July '84. A few months later he was elected President by 4,910,975 popular votes, beating Mr. Blaine (*q.v.*) by about 100,000 votes. Subsequently receiving the majority of electoral votes, he was duly inaugurated at Washington, March 4th, '85. Two important events will make the year '87 memorable in the history of Mr. C.'s term of office: *i.e.*, the celebration of the centenary of the adoption of the American Constitution, and the enunciation of the programme of sweeping fiscal reforms contained in the presidential message of Dec. 6th, '87. The principal terms of this policy, which recommended a large reduction of the import dues on raw materials as the most practical means of dealing with the glut of money in the Treasury, were embodied in his address, seeking for re-election in November '88. On the occasion of the rejection by the Senate of the Fisheries Treaty, the President's announcement to ask for powers to adopt a policy of retaliation against Canada created a profound sensation at first, but soon came to be regarded merely as a clever electioneering move. President C.'s action in demanding the recall of the British ambassador, Lord Salisbury, was the subject of much comment. President C. was opposed by General Harrison, who defeated him by 233 electoral votes against 168. On July 3rd, '88, he was thrown from his carriage, but happily without sustaining serious injury.

It is stated that the ex-President is now practising law in New York.

Clifford, Rev. John, M.A., D.D., Ex-President of the Baptist Union, was b. 1836 at Sawley. In '55 he entered the General Baptist College. During his third year at the College accepted an invitation from the Praed Street church, Paddington. Dr. C. graduated B.A. at London University in '61, B.Sc. in '62, in '64 taking the degree of M.A., and in '66 that of LL.B. The honorary degree of D.D. was conferred on him in '83 by Bates' University, U.S.A. His growing success at Praed Street led to the erection of Westbourne Park Chapel, which was opened Sept. '77, and where Dr. C. still continues to minister. His works include the following: "Is Life worth Living?" "The Dawn of Manhood," and "Starting in Life." Dr. C.'s lecture on "The Place of Baptists in the Evolution of Christianity," at South Place Chapel, Finsbury, aroused some controversy in the religious press. He is one of the committee for promoting a Women's Trade Union in East London.

Clifton College, Bristol. Founded 1860, received charter 77. It is under a Council of fifteen, Earl Ducie being President. It is mainly classical, but has a military and engineering side, and prepares pupils specially for Sandhurst, Woolwich, or Cooper's Hill (*q.v.*); also for the Indian Civil Service (*q.v.*). Three exhibitions, ranging from £25 to £50 a year, tenable at the Universities, offered annually. Pupils, 600. **Head Master**, Rev. J. M. Wilson, M.A. **Registrar**, A. W. D. Macpherson. **Motto**, *Hoc studia oblectant.*

Closure. See PARLIAMENTARY PROCEDURE.

Coal. The chief varieties of coal are anthracite, or "stone coal," which occurs largely in South Wales, and is used in furnaces and malt kilns; semi-bituminous, or "steam coal," much used in marine and locomotive engines, being almost smokeless; bituminous, or "household coal," which is the common form of fossil fuel for domestic use; and lignite, known also as "brown coal," or "wood coal," an imperfect coal, not used in this country, though valued on the Continent. **Cannel** is a variety of coal which does not soil the fingers, and burns readily like a candle, whence the name. It occurs abundantly near Wigan, and is highly valued for gas-making. The vegetable origin of coal is fully established by its chemical composition, microscopic structure, its mode of occurrence, and its associated fossils. Some coals, notably the "better bed" of Bradford in Yorkshire, are largely made up of resinous spores or minute reproductive bodies shed from the cones of fossil lycopods, or plants allied to modern club-mosses. Two kinds of spores, known as *microspores* and *macrospores*, occur in certain lycopods, and similar bodies are found in coal. Some observers regard the larger bodies not as spores, but as sporangia or spore-cases. Certain kinds of coal seem to be largely made up of the mineralised bark of the coal-measure plants. Small deposits of coal may have been formed by vegetable matter drifted by streams, and buried in lakes or in estuarine deltas; but in most cases the vegetable matter must have grown *in situ*. The roots of the coal plants are often found in the "underlays" or fossil soils beneath the coal-seams. The principal coal fields of Great Britain are those of South Wales, Forest of Dean, Bristol and Somerset, Warwickshire, South Staffordshire, North Staffordshire, Shropshire, Denbigh and Flint, Lancashire and Cheshire, Cumberland, Yorkshire, Derbyshire and Nottinghamshire, Leicestershire, Durham and Northumberland, the Clyde Basin, Midlothian, Fifeshire, and Ayrshire. In Ireland good coal occurs in Tyrone and Antrim, but the resources are not well developed; the coal in the south of Ireland is chiefly anthracitic. The deepest coal-pit in Britain is at the Ashton Moss colliery, near Manchester (12,688 feet).—As the general characteristic of British trade in all its staple branches during '88 may fairly be inscribed as "good," coal mining prospered, first in quantity of output, and next as to prices and wages. The imports and exports of coal into and from the Port of London during December brought up the totals for that year ('88) to the following: Seaborne, 4,887,583 tons; railway, 7,621,763 tons; being an increase in the former over '87 amounting to 161,305 tons, and of the latter to 303,093 tons. The total quantity of coal in transition or exported beyond the London district in '88 amounted to 3,119,326 tons, showing an increase over '87 of 122,080 tons. Deducting the increase of exports from that in the gross imports, the net increase in the trade within the London district in '88 is thus 343,218 tons. The average price for the whole year was 26s. 4d. per ton, being a fraction higher than in '87. An interesting article on "Our Coal Supply," and the prospects of its exhaustion—having special reference to an able paper on the subject read before the Royal Statistical Society, by Mr. Price-Williams—was published in the *Engineer* of March 8th, '89. In the spring of the year a coal syndicate for the United Kingdom was much discussed, under the title of the

Coalowners', Lessees', Workmen's, and Consumers' Co-operative Association, with a proposed capital of £100,000,000, to be issued in shares and debentures, with general supervision by the Board of Trade, but it came to nothing. Some idea of the extraordinary increase in the value of coal may be obtained from the enhanced prices which the great railway companies connected with the West Riding field had to agree to pay in their June contracts. The difference was 40 per cent., the additional cost to the L. & N. W. being £100,000, the Midland £90,000, and the Great Western £80,000 for the year. A further notion of the state of affairs was given in the annual circular of Messrs. G. Cockerell & Co., published early in July. They state:—"The London coal trade was never in a more unsettled condition. Anticipating the abolition of the dues, large consumers have postponed the filling of their cellars; but this check having been at length removed, a period of stagnation is likely to be followed by one of unusual activity. . . . The revival of commerce and the consequent demand for manufacturing purposes have already caused an advance of 30 per cent. in the cost of steam, while the market value of all classes of house coal is considerably higher than last year. . . . We are unable to guarantee the continuance of the present rates for any length of time." A matter of considerable interest arose in the spring of the year, especially affecting the coal trade of Durham and Northumberland. The *raison d'être* was the preference of the Admiralty for Welsh coal, and a meeting of North of England owners and others was held on May 14th in the Conference Room of the House of Commons to discuss the question. Mr. John Morley, M.P., presided. One gentleman present stated that he had recently visited Malta, and discovered that whereas eight years before out of the total quantity of coal received there 25 per cent. came from the North of England, the percentage last year was only 5 per cent. The volume of trade continued in an exceedingly good condition throughout the year, and although, as will be seen below, there was a general upheaval among the men, no strike of the old-fashioned kind ensued, while the *eight-hours' movement* (*q.v.*), though much discussed among the miners, was not in any serious sense adopted. The extraordinary development in the iron trade had an especial effect on coke, the celebrated Durham qualities running up to unheard-of prices. The Board of Trade returns for October show that of coal, coke, etc., 2,608,685 tons were exported, against 2,504,303 in October '87; this is a rise in quantity of 4'1 per cent., while the increase in price showed the vast increase of 26'7 per cent. The London market was of course affected by the dock strike (see STRIKES), which, beginning in August, came to an end in September, and, as the coalmen joined the strikers, caused a rise in prices and wages all round. The report of the Registrar of London Coal Markets for the ten months of the present year shows a decrease in the imports by sea of 115,923 tons, the quantity received from Jan 1st to Oct. 31st being 3,893,942 tons, while the quantity coming in by rail was 6,274,173 tons, or an increase of 166,959 tons. These figures give a net increase in the receipts of 51,031 tons; but there being an increase in the quantity exported beyond the London area of 33,521 tons, the development of trade within the area is represented by 175,510

tons. The *Engineer* of Aug. 30th publishes the following interesting statistics: The total coal consumption of the world is said to amount to 1,000,000 cwt. per hour. Of this quantity about 240,000 cwt. are required per hour in order to heat the boilers for stationary and marine engines, locomotives, etc. The production of pig-iron absorbs 100,000 cwt., and that of other metals 80,000 cwt. per hour. The average hourly consumption of household coal is reckoned at 200,000 cwt.; but the total production is estimated at 30,000,000 to 33,000,000 cwt. per diem, so there is a considerable margin. Of course the question of wages was very much discussed as a necessary corollary to the improved trade in quantity and prices. An important conference of miners was held at Birmingham at the end of March, between 300,000 and 400,000 men being represented. The leading resolution adopted was to demand an immediate advance all round of 10 per cent. The next conference was held at Nottingham in April, concluding on the 26th, when it was agreed to take steps to enforce the demand. The following month the conference again sat at Manchester, when it agreed to accept 5 per cent. on July 1st and 5 per cent. on October 1st—an offer made by way of compromise by the Yorkshire owners. In the autumn (October 8th), the conference, representing 227,500 men, met at Birmingham. The reports were to the effect that the second advance above mentioned had been given over the midland and north-western districts. This made a total increase of 10 per cent. in '89, and 20 per cent. since the previous October. It may be mentioned that the miners under the South Staffordshire Wages Board, the Northumberland, the Durham, the Scottish, and the South Wales miners obtained advances on their own account. The prospects for the end of the present and at least the beginning of next year are excellent for both masters and men. For accidents see MINING.

Coal Duties, London, Abolition of. See Session, sect. 62.

Coaching. Of late years there has been a tendency towards reviving the practice of travelling between fixed points by coach; but whilst this mode of travelling was a necessity in the days prior to the introduction of railways, it is now merely indulged in for pleasure, and as a rule is confined to the summer months, a notable exception being that inaugurated by Mr. H. M'Calmont on Nov. 12th, '89, on which date he commenced running a coach between Ross and Monmouth, *via* Kerne Bridge and Whitchurch, during the winter, on which occasion he was presented with a handsome whip, upon which was a silver-plate bearing the following inscription: "Presented to H. M'Calmont, Esq., by the Men of Ross." Throughout the summer season several coaches start on specified days from *Watney's Hotel*, Piccadilly (the famous White Horse Cellars), for Brighton, Virginia Water, and other favoured resorts; but the leading and best organised clubs are the *Coaching* and *Four-in-Hand*, their meets at the Magazine in Hyde Park always attracting large and aristocratic assemblages. Visitors from America evince a strong predilection for this old-fashioned conveyance, as affording better and more pleasant opportunities of viewing the beauties of the country and the historic castles, abbeys, and other revered landmarks which dot the picturesque

coaching routes mapped out by our forefathers. For *Salby's* celebrated drive from London to Brighton and back in '88 see OBITUARY (Salby); and also CYCLING, an attempt having been made this year to beat his record with the bicycle. See "Coaching," Badminton Library Series.

Coaling Stations, British. To a country like Britain the importance of having various convenient points throughout the world at which both her navy and her mercantile marine may obtain supplies of coal cannot be over-estimated, especially in the event of hostilities breaking out. As steam navigation has advanced, the Government have organised in our own possessions coaling stations, where it has been conceived that they would be most useful. The principal of these ports are Aden, Trincomalee, Colombo, Singapore, Hong Kong, Simon's Bay, Sierra Leone, St. Helena, Mauritius, Port Royal, and St. Lucia. A Royal Commission appointed to inquire into the defence of British possessions and commerce abroad tendered its report to the Government July '82, and the Inspector-General of Fortifications was instructed to draw up a scheme based on the report. A scheme based on the recommendations of this Commission was first laid before Parliament in '84. Since then, however, a fuller knowledge of the requirements of each place to be defended and of the defences now thought essential have largely added to the estimates of the necessary expenditure. In addition to the list of stations drawn up in '84, is that of *Table Bay*; armament is also to be provided for *King George's Sound* and *Thursday Island*. During '88 the Imperial Defence Bill was passed, which provides for the issue out of the Consolidated Fund of the sum of £850,000 to carry out the agreement for naval defence entered into between the Imperial Government and the colonies respecting the provision of a special squadron of men of war. A further sum of £2,600,000 will be raised for the defence of the military ports and coaling stations, and for making further provisions for Imperial defence. These sums are to be raised by loan, principal and interest to be provided for by appropriation of dividends received on account of the Suez Canal shares. An exhaustive report upon the defences of the ports and coaling stations of the Empire was made in '88 by a committee, of which the naval and military representatives were Admiral Sir W. M. Dowell and Lieut.-Gen. Sir G. B. Hamley. The committee recommended that between £850,000 and £950,000 was requisite to put the coaling station defence in a proper state of readiness so far as works and armaments, barracks, submarine mines and stores were concerned; it was further recognised that a mobile defence was needed, and that for the provision of this the Admiralty must be responsible. Although promise was made by the Secretary of State for War that the military defences of the coaling stations were to be completed in '88-9, this promise has not yet been fulfilled. The following is a brief summary of the advances which has already been made:—Gibraltar, four 100-ton B.L. guns, mounted with all-round fire and six-mile range. These guns and their hydraulic machinery, supplied from Elswick, are said to be untrustworthy. There is also a battery of 38-ton B.L. guns, and emplacements are in course of preparation for a battery of 9.2-in. B.L. guns on the summit of the Rock. Malta has been supplied

with some 38-ton B.L. guns, £240,000 having been expended on the fortifications here. The guns, 6-in. 5-ton B.L., for Aden, have been mounted, and quick-firing 6-pr. and 3-pr. have been supplied. Muzzle-loaders have been supplied to the new fortifications at Trincomalee and Bober Island, but no breech-loaders. At Colombo the works are finished, and one of the five 7-in. B.L. has been shipped: four 9·2-in. B.L., which form part of the armament, are not yet ready. Singapore is slightly better off, but, although a few 8-in. 15-ton B.L. have been mounted, most of the guns are 9-in. M.L. Some 9·2-in. B.L. have recently been sent out, and a proportion of quick-firing ordnance. Hong Kong is reported to be impregnable, and its batteries are well armed, both with breech-loaders and muzzle-loaders. Simon's Bay and Table Bay yet wait for their breechloaders. At the former port the batteries are armed with 9-in. 12-ton M.L. Those at Table Bay are to have 9·2-in. B.L., and at both places more quick-firing guns are to be supplied. At St. Helena batteries of 9-in. and 7-in. M.L. guns have been erected and completed, so that the value of this naval station between the Cape and Sierra Leone may be said to be fully recognised. At Sierra Leone, Jamaica, and St. Lucia, a great deal remains to be done, and the guns have not yet been sent to King George's Sound or Thursday Island. The armament for Esquimalt is also not yet forthcoming, and several smaller stations are without their guns. This delay in the progress towards completion of the additional fortifications at the Colonial ports has called forth many complaints in the Colonial press. It is to be feared that until the heavy demands—both current and in arrear—for the Navy have been met, the cause of these complaints will not be removed. As to mobile defences, two torpedo boats have been stationed at Gibraltar and nine at Malta, with two gunboats. Halifax has got, or is to have, two. At Bermuda there are the *Scorpion*, *Viper*, and *Vixen* gunboats, and six torpedo boats. At Jamaica two torpedo boats. At the Cape the *Penelope*, an old ironclad, has been re-armed, and replaces the *Flora* at Simon's Bay. Three gunboats and four torpedo boats are also stationed here. At Singapore the *Orion* (armoured) has been placed as a temporary measure, and for the naval defence of Hong Kong the *Wyvern* (ironclad), gunboat, and six torpedo boats. At Esquimalt two torpedo boats have been stationed. Lord Brassey has called attention to the insufficient docking accommodation on several stations for the wants of the Navy in war-time. At Bombay especially a first-class dock is needed, and another in the West Indies, where it has been suggested one should be provided at Castries Bay, St. Lucia, now being fortified as a coaling station in lieu of Barbados. A dock is also much wanted at Gibraltar, and this is likely to be supplied by private enterprise. In the ports east of the Mediterranean are eleven docks capable of taking in a first-class armoured battleship. Four are in the hands of foreigners—one at Saigon, two in Japan, and one at San Francisco. The remaining seven are in British Colonies: one is at Hong Kong, the others at the Cape, Melbourne, Sydney, Auckland and Esquimalt. At the military station of Halifax a dock, the largest in America, has been opened in the course of the year '89, and at Bombay arrangements are in progress for increasing the size of a dock now

being built, so that it shall be also capable of accommodating a first-class ironclad.

Cobbe, Frances Fower, b. in Dublin 1822. Has for many years been associated with various social and philanthropic movements, and is the author of many works devoted to the solution of social and ethical problems. She was actively associated with the late Mary Carpenter in the work of bringing criminal and neglected children under healthy educational influence. She has practically aided the establishment of institutions for the protection of young servants and for the relief of destitute incurables, and has been a powerful advocate for the removal of women's disabilities, and for the advancement of female education. She is also a prominent leader of the anti-vivisection agitation. Amongst the most important of her books are "An Essay on Intuitive Morals" ('55); "Religious Duty" ('57); "Darwinism in Morals" ('72); "Duties of Women" ('80); "The Scientific Spirit of the Age" ('88); and an article in the *Forum* for Oct. '89, on the "Decline of Honest Ambition, and the Increase in the Craving for Notoriety."

Cochin-China. (1) Lower or French Cochin China consists of a portion of the old Annamese province of Champa, and comprises the whole of the Mekhong delta, but comprehends little or none of Cochin China proper. Area 23,082 sq. m., pop. 1,792,733. Capital, Saigon. (2) Cochin China proper is the protectorate kingdom of Annam, exclusive of Champa (or French Cochin China) and Tonquin. See ANNAM, and COLONIES OF EUROPEAN POWERS.

Cocos (or Keeling) Islands. A dependency of the Straits Settlements (*q.v.*), 700 miles southwest of Java. Area 9 sq. m., pop. 400. Consists of Horsing and Keeling, with several smaller islands. Abound in cocoa-nut palms.

Code Napoléon. Finding no fewer than four hundred systems of administering the law in vogue, Napoleon I. assembled, in 1802, the ablest lawyers in France under the presidency of Cambacères, for the purpose of bringing the several systems into harmony. The result was the production of several codes—the Code Civil des Français, Code de Procédure, Code Penal, and Code d'Instruction Criminelle. There were created in addition Commercial and Military Codes, the whole of which are known as the Code Napoléon.

Coercion Bills. See IRELAND AND CRIMINAL LAW (IRELAND).

Coinage Act, '89. See SESSION, sect. 64.

Colchester, Bishop of. See BLOMFIELD.

Cole, Vicar, R.A., landscape painter, b. at Portsmouth 1833, and received early artistic instruction from his father. Exhibited his first paintings in '52, and six years later was elected member of the Society of British Artists. His picture entitled "*A Surrey Cornfield: a View near Leith Hill*," greatly increased his reputation, and gained for him the silver medal of the Society for the Encouragement of the Fine Arts ('60). Mr. C. became an Associate of the Royal Academy in '70, enjoying the distinction of being the first landscape painter deemed worthy of that honour after a period of thirty years. Elected R.A. ('80).

Coleridge, John Duke Coleridge, P.C., 1st Baron (creat. 1873), Lord Chief Justice; eldest son of the late Right Hon. Sir John Taylor Coleridge, of Heath's Court, Ottery St. Mary, Devon (a Judge of the Court of Queen's Bench), by Mary, d. of Dr. Albert Buchanan, vicar of Woodmansterne, and rector of Northfleet; b.

1821. Educated at Eton and at Balliol College, Oxford: B.A. ('42), M.A. ('46), Hon. D.C.L. ('77); was scholar of Balliol and Fellow of Exeter. Called to the bar at the Middle Temple ('46); made a Q.C. and bencher of his inn ('61); a serjeant-at-law (Nov. '73); was Recorder of Portsmouth ('55-65, when he resigned). He was leading counsel for the Tichborne family in the celebrated *Tichborne case*, and crowned his great success as an advocate by his masterly cross-examination of the "claimant." Was M.P. for Exeter (July '65 to Nov. '73); was Solicitor-General (Dec. '68 to Nov. '71); Attorney-General from the last date to '73, when he was appointed Chief Justice of the Common Pleas; and made Lord Chief Justice of England ('80). Paid a visit to the United States in '83, and was very cordially received, particularly by the judiciary and the bar. He has contributed to the *Edinburgh Review* and other periodicals. Lord C. distinguished himself in Parliament by his powerful advocacy of the removal of Dissenters' disabilities at the universities. Owing to his musical voice, he is known in society and at the bar as "the silver-tongued Coleridge." His lordship has recently advocated a reform of the practice of sentencing minor offenders to long terms of imprisonment.

Colombia. A republic of Central America, formed by the union in 1861 of nine states — viz., Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Panama, Santander and Tolima—under the title of the "United States of New Granada," changed in '71 to that of the "United States of Colombia." After the termination of the revolution, which prostrated this country in '84-5, a new constitution was promulgated in August '86. By this constitution, the Republic, from being Federal, has become Central; and the country is now styled the "Republic of Colombia." The sovereignty of the nine States is abolished, and they are now simple departments, their presidents being reduced to governors under the direct nomination of the President of the Republic, whose term of office has been extended to six years. The Senate, as before, consists of 27 members, 3 from each department, and the House of Representatives of 66 members, elected by universal suffrage, each department

forming a constituency and returning one member for 50,000 inhabitants. (For members of executive see article DIPLOMATIC.) Area, 513,938 sq. miles; pop. about 4,500,000. Capital, Bogota, pop. 100,000. Estimated revenue for '89, \$21,500,000 (dollar = 38. 4d.); expenditure, \$28,000,000; foreign debt, \$7,000,000, chiefly due to English creditors. Finances in a very unsatisfactory condition. Industries chiefly confined to agriculture and the rearing of cattle. Great attraction of Colombia its mineral wealth. Rich mines of gold, silver, iron, copper, lead, etc., and precious stones. Army, in time of peace, nominally 6,500 men. Education steadily progressing. Postal and telegraph services kept up as efficiently as the state of the country will admit. Railway construction extending. The bulk of the foreign trade is with Great Britain and the United States. The transit traffic across the isthmus of Panama is of great importance. See also PANAMA CANAL. Consult *Statesman's Year-Book*.

Colombo. Ca about 120,000.

Colonial Institute. See ROYAL COLONIAL INSTITUTE.

Colonial Office. The authority of the Crown throughout our colonial dependencies is exercised by the Colonial Secretary. Governors of colonies are nominated to the Crown by him; the enactments of all colonial legislatures come before him, for approval or disallowance (a pure formality in most cases); and in his office the constitution of new colonial legislatures is planned. The direct executive action of the department is mainly confined to the Crown colonies, protectorates, etc. (see BRITISH EMPIRE). An *Emigrants' Information Office* (q.v.) is attached to the department. Crown colonies are represented in London by Crown Agents, and colonies having responsible governments by Agents-General (see DIPLOMATIC). The *British Settlements Act 1887* enables Her Majesty in council to provide for the government of her possessions acquired by settlement, and by order in council to establish all such laws and institutions, and constitute such courts and officers, and make such provisions and regulations for the administration of justice as may appear to be necessary.

Colonisation, Committee on. See **SESSION**, sect. 137.

Colonisation, German. See **GERMAN COLONISATION**.

Commemoration, Days of. The Black-letter Saints' Days of the Anglican Calendar, so called from the names being printed in ordinary black letters, and not in red, like the more important feasts. No special collect, epistle, and gospel are appointed.

Commercial Education. "A new departure" in the direction of making the national education more worthy of the first commercial country in the world, and more suited to modern conditions, and at least as efficient as that provided in those foreign countries—especially Germany—which are successfully competing with British traders in their oldest markets, was inaugurated in '87. The commercial and educational communities were at last awakened to the need for immediate action, and before long youths who are intended for a commercial career, instead of entering an office without even an elementary knowledge of trade or commerce, will have an opportunity of obtaining that special training which is given to those who are intended for the learned professions. **Technical Education (q.v.)**—thanks mainly to the City and Guilds of London Institute—has done, and is doing, much for our artisans and operatives engaged for the most part in manual labour. The Government of the day has placed upon its legislative programme a measure for the purpose of giving facilities for providing **Technical Instruction in Elementary Schools** after a child has passed the sixth standard, and it is quite likely that the fifth will ultimately be agreed upon. But C. E., or as it has been called, the "trained intelligence" of the merchant, the banker, the manufacturer, the manager, the commercial traveller, and the clerk, has been comparatively neglected in this country; and a young man entering a house of business, in spite of classical and mathematical efficiency at school or college, finds that he has learned very little that is of practical value to him at the outset of his career. It is only after a long and sometimes expensive experience that he realises the thousand-and-one conditions that enter into the consideration of the successful business man. In commerce, as in everything else, there are things that only experience can teach; but it is contended that, with a knowledge of the objects of commerce, of the economic laws and regulations which control it, of commercial law, of commercial geography, and of modern languages, a young man will at once be able to take a more intelligent and therefore a more useful, part in the business he adopts. Such is the principle recognised by the Germans and other foreigners whose competition we have experienced at home and abroad in recent years, and there is no doubt that their educational superiority has stimulated it. The **Royal Commission on Depression of Trade** (see ed. '87) stated in their report: "In the matter of education we seem to be particularly deficient, as compared with some of our foreign competitors; and this remark applies not only to what is usually called technical education, but to the ordinary commercial education which is required in mercantile houses, and especially the knowledge of foreign languages." This statement of the position has been generally accepted. The C. E. movement is steadily gaining ground. The Chambers of Commerce have given

a great impetus to it. An Association has been formed, with Lord Hartington as President and the support of many leading public men, to promote the required reforms; and the **Oxford and Cambridge Schools Examination Board**, after conferring with representatives of the Chambers of Commerce, have adopted a scheme under which certificates are granted for proficiency in commercial knowledge preparatory to entering upon a mercantile career. The next examination for certificates will be held July '88. **Secs.** E. J. Cross, M.A., Caius College, Cambridge, and P. E. Matheson, New College, Oxford, from whom all information can be obtained. In various parts of the country—and especially in London—evening classes have been instituted for imparting knowledge on commercial subjects, and efforts are being made to induce the governors and teachers of existing schools to modify their curriculum with the same object. By this means, and with the aid of the ample endowments already devoted to educational purposes in many places, it may be fairly hoped that the Englishman will no longer be placed at a disadvantage compared with his foreign rivals. The movement has been fully recorded in the *Chamber of Commerce Journal* (Botolph House, London, E.C.). The new scheme for junior and higher commercial education was finally drafted by the committee of the London Chamber early in '89. It has received the approval both of the Council of the London Chamber and the Association of Chambers of Commerce of the United Kingdom, and it is now being generally circulated throughout the country in the hope that it will be taken as a basis for alterations in the present system of education, thus bringing it into accord with modern requirements. The chief difference in the adopted scheme from the draft originally circulated consists in the exclusion of Latin from the programme of subjects. The **Yorkshire College at Leeds** has also arranged for a special curriculum for students intended for commercial life.

Commissioners for Oaths Act, '89. See **SESSION**, sect. 68.

Commercial Museums may roughly be divided into two classes: (1) those established in manufacturing countries for the exhibition of articles of every-day demand in foreign markets; and (2) those established in foreign countries for the exhibition of the manufactures of Europe and the United States. A consular officer living, say, in Cuba, finds the agricultural implements used in that island to be of a wretchedly crude type. He immediately opens a room, and therein exhibits specimens of light American ploughs and general agricultural machinery, sent out by the manufacturer, and a new trade with the United States is thus initiated. The other kind of commercial museum may be illustrated by a reference to that at Brussels. Here the Belgian cotton manufacturer will find samples of cotton goods used in various parts of the world. He will discover whether for a particular trade much or little "size" is required, in what lengths and widths the pieces are usually sold, and what colours are preferred. Side by side with this will be found specimens of the cotton produced in certain little-known countries, and the spinner will be able to form an opinion whether he could with advantage draw a portion of his supply of raw material therefrom. At the beginning of '87, when the question of a suitable site for the Imperial Insti-

tute (*q.v.*) was being discussed, some amount of opposition was shown to its proposed location at S. Kensington; and this at one period threatened to seriously influence the Mansion House Fund for the Institute, as it was held in high quarters that its proper place was within the boundaries of the City of London. It was therefore proposed to invite subscriptions for a *City Commercial Museum*; but subsequently the project became incorporated with the Institute, and it was officially agreed that 30 per cent. of the Mansion House Fund should be devoted to the Museum, the remainder to the Imperial Institute, and the Museum to be an integral portion of the latter. A considerable sum has been already raised and there is established a *special committee* charged with the furtherance of the scheme.

Commerell, Vice-Admiral Sir John. b. in London, 1829. Entered the navy, '42. Served with distinction in China, South America, and the Crimea. Received the *Victoria Cross* for heroic service before Sebastopol. *Naval Aide-de-camp to the Queen*, '72. Groom-in-waiting, '74. *Junior Lord of the Admiralty*, '79. *Commander-in-chief on the American Station*, '82. In recognition of his long and distinguished service, Admiral C. was ('88) appointed to the *chief command at Portsmouth*.

Commissionaires, frequently called *Commissioners*, are public street messengers. The idea is of Parisian origin. At first they were selected from the wounded soldiers pensioned after the Crimean and Indian wars. They receive their appointment from a society which was established by Captain Sir E. Walter, K.C.B., in 1859, and which regulates their charges. Their number is now about 1,723. During the year '88 the system has been introduced with success in Sydney and Melbourne. *Office*, 419, Strand, W.C.

Committees, Various Parliamentary. See *BILLS, PRIVATE*; *GRAND COMMITTEE*; and *PARLIAMENTARY PROCEDURE*.

Commoners now Peers. See *PEERS WHO HAVE BEEN COMMONERS*.

Common Law. The Common Law has often been described as that immemorial and unwritten customary law, which dictated the decisions of those ancient Courts of King's Bench, Common Pleas, and Exchequer, in later times grouped under the name of Courts of Common Law. In reality the Common Law is an enormous accretion of law in the form of judicial decisions given by the judges of those courts in the course of several centuries. It is neither a complete nor a systematic body of law. It doubtless had a nucleus of primitive custom, and has been modified very largely by legislation, in the form of Acts of Parliament. Its early development is obscure, but its characteristic principles had been elaborated before the close of the fourteenth century. The Common Law is *contrasted* with (1) the statute law contained in Acts of Parliament; (2) equity, also an accretion of judicial decisions, but formed by a new tribunal, which first appeared when the Common Law had reached its full growth, and which administered justice upon new principles; (3) the civil law, inherited by modern Europe from the Roman empire, and never recognised as of authority in England, although, through the agency of the old ecclesiastical courts and courts of equity and admiralty, many of its provisions have been

gradually introduced into our law. At the present day the Common Law is in a state of rapid disintegration, owing to the following causes: (1) the consolidation of all the superior courts of justice into one Supreme Court of Judicature, and the consequent obliteration of distinctive modes of procedure and distinctive legal habits of thought; (2) the extreme activity of the Legislature, whose acts embody the ideas of a modern society.

Common Prayer Book of. After the Reformation the first Prayer Book was that of *Edward VI.*, in 1542; this was followed by the *New Prayer Book*, in 1549, succeeded in 1552 by the *Second Prayer Book of Edward VI.* Another revision was made in the reign of *James I.* (1604). Under the rule of the Puritans the use of the Prayer Book was made punishable by fine and imprisonment, and the "*Directory*" was substituted in its place. It underwent its *final revision* in 1662, and was embodied in the *Act of Uniformity*. A *revised Lectionary* came into use between 1871 and '79, and *shortened services* were authorised in '72. The Prayer Book used in daughter churches (see *ANGLICAN CHURCH*) is practically the same; but these churches being autonomous, alterations may be made by properly constituted synods. The Episcopal Church of Scotland and the Protestant Episcopal Church of the United States took advantage of this liberty in '89, the former by bringing the words of consecration at Holy Communion into nearer approximation with the old Laudian Prayer Book of the Church of Scotland, and the latter by various minor alterations.

Commons, Principal Officers of House of. *Chairman of Ways and Means*, Rt. Hon. L. H. Courtney, M.P. — *Clerk of the House*, R. F. D. Palgrave, Esq., C.B. — *Clerk Assistant*, A. Milman, Esq.; *Second Ditto*, F. B. G. Jenkinson, Esq. — *Principal Clerks*: W. A. Ferguson-Davie, Esq., *Public Bills and Fees*; G. J. Stone, Esq., *Committee Office*; James B. Bull, Esq., *Clerk of the Journals*; Felix H. Webber, Esq., *Private Bill Office*. — *Senior Clerks*: C. E. A. Leigh, W. M. Molyneux, G. Laughton, W. Gibbons, E. H. Ley, C. Forster, Esqs. — *Assistant Clerks*: R. Dickinson, F. St. George Tupper, W. H. Ley, J. H. W. Somerset, H. C. Tower, C. E. Frere, L. T. Le Marchant, G. C. Giffard, A. W. Nicholson, E. H. Doyle, Hon. A. G. Brand, and S. L. Simeon, Esqs. — *Examiners of Petitions for Private Bills*, J. H. Robinson, C. W. Campion, Esqs. — *Taxing Master*, C. W. Campion, Esq. — *Clerk to Examiners and Taxing Master*, H. C. Tower, Esq. — *Librarian*, R. Walpole, Esq. — *Clerk in charge of Accounts*, W. O. Mayne, Esq. — *Shortland Writer*, W. H. G. Salter, Esq. — *Secretary to Speaker*, E. Ponsonby, Esq. — *Serjeant-at-Arms*, H. D. Erskine, Esq. — *Deputy Serjeant*, F. R. Gosset, Esq. — *Assistant Serjeant*, Hon. E. H. Legge. — *Chaplain*, Hon. and Rev. F. Byng, M.A. — *Speaker's Counsel*, Hon. F. Chandos Leigh, Q.C. — *Referee of Private Bills*, Alfred Bonham Carter, Esq.

Commons, House of. With certain exceptions any male of full age may be elected to represent a constituency in the House of Commons. English and Scotch peers are entirely disqualified, but Irish peers may be returned for any constituency in Great Britain. All English, Scotch and Irish judges, except the Master of the Rolls in England; clergymen

of the Established Church of any of the three kingdoms; Roman Catholic priests; the holders of various offices specially excluded by statute—including revenue officers—persons who have been convicted of certain offences, aliens who have been naturalised (except in special cases where exceptions are made), imbeciles, government contractors (except contractors for government loans), and sheriffs and returning officers within the constituencies for which they act, all these are disqualified. No candidate requires any property qualification, and no member receives any payment or allowance whatsoever from the country for his service in the House or on any committee thereof. The Speaker (*q.v.*) is the first to take the oath and subscribe the roll in a new House of Commons, and is followed by the other members, who come to the table without any ceremony, and are presented to him by the clerk. Members returned after a general election are introduced by two other members. The form of oath taken is as follows:—"I, —, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, her heirs and successors, according to law. So help me God." Quakers, Moravians, Separatists, and others are permitted to make an affirmation to the same effect as the oath; and by 51 & 52 Vict. ch. 46 every person upon objecting to being sworn, and stating, as the ground of such objection, either that he has no religious belief, or that the taking of an oath is contrary to his religious belief, shall be permitted to make an affirmation instead of taking an oath in all places and for all purposes where an oath is and shall be required by law. A few years ago a valuable return was made to the House of all the members who had sat for hundreds of years before, and was printed and sold as a parliamentary paper. A seat in the House is vacated when the holder is created a peer or succeeds to the peerage, by death, or by the acceptance of any office of profit under the Crown; and there are also certain disabilities attached to bankruptcy (see PRIVILEGES OF PEERS, etc.). All the principal members of the Government, on accepting office, vacate their seats and are eligible for re-election; but the rule does not apply to such offices as Secretary to the Treasury or other similar appointments which are not held direct from the Crown; and a change from one office to another does not involve going again to the constituency. In theory a member cannot resign, but he can accept the office of honour or profit under the Crown or the stewardship of the Chiltern Hundreds, or of the manors of Northstead, which is granted to him by the Chancellor of the Exchequer, and resigned immediately its purpose is served. (See WRITS.) The Act of Union with Ireland increased the number of the House of Commons to 658, and though it stood nominally at this figure until the end of the parliament of '80-'85, the disfranchisement of 4 constituencies returning 6 members, and the suspension of 12 writs in 7 cities and boroughs, had reduced the total of members to 640. The Redistribution Act did not alter the apportionment of members to Ireland or Wales, but increased the number returnable by Scotland from 60 to 72, and these 12 new seats being added to the nominal number of the House brought it up to 650. An alphabetical list of members follows below, together with summary of the number and political bias of the

members returned by the boroughs, counties, and universities of England, Wales, Scotland and Ireland, to the Parliaments of '85-'86 and August '86. The summary also exhibits the result of the changes which the subsequent bye-elections have made up to November 31st, '89. A word as to the parts of the House which the different sections of members occupy may be added here. The benches are fixed in two long rows, extending on either side from the chair to the bar, and each row is divided midway by a narrow passage known as the gangway. The front bench to the right of the chair and above the gangway is the **Treasury Bench**, and upon it sit the leader of the House and as many of his ministerial colleagues as can find accommodation there. The other benches on the Ministerial side are occupied by supporters of the Government; below the gangway having been, when the Liberals were in power, the resort, for the most part, of the Radical members. In the last parliament the Liberal Unionists sat, some above and some below the gangway. Mr. Chamberlain and Sir G. Trevelyan taking the latter position, while Lord Hartington chose a place immediately behind the Treasury Bench. On the left of the chair are the **Opposition benches**, the front of which, above the gangway, is reserved to ex-Ministers and Privy Councillors. Now that the Liberals are in opposition Lord Hartington and Mr. Chamberlain, Mr. Gladstone and Sir W. Harcourt all sit on the front bench on this side. Since 1880 the Parnellites have always sat in opposition, and most of them keep below the gangway. The famous and now historic Fourth Party sat on the front bench of this quarter of the House, until its existence as such was terminated on the formation of the first Salisbury cabinet. By ancient custom the two members for the City of London sit on the **Treasury Bench** on the first day of the meeting of a new Parliament. The legislative duties of Ministers are familiar to most readers, but a word or two concerning some of them may be said here. If the **Secretary for War** and the **First Lord of the Admiralty** are peers, the Financial Secretary to the War Office generally, and the Secretary to the Admiralty, have charge of the Estimates. The **Education Estimates** for England and Wales are introduced by the Vice-President. A goodly number of the **Civil Service Estimates** are in charge of that hardly worked official, the **Financial Secretary to the Treasury**; and he is bound to be well up in a large mass of detail, not only as regards them but other parliamentary matters, for he arranges the course of Government business in the House of Commons. The **Patronage Secretary** as principal ministerial whip endeavours to secure a good attendance of members of his own side when Government business is being transacted, issuing on important occasions **summonses**, which are also called **whips**, and which, according to the urgency of the case, are emphasized by three, four, or five underlines. He is aided in his important party duties by the Junior Lords of the Treasury and the holders of subordinate Household appointments, or some of them; and with their assistance, too, he tells for the Government in divisions (*q.v.*). See PARLIAMENT, SPEAKER, ELECTION, etc. The important changes in the rules of the House, made during the sessions of '86, are noticed in detail under PARLIAMENTARY PROCEDURE.

COMPLETE ALPHABETICAL AND BIOGRAPHICAL LIST OF MEMBERS OF THE

NOTES.—In cases where members possess a double surname (e.g., *Hicks-Beach*)

The asterisk (*) denotes Member of the last Parliament.

Names when given in *italics* indicate those who, though returned

The following is an alphabetical list of the Parliamentary constituencies of the United Kingdom, with the names of the member or members returned by each, and, where there was a contest, the figures polled by the candidates, at the last general election (July '86), and at every subsequent bye-election to Nov. 21st, '89. The great majority of the old constituencies were by the last Redistribution Act split up into divisions each returning one member, and the name of these divisions is given in parentheses after the name of the county or borough, but as under an alphabetical arrangement of counties and boroughs it may not be easy to readily find some of these divisions which bear local names, a special list has been compiled, showing in one column the local name of the division and in the other the name of the county or borough in which it is situate. This list will be found at

the beginning of the alphabetical list of constituencies. The few places which, like the City of London, Leicester, etc., were not broken up into single-member divisions, and still return two members, are distinguished in the alphabetical list of constituencies by a figure thus (2). The figures in brackets, *e.g.* [5280], show the number of electors on the register in force; black figures [9874] show register as revised for '90.

Local Names of Divisions and the County or Borough in which each is situate.

| DIVISION. | COUNTY OR BOROUGH. |
|------------------|--------------------|
| Abercromby - - - | Liverpool. |

* The bye elections held between this General Election and the next resulted in a Conservative gain of two seats. † The Speaker is counted with the Liberal Unionists.

Commutation of Tithes. See TITHES.

Comoro Islands. The, a group of volcanic islands in the Mozambique Channel, between the east coast of Africa and the north-west coast of Madagascar. Area 758 sq. m., pop. 63,000. The group consists of four small elevated islands—Great Comoro, Mohilla, or Little Comoro, Anjuan, erroneously called Johanna, and Mayotta or Mayotte. Mayotte is a French possession, and the other islands form a French protectorate. Commercially the most important is Mohilla, which carries on a brisk trade with Madagascar, Zanzibar, Mozambique, and the rest of the mainland. The people are Mohammedans, speak Arabic, and are akin to the mixed races of Zanzibar. A British consul is resident. See COLONIES OF EUROPEAN POWERS.

Company Law in '89. The rule of law that a company cannot "ratify" or "confirm," though it may adopt, an act done prior to its registration, was fully illustrated in the case of *In re Dale and Plant, Ltd.* (Chancery Division, June 21st). A Mr. Bloomer had entered into an agreement with the promoters of a company that, upon certain conditions, he should act as secretary of the intended company for a period of five years. Subsequently, when the company was registered, a resolution was passed by the directors "confirming the agreement," which Mr. Bloomer now sought to enforce. The court, however, held that there was no agreement between Mr. Bloomer and the company which the company could confirm.—In the case of *Wood v. The Odessa Waterworks Co., Ltd.* (Chancery Division, June 22nd), the court granted an injunction restraining the company from paying a dividend to its shareholders, not in cash, but in debenture stock, bearing interest and redeemable at par, at

some future period.—A shareholder in a limited liability company can transfer his shares to a pauper in order to avoid payment of calls, provided that the transfer is genuine, and that he retains no ground of interest. The question whether a director of a company can do the same thing was raised in the Court of Appeal (June) in a case in which the plaintiff had transferred his shares to a solicitor's clerk in order to avoid payment of calls, but in which his fellow-directors, in order to outwit him, arranged their business so that the call was made before the transfer was sanctioned. The Court of Appeal decided that where there was no indebtedness, the sanctioning of the transfer was a mere ministerial act, which the directors were bound to perform forthwith, and that therefore it should have taken effect before the call was made.—In the case of *Everest v. The Metropolitan Coal Consumers' Association, Ltd.*, the memorandum of association provided for the payment of expenses connected with the issue of capital and the formation of the Association, but by resolution of the shareholders it was decided to pay £5000 in cash and £1250 in shares to the Hamilton Syndicate, Ltd., for their services, although it was admitted that the syndicate had not incurred expenses to the amount voted. On application to Mr. Justice Kay (Aug. 2nd), his lordship restrained the Association from issuing the £1250 of shares, the £5000 having in the meantime been paid.—In the Queen's Bench Division (April) an important question was raised as to whether an agreement for the sale of a business to be converted into a limited liability company should be stamped merely with a ten-shilling deed stamp, or be treated as a conveyance, and therefore be liable to the usual

ad valorem duty of five shillings for every fifty pounds of the consideration or purchase price. The Commissioners of Inland Revenue took the latter view, and mulcted the appellants, Messrs. James Lewis & Sons, in the sum of £337. Their contention was that the agreement, because it gave the purchaser an equitable right in the property, was an actual conveyance within the meaning of the Stamp Act of 70. The appellants, on the other hand, contended that the agreement for the sale of the goodwill was merely an agreement giving the right to a conveyance, but not in itself an actual conveyance. The Lord Chief Justice and Mr. Justice Hawkins took the latter view, and found for the appellants.—In the case of the *Portuguese Consolidated Copper Mines, Ltd., ex parte Steele* (Chancery Division, April), an application was made by an allottee of a hundred shares in the company to have his name struck off the register of members, on the ground that no formal and binding allotment of shares had been made. It appeared that the first meeting of the board of directors was held on the 24th Oct., '88, but only two of the directors were present. They passed a resolution that two directors should form a quorum, and then proceeded to allot the shares. Mr. Steele subsequently withdrew his application for shares, and it was contended on his behalf that the allotment to him was invalid because two directors could not fix the quorum. Mr. Justice North held that two directors could not appoint themselves a quorum, and decreed Mr. Steele's name to be removed from the company's register. On appeal this decision was affirmed.—The question of the responsibility of a company for mis-statements in its prospectus was raised in the case of *Peck v. Derry* (House of Lords, July and). The misrepresentation alleged was that the company had the right to use steam or other mechanical power, when such right was contingent upon the consent of the Board of Trade and of the Corporations of Plymouth and Devonport, which consents were subsequently partially refused. Mr. Justice Stirling, who originally tried the action, dismissed it on the ground that there was no intention to deceive; but the Court of Appeal held that, the statements being untrue, and the defendants knowing them to be untrue, it was immaterial whether they had any intention to deceive. The House of Lords, on appeal, reversed this decision, and decided that, though in some respects inaccurate, the statements were honest and *bona fide* on the part of the company, and did not expose them to an action for deceit.—In the case of the *Union Plate Glass Co., Ltd.*, Mr. Justice Kay refused (August 6th), to sanction a reduction of one part of the capital of the company, while leaving the remainder untouched.—Where a company is voluntarily winding up, execution against it is void in the same way as if it were being compulsorily wound up (*In re Thurso New Gas Co., Ltd.*, Chancery Division, June 21st).—In the case of the *Mercina and Adana Construction Co.* (Chancery Division, July 20th), Mr. Justice Stirling held that a clause in the memorandum of association authorising the company to buy or accept a surrender of its own shares otherwise than for forfeiture, was *ultra vires*.—Where a company formed to supply the city of Genoa with waterworks had stated in its prospectus that £200,000 out of £300,000 of the capital had been subscribed,

whereas contracts had only been entered into for taking that amount in fully paid-up shares, it was held by the Court of Appeal (April) that the plaintiff, who had subscribed for shares on the faith of the prospectus, was entitled to be compensated by the directors.—In the case of the *Lisbon-Berlyn Goldfields Co.*, there was a proposal to reconstruct the company, which involved its voluntary winding up. For this purpose it was necessary to hold two meetings, the first to pass a resolution in favour of winding up, and the other to confirm it. The directors, however, issued only one notice, stating the time for the first meeting, and giving the date when the second would be held if the proposal were carried. It was decided (Chancery Division, Nov. 1st), that the intimation as to the second meeting was only conditional, and that the proceedings at the second meeting were invalid, owing to want of proper notice.—In the case of the *British Workmen's Assurance Co. Ltd. v. Harward and others* (Queen's Bench Division, Nov. 5th), the plaintiffs, who had paid £1000 for shares in the City of London Deposit Bank, Ltd., upon the faith of a prospectus which subsequently proved to contain misrepresentations as to the value of the business which the Bank took over, obtained a verdict against the defendants.

Compensation to Tenants. See Session, sect. 138.

Compton, Earl, M.P., b. 1851, is the second son of the 4th Marquis of Northampton; ed. at Trin. Coll. Camb., and for seven years was engaged in diplomatic service. Acted as private secretary to Earl Cowper when Lord-Lieutenant of Ireland ('80-82). Unsuccessfully contested S. Warwickshire ('84), but was returned for the Stratford-on-Avon Division in '85, losing, however, his seat in the following year. He came forward as a Liberal candidate for the Holborn Division of Finsbury, but was defeated by Mr. Gainsford-Bruce. On the retirement of Mr. C. S. Kenny, Earl Compton re-entered the House of Commons as member for the Barnsley Division of Yorkshire. He is favourably known for the interest he displays in social questions, and has given evidence before the Royal Commission held to inquire into the housing of the industrial classes. Earl C. represents Central Finsbury on the London County Council.

Comptroller and Auditor-General. See EXCHEQUER and FINANCE.

Comptroller of the Household (see MINISTRY) is the second officer under the Lord Steward of the Household (*q.v.*), and checks and examines the expenses of the royal household. He is always a Privy Councillor.

Congo Railway. At the end of 1885 it was announced that the Government of the Independent Congo State had granted a concession to Mr. H. M. Stanley (*q.v.*), the explorer, and Mr. F. F. Hulton, President of the Manchester Chamber of Commerce, acting on behalf of the Congo Railway Syndicate, for the construction of a line to connect the Upper and the Lower Congo, taking the traffic of the Congo basin. Many distinguished names were attached to the scheme, and it was arranged that subscription lists for capital, estimated nominally at two millions sterling, should be opened in the capitals of the fourteen powers which at the Berlin Conference agreed to maintain the neutrality of this region. (For the earlier history of the scheme see eds. '88 and '89.)

It was announced on Jan. 30th, '89, that the engineers sent out by the Congo Railway Co.—which appears to be almost entirely Belgian—had returned, and that their chief, M. Cambier, had issued a favourable report. The proposed line was two hundred miles long, running an average distance of thirty miles from the south bank of the river, and would take only two or three years to make, at a cost of about a million sterling. A telegram dated Brussels, April 28th, was to the effect that Capt. Gambier, who had directed the railway surveys, had asserted that the capital of £1,000,000 would be sufficient for the construction, for the rolling stock, general expenses, and for paying the interest on the capital during the four years of construction. The line starting from Matadi, on the Lower Congo, and terminating at Indolo, on Stanley Pool, would be 260 miles long, and the whole journey would take two days. The longest bridge, that over the river Inkissi, would have a length of 100 metres. The cost of working the line is estimated at £300,000 annually. A telegram dated Brussels, June 13th, stated that the Belgian Ministry were to ask the Chambers for authority to subscribe 8,000,000 fr. towards the cost of the line. The rest of the 25,000,000 fr. required had then been subscribed in Belgium, England, and Germany. It was explained that the construction and working of the line would remain in the hands of the *Compagnie du Congo*, founded in '87. Under date Brussels, June 20th, it was stated that Mr. Huntington, a wealthy American railway promoter, had subscribed \$500,000 towards the cost of the Congo railway—to express his admiration of the work of the King of the Belgians, and to contribute to the suppression of the Slave Trade (*q.v.*). A telegram from the Governor-General of the Congo (Brussels, July 3rd), stated that the English steamer *Loulaba*, from Liverpool, gauging 1860 and loading 2500 tons, which left Antwerp on May 18th, had ascended the Congo to Matadi. The company was constituted on July 1st, of the proposed capital of 25,000,000 fr., the Belgian State subscribing 10,000,000 fr. and the four *l'is* 5,000,000 fr. The public subscription was opened in August, simultaneously at London, Brussels, and Berlin, for the balance. The expedition to determine the direction of the first section of the line left Antwerp Oct. 10th.

Congo River and Free State, The. was constituted and defined by the general Act of the International Congo Conference of Berlin, '86, and entered into treaties with all the great Powers, by which its status as a sovereign power was recognised. At the same time the boundaries of the new State were settled. Its area is estimated at 1,056,200 sq. m., pop. 27,000,000. There are eleven administrative provinces, in which are various nations. The central Government is at Brussels, and consists of the King of the Belgians as sovereign, and three departmental chiefs. On the Congo there is an Administrator-General, under whom are several European administrators of stations and districts. Revenue is principally derived from a subsidy granted by King Leopold; expenditure, '87, 1,801,190 fr. The official returns place the exports and imports, including all that passes through the State, at about the value of 15,000,000 fr. Chief exports, rubber, ivory, coffee, nuts, palm oil. Gold, copper, and other metals have been discovered. Districts are

suitable for growing sugar, cotton, coffee, etc. In '86 Arab slave-dealers broke up the station at Stanley Falls. At Léopoldville natives (Bangalas) have been drilled and armed by European officers, and form a force of 3000 citizen-soldiers for the new state. During '89 there were signs of increased prosperity in the country, and Lieut. Liebsch reported that a complete transformation has been effected in the district of Léopoldville, a large tract round the station being now under cultivation. The authority of the Congo State had been completely established in the Stanley Pool district as far as the river Inkissi, and the local tribal wars had almost ceased. A new Congo Co. was formed at Ghent in October to work tobacco plantations in the country (see also CONGO RAILWAY). The Treaty of Friendship, Settlement, and Commerce, concluded between Switzerland and the Independent Congo State, was signed (Nov.). M. Van Etvelde, the Administrator-General of the Congo State, addressed a long report to the King as its sovereign, enumerating the effectual measures which had been taken in the territories of the State to prevent the traffic in slaves, even in cases where it was carried on under various disguises. Consult: H. M. Stanley's "Through the Dark Continent" and "The Congo, and the Founding of its Free State," Wauters' "Le Congo," "Proceedings of the Royal Geographical Society, 1885-8," and Bentley's "Life on the Congo."

Congregationalism. This is the democratic form of church life. It is based upon three ideas: the right of each individual to take part in the government of the community; the autonomy of the local church; and its independence of all external ecclesiastical authority. While complete in itself, the local church may voluntarily unite with other churches for consultation and common action. But no resolution of any such union binds the individual church without its own consent. Usually each church has one minister or pastor, who is chosen by the free suffrages of the membership; but there is nothing to prevent there being more than one, and in fact such cases are not uncommon. In addition to the pastor or pastors, home missionaries and evangelists are sometimes appointed, whose work is distinct from, though subject to the supervision of, the regular pastorate. Congregational polity admits two orders of church officers only: bishops, elders, or pastors, who are the presidents or administrative rulers in the spiritual department of church life; and deacons, who have charge of its secular affairs. It claims to be of apostolic origin, and to be at once the highest and most natural organisation of the life of the Christian Church. It presupposes the Christian character of all members of the Church, and requires a credible profession of faith in Christ. There are in the British Isles 4,645 Congregational churches, branch churches, and mission stations, with about 2,800 recognised and accredited ministers, in addition to upwards of 300 evangelists. In England and Wales alone there are 4,338 places of worship, with accommodation for 1,625,600 persons. County or district associations of these churches exist for the purpose of upholding and extending evangelical religion, of promoting the spiritual intercommunion of the churches, strengthening their fraternal relations, facilitating co-operation in everything affecting their

common interest, aiding weak churches, and carrying on mission work within their respective areas. The **Congregational Church Aid and Home Missionary Society** expends in mission work through the county unions about £27,000 per annum. For foreign missions see **MISSIONARY SOCIETIES** (London Missionary Society). There is also a general union of the churches, known as the **Congregational Union of England and Wales**, which in 1881 celebrated its jubilee by originating a fund for church extension, paying off church and chapel debts, and for evangelistic and home missionary purposes. The sum raised in connection with this celebration amounted to nearly £400,000. There are fifteen colleges belonging to the denomination in the three kingdoms, in which between 400 and 500 students are being trained for the regular ministry. Various societies have been formed for church extension; and for conducting mission work. In connection with their operations an amount of over £4,500,000 has been expended. The British Congregational churches raise for the support of religious worship, and for philanthropic purposes, in connection with their own organisations, upwards of £1,000,000 per annum. Congregationalism is also a prominent form of church life in the United States of America, throughout the British dependencies, and in other parts of the world. The annual meetings of the C. U. were held in '89 in London (May), and Hull (October). Offices, Memorial Hall, Farringdon St., E.C. Sec., Rev. A. Hannay D.D. **Chairman**, '90, Rev. Thomas Green, M.A. (g.v.), Ashton-under-Lyne.

"Congregational Review" (monthly.) Commenced Jan. 1887, and is a new series of *The British Quarterly Review* and *The Congregationalist*. It contains a record of passing events of Congregational churches, while attention is given to Biblical and theological questions, Church history, and also to general literature. Editor, Rev. J. Guinness Rogers, B.A. Office: 26, Paternoster Square, E.C.

Connaught and Strathearn, H.R.H. Prince Arthur William Patrick Albert, P.C., K.G., K.T., K.P., G.C.S.I., G.C.M.G., 1st Duke of (creat. 1874), was b. 1850. The third son of the Queen. Mar. the Princess Louise Margaret, youngest dau. of Prince Fredk. Charles of Prussia (79). Commanded a Division in the Egyptian Expedition ('82). He is commander of the forces in the Bengal Presidency. It is stated that H.R.H. is about to return to England to succeed General Willis in the command of the southern district.

Constantinople. Otherwise called *Byzantium*. Enlarged by Constantine the Great, who removed thither the seat of the Eastern Roman Empire (A.D. 330). This most powerful situation for dominating Europe has always been in the hands of a decaying power. The Turks wrested it from Christian hands (1452), and it is now the capital of Turkey, situated on the waterway between the Black Sea and Mediterranean. It has long been coveted by Russia, and attempts to possess it have been the cause of expeditions for the last thousand years. The population of Constantinople exceeds a million, and is, therefore, larger

than that of any Russian city. To protect it, the Berlin Treaty left on the European side a portion of territory about the size of England and Scotland combined (80,000 sq. m.), and a population of 5,250,000.

Consul, A. is a diplomatic agent appointed to advise upon and protect the interests of traders of his own country in the foreign town at which he is resident, to certify and attest acts and documents, and to report upon the trade of the country to his Government. He may further celebrate marriages of the subjects of his own sovereign under foreign jurisdiction, and take evidence on oath respecting crimes committed on board vessels of his own nationality. A Consul-General is one who at the same time holds a post of *Chargé d'affaires*. First appointed in the sixteenth century.

"Contemporary Pulpit" (monthly). Founded Jan. 1884. Furnishes in its pages selected sermons from the greatest living preachers of the day; giving, in addition, exegetical outlines by experienced divines on texts for the Church's year, with copious references to all available sources of information. Office, 6, White Hart St., Paternoster Sq., E.C.

"Contemporary Review" (monthly). Founded Jan. '66. First editor, Dean Alford. From the first it has paid particular attention to theological questions, treating them in a broad and Catholic spirit, and often giving successive articles on the same subject from writers of various schools and churches. It has also always given full scope for the discussion of all great questions, religious, social, political, literary, and artistic, by the leading writers of the day. Many eminent Continental and American authors write in its pages. The C. R. gives regularly signed surveys of "Contemporary Life and Thought" in various countries by competent writers on the spot. Editor, Mr. P. W. Bunting. Office, 15 and 16, Tavistock Street, Covent Garden, W.C.

Convocation. The clerical parliament of the Church of England. Was prorogued in 1717, and did not meet again till the year 1850, when it once more found voice, after a silence of 133 years. Sits now thrice yearly. First sat in its present form in the fourteenth century. (Convocations or Synods without the authority of the Crown date from the very earliest times.) It consists of two Houses—the Upper and Lower. There is also a separate Convocation for each of the two great ecclesiastical divisions of England, called *Provinces*. The *Upper House* consists of the several bishops of the provinces, as enumerated below. The *Lower House* is composed of the Dean of every cathedral and Archdeacons of the dioceses of the province, with Proctors elected by the clergy of every diocese. They represent (1) the cathedral chapters, and (2) the minor clergy. A fresh election of Proctors is made with every new parliament. In Convocation are discussed, and resolutions passed upon, all matters affecting the interests of the Church, both doctrinal and administrative, as also the spiritual welfare of the nation at large. But any resolutions which suggest an alteration in the services, rites and ceremonies, or the rubrics of the Church service, as contained in the Book

of Common Prayer, cannot be discussed in Convocation with the purpose of making such alterations, either in the Prayer-Book or in the Canons, without the Queen's Licence and Letter of Business, giving them the authority so to do, having been first obtained. And no such alteration made by such authority can be adopted and put in force without the authority of both Houses of Parliament. *Houses of Convocation.* [In the Lower Houses those marked * are Proctors for the Chapter; those marked † Proctors for the Clergy.] **PROVINCE OF CANTERBURY.**—1. *The Upper House.* Archbishop of Canterbury, *President*; Bishops of London, Winchester,

Bath, Exeter, Salisbury, Worcester, Gloucester, Hereford, Worcester, Rochester, St. Albans, St. Asaph, St. Davids, Salisbury, Southwell, Truro, and Worcester. 2. *The Lower House. Prolocutor:* Right Rev. George H. Sumner, D.D., Suffragan Bishop of Winchester. *Canterbury*—Dean R. P. Smith; Archdeacons Parry (Bishop Suffragan of Dover) and B. F. Smith; *Rev. Canon Rawlinson, †Rev. Canons Puckle and H. A. Jeffreys. *London*—Deans Church and Bradley; Archdeacons Sinclair, Hessey, and Farrar; *Revs. Canons Gregory and Prothero, †Rev. A. J. Ingram and Canon W. Cadman. *Winchester*—Dean Kitchin; Archdeacons Sumner, Sapte, and Henry Haigh; *Rev. Canon Warburton, †Revs. V. Musgrave, and W. H. Lucas. *Bangor*—Dean Lewis; Archdeacons Pryce and Evans; †Revs. P. C. Ellis, T. Williams, and D. W. Thomas. *Bath and Wells*—Dean Plumtree; Archdeacons Denison, Browne, and Fitzgerald; *Rev. Canon Bernard, †Rev. Prefendaries A. C. Ainslie and Edwin A. Salmon. *Gloucester*—Dean Pigou; Archdeacons F. J. Mount and R. Sutton; *Rev. Canon J. F. Crosse, †Rev. H. Bailey. *Ely*—Dean Merivale; Archdeacons Emery, Chapman, Bathurst, and Vesey; *Low, †Rev. Canons W. B. Hopkins and J. H. Macaulay. *Exeter*—Dean Cowie; Archdeacons Herbert Barnes, C. T. Wilkinson, and E. G. Sandford; *Rev. Prefendary Kempe; †Rev. Prefendary Sadler and G. R. Prynn. *Gloucester and Bristol*—Deans Spence and Elliott; Archdeacons Norris, Hayward, and Sheringham; *Rev. Canons Tinling and Nugent Wade, †Rev. Canons Medd and Mather. *Hereford*—Dean Herbert; Archdeacons Maddison and Stanhope; Revs. W. Poole, E. F. Clayton, and C. S. Palmer. *Lichfield*—Dean Bickersteth; Archdeacons T. B. Lloyd, M. H. Scott, and E. Lane; *Rev. Canon J. G. Lonsdale, †Revs. J. T. Jeffcock and Bishop Stamer. *Lincoln*—Dean Butler; Archdeacons Kaye and Trollope (Bishop Suffragan of Nottingham); *Rev. Sub-Dean Clements, †Revs. G. G. Perry and A. S. Wilde. *Llandaff*—Dean Vaughan; Archdeacons W. C. Bruce and Griffiths; *Rev. Canon Evans, †Revs. C. R. Knight and J. T. Harding. *Morwisch*—Dean Lefroy; Archdeacons Perowne, Woolley, and Neville; *Rev. Canon J. M. Nisbet, †Revs. Canon C. Frere and Hinds Howell. *Oxford*—Dean Liddell; Archdeacons Palmer, Pott, and Bishop Randall; *Rev. Canon Bright, †Revs. Canon E. Savory, and G. N. Freeling. *Peterborough*—Dean Perowne; Archdeacons Thicknesse, Lightfoot, and Mitchinson (Assistant Bishop); *Rev. Canon Argles, †Rev. Canons Thos. Yard and H. Twells. *Exeter*—Dean Hole; Archdeacons Cheetham, Richardson, and Burney; *Rev. Canon H. W. Burrows, †Rev. Canons Friskine Clarke and

the Hon. A. Legge. *Salisbury*—Dean Boyle; Archdeacons Lear, Sowter, and Buchanan; *Rev. Canon Swayne, †Revs. Canons E. A. Dayman and Prefendary R. B. Hutchings. *St. Albans*—Archdeacons Lawrance, Blomfield (Bishop Suffragan of Colchester), and Johnson; †Revs. E. T. Vaughan and T. Scott. *St. Asaph*—Dean Owen; Archdeacons D. R. Thomas and W. H. Williams; *Rev. William Howell Evans, †Revs. Canon William Richardson and J. E. Hill. *St. Davids*—Dean Allen, Archdeacons De Winton, North, James, and Hilbers; *Rev. Canon Phillips, †Revs. Canon Bevan and T. Walters. *Southwell*—(no dean); Archdeacons Balston and Maltby; *Rev. Canon Grey and Rev. Thomas H. Frere. *Truro*—(no dean); Archdeacons Cornish and Hobhouse; *Rev. Canon Grey, †Revs. Canons Hockin and Thynne. *Windsor*—Very Rev. R. Thomas Davidson; †Canon E. Capel Cure. *Worcester*—Dean John Gott, D.D.; Archdeacons Bree and Lea; *Rev. Canon Melville, †Revs. W. W. Douglas and H. B. Bowlby. *Vicar-General:* Sir J. P. Deane, Q.C., D.C.L.; *Registrar:* Sir John Hassard; *Actuary:* F. Cobb, Esq.; *Apparitor-General:* Sir J. Hanham, Bart. **PROVINCE OF YORK.**—1. *The Upper House.* Archbishop of York, *President*; Bishops of Durham, Ripon, Chester, Carlisle, Liverpool, Newcastle, Wakefield, and Sodor and Man. 2. *The Lower House. Prolocutor:* Rev. Chancellor Espin, D.D. *York*—Dean Purey-Cust; Archdeacons Crosthwaite, Blakeney, Blunt, and Yeoman; *Rev. Canons Randolph and Fleming, †Revs. Canons Raine F. W. Peel, Machell, Watson, and Revs. C. N. Gray, H. Favell, W. R. Sharrock, and T. Rigby. *Durham*—Dean Lake; Archdeacons Long and Watkins; *Rev. Canon Tristram, †Rev. Canons Grey, Falconer, Baily, and Chancellor Espin. *Carlisle*—Dean Henderson; Archdeacons Cooper, Crosse, and Prescott; *Bishop of Barrow, †Rev. Canons Phillips, Knowles, Bell, Stock, Bardsley, and W. A. Matthews. *Chester*—Dean Darby; Archdeacons Barber and Gore; *Rev. Canon Hillyard; †Rev. Canons Cooper and Dodd; Revs. H. J. Blackburne and E. C. Turner. *Liverpool*—(no dean); Archdeacons Claike and Taylor; *Rev. Canons Jones, Blundell, Warr, and Penrhyn. *Manchester*—Dean Oakley; Archdeacons Anson, Hornby, and Rawstorne; *Rev. Canon Crane, †Rev. Canons Birley and Heywood, and Revs. S. Hastings, E. Jackson, W. Champneys, and J. C. Kershaw. *Newcastle*—(no dean); Archdeacons Hamilton and Martin; *Rev. Canon Crane, †Revs. Canons Mason, Lloyd, Grey, and Waite. *Ripon*—Dean Fremantle; Archdeacons Cust and Boyd; *Rev. Canon Holmes, †Rev. Canons Owen, Jackson, Ellison, and Rev. F. J. Wood. *Wakefield*—(no dean); Archdeacons Brooks and Stratton; no proctors yet elected. *Sodor and Man*—(no dean); Archdeacon Hughes-Games; †Rev. W. Kermode. *Archbishop's Commissioners:* the Dean, Canons Residentiary of York, and Canon Raine; *Synodal Secretary:* Rev. Canon Wright; *Registrar and Notary:* H. A. Hudson, Esq., Minister Yard, York; *Treasurer:* Canon Randolph.

Co-operation. In England co-operative societies are united under the *Co-operative Union*, which began to form after 1869, the year in which the first Co-operative Congress was held. A *central Co-operative Board* was then formed, consisting of London and provincial members. This Board now consists of six sections—the Midland, Northern, North-Western,

Scottish, Southern, and Western, and comprises fifty-three members. These six sectional Boards meet twice every year—on the Saturday before the meeting of the Congress, and on the Wednesday during the Congress. The governing body of the Union is the *United Board*, the members of which are representatives from the above six sectional Boards. This organisation directs and promotes the cause of co-operation. The number of societies already enrolled under the Union (which enrolment is conditional on the payment of a halfpenny per quarter per member) is, according to the latest published returns, in Great Britain 1,281. The members of these societies number close on 850,000, their share capital is £9,500,000 sterling, loan capital £2,000,000, their annual sales exceed £31,000,000, and their net profits are about £3,000,000. Every year the movement expands; it has an organ, *The Co-operative News*, which took the place of the *Co-operator* in '71; it has an *Insurance Company*, and has made considerable headway in *Co-operative Cottage Building*. It is usual to trace the origin of co-operation to the Rochdale Pioneers; as a matter of fact, however, many co-operative stores were started previous to the Rochdale experiment. These lacked the distinctive feature of co-operation as now understood, all the profits being distributed among the shareholders, and were in no way different from ordinary joint stock enterprises, though they assumed the name "Co-operative." It was in '44, then, and by twenty-eight poor weavers of Rochdale, that the genuine co-operative movement was inaugurated. These weavers clubbed together, and by paying two pence or threepence a week into a common fund, purchased tea and sugar from a wholesale shop. This they sold to one another at the ordinary prices. The profits realised were great; and others joined them—bread, meat, and clothing being added to their stock-in-trade. In '56 this society was known as the *Rochdale Pioneers*, and possessed a capital of £12,000. The profits of the undertaking were divided at the end of each quarter between the shareholders and the customers—5 per cent. being first allotted to capital, and the surplus then distributed amongst the purchasers according to the amounts purchased. A portion of the profits—2½ per cent.—was always devoted to education. Meanwhile the example of the Rochdale pioneers was being rapidly followed in other parts of the country. A wholesale department was commenced in '52 to supply the various stores; then came a corn-mill, and a cotton mill, and in '60 the *Co-operator* newspaper was started. In '62 the first *Parliamentary returns* of the co-operative movement were made to the Registrar, and then there were already in existence 450 societies, with 90,000 members, and £450,000 share and loan capital; their annual sales amounted to £2,350,000, and their profits to £166,000. This was the result only eighteen years after the humble efforts of the Rochdale Pioneers. Soon after this the *Co-operative Printing Society* and the *Co-operative Insurance Company* were formed. In '63 the *wholesale depot* was opened at *Manchester*; it has now branches in London and Newcastle, and does a trade of more than £2,000,000 a year. In '68 the *Scottish Co-operative Wholesale Society* began at *Glasgow*; its branches are at *Dundee*, *Leith*, and *Kilmarnock* and its annual trade is a million and a half sterling. Socialists

are now, too, developing the co-operative ideas and on July 11th, '88, was registered the *Socialist Co-operative Federation, Limited*. It will be seen from the preceding statements that co-operation has been successful mainly in distributing the products of industry; much headway has not yet been made in this country in what is called *productive co-operation*. True, there are over sixty productive societies, and an attempt at *co-operative agriculture* has been made. Still the ideas of co-operators on this branch of the subject are not very clear, and the chief advances made have been by *private firms* admitting their employes as shareholders, and as sharers in profits. Recent movements have been set on foot amongst the *Tyneside engineers* and a few workmen in *Poplar* with a view to united action on the lines of productive co-operation. It is in *France*, however, that co-operative production has reached its highest development. In *Paris* some masons united into a co-operative society in '48. They laid by one-tenth of their earnings until they got together a sufficient amount to start business. By '60 there were 107 of them, with a capital of £14,500. They employed only shareholders, devoting two-fifths of the profits to paying the annual dividend, and the remaining three-fifths went as bonuses to the labourers. A similar association was started amongst the *Parisian pianoforte makers*, and other trades. The *Familistère of Guise* is perhaps the completest co-operative association that has yet been realised. It was founded by *M. Godin*, the great ironmaster of Guise. In '65 *M. Godin* built a mansion to accommodate eight hundred of his workpeople. In '69 schools, a theatre, baths, and wash-houses were added. In '77 he began a system of profit-sharing among his workers, and in '80 he incorporated his workshops, the mansion, stores, schools, theatre, etc., into one great co-operative society, under conditions that enable the whole to become the property of the workers and their families, who then numbered 1,040. The store that supplies the wants of this society brings in a large profit, which is divided amongst the purchasers and the schools. The children are kept in the nursery, a large well ventilated room, until they are three and a half years old; they then go to school until they are fourteen, when the boys go into the factory, and the girls to perform the various domestic duties of the community. Three doctors and two nurses reside in the *Familistère*, and a fund is set apart to provide pensions in cases of sickness and old age. The promoter of this great and good work died early in '88. "*The Co-operative Traveller Abroad*," by *Arthur Standing*, is the most recent work on the *Familistère*. Just as *England* leads the way in *Distributive Co-operation*, and *France* in *Productive Co-operation*, so *Germany* leads in *Co-operative Banking*. This is due to the efforts of *Schulze-Delitzsch*, the economic opponent of *Lassalle*. The object of the former was to enable the labourer to obtain command over capital, and this was to be accomplished by associations of labourers into which individuals paid subscriptions. The funds so raised are lent out at interest, and the profits of the business are distributed amongst the subscribers. There are over a thousand of these *Schulze-Delitzsch* Credit associations in *Germany*. Among the leading co-operators in *England* are *G. J. Holyoake*, whose "*History of Co-operation*" is a standard

work on the subject; and Judge Hughes, Q.O., who has also written largely on it. Consult a useful little book by A. H. Dyke Acland and B. Jones, giving a concise statement of the history and present condition of co-operation; its title is "Working Men Co-operators"; also the "Annual Diary of the Co-operative Wholesale Society," and for an account of French Co-operative Production, Sedley Taylor's "Profit-sharing between Capital and Labour," Mill's "Principles of Political Economy," and Fawcett's "Manual of Political Economy."

Co-operative Societies (usually called Industrial and Provident Societies). According to the latest report, the number of Co-operative Societies in the United Kingdom, making returns in 1888, was 1,348; the total membership was 903,361; the share capital amounted to £9,970,921; and the loan capital £2,044,498. The cash received during the year was £32,773,275; and the trade charges £1,865,121. The Societies showing sales of over a quarter of a million were—The Co-operative Wholesale, Civil Service Supply Association, Leeds Industrial Co-operative, Sowerby Bridge United District Flour, Oldham Industrial Co-operative, Bury Co-operative, Great and Little Bolton Co-operative, Newcastle upon-Tyne Co-operative, Gateshead Co-operative, Barnsley British Co-operative, and Rochdale Equitable Pioneers. The Co-operative Wholesale has developed very large proportions, and has a turn-over of nearly £5,000,000. It has recently erected extensive premises in London.

Cooper, Thos. Sidney, R.A., b. 1803, at Canterbury. After struggling against adversity in his early life, in '23 he entered the R.A. school, through the influence of Sir Thomas Lawrence, and subsequently set up as a drawing-master at Canterbury. Travelled to Brussels, where, under the auspices of Verboeckhoven, the animal painter, he became a very successful artist. First exhibited at the R. A. in '33, becoming A.R.A. in '45 and R.A. in '67. As an animal painter Mr. C. is supreme. His "Cattle Reposing" and "King of the Meadows" are amongst the best of his numerous paintings. Mr. C.'s works have been more frequently copied, perhaps, than those of any other living artist. After becoming famous Mr. C. returned to his native city, in the affairs of which he takes a lively interest. He presented its corporation with an Art Institute in '82. A fine portrait of Mr. C., by Mr. Oulless, was exhibited at the R. A. last year. To the same exhibition Mr. C. contributed "In the Meadows at Noon."

Cooper's Hill College. See ROYAL COLLEGE OF ENGINEERING.

Copais Lake Drainage. To complete this great scheme of reclamation (which was described in ed. '87—a drainage canal, the work of five years, was opened on June 12th, '86 in the presence of the French Minister and other distinguished persons from Athens, as mentioned in our last volume) the French Company was reconstructed in the form of an English Company, and in Feb. '88, asked subscriptions for £150,000 of 6 per cent. First Mortgage debentures at £95 per £100. The French company, having, it was stated, done the heavier part of the work at an expenditure of £400,000 took shares in the new company for its interest. It was calculated that the completion would be carried out in 2½ years, the land reclaimed or in process of being reclaimed amounting to 60,000

acres. In their first annual report, made up to Oct. 31st in Greece, and to Nov. 30th in London, it was stated that the above issue had been most favourably received. It was further shown in the report that the Company held investments of the value of £29,456, which stood as a guarantee for the payment of the interest on the debentures, and had then on deposit and drawing account the sum of £57,256, while the amount expended on construction account to that date was £34,315.

Cope, Charles West, R.A. (retired), b. 1811, is well known as a painter of historical and domestic pictures. Elected A.R.A. (1844) and R.A. (1848). He has been a most successful fresco painter, as his works in the Peers' Corridor of the House of Lords fully show. The subjects of the eight frescoes which he there painted are: "The Raising of the Royal Standard," "Defence of Basing House," "Expulsion of Fellows from Oxford for refusing to sign the Covenant," "Burial of Charles I.," "Speaker Lenthall asserting the Privileges of the Commons," "March of the Train-bands to relieve the Siege of Gloucester," "Departure of the Pilgrim Fathers," and "Parting of Lord and Lady Russell." Mr. Cope is a trustee of the Royal Academy.

Copeland, Ralph, Ph.D., F.R.A.S., the Astronomer-Royal for Scotland, and Professor of Practical Astronomy in the University of Edinburgh, was b. 1837 at Woodplumpton, Lancs. After being employed by a firm of eminent engineers in Manchester, Prof. C. decided to devote his life to the study of astronomy, and with this view entered the University of Göttingen in '64, becoming volunteer assistant under the late Prof. Klinkerfuss, at the Observatory. Was a member of the Arctic Expedition, which claims the distinction of being the first which wintered on the Arctic coast of E. Greenland. Assisted for a time the Earl of Rosse in his observations; and since '76 has been connected with Lord Crawford's observatory at Dun Echt. For the purpose of observing the transit of Venus, Prof. C. has paid visits to Mauritius and Jamaica; and in '83 took astronomical observations in Peru and Bolivia, at various heights rising to 14,400 feet. On the resignation of Prof. Piazzi Smyth, the appointment of Astronomer-Royal for Scotland was conferred on Prof. Copeland.

Copper. Some thirty-five years ago the world's production of copper was calculated at about 45,000 tons per annum; now the actual output from all sources amounts to over 260,000 tons. This, however, could be increased without difficulty if there was sufficient demand for the metal, and the market price was such as to allow many of the mines to be worked at a profit. With the great fall in the value of copper many of the mines have almost ceased to be worked, this being very noticeable in Australia. The great increase in the production of the world dates from between '80 and '84. The result of this has been that while America stands first, with an output of nearly 104,000 tons per annum, and the product of Spain has been augmented to over 63,800 tons, that of England has receded to 1330 tons of metallic copper, that of Australia to 7,450 tons, and that of Chili to 31,240 tons. The chief feature of '89 was the great collapse which took place in the first week in March, through the failure of French financial houses to sustain the market under the ever-increasing supplies.

Between the end of December and the end of March the visible supply was augmented about 20,000 tons, making the stock in England and France, and afloat thereto from Chili and Australia, 124,876 tons. At the beginning of the year the value of Chili bars and G.M.B.'s were quoted £77 10s. per ton, on Feb. 28th £78, while on March 31st the price was £39 5s., and it further receded to £37 15s. at the end of April. At the time of the collapse the French speculators held about 120,000 tons of copper, which had been partly purchased under an agreement with twenty-seven mining companies to take their annual output at prices ranging from £60 up to £70 per ton. The operation entered upon by the Société des M. teaux combination to maintain the value of the metal over £60 per ton proved to be more difficult than was anticipated, as the consumptive demand scarcely averaged 5000 tons per month, while the monthly average supplies were about 10,400 tons. Consumers would not pay the prices demanded, and only purchased the smallest possible quantities, contenting themselves with using all the old copper which could be procured. After the crisis, which brought down the Comptoir d'Escompte, was over, manufacturers commenced to replenish their stocks when the metal was obtainable at a reasonable figure, so that the visible supplies on Nov. 1st were reduced to 103,540 tons, or a declension of 21,000 tons in the seven months. The value improved with the heavy deliveries, which have increased to about 13,800 tons per month, in consequence of the trade revival throughout the country, and cash warrants once more touched £48 per ton.

Copyright, English. The first English Copyright Act, passed in the reign of Queen Anne, gave the author an absolute right of fourteen years, with an additional fourteen years in case of the author or his representative surviving this term. By an Act of George III. the period was increased to twenty-eight years, and the remainder of the author's life, if any. The Act at present in force (5 and 6 Vict., c. 45) fixes copyright at forty-two years, or the period of the author's life, with a grace of seven years, whichever is the longer. Copyright covers literary, dramatic, artistic, and musical property. The Act provides that the owner of a copyright shall present one copy of the article protected, if published, to the Library of the British Museum, and one copy each, if demanded, to the Bodleian Library, Oxford, the University Library, Cambridge, the Advocates' Library, Edinburgh, and the Library of Trinity College, Dublin.

Copyright in Government Publications In a Treasury Minute relating to this subject, and dated 31st August, 1887, Government publications are classified as follows:—(1) Reports of Select Committees of the two Houses of Parliament, or of Royal Commissions. (2) Papers required by Statute to be laid before Parliament.—e.g., Orders in Council, Rules made by Government Departments, Accounts, Reports of Government Inspectors. (3) Papers laid before Parliament by Command.—e.g., Treaties, Diplomatic Correspondence, Reports from Consuls and Secretaries of Legation, Reports of Inquiries into Explosions or Accidents, and other Special Reports made to Government Departments. (4) Acts of Parliament. (5) Official books.—e.g., Queen's Regulations for the Army or Navy. (6) Literary or quasi-literary Works.—e.g., the

Reports of the Challenger Expedition, the Rolls Publications, the forthcoming State Trials, the "Board of Trade Journal." (7) Charts and Ordnance Maps. As respects the first five classes of publications, "the reproduction of them with certain exceptions, should not," says the Treasury, "be restricted in any form whatever. Indeed, in most cases it is desirable that they should be made known to the public as widely as possible." The first exception is, that Acts of Parliament and official books should not, except when published under the authority of the Government, purport on the face of them to be published by authority. The second exception is, where a work of a literary or quasi-literary character comes accidentally within these classes. For example, the Reports of the Historical Manuscripts Commission would, but for the fact that they were produced under the direction of a Commission instead of under the Master of the Rolls, be published in the ordinary manner like the Rolls publications, and come within Class 6. So, again, a Report to a Government Department may be laid before Parliament made by a person of eminent scientific knowledge, who is willing to give the Government and the public the advantage of his knowledge, but not to allow it to be reproduced for the private benefit of an individual publisher. Other exceptions will, no doubt, from time to time occur, which can only be dealt with as they arise. As regards the sixth and seventh classes above mentioned, it seems desirable to the Treasury that the copyright in them should be enforced in the interests of the taxpayer and of literature and science. Notice of the intention to enforce the copyright in any work should, the Treasury say, be given to the public. In the case of future works this can be given by prefixing to the work an announcement to the effect that the rights of copyright are reserved. In the case of past works it will be desirable to inform the publishing trade of those the reproduction of which without permission is forbidden. See STATIONERY OFFICE.

Copyright, Law on, in '89. In an action for infringement of copyright (*Harris v. Smart*, Court of Appeal, June 22nd), it appeared that the plaintiffs' book was registered at Stationers' Hall as "Illustrated Book of Shop Fittings," but that these words nowhere appeared in the book, the front page merely giving a description of the plaintiffs' firm and of the contents of the book. It was consequently held that the title of the book was not registered in accordance with the Copyright Act of '42, and that the plaintiffs' action for infringement therefore could not lie. The Court of Appeal, confirming a judgment of Mr. Justice Denman, refused (Nov.) Mr. Gilbert an interlocutory injunction against the interpolation of other people's songs into his version of the comic opera "Les Brigands." Messrs. Boosey, the defendants, offered in the playbills to announce that the songs in question were not written by Mr. Gilbert.

Coquelin, Benoît Constant, is the son of a baker, and was b. at Boulogne sur-Mer, 1841. He was admitted to the Paris Conservatoire in '59, and made his *début* at Théâtre Française, Dec. 7th, '60, when he appeared as *Gros-René* in the "Dépit Amoureux." He is not only very popular as an actor, but is a great favourite in French society as a reciter. He is an older

brother of E. A. Coquelin, who is also a celebrated actor.

Corea. A kingdom embracing the peninsula lying between the Yellow Sea and the Sea of Japan, with an area of about 82,000 sq. m., and a population estimated at about 10,000,000. Capital, Seoul, pop. 250,000. Government modelled on that of China, which is the suzerain of Corea, and directs her foreign policy. Very little is known of the interior, either as to the people or the nature of the soil; but rice, millet, cotton, hemp, tobacco, and many fruits are grown on the fertile territory skirting the sea, and the people are similar in their habits and customs to the Chinese on the neighbouring mainland. The foreign commerce is carried on at the three Treaty Ports of Jenchuan, Fusan, and Yuensan. (For earlier details see ed. '89.) On Dec. 8th, '88, the *Times* stated that an attempt had just been made through an American citizen to raise a Korean Loan in the United States, but the terms demanded were such that the Korean Government could not accede to them. The *Times* of Dec. 27th published a summary of a letter addressed by Mr. Denny, the King's Foreign Adviser, to an Eastern paper, in which he explains how he received his appointment through Li Hung Chang, and also says that the publication of his pamphlet (see '89 ed.) was directed against the conduct of the Chinese resident at Seoul, and not against China itself. Early in Jan. '89 it was reported that the audience difficulty between the King of Corea and the British representative (see '89 ed.) had been settled, and the representative had been received at court. During his visit to China, Mr. Denny took occasion to speak of the position of Korean affairs, pointing out that the obvious policy of the country was to claim entire autonomy (*Times*, Feb. 8th). A telegram from St. Petersburg, dated March 19th, says: "The treaty dated Aug. 8th, '88, concluded between Russia and Corea, granting certain privileges to Russian trade carried on by land, is promulgated to-day." It was stated on March 21st that arrangements had been made by which Mr. Denny, the King's Foreign Adviser, was to leave the country, the Chinese Resident, Yuan, being at the same time withdrawn. Details of the above-mentioned treaty appeared in the *Times* of March 23rd. The mail arriving in London early in April brought news that the Chinese Government persisted in retaining its Resident at Seoul. It was stated here on April 18th that Mr. Hillier, Chinese Secretary to the British Legation at Peking, had been appointed Consul-General to Corea. It was also reported that treachery had been discovered in the Chinese Residency at Seoul, a secretary to the Resident having been in the habit of conveying information to Mr. Denny, who, on discovery, aided him to escape to Hong Kong. It was reported, according to the *Times* of June 6th, that the difficulty between the Foreign Adviser to the King and the Chinese Resident was to be settled by the withdrawal of both. Mr. Denny, who was then out of the country, was not to return, and Yuan, the Chinese Resident, was to be succeeded by two officials closely connected with Li Hung Chang, one of them, Lo, having been his private secretary. From the report of the British Consul-General in Corea, published in August, the total net value of the trade of the country in '88, excluding gold exports, was £814,514,

against £729,540 in '87, and £571,002 in '86. The imports amounted to £597,000, and the exports to £217,149. Besides gold, the exports of ginseng are not given, although of increasing value. When the mail arriving in England at the end of August left, a dispute was proceeding at Seoul between the Government and the French Minister, owing to a native servant having been beaten by order of a Korean official. It was announced on Aug. 30th that the Rev. C. J. Corfe, M.A., Chaplain of H.M.'s Dockyard, Portsmouth, had been selected as Bishop of Corea, and he was subsequently consecrated. The bishopric is without endowment, but the bishop will have the use of certain funds provided by the Society for the Propagation of the Gospel. Consult "Life in Corea" ('88), by W. R. Carles, F.R.G.S.

Corinth Ship Canal. The first sod of this canal across the Isthmus of Corinth was turned by the King of Greece in April 1882. The isthmus is about 3½ miles in breadth, there being a backbone in the middle 120 to 180 feet high, which is approached on each side by a plain from the sea-shore. A port and harbour will exist at each end of the canal. Early in '88 it was stated that the 30,000,000 francs had been deemed insufficient to finish the work, and that power had been obtained to raise further funds, so that an issue of 60,000 more shares of 500 francs, each bearing 6 per cent. interest, had been decided upon. During the latter part of '88 the work was steadily proceeded with under Herr Kapp, there being some alterations in the configuration of the banks, while the water width of the canal was slightly increased at the top and narrowed at the bottom. The *Bulletin du Canal de Corinthe* (see *Times*, March 6th, '89), says: "During the last three months work has continued regularly and almost without interruption, except for feasts. Despite the season, there has been an average of five working days a week. The coldest weather experienced was two degrees below zero. There was a little snow, which did not, however, lie long, and in January one or two shocks of earthquake. The number of workmen engaged varied between 1,200 and 1,400. The cube executed in this period was 382,000 metres, or an average of 5,500 per working day. No falling in occurred, and the subterranean waters gave no trouble. A new place of discharge for 250,000 metres of earth has been assigned the contractors close to the workshops at Isthmia. All arrangements are being made for the renewal of the work in the spring." On March 13th it was reported from Athens that work had been suspended, the company being affected by the financial crisis in Paris. The British Consul General at Patras, in his report for '88 (see *Times*, April 20th, '89), says that the Corinth Canal Managing Committee had decided to defer payment of interest to the shareholders. The canal was to be completed in '88, at a cost of 30,000,000 fr., but this was not possible before '91, at a cost of double the estimated expenditure. The report continues: "The canal is 3½ miles in length; according to the original plan, it was reckoned that 8,000,000 cubic metres of earth should be extracted at the cost mentioned, which included 5 per cent. interest per annum to shareholders. A committee having been appointed by the Government to inquire into the difficulties which have arisen, it was informed that the period for completing this work should

be extended, and that angles of slope should be reduced, and the sides protected by walls, to prevent any earthslips. On account of these alterations, the period for the completion of the work is extended to Nov. '91. The amount of cubic metres of earth to be extracted is increased to 10,000,000, and the cost to 60,000,000 fr." It was further telegraphed (March 2nd) that the *Société pour la Construction* claimed from the Corinth Canal Company over 1,000,000 fr. Its representative had seized already 700,000 fr. worth of material, and that the works would be entirely stopped on April 1st.

"**Cornhill Magazine**" (monthly). Established Jan. '60 as a shilling magazine. First editor, W. M. Thackeray. Price altered to sixpence July '83. Contents: General literature, and articles of a popular scientific character. Also an instalment of a serial story by a well-known writer. Editor, Mr. James Payn. Office, 15, Waterloo Place, S.W.

Coroners' Inquests. The following are the statistics of inquests held in each of the years '87 and '88 (latest return), distinguished under the different verdicts:—

| Verdict. | 1887. | 1888. |
|---|--------|--------|
| Murder | 196 | 187 |
| Manlaughter | 154 | 110 |
| Justifiable homicide | 7 | 6 |
| Suicide | 2,227 | 2,297 |
| Accidental death | 11,983 | 11,550 |
| Injuries, causes unknown | 283 | 259 |
| Found dead | 2,043 | 2,157 |
| Executed | 29 | 17 |
| Natural death:— | | |
| From excessive drinking | 372 | 355 |
| Disease aggravated by neglect | 129 | 139 |
| Want, cold, exposure, etc. | 250 | 217 |
| Natural causes | 11,241 | 10,695 |
| Other causes | 1,126 | 1,042 |
| Total | 30,030 | 29,057 |

The number of verdicts of murder of infants of one year old and under in 1888 was 71, as against 85 in 1887, 86 in 1886, 65 in 1885, 103 in 1884, 87 in 1883, 86 in 1882, 92 in 1881, 87 in 1880, and 88 in 1879. Of the 71 cases in 1888, 25, or 35·2 per cent., were in the county of Middlesex. In Liverpool there was not one such case; in Manchester, three; in the Bolton district none; in the Salford district one; in the borough of Birmingham three cases.

Coronini, Count Franz, Austrian politician, was b. Nov. 18th, 1833, in Gorizia. Retired from the army in '67, with the rank of colonel, and has sat in the Reichsrath since '71, where he founded ('81) the **Coronini party**—Liberal centre—one of the factions composing the ministerial majority. This party has recently occasionally supported the German-Austrian party, of which Dr. Herbst is the leader, and also, at times, assists with its influence the German party led by Dr. Heilsberg. The Coronini party, however, does not wield much influence in the Lower House of the Austrian Reichsrath, as it numbers only some sixteen members. See **AUSTRIAN POLITICAL PARTIES**.

Corporal Punishment Bill. See **SESSION**, sect. 67.

Corporal Punishment, Law on, in '89. The question whether a schoolmaster who canes a pupil on the hand is guilty of an assault was raised in a special case stated by Mr. Bushby,

magistrate at Worship Street, for the opinion of the High Court (Nov. 5th). It was admitted that the pupil had committed a fault calling for punishment, and received four strokes on the hand with a cane. The learned magistrate, however, thought that such punishment was attended with risk of serious injury to the hand, and that there were other methods of corporal punishment "quite as available and efficacious," but not necessarily attended with any risks. He therefore decided that in the circumstances caning was improper. The Queen's Bench Division found that the magistrate was wrong in deciding that caning on the hand was necessarily attended with risk to the hand, and the conviction was accordingly quashed.

Corporation of London, The, is the Municipal Authority for the City of London; but its powers and duties in that capacity are not regulated by the general law relating to Municipal Corporations; they have, however, to a certain extent been defined and regulated by special Acts of Parliament. Under the London Coal and Wine Duties Continuance Acts 1861, '63, and '68, the C. collected coal duties amounting to 1s. 1d. per ton on all coals coming into the Metropolitan Police District, and a wine duty of 4s. per tun on all wine imported by way of merchandise into the port of London. The net proceeds of this wine duty, and of 9d. out of the 1s. 1d. per ton coal duties, were required, by the above-mentioned Acts, to be paid by the C. to "The Thames Embankment and Metropolis Improvement Fund" at the Bank of England; the amounts thus paid being subsequently included as receipts in the accounts of the defunct Met. Board of Works. The net proceeds of the remaining 4d. out of the 1s. 1d. per ton coal duties are applicable primarily to the payment of interest and principal in respect of moneys borrowed under the Holborn Valley Improvement Acts '64, '67 and '69, and the Holborn Valley and Farringdon Market Improvement Act (see **COAL AND WINE DUES**, and **SESSION '80**, sect. 63). The C. were also empowered by the **Metage on Grain (Port of London) Act, 1872**, to levy a grain duty of three-sixteenths of a penny per cwt. in respect of all grain brought into the port of London, which duty is, subject to the provisions of that Act, to be held by the C. for the preservation of open spaces in the neighbourhood of London, not within the Metropolis, as defined by the Metropolis Management Act, 1855. The only rates made by the C. are the **Police and Ward Rates**, which are made under the City of London Police Act 1839. The Police Rates are applicable to the payment of three-fourths of the expenses of the City Police, the remaining fourth of which expenses are, under Section 57 of the above Act, payable by the C. "out of their revenues and possessions." Of the estates of the C., the **Bridge House Estates**, prior to the passing of the Blackfriars Bridge Act 1863, were held by the C. "in trust for the maintenance and support of London Bridge." By that Act, and the Blackfriars and Southwark Bridges Act, 1867, the C. were empowered to borrow on the credit of these estates, for the purpose of rebuilding Blackfriars Bridge and purchasing Southwark Bridge from the Southwark Bridge Company, and the expenses of lighting, watching, and maintaining the two last-mentioned bridges were made a charge on these estates. A considerable number of other local Acts have

been passed at various times relating to the Corporation and their estates.

Coronico. An island of the Mediterranean, and a department of Franco, separated from Sardine by the Strait of Bonifacio. Area, 4,376 sq. m.; pop., 278,501. Capital, Ajaccio, the birthplace of Napoleon Bonaparte. Other towns, Bastia and Corte.

Cortes. See SPAIN.

Costa Rica is the most southern republic of Central America. Capital, San José. It is governed by a President, a Senate, and a Chamber of Representatives, each elected for four years by the "respectable" inhabitants. Constitution promulgated in '59, but frequently interrupted by pronunciamientos, and practically suspended from '70 to '82. Area 23,000 sq. m.; estimated pop. in '86, 196,270. Estimated revenue in '88, 3,594,743 pesos; expenditure, 3,484,782 p. Foreign debt, £2,000,000. Imports in '87, 5,601,225 p.; exports, 6,236,563 p. Chief exports, coffee and bananas. Valuable metals exist in various parts of the country, and mining industry is making progress. In '88 there were 180 miles of railway and 420 miles of telegraph. For Ministry, etc., see DIPLOMATIC.

Cottage Arts Association. See HOME ARTS ASSOCIATION.

Cotton, James Sutherland. b. in India 1847, the son of J. J. Cotton, I.L.E.I.C.S., educated at Winchester School, and at Trinity College, Oxford; first class in moderations and in the final schools; Fellow of Queen's College. Called to the bar at Lincoln's Inn '74, and went the Western Circuit. Has undertaken much literary work in connection with India; assisted Sir W. W. Hunter (q.v.) in compiling the "Imperial Gazetteer of India," and in revising the second edition; wrote "India" in Macmillan's "Citizen Series"; prepared for the Government a report upon the administration of India for the ten years '73-'74 to '82-'83—a blue-book of nearly four hundred pages. Editor of the *Academy* (q.v.) since '80.

Cotton, Rt. Hon. Sir Henry, a Lord Justice of Appeal, was b. 1821. Educated at Eton and Oxford. Called to the bar at Lincoln's Inn '46; Q.C. '66; Bencher of his Inn '67. Standing counsel to the University of Oxford '72. Appointed a Lord Justice of Appeal '77.

Cotton Cloth Factories Act, '89. See SESSION, sect. 68.

Cotton Trade, '89. The chief event of the year was the creation of a "corner" and the utter collapse of the same. The chief promoter of the "corner" came to the conclusion that the supply of cotton during the year would not be sufficient to meet the requirements of the world except at a more or less important rise in prices from the low rates current in the winter and spring months, and acting on this belief he bought largely. The Lancashire spinners, on the other hand, failed to take a similar view of the situation, and did not recognise their mistake till the price of their raw material had advanced to a figure at which they could not purchase it for manufacture at a profit. Their only remedy was to put their mills on short time, and by thus lessening the demand for cotton bring down the price. Many spindles and looms were stopped for a time, and of course serious loss was entailed on the workpeople. With a view to insuring the defeat of the "corner," should the steps already taken fail in their purpose, a large majority of the spinners agreed to stop operations entirely

during the first two weeks of October. This extreme step was, however, found to be unnecessary; for, on Sept. 30th, the "corner" underwent a complete collapse, and the price of cotton fell a halfpenny per pound. The

districts with great satisfaction. After the check caused by the "corner" was got over, spinners purchased largely of cotton futures, and work in the mills proceeded on an increased scale. A feature of the trade has been the growing demand for bundle yarn and cloth from the great Eastern markets. To meet this, a good deal of the machinery that had been idle for some time has been set in motion, and a number of new mills fitted with improved machinery are being built. An important question has been raised with regard to the possibility of the United Kingdom retaining its fair share of the cotton manufacture of the world. A serious fact in the case is that the Continent now consumes more cotton than is spun in this country, the totals for last season being 3,770,000 bales for us as against 4,069,000 for the Continent, while the consumption of the United States has reached 2,906,000 bales. The consumption of the world for the season '89-'90 is estimated at 11,080,000 bales of 400 lb. each—the United Kingdom taking 3,077,000, the Continent 4,205,000, and the United States, Canada, etc., 2,906,000. From the Board of Trade returns for October the following figures are drawn. The imports of raw cotton into the United Kingdom for the ten months up till Oct. 31st were 12,094,123 cwt., as against 10,843,352 cwt. in the same period of the year '88. The exports (foreign and colonial) of raw cotton were 2,049,546 cwt. against 1,970,183 cwt. in the ten months of '88. The cotton yarn exported was 211,220,600 lb., as against 215,324,400 lb. in '88. The piece goods exported in the ten months of the two years were 4,177,990,600 yds. in '89, and 4,207,768,200 yds. in '88.

Couch, The Right Hon. Sir Richard, b. 1817, was called to the bar in '41. In '62 he was appointed a puisne judge in India. Four years later he was promoted to be Chief Justice of the High Court of Judicature at Bombay, subsequently receiving the honour of knighthood. Succeeded Sir Barnes Peacock as Chief Justice of the High Court of Calcutta ('70). On resigning in '75 he was sworn of the Privy Council, and was appointed a member of the Judicial Committee of that body ('81).

Council of India Reduction Act, '89. See SESSION, sect. 69.

Councils, Ecumenical. An Ecumenical Council is one which represents the whole Christian Church. Of these there have been four recognised by the Reformed English Church, viz.:—(1) The first of *Nicea* (A.D. 325), condemned Arianism and formulated the *Nicene Creed*. (2) *Constantinople* (380), added to the *Nicene Creed*. (3) *Ephesus* (431), condemned Nestorius. (4) *Chalcedon* (451), declared the divine and human nature of Christ, and set its seal on the additions to the *Nicene Creed* made at Constantinople. Amongst other Councils, reckoned by the Roman Church as Ecumenical, may be mentioned the *Second of Nicea* ('787), permitting worship of images. *Fourth Lateran* (1215), transubstantiation held to be an article of faith. *Constantine* (1414), the cup denied to the

laity. *Treat* (1546-63), condemned the reformers. *Rome* (1869), decreed papal infallibility.

Countess of Huntingdon's Connexion. The, owes its existence to the religious revivals in the eighteenth century, with which Whitfield and the Wesleys are so prominently identified. The Countess of Huntingdon (d. 1791) had been a member of the Established Church, but finding that the parochial system interfered with her intense desire to have the gospel preached in every place in England, she cast in her lot with the Nonconformists. The liturgy formed part of the religious worship in her chapels, and it is still used in some of them. The Connexion has never been numerically strong. During life her control was absolute. Her successors were unable to exercise a similar control; and although a trust was created a few years after her death, many leasehold chapels lapsed into other hands. At one time the preaching stations numbered over a hundred; now those under the Trustees amount to over thirty, not including village stations vigorously maintained by the principal churches, and Countess's chapels which are beyond the control of the Trustees of the Connexion. Cheshunt College has been rebuilt. New Spa Fields Church has been erected. The Connexion chapels generally have been adapted to the religious requirements of the age, and the Trustees have faithfully endeavoured to maintain an evangelical ministry in every chapel of the Connexion. All its ministers have to subscribe to the "Fifteen Doctrinal Articles" of the Church of England, as are the professors of Cheshunt College and the students, with a view of carrying out the Countess's idea—the continuance of an earnest evangelical ministry. See, Rev. W. M. Lennox. *Offices*, Cheshunt Coll. Rooms, 13, Blomfield St., E.C.

Country Holidays Fund. This and similar Funds (e.g., the Children's Fresh Air Mission) have recently arisen in London to organise holidays, never less than two weeks, for poor sickly city children by boarding them with country cottagers, who are paid 5s. a week per child; and much good has resulted from the movement, several thousands of children being annually benefited. Similar efforts in New York, Berlin, etc., have been equally successful. The Bishop of London and Chairman of the London School Board have each written special appeals in '89. *Patroness*, H.R.H. the Princess of Wales. See, Cyril Jackson. *Treas.*, Hon. A. Lyttelton. *Offices*, 10, Buckingham St., Strand.

County Councils. Under this heading is included lists of the aldermen and county councillors for the administrative counties of London, Bedford, Berks, Bucks, Essex, Herts, Kent, Middlesex, Oxford, Southampton, Surrey, and Sussex, there being added, in the case of London, some particulars regarding the election and concerning such proceedings of the Council as were considered to be of sufficient importance to deserve preservation for purposes of reference. An outline of the main provisions of the Local Government (England and Wales) Act, 1888, reprinted from our '89 edition, will be found elsewhere in our columns. In pursuance of that Act the first elections of county councillors were held in January '89. [1] It was enacted that the number of councillors for the administrative county of London should be double the number of members (59) which the boroughs in the Metropolis are authorised by statute to return to serve in Parliament, and that the number of

county aldermen should not exceed one-sixth of the whole number of councillors. In some of the constituencies candidates presented themselves almost before the Act received the royal assent; and although the Metropolis seldom manifests the amount of interest in Parliamentary or municipal affairs which is shown by most provincial towns, the numbers polled in the majority of the divisions were evidence that London had in this instance appreciated the importance of the occasion. In some of the constituencies the candidates professedly stood and the contests were avowedly fought on the ordinary political lines; in others, notably the City, men of pronounced political opinions declared that they stood on purely non-party grounds, and both they and the electors of different parties who came forward in their support studiously kept politics out of the election. The nominations took place on Jan. 9th, and the candidates included three peers (viz., Lords Rosebery, Sandhurst, and Monckswell), seven M.P.'s (namely, Sir J. Lubbock, Mr. Lawson, Mr. H. Vincent, Mr. Conybeare, Col. Hughes, Mr. Boord, and Mr. Firth); twenty-eight members of the Metropolitan Board of Works (including Mr. Vincent and Col. Hughes), and three ladies (viz., Lady Sandhurst, Miss Cobden, and Miss Varley). The only unopposed return in the county was at St. George, Hanover Square. The polling in all the other constituencies took place on Jan. 17th, the results being declared either that night or on the following day. Subjoined are the returns. The names of candidates who were at that time members of the Metropolitan Board of Works are marked with an asterisk; the letter L. signifies Liberal, C. Conservative, N. Non-Political, and Ind. Independent. The names of the unsuccessful candidates are printed in *Italics* :—

BATTERSEA AND CLAPHAM : (Battersea) J. Burns (Socialist) 3,071, J. Tims (L.) 2,307, A. Cameron (L.) 2,279, R. A. Balpy (Ind.) 1,564, G. Harris (L.) 188, *W. Davis* (N.) 54; (Clapham) T. L. Corbett (C.) 2,501, Lt.-Col. A. Rotton (L.) 2,336, H. Turner (L.) 2,286, C. A. V. Conybeare, M.P. (L.) 1,883.

BETHNAL GREEN : (North-East) J. F. Torr (L.) 1,740, W. Wren (L.) 1,700, T. Lumley (C.) 1,456, W. Wright (C.) 718, J. Bishop (N.) 484, J. Milbourne (L.) 401; (South-West) J. Branch (L.) 2,406, C. Harrison (L.) 2,366, T. W. Francis (N.) 975, A. Ewin (C.) 835, J. C. Wallon (Ind. C.) 677.

CAMBERWELL : (North) R. Strong (L.) 1,962, Rev. H. B. Chapman (L.) 1,612, W. E. Teather (Ind.) 1,097, W. B. Thornton (C.) 1,071, D. Rogers (L.) 823; (Dulwich) W. M. Acworth (N.) 2,222, H. J. Powell (C.) 2,151, Lord Sandhurst (L.) 1,810, Dr. Guttridge (L.) 1,622, W. Matthews (C.) 1,400, Dr. H. M. Hardy (Ind.) 125, A. Watten (Ind.) 88; (Peckham) E. Jones (L.) 2,608, R. Lyon (L.) 2,194, J. Howard (C.) 1,639, J. Borland (C.) 1,578, W. E. Dowton (Ind.) 973.

CHELSEA : G. W. Osborn (L.) 3,170, W. E. Smith (L.) 2,512, L. White (Ind.) 1,774, W. Jeffray (C.) 1,617, C. Mossop (N.) 1,217, A. Thompson (N.) 211.

CITY OF LONDON : Sir J. Lubbock (N.) 8,976, Lord Rosebery (N.) 8,032, B. L. Cohen (C.) 3,925, H. Clarke, C.C. (C.) 3,622, G. Shaw (C.) 2,752, G. N. Johnson (N.) 750.

DEPTFORD : E. Collard (N.) 2,994, W. Phillips (L.) 2,283, H. Keylock (Labour) 1,871, A. A. Knight (N.) 1,047.

FINSBURY: (East) J. W. Benn (L.) 1,791, Capt. Sinclair (L.) 1,655, *Mr. Morland* (N.) 1,098, *Mr. Berry* (N.) 1,071, *Mr. Hall* (Ind.) 66; (Central) Lord Compton (N.) 3,333, F. A. Ford (L.) 1,461, H. E. Davis (N.) 1,074, *Mr. Robson* (L.) 841, W. Davies (N.) 561, *Mr. Goods* (N.) 374, J. Ross (N.) 74; (Holborn) A. Hoare (Ind.) 1,430, T. W. Maule (N.) 975, *Mr. Murrough* (Ind.) 749, W. R. Smith (Ind.) 712, *Li. Col. Gardner* (L.) 671, *Mr. Blott* (N.) 234.

FULHAM: J. Beal (L.) 2,309, R. A. Germaine (C.) 1,950, L. Scarth (N.) 1,509, *P. P. Berry* (N.) 1,203, E. G. Easton (N.) 366.

GREENWICH: G. Lidgett (L.) 3,102, R. S. Jackson (L.) 2,025, T. W. Boord, M.P. (C.) 2,440, Alderman Knill, C.C. (C.) 2,390.

HACKNEY: (North) J. Beck (C.) 1,980, A. Davies (L.) 1,805, *J. Runtz* (L.) 1,770, E. Jones (C.) 1,029; (South) *J. Jones* (C.) 2,071, G. B. Holmes (L.) 1,968, *J. Lobb* (Ind.) 1,863, T. Jackson (L.) 1,786; (Central) J. Lowles (C.) 1,764, W. Johnson (C.) 1,602, R. Martin (L.) 1,455, A. Howser (L.) 1,362.

HAMMERSMITH: C. C. Cramp (Ind. C.) 1,591, A. Arter (C.) 1,560, C. Cordingley (Ind. L.) 1,539, W. F. Laxton (C.) 1,127, Col. R. F. Webb (Ind.) 388.

HAMPSTEAD: J. S. Fletcher (N.) 1,730, *H. Harben* (N.) 1,630, E. K. Blyth (L.) 905, T. Birch (N.) 364.

ISLINGTON: (North) W. C. Parkinson (L.) 2,159, Dr. W. E. Grigsby (L.) 2,080, A. Chamberlayne (N.) 1,787, H. Stephen (L.) 1,464; (South) G. S. Elliott (N.) 2,663, R. Roberts (Ind.) 1,284, A. W. Memory (Economist) 1,012, *S. Furlong* (N.) 713; (West) D. H. Macfarlane (L.) 1,661, R. B. Carter (N.) 883, Col. Keene (N.) 854, J. May (Ind.) 798, W. Goodman (N.) 771, Dr. Slater (Ind. C.) 506; (East) A. M. Torrance (L.) 2,388, C. Horsley (C.) 2,066, H. R. Taylor (N.) 512, T. F. Stonelake (Ind.) 371, Miss Varley (Ind.) 226.

KENSINGTON: (North) *F. C. Frye* (L.) 3,026, J. Lloyd (L.) 2,163, E. M. Daniel (C.) 1,770, J. J. Slansfeld (L.) 559; (South) C. H. Campbell (N.) 2,086, Capt. W. H. James (N.) 2,015, T. Melidew (L.) 861, *J. Webb* (C.) 738, *W. A. Lindsay* (N.) 629, J. W. Duffield (N.) 596.

LAMBETH: (Brixton) Capt. Verney (L.) 2,112, Lady Sandhurst (L.) 1,986, C. Beresford-Hope (C.) 1,686, H. Smallman (C.) 1,397; (Kensington) H. Myer (L.) 2,139, H. S. Foster (C.) 1,192, *C. W. Andrew* (C.) 1,061, C. R. White (L.) 918, W. Stockbridge (L.) 211; (North) J. R. Hoare (C.) 1,361, H. Bell (C.) 1,130, Col. Ford (Ind. C.) 1,000, Rev. F. G. Pelham (N.) 955, *C. W. Ryalls* (Ind.) 954, J. H. Lile (L.) 794; (Norwood) W. B. Doubleday (L.) 2,101, N. W. Hubbard (L.) 1,525, F. Day (C.) 1,399, H. W. Chatterton (C.) 1,326, J. S. King (C.) 435, A. Cave (Ind.) 35.

LEWISHAM: W. G. Lemon (L.) 2,351, F. S. Brereton (C.) 2,127, A. Poyser (N.) 1,889, C. A. P. Conybeare, M.P. (L.) 1,312.

MARYLEBONE: (East) H. S. Marks (C.) 1,874, H. B. T. Farquhar (C.) 1,815, Sir T. Farrer (N.) 1,300, T. Holmes (N.) 1,201; (West) E. Boulnois (C.) 2,278, Sir R. Hanson (N.) 2,231, F. Debenham (N.) 1,683, R. E. Farrani (N.) 1,438.

NEWINGTON: (West) Dr. G. Bott (L.) 1,656, A. B. Hopkins (L.) 1,594, E. M. Mullins (Ind.) 1,084, W. S. Siegel (C.) 803, F. Sutton (C.) 793; (Waltham) J. Marsland (L.) 1,012, W. Saunders (L.) 1,787, J. Pain (C.) 1,031, E. Yates (C.) 866, H. Quench (Socialist) 793.

PADDINGTON: (North) R. M. Beachcroft (C.) 1,779, E. P. Young (C.) 1,598, *Mr. Maberly* (L.)

1,170, *M. H. Judge* (N.) 1,043; (South) *T. G. Fardell* (C.) 1,631, Sir G. D. Harris (N.) 1,368, A. E. Dobbs (N.) 1,283, Rev. Mr. Cox (Ind.) 213, H. G. Mills 286.

ST. GEORGE: (Hanover Square) R. Antrobus (N.) and H. Vincent, C.B., M.P. (N.), were nominated, and there being no other candidates they are duly elected.

ST. PANCRAS: (North) T. H. Williams (N.) 1,536, C. L. Lewes (N.) 1,128, *Mr. Wattenhall* (N.) 1,087, Mr. Dixon (C.) 1,051, *Mr. Leighton* (Ind.) 614; (South) J. Hutton (N.) 1,672, Col. Edia (N.) 1,322, *Mr. Matthews* (C.) 620, *Mr. Burroughs* (C.) 577, *Mr. Bartlett* (Socialist) 277; (East) N. Robinson (Ind.) 1,824, T. B. Westcott (C.) 1,649, *Mr. Samuel* (C.) 1,259, *Mr. Hallett* (N.) 1,059, *Mr. Hobart* (Socialist) 471; (West) H. L. W. Lawson, M.P. (L.) 2,800, H. H. Raphael (C.) 1,594, *Mr. Allen* (N.) 1,198, *Mr. Baker* (Ind.) 738.

SHOREDITCH: (Haggerston) J. F. B. Birch (L.) 1,791, Lord Monkswell (L.) 1,671, H. W. Mason (C.) 1,035, Major F. M. Wenborn (N.) 978, Major H. Greenwood (Ind.) 507, J. R. Sackett (C.) 60; (Hoxton) E. Austin (L.) 1,901, N. Moss (L.) 1,703, E. T. Holloway (N.) 1,319, W. Beasley (N.) 844, H. A. Barker (Labour) 169, F. J. Genge (Ind.) 142.

SOUTHWARK: (West) A. H. Haggis (L.) 2,030, J. G. Rhodes (N.) 2,024, *T. F. Rider* (C.) 1,431, R. D. Hilton (N.) 869, H. Slopes (Ind. C.) 776; (Bermondsey) G. J. Cooper (L.) 2,602, J. Thornton (L.) 2,401, T. Brooksbank (N.) 1,280, H. C. Smith (N.) 1,319, *W. Shepherd* (N.) 556; (Rotherhithe) F. Carr-Gomm (Ind. L.) 1,068, L. Stevens (L.) 1,652, J. Bulner (C.) 1,607, W. W. Tyler (C.) 741.

STEAND: A. A. Harris (N.) 2,146, Capt. Probyn (N.) 1,407, E. C. Keevil (L.) 1,284, J. Bonthron (N.) 893, E. Cartice (N.) 822, S. D. Laing (C.) 597, W. Emden (N.) 498, J. R. Hale (Ind.) 55.

TOWER HAMLETS: (Bow and Bromley) W. Hunter (C.) 2,759; Miss J. Cobden (N.) 2,045, *E. R. Cook* (L.) 1,722, J. H. Howard (C.) 1,561; (Mile End) F. N. Charrington (N.) 1,424, A. J. Hollington (N.) 1,265, R. Hirst (Ind.) 1,187, F. J. Reilly (C.) 1,172; (Stepney) Capt. W. S. Beaumont (C.) 1,808, B. F. C. Costelloe (L.) 1,122, J. T. Kemp (N.) 1,316, J. Woollen (L.) 1,185; (Whitechapel) S. M. Samuel (L.) 1,523, C. Tarling (L.) 1,477, M. Abrahams (Ind.) 1,205, J. Harris (Ind.) 854, T. Catmur (Ind.) 845, H. W. Henderson (C.) 512; (Poplar) W. P. Bullivant (C.) 2,925, J. McDougall (L.) 2,345, Hon. R. C. Grosvenor (N.) 2,215, *J. Lenanton* (Ind.) 1,563; (Limehouse) J. Ambrose (L.) 1,817, A. Leon (L.) 1,684, Mr. Johnson (Ind.) 1,243, J. Abbott (N.) 1,067, Mr. Cox (Ind.) 204; (St. George's-in-the-East) *R. S. Sly* (L.) 1,146, P. Martineau (L.) 786, T. W. Dellow (C.) 558, R. G. Hall (C.) 175.

WANDSWORTH: W. H. Dickinson (L.) 3,232, G. B. Longstaff (C.) 2,837, C. C. Mortimer (C.) 2,624, J. Richmond (Socialist) 927.

WESTMINSTER: Sir W. de Souza (C.) 1,539, V. J. Watney (N.) 1,482, J. Copen (N.) 1,415, Hon. A. J. G. Ponsonby (N.) 1,184, *Mr. De Pinna* (N.) 455, W. L. Josephs (N.) 88.

WOOLWICH: *Col. Hughes*, M.P. (C.) 5,140, Dr. Rentoul (N.) 3,795, J. Watts (Ind.) 2,417, R. Green (L.) 2,430.

Two out of the three peers who stood, and five of the seven M.P.s, were returned, the unsuccessful peer being Lord Sandhurst, and the unsuccessful members Mr. Boord and Mr. Conybeare, the last of whom contested both Clapham and Lewisham; and out of twenty-eight members of the Metropolitan Board who offered themselves, only seven were chosen.

Two out of the three ladies who went to the poll were successful, Miss Varley being the exception; three vestrymen who were not members of the Metropolitan Board were returned, and four were rejected; four members of the Corporation were elected and an equal number were defeated. Among other unsuccessful candidates were Sir Thomas Farrer, Mr. Archibald Dobbs, Mr. Frank Debenham, Mr. Mark Judge (M.B.W.), Mr. Dresser Rogers (M.B.W.), and Mr. William Emden, architect. The successful candidates were said to consist of 70 Reformers or Progressists, and 48 Moderates or Independents. 85 councillors were pledged to vote against a renewal of the Coal Dues. The elected members of the London County Council held their first meeting as a provisional council for bringing the Local Government Act into operation on Jan. 31st, at the offices of the Metropolitan Board, when Sir J. Lubbock was unanimously elected as temporary chairman. On Feb. 5th the second meeting was held, at which the following were elected aldermen:—Lord Lingen 106 votes, Lord Hobhouse 105, Mr. Quintin Hogg 104, Sir T. H. Farrer 70, Mr. F. Harrison 69, Mr. J. Barker 66, Mr. E. Routledge 65, Mr. F. Debenham 64, Mr. S. S. Taylor 64, The Hon. R. C. Grosvenor 64, Mr. A. Arnold 64, Mr. S. H. Morley 63, Mr. E. Gibb 63, Mr. G. W. E. Russell 62, The Earl of Meath 61, Mr. E. Spicer 60, Mr. M. Beaufoy 56, Miss Cons 56, Rev. F. Williams 55. It was decided, on a vote by ballot, that the following aldermen should retire in the third year—that is, on the 7th Nov., '91.—Rev. F. Williams, Mr. J. Barker, Miss Cons, Mr. E. Gibb, Mr. S. S. Taylor, Hon. R. Grosvenor, Mr. S. H. Morley, Mr. M. Beaufoy, Mr. E. Spicer, Earl of Meath. The other aldermen retire on Nov. 7th, '94. The councillors hold office until the next election day, which is Nov. 1st, 1891. [2] The next meeting, being the first assembly of aldermen and councillors, was held at the Council Chamber, Guildhall, the use of which was granted to the provisional Council on application, and the Earl of Rosebery was elected chairman by 104 votes to 17; a motion for the election of Sir J. Lubbock as vice-chairman was carried with only one dissident, and on the question of the election of a deputy-chairman there voted, for Mr. Firth 66, Mr. Fardell 44, Mr. Gibb 27; and the last name being struck out, Mr. Firth obtained 68 votes, and Mr. Fardell 43. Mr. De La Hooke was appointed clerk to the provisional council, and was subsequently appointed clerk to the Council, at a salary of £800, to be increased by annual instalments until it reaches £1,000. The Council subsequently appointed a medical officer. On the question of procedure, a suggestion of the Earl of Rosebery that he should be addressed as Mr. Chairman, and that in their debates the distinction of alderman should be dropped, was adopted.—Numerous applications were made to the Queen's Bench Division by county councillors in various parts of the country for relief from penalties incurred through ignorance of the law affecting their elections, and in the majority of instances the excuses were held to be fair.—The most interesting question as affecting county councils was that relating to the status of women. This matter came before the Queen's Bench Division on the petition of Mr. Beresford Hope that he should be declared duly elected for the Brixton Division, on the ground that the votes given to Lady Sandhurst

were legally thrown away, and that he, as coming next on the poll, was entitled to the seat held by her. Mr. Baron Huddleston and Mr. Justice Stephen held that Lady Sandhurst, being a woman, was incapable of sitting as a county councillor, and that Mr. Beresford Hope, as next on the poll, was entitled to the seat; and on appeal this decision was upheld. The question was discussed at the Council, and a resolution in favour of the principle of the Bills before Parliament, enabling women to be elected and to act as county councillors, was adopted by 53 to 27 votes. (See also Session, sect. 70.) On May 21st Mr. Beresford Hope took his seat at the Council, but it was then stated by the Chairman, on the authority of Sir Horace Davey, Q.C., whose opinion he had taken on the point, that the seats of Miss Cobden and Alderman Miss Cons on the Council were not affected by the decision of the Court of Appeal, although that decision went to show that at the time of their election those ladies were disqualified. Sir H. Davey thought the Chairman might properly invite the ladies to resign their seats, but if they declined to do so he was not bound to do anything further in the matter.—Meanwhile the attention of Parliament, as well as that of the Council, was being attracted to the proceedings of the Metropolitan Board of Works. Several officers of the Board resigned and were pensioned, and to other members of the staff was granted a marked increase of salary. Representations regarding this question of increasing the salaries of some of the staff, which was soon to become the staff of the Council, and also on the proposal to advance the frontage of the Samaritan Free Hospital in Marylebone Road, and in reference to the contract for the construction of the Blackwall Tunnel (*q.v.*), were made to the Board, but, according to a statement of Lord Rosebery, were ignored by the Board. The Board went so far as to open tenders for the construction of the Tunnel; but before the accepted tender had been sealed the Local Government Board, on the application of the provisional Council, who themselves acted on the suggestion of the President of the Local Government Board, took advantage of a section of the Local Government Act and advanced the appointed day (April 1st) on which the Council were to enter upon their ordinary duties to March 21st. On this latter day, therefore, it being the day before that on which the tender was to have been sealed—though, perhaps, it would be only fair to add that Lord Magheramorne wrote, stating that, having asserted its position, the Board would without doubt leave the question of sealing the contract to its successors—the Metropolitan Board ceased to exist, and its powers, duties and liabilities were assumed by the County Council for London, with the other administrative and financial functions conferred upon it by the Local Government Board. The question who should be the responsible chief salaried officer of the Council and head of its staff was considered by the standing committee, who in May presented a report defining the duties of this chief officer, suggesting that those functions should be attached to the office of deputy-chairman, and recommending that, in consideration of his undertaking them, he should receive a salary at the rate of £3,000 a year. When this report was considered by the Council, an amendment of Col. Rotton, proposing that the office of deputy-chairman

should be unpaid, and that the executive duties of the Council should be discharged by a clerk appointed for the purpose, was rejected by 79 to 29, and the report of the committee adopted. [8] The question of rating to meet current expenditure demanded and received the early and close attention of the Council. The last Budget of the Metropolitan Board of Works recommended the levying of a rate for the quarter ending March 31st equivalent to a rate of 10*d.*, being an increase of 1*d.*, which it was said was necessary in consequence of the pending abolition of the coal dues; and a rate of 2*d.* in the £ was accordingly made for the first quarter of 1889, or the last three months of the Board's existence. In the first Budget of the County Council, which was unfolded by Lord Lingen, chairman of the Finance Committee, on March 26th, it was stated that the total rateable value of the administrative County of London was estimated to be £31,386,272, and the sum required to be raised from the pocket of the taxpayer was £1,618,654, equal to a rate outside the City of 12.53*d.*, or 1*s.* 0*d.* in the £. The debt inherited by the Council was about £28,000,000 sterling. [On Dec. 31st '88, the debt of the Board of Works was £27,787,709, but there were assets, including £8,723,986 loans advanced to other bodies, amounting to sufficient to reduce the net liability of the Board to £16,972,469, as compared with a net liability on Dec. 31st '87, of £17,064,963.] In May, when the demand notes for rates had been distributed throughout the Metropolis, the amount was so much larger than usual that the Council thought it expedient to publish a statement to make the public aware of the fact that so far as they were concerned the levy was not merely not heavier, but actually lighter, than before; that of the rate of 12.53*d.* in the £, 8.11*d.* represented expenditure formerly defrayed by the Metropolitan Board, adding thereto the costs of the election of the Council (£12,453), and deducting the aid receivable from the Government under the Local Government Act; and that the precept of the Metropolitan Board for Jan. to March being equivalent to a rate of 10*d.*, there was actually a reduction of 2*d.* in the £ under this head. The remainder—4.42*d.*—represented rates formerly required by the guardians and county authorities, and now included in the budget of the Council, there being no new charge in this sum. The reason of the addition to the rate was that many of the vestries had had to include in the half-yearly demands then in course of collection a three months' expenditure by the Board (Jan. to March 31st), and a seven months' expenditure by the Council (April to Oct. 31st). In other words, owing to the financial year of the Board being different to that of the County Council, there were three demands for rates where two had been usual; but this was to get the dates right, and the ratepayers, it was explained, were not paying three rates for the time of two. Before leaving the question of finance, it may be added that the new money powers conferred upon the Council by the London Council Money Act 1889 (52 & 53 Vict. ch. 67, royal assent Aug. 30th), amounted to a total of £3,475,600, £313,000 of this amount being for the Blackwall Tunnel scheme; but of this total, including the amount set down for the tunnel in question, £1,712,000 was in respect of re-grants of borrowing power previously granted to the Metropolitan Board, so that the amount of the new borrowing powers

was £1,763,487. Of this sum £884,987 was for the Council and £878,500 for loans. The first Money Bill promoted by the Board and introduced on their behalf by the Government, contained a clause enabling the Council to pay the expenses of and incidental to any inquiry to be instituted with respect to the water supply of the County of London; but considerable opposition to this proposal was threatened, and the Government withdrew the Bill, and introduced another without the clause in question.—At the end of the year '88 the Metropolitan Board of Works gave the usual notices required by the standing orders of Parliament of a Bill empowering them to make such further street improvements in the Metropolis as they deemed of an urgent character, with the direct intention of leaving their municipal successors to decide whether or not these proposals or any of them should be proceeded with. These projects included the widening of the Albert Embankment, Vauxhall, and of Nine Elms Lane, Battersea Park Road, and York Road, Battersea, which widenings, although separated by intervals, would form in effect one improvement, the result of which would have been to give a thoroughfare generally 50 feet wide for a distance of 4½ miles; a widening of a short length of Jamaica Road, in extension of an improvement previously carried out by the Board; three separate improvements in Deptford; a widening of Black Lion Lane, Hammersmith; the construction of a bridge at Cromwell Road; and the widening of Kensington High Street, Old Brompton Road, and Mare Street, Hackney. It was also proposed to purchase two plots of land (one being a disused burial ground) between Tottenham Court Road and Whitfield Street, adjoining Whitfield's tabernacle, which plots of land were to be laid out by the Board as a public recreation ground, and to lay out and plant two plots of land at the northern end of Shaftesbury Avenue. The street improvements proposed in the Bill were estimated to involve an outlay of £1,180,000, and the Council decided to abandon them all, mainly on the ground that there was not sufficient time, within the period yet open for proceeding with the Bill during the current Session, to investigate and decide upon the expediency or otherwise of adopting these proposals. The powers taken under the Improvements Bill were therefore limited mainly to the original provisions relative to the acquisition of the disused burial ground and land in Tottenham Court Road, and to the plots of land at the northern end of Shaftesbury Avenue; but new clauses were added prohibiting the erection of buildings on the vacant land at Piccadilly Circus, and enacting that the plot in question should be kept as an ornamental inclosure; and enabling the Council to hold and maintain as a park the piece of ground known as Myatt's Fields, Camberwell. As bearing upon the question of future improvements should be mentioned a report of the Local Government and Taxation Committee recommending that every Act empowering the Council to raise loans should contain a provision that the repayment of such loans and interest should, as between the various classes of persons interested in London property, be borne in such manner as Parliament should either by the same or any other Act direct; and a further provision that no contract should take effect whereby the proportion of expense directed by law to fall on any person should be

shifted to another person. This recommendation was adopted by the Council. A similar recommendation subsequently made, to the effect that Parliament should be petitioned to provide forthwith that the burden of all future loans for permanent improvements should fall upon such persons as the law should hereafter direct, all private contracts to the contrary notwithstanding; and that the Council should postpone all new loans for such improvements which could be postponed without grave inconvenience until Parliament had so provided, was carried (July 9th) by 46 to 37. With regard to the **Blackwall Tunnel** scheme, for which the Metropolitan Board had obtained the necessary Parliamentary powers, the Council adopted a recommendation of the Bridges Committee that it should take precedence of all other schemes for crossing the Thames. This same committee reported that they had given instructions to the architect to take the necessary steps for preserving the licence of a public-house which had been acquired in connection with the construction of Battersea Bridge; but an amendment declaring it to be undesirable to preserve the licence was carried in the Council by 68 to 17.—The **Woolwich Free Ferry**, which had been designed and completed under the auspices of the old Board, was inaugurated by Lord Rosebery (March 23rd); **Olisold Park**, Stoke Newington, was opened to the use of the public in perpetuity by his lordship (July 24th), and on the same day the Countess of Rosebery opened the **St. Martin's Gardens**, Camden Town, as an open space, unveiling on the same occasion a memorial to Charles Dibdin erected therein. The Council agreed to advance on loan £24,747 to the Vestry of Lambeth in connection with the purchase of **Vauxhall Park**, and paid over £17,747 agreed to be contributed by the Board of Works; and in the case of **Brookwell Park** they resolved to contribute one-half the cost, not exceeding £61,000, towards the sum required for the purchase, subject to the removal of their statutory liability to contribute £12,500 towards the cost of **Raleigh Park**.—On the important question of the removal of bars and gates in certain parts of London, a recommendation of the Parliamentary Committee that it should be referred to them to take steps for the removal of some of these, which might be regarded as test cases, by means of a Bill to be promoted in the Session of 1890, was adopted. A report of the Corporate Property, Charities, and Endowments Committee, recommending (June 18th) that the Government be requested to introduce without delay a measure for the purpose of carrying into effect the reforms contemplated by the majority of the **Royal Commissioners** appointed in '80, with reference to the **Livery Companies** of London, including a Bill on the principle of that which was introduced by Sir Charles Dilke and the Attorney-General in '85, was adopted by 57 to 17, after three amendments had been rejected by large majorities.—The question of the continuance of London Coal Dues came before the Council on various occasions. On March 5th it was resolved in the provisional Council by 76 to 34 to give notice that it was intended to oppose the **London Coal and Wine Dues Continuance Bill**; and another recommendation that the unappropriated surplus of the Coal Dues should be claimed by the Council for county purposes, was also adopted. At another time a resolution setting forth that any claim of the City, legal

or equitable, to any coal dues, or to any charges in respect of coal, ought not to be recognised by the Council, and should be opposed, was adopted (see Session, sect. 63).—The Board of Trade having invited the Council to furnish any observations it might have to offer upon the question of the future of electric lighting in London, a reply was sent expressing the opinion that extensive areas might properly be granted to companies when their financial and technical means of carrying out the powers entrusted to them were of a satisfactory character, and accepting generally the recommendations of Major Marindin's report (on the result of his inquiry into the applications for provisional orders) as regarded the districts to be allotted to the several companies. The Council considered further that, in the interest of the public, competition was desirable under proper restrictions.—Upon another matter of interest to the Metropolis, the opening of museums and public galleries on **Sundays** and week-day evenings, it was resolved to petition Parliament in favour of those increased facilities for enabling the collections to be visited being granted.—The question of the control of the **Metropolitan Police** was debated at length, and a motion made by Sir T. Farrer to the effect that London was the only city in Great Britain which, whilst paying the expense of the police, had no voice in its control or management, and declaring that the Council could not doubt that Parliament would take an early opportunity of supplementing its scheme of municipal government for London by transferring the management of the civic police to the Council, was (April 11th) carried by 64 to 31. Mr. Costelloe moved (June 19th) that it was highly expedient for the peace and good government of London that the Council should have powers to permit and regulate the use of **Trafalgar Square** and of **Hyde Park** for purposes of public meeting, similar to the powers already possessed by the Council as to the other open spaces under its control. An amendment of Mr. Beacheroff, for the adjournment of the question until the Council had control of the police, was lost by 42 to 20. On July 23rd the Council adopted Mr. Costelloe's proposal by 46 to 27.—The Committee on **Theatres and Music Halls** recommended that every one of their number should be empowered by an authorising document to pay surprise visits at any time to any one of these places; but the Chairman so strongly discouraged the suggestion, that it was finally agreed to restrict the inspection in the first instance to the superintending architect and his assistants. It was subsequently resolved by the Council that the committee be authorised to prepare in conference with the Parliamentary Committee a Bill, to be promoted in the current Session, giving the Council more extended powers over the structure and internal arrangements of buildings frequented by the public. The Bill was accordingly prepared, and was introduced by Sir John Lubbock, but was blocked; so it was decided on July 23rd to request the First Lord of the Treasury to give facilities for passing the measure into law. Mr. W. H. Smith replied that the Government would have to propose considerable amendments before they could accept the Bill, and that it would undoubtedly be strenuously opposed in the House; they could not therefore undertake to give facilities for the Bill, and he suggested that it should be re-drafted and re-introduced next

session. The Bill was dropped. In connection with the subject of theatres should be mentioned a decision of the Council that such places of entertainment should no longer be compulsorily closed on Ash Wednesday, the days on which performances may not take place being now therefore limited to Sundays, Christmas Day, and Good Friday.—The Contagious Diseases (Animals) Acts Committee arrived at the conclusion that the muzzling of dogs in the Metropolis would be of little real value if it were not also adopted in the outlying districts, and therefore requested the Privy Council to make compulsory and stringent regulations for the whole kingdom. The Privy Council replied that they were not prepared to do this, but that they were willing to issue orders applicable to those parts of the kingdom in which rabies was prevalent. The Privy Council issued an Order for the muzzling of dogs in the Metropolis, leaving it to local authorities to carry the Order out; and the County Council, holding that they possessed no means to give the Order effect, sent a letter to the Privy Council stating that they were willing and desirous to fulfil their obligations, but that they had no alternative but to decline a responsibility for regulations which they could not enforce; while in response to a communication from the Chief Commissioner of Police, asking what regulations they were prepared to lay down, they replied that they were not in a position to frame any. The Order was then enforced by the police under the direction of the Privy Council.—By the courtesy of the Corporation the London County Council have held most of their meetings in the chamber of the Common Council at Guildhall; but on July 9th a recommendation of the Council Chamber and Offices Committee in favour of enlarging the chamber at Spring Gardens, and providing two additional committee rooms, at a cost not exceeding the sum of £75,000, was adopted; and in their Money Act the Council took power to expend for the purpose of acquiring a site for a council chamber and offices such a sum as they with the approval of the Treasury might think fit.—When the London Council reassembled after its vacation, on Oct. 1st, formal notification was made of the sad death of Mr. Firth, M.P., deputy chairman, which had taken place while he was upon his holiday in Switzerland, and a resolution placing upon record the sorrow of the Council for the severe loss it had sustained was unanimously agreed to. The seat for the Haggerston division thus vacated was filled by the election of Mr. W. J. Orsman, who obtained 1052 votes, 636 being given to Mr. E. T. Holloway, the rival candidate. On Nov 5th cordial votes of thanks were passed to Lord Rosebery for his uniform courtesy and impartiality during his year of office as chairman, and to Sir J. Lubbock for his courteous manner as vice-chairman; and on Nov. 7th the Earl of Rosebery and Sir J. Lubbock were unanimously re-elected chairman and vice-chairman respectively. On the question of the election of a deputy chairman, who it was agreed should be paid a salary of £1500 per annum, there voted for Mr. Fardell 51, for Mr. Haggis 59, and for Mr. Gibb 19; and a second vote being taken, Mr. Haggis received 61 votes and Mr. Fardell 51, so that the former was elected by a majority of 10. Some time previously to this the Proceedings of the Theatres and Music Halls Committee had attracted a

considerable amount of public notice. As the licensing authority in respect to the music-halls situated within the county of London, the Council required in several cases, as a condition of renewal, that certain structural alterations should be made in accordance with the recommendations of the architect; in other instances objections of a different character were raised, —and, to take two noteworthy instances, a majority of the committee decided to recommend the Council not to renew the licences of the Royal Aquarium and Trocadero. At the conclusion of its sittings the committee stated, in their report to the Council, that they had considered a total of 380 applications for new licences and renewals; and they regretted it was their duty to recommend the Council to refuse renewals or grants of licences in 26 cases, but they were constrained to do so in the public interest. The committee added that they had been much struck by the want which existed of some proper authority to whom songs or words of any sketch given in music-halls should be submitted for approval, in the same manner as the words of all stage plays were submitted to the Examiner of Plays, and they desired to express a hope that this want would be supplied at no distant date. On the case of the Trocadero coming up for consideration in the Council Mr. Marks moved that the Council do grant the renewal of the licence for music and dancing on the distinct understanding that the manager give an undertaking, to be prepared by the solicitor to the Council, that everything in future should be conducted with due regard to propriety. This amendment was carried by 81 to 34; and a proposal of Col. Hughes, M.P., that in the case of the Royal Aquarium the licence should be granted on the same conditions as in the case of the Trocadero, was carried by 82 to 23.—To turn to another question, on Oct. 29th the Finance Committee reported that they had considered certain estimates of costs, debts, or liability, and recommended that the said estimates, amounting to £1,000,000, be approved, and that stock amounting to £1,000,000 nominal, bearing interest at 2½ per cent., be created, to be redeemed at the end of 60 years, but redeemable at the option of the Council at any time after 30 years from the date of issue. The minimum price of 88 per 100, at which tenders for such stock were proposed to be received, and the other particulars, were submitted by the committee with the approval of the Treasury. The report was adopted, and it subsequently appeared that the loan had been taken up at an average price of about £91.12s. per cent. As to future improvements in London, the Improvements Committee reported that the widening of the narrow portion of the Strand lying between the churches of St. Mary-le-Strand and St. Clement Danes was of the most pressing necessity, and advised the Council to apply for powers to demolish the block of buildings on the south side of Holywell Street; the same committee also came to the conclusion that a want existed for a good thoroughfare between Holborn and the Strand west of Temple Bar, and recommended the construction of a road from Southampton Row in almost a direct line to Catherine Street and the Strand, with a spur street leaving the said new street at a point about 500 feet from the Strand and running eastward to St. Clement Danes Church, thus meeting the demands of traffic going both across Waterloo Bridge and eastwards to the

city. The approach to Waterloo Bridge would they considered, also have to be improved by removing a portion of the buildings at both corners of the junction of this approach with the Strand. The committee were also of opinion that, in the event of the scheme being adopted, the whole of the property within the triangle which would be bounded on the south by Holywell Street and the Strand, on the north-east by the new street, and on the west by Neweast Street, should be acquired by the Council. At a subsequent meeting of the Council, the Committee withdrew for the present the recommendation as to improvement in the approach to Waterloo Bridge, and the consideration of the remainder of the Finance Committee and Local Taxation Committee had had time to consider and report upon the best method of raising the necessary funds, and as to the burdens which would in consequence be placed on the shoulders of the ratepayers. A Bill to enable the Council to carry out the Strand improvements without paying undue compensation for the property required was prepared by the Parliamentary Committee; and among other measures drawn up by the same body were Bills empowering the Council to construct subways and to compel owners of gas and water or other pipes, or of wires, to use them and to remove their pipes into them when made; to remove certain bars and gates in the western central district without payment of compensation; and to authorise the periodical inspection of house drains by local authorities. At the meeting of the Council held on Nov. 12th a letter was read from Sir Sydney H. Waterlow, stating that he desired to present to the Council as a free gift his entire interest in an estate of nearly 29 acres in extent, situated on the southern slope of Highgate Hill, which was for many years his own home, and which property would, he thought, if judiciously laid out, make an excellent park for the north of London. The land was freehold with the exception of 2½ acres held on a long lease; and to enable the Council to acquire the freehold interest in this portion Sir Sydney offered to pay over to the Council the sum of £6000 in cash. A vote of thanks was unanimously passed to the donor for his munificent gift.—[2.] Subjoined is a list of the Council corrected to Nov. 10th. The changes which have taken place since the first election have already been noticed, but it may be added that during that period four members have been returned to the House of Commons—viz., Mr. Beaufoy, Earl Compton, Mr. Boulnois, and Captain Verney. **Chairman**, The Earl of Rosebery; **Vice-Chairman**, Sir J. Lubbock, Bart., M.P.; **Deputy-Chairman**, A. H. Haggis.—**Aldermen** (to retire in 91): Barker, J.; Beaufoy, M., M.P.; Cohe, Miss E.; Gibb, T. E.; Grosvenor, Hon. R. C.; Meath, Earl of; Morley, S. H.; Spicer, E.; Taylor, S. S.; Williams, Rev. C. F. (to retire in 94): Arnold, A.; Debenham, F.; Farrer, Sir T. H., Bart.; Harrison, F.; Hobhouse, Lord; Hogg, O.; Lingen, Lord; Routledge, E.; Russell, G. W. E.—**Councillors** (to retire in 91): Awworth, W. M., Dulwich; Ambrose, J., Limehouse; Antrobus, E. C., J.P., St. George, Hanover Square; Arter, A., Hammersmith; Austin, E., Hoxton; Beacherot, E. M., North Paddington; Beal, J., Fulham; Beaumont, Capt. W. County Courts. History.—The modern County Court, which must be carefully distinguished from the County Court of early English history, dates from the year 1846. Under the Act 9 & 10 Vict., c. 95, and subsequent Acts, a certain number of county court districts have been marked out in each county. The court for that county is held at short intervals in one or more places within each of these districts. Several districts are grouped in one circuit, and a judge is allotted to each circuit. The judge is appointed by the Lord Chancellor, and must be a barrister of at least seven years' standing. He has the assistance of a registrar and other officers. *Jurisdiction.*—County Courts have jurisdiction in the following cases:—(1) In actions in which the sum claimed by the plaintiff does not exceed £50; (2) in actions relating to real property, the annual value or rent of which does not exceed £50 per annum. But from the above cases must, generally speaking, be excepted all actions in which the validity of any devise, bequest or limitation in a will or settlement is disputed, and all actions for malicious prosecution, libel, slander, seduction, or breach of promise of marriage. But by consent in writing of both parties, any action whatever which could have been brought in the Queen's Bench Division may be brought in a County Court. And if the plaintiff in a superior court recover no more than £50 in an action for breach of contract or £10 in an action of tort, he can get no costs except by special favour of the court; and in an action for breach of contract in a superior court, if the claim be not for more than £50, either party may apply to have the action transferred to the County Court; (3) in actions such as may be brought in the Chancery Division of the High Court of Justice, provided that the property in dispute does not exceed £500 in value; (4) in Admiralty actions in which the claim is for salvage, for towage, necessities or wages, for damages to cargo, or by collision, or arises out of agreements concerning the use or hire of any ship, the care of goods therein, etc., and does not exceed certain specified limits of amount; (5) actions in bankruptcy; (6) a variety of actions too numerous to be severally mentioned here. *Procedure.*—A jury may be summoned when the amount claimed exceeds £5 at the requisition of either party, and in other cases at the discretion of the judge upon the application of either party. The jury consists of five persons qualified to serve as jurors in the High Court. The plaintiff begins by entering a plaint in a book kept by the registrar. The officer of the Court then serves a summons upon the defendant. Both parties must appear on the day named in the summons. Pleadings are not in use. Evidence is taken *viâ voce*. Solicitors as well as barristers may address the Court. If the debt or damage claimed exceed £50, an appeal lies from the decision of the judge upon any question of law, or on the admission or rejection of evidence, unless the parties have previously agreed that such decision shall be final.

Course of Exchange, The. See STOCK EXCHANGE OFFICIAL LIST.

Coursing. With the exception of archery (*q.v.*), there are few sports more ancient than

that of coursing the hare, and in all ages the greyhound has been admired for its graceful form and extraordinary speed. Its keenness of vision is also marvellous; and the numerous enclosed meetings which have of late years been inaugurated in close proximity to our large towns fully testify to the popularity of coursing. Prizes of great value are offered for competition at these fixtures; and although many owners, attracted by rich rewards, devote their attention to the breeding of greyhounds chiefly for speed, to the neglect of that cleverness which is of so much more value in the open, the Waterloo Cup is still the leading trophy of the year. For this there are sixty-four nominations, which are awarded as a rule to the best known and most respected of coursers, at a subscription of £25 each, of which the winner takes £500, the runner-up £200, two dogs £50 each, four £30 each, eight £20 each, and sixteen £10 each, the balance being awarded to the leading dogs in the Purse and Plate, which are confined to the beaten dogs in the Cup and Purse respectively. The Great Champion Stakes at Kempton Park terminated on Jan. 25th, '89, when Major H. Holmes's Fuddletown beat Mr. Sidney's Filate Black, and won the valuable prize. The meeting at Aitona closed on Feb. 22nd, when Colonel North's Fullerton and Troughend divided the Cup Stakes, the latter greyhound representing the nomination of Mr. Badger; Mr. Huntingdon's Highness, nominated by the Earl of Sefton, was accorded the Purse, and Sir R. Jardine's Glenogle was successful in the contest for the Plate. Owing to frost and snow the Gosforth Park Gold Cup meeting was brought to a premature close on March 5th, and the principal stake thus resulted in a division between Mr. Edwards's Glenkirk, Mr. W. Paterson's Plymouth Rock, and Colonel North's Kate Cuthbert. Consult "Coursing Calendar," edited by C. N. Brown, the Field Office, 346, Strand.

Courtesy Titles. The eldest son of duke, a marquis, or an earl, takes by courtesy the second title of his father, which is generally, but not always, the next in degree. Thus the eldest son of the Duke of Devonshire takes the courtesy title of Marquis of Hartington, but the present Earl of Derby was Lord Stanley during the lifetime of his father, the second title being, not viscount, but baron. Where the second title is of the same name as the first it is dropped, to avoid confusion; for example, the Marquis of Salisbury is also Earl of Salisbury, so his eldest son is known as Viscount Cranborne. Younger sons of dukes and marquises prefix the courtesy title of lord, and all the daughters of earls, as well as of the higher degrees of nobility, the courtesy title of lady, to their Christian and surname, and the daughters may retain it after marriage with the altered surname. The courtesy title of master is given in Scotland to the eldest son of a baron. A duke's eldest son's eldest son or a marquis's eldest son's eldest son sometimes takes by courtesy the third title of the duke or marquis. While these courtesy titles are invariably used when addressing the persons taking them, they are not accorded full recognition in certain formal documents; for example, the name of the Duke of Devonshire's eldest son appears sometimes in the House of Commons journals as "the Right Hon. Spencer Compton Cavendish," commonly called the Marquis of Hartington.

In the following list the first column gives the courtesy title which is usually taken by the eldest son of a duke, marquis, or earl; but it will be borne in mind that in many cases the courtesy title is not in present use, because the peer has no son. Thus a familiar title to English ears, the Marquis of Granby, was long in abeyance as a courtesy title, the late Duke of Rutland's heir presumptive having been his brother, Lord J. Manners, M.P.; but on the succession of the latter to the dukedom the courtesy title was revived in the person of his son, now M.P. for the Melton Division. In several cases where the eldest son has died, and the next survivor has taken another family title, the dignity in actual use is given.

Courtney, Rt. Hon. Leonard H. M.P., P.C., was b. 1832. Graduated (1855) at St. John's College, Cambridge, as Second Wrangler, was bracketed first Smith's prizeman, and elected a Fellow of St. John's. He was called to the bar at Lincoln's Inn (1858). Professor of Political Economy at University College, London (1872-75). Entered parliament as Liberal member for Liskeard (1876-85). Successively Under Secretary of State for the Home Department (1886), Under Secretary of State for the Colonies (1881-82), and Financial Secretary to the Treasury (1882-85). Elected in the Liberal interest as member for South-East Cornwall (Bodmin) (1885), and re-elected as a Liberal Unionist in 1886. *Chairman of Committees*

of the House of Commons (87). Mr. C. is a strong advocate of reform in the system of land tenure. He was formerly leader-writer for the *Times*. He married in '83 Miss Catherine Potter, a lady well known for her exertions in behalf of the better housing of the poor in the East End of London. Privy Councillor '89. Presented with hon. freedom of Penzance, April 25th.

Cowen, Frederic Hymen, one of the most popular of modern song composers, b. in Kingston, Jamaica, 1852. From an early age he was a pupil of Sir Julius Benedict and Sir John Goss, and further studied at Leipzig and Berlin. He has written an opera ("Pauline") an oratorio ("The Deluge"), several cantatas, chamber music, four symphonies, pianoforte sketches, and many vocal pieces. Apart from a few of his songs, his most esteemed productions are his symphonies, his "Language of Flowers" orchestral suite, and his cantatas "The Rose Maiden" and "The Sleeping Beauty," the latter having been specially composed for the Birmingham Festival of '85. Mr. Cowen's oratorio "Euth," was produced at Worcester Festival in Sept. '87. In May '88 Mr. C. left for a six months' visit to Melbourne, for the exhibition (q.v.) of which city he composed the "Inaugural Ode," Mr. C.'s latest work ('89) is entitled "St. John's Eve."

Crane, Walter, poet and painter, b. 1845, first exhibited at the Royal Academy (62), and has since contributed frequently to the Burlington House and Grosvenor Gallery exhibitions. He has published various illustrated books, and is an authority on decorative art. Mr. C., who was elected a member of the Institute of Painters in Water Colours in '82, is an ardent advocate for the reform of the Royal Academy. He has published "Walter Crane's Toy Hooks," and many poems illustrated by himself. His design for the seal of the London County Council was accepted by that body. He took an active part in promoting the Arts and Crafts Exhibition. In the spring of '89 he gave a series of interesting lectures, at the rooms of the Society of Arts, on the decoration of books. See NEW GALLERY.

Crawford, F. Marion, the novelist, spent a great portion of his early life in India, and is now accustomed to live for the most part of the year in Italy, where the plot of more than one of his novels is laid. His works include "Tale of a Lonely Parish" ('86), "Saracinesca," "Paul Patoff" ('87), "Dr. Claudius," "Mr. Isaacs," "Marzio's Crucifix" ('87), and "With the Immortals" ('88). One of his most popular books has been "Marzio's Crucifix," which depicts the life of an engraver on silver. Mr. C.'s most recent works, "Graifenstein" and "Sant Ilario" ('89), have quite justified the already high reputation of its author.

Crawford, Mrs. Emily, the well-known Paris correspondent of the *Daily News*, commenced her connection with that journal at the age of twenty-two, on her marriage to Mr. Crawford, who at that time occupied the position she now holds; and, until his death, successfully collaborated with him. She wrote, at one time, regularly for *Once a week* and the *San Francisco Bulletin*; and, at the present time, is understood to contribute to *Truth* and the *New York Tribune*, as well as sending daily telegrams to the *Daily News*. One of her greatest journalistic successes,—and one arising from her being a lady,—occurred in connection with the celebrated debate of May 24th, at Versailles, at

which, by the courtesy of M. Thiers, she was a spectator, and of which she telegraphed the fullest report of any paper. Mrs. C. is a brilliant and descriptive writer, and not infrequently articles from her pen appear in the leading reviews.

Cremation. The disposal of the human body after death by the process of cremation, which rapidly resolves the body into its component elements, in an absolutely innocuous manner, is now largely practised throughout the civilised world, where formerly burial in the earth only was carried out. This modern movement in its favour commenced about fifteen years ago. Up to the present time, over 1,500 bodies have been cremated in Italy and in Dresden. Cremation societies have been instituted in every European country, and many of the states of America possess them also, and cremation in these states has become a regular practice. There are two patterns of crematories in use—the German and the Italian. The latter was chosen for use at St. John's, Woking, Surrey, where upwards of eighty cremations have already been carried out, there being no legal bar to its performance in Great Britain or in the Colonies, except in New South Wales, where the Government at present decide against it. The cremation of an adult by either process is complete in about an hour and a half, and the ashes, which are perfectly white, weigh about 4 lb. The cost of reduction, were it to become common, would be less than thirty shillings; but at present is more than treble this sum, owing to the necessity of heating the crematory every time for each cremation. There is a chapel in connection with the crematorium at Woking. The Marquess of Ely cremated at Woking (April 13th); Sir W. Tindal Robertson, M.P. (Oct. 10th). The literature of cremation since 1843 amounts to over 700 volumes, no mean share of them having been produced in England since the first "Essays" published by Sir Henry Thompson. See also "Modern Cremation," by Sir H. Thompson, and "Cremation and Urn Burial," by W. Robinson. Hon. Sec. of Cremation Society, J. C. Swinburne-Hanham, 8, New Cavendish St., London, W.

Crete, Kritt, or Candia. An island of the Mediterranean, lying to the south of the Ægean Sea and Archipelago, and appertaining to Turkey. Area over 3000 sq. m., pop. 279,200. Chief cities, **Kastron**, otherwise **Candia**; **Khania**, or **Canea** (pop. 15,000); and **Retimo**.—'89: During the year the condition of Crete has been much disturbed, owing to dissatisfaction with the administration of its affairs by the Porte. The movement first arose from quarrels among the Christian population. The measures taken by the Porte resulted in the Christian factions, which had previously been quarrelling, making common cause against the Mussulmans, in consequence of which the Turkish Government armed the Moslems in the towns and despatched a number of troops to the island. The malcontents demanded the appointment of a new governor and the reform of the constitution, and the Greek Government despatched a note (August) to the Powers, demanding their intervention to restore tranquillity. A note in reply was sent to all the Powers by the Porte. A new civil and military governor, Chakir Pasha, received orders to establish a state of siege in Crete, to institute courts-martial, and to call upon the rebels to lay down their arms. The disturbances were

quelled for a time, but agitation was renewed owing to the reported excesses of the Turkish troops. A memorandum on the Cretan question, drawn up by the combination of refugees at Athens, was presented in October to the representatives of the great Powers. Telegrams from Athens (Nov. 14th) stated that public opinion in Greece was excited against Lord Salisbury because of his attitude on the Cretan question due to his supposed sympathy with the Porte. Later news from the island (Nov. 20th) indicated the general quieting of the disturbances, and the probable recall of Chakir Pasha. It was announced at Athens (Nov. 20th) in official quarters that the Porte had granted a general amnesty in Crete, those persons only who are accused of crimes being excluded from its benefits. Consult "Reports of Her Majesty's Consuls, Part VII. '84, and Part III. '85, article 'Crete.'"

Cricket, '89. Much doubt exists as to the origin of the word "cricket," which is first mentioned in the "Mysteries of Love and Eloquence," written by Edward Phillips, a nephew of the author of "Paradise Lost"; and although a game with bat and ball was much played in this country as far back as the thirteenth century, Fosbrooke states that club-ball, a pastime in vogue in the time of Edward III., was far more likely to have conducted to what is now looked upon as our leading summer pastime. The first collection of rules was framed in 1774, by a committee consisting of Sir William Draper, Sir Horace Mann, the Duke of Dorset, and Lord Tankerville, the wickets to this date being made up of two stumps. In the following year a middle-stump was added, and since then but few really important changes have been made in the game, beyond, perhaps, the regulations as to round-arm bowling and the sizes of bats. **Lord's Cricket Ground**, the headquarters of the **Marylebone Club**, was established in 1780, but in 1864 it was feared it would have to be given up to a firm of West-End builders. This was averted by the generous response of the cricketing public, the list of subscriptions being headed by the Prince of Wales with £100. The Club, which is usually called "The M. C. C.," numbers over three thousand members, and is regarded as the guiding authority upon all matters pertaining to the pastime, although in '87 a **County Council** was formed, which is also doing good service without in any way interfering with the functions of the parent body. The new rules with regard to overs consisting of five balls instead of four, and of captains of eleven being allowed to declare an innings at an end when they feel circumstances warrant them in doing so, have worked exceedingly well, and lessened considerably the number of unsatisfactory draws. Another famous Metropolitan cricketing centre is **Kennington Oval**, which covers about ten and a half acres of ground. This belongs to the Duchy of Cornwall, and is let to the **Surrey Club**, which numbers over two thousand members, at a nominal rent, the only stipulation made by the Prince of Wales being that the charges for admission to county matches must be fixed low enough to admit of the humblest lover of the game attending. The first-class counties now number eight, Derbyshire having been relegated to the second-class division; and **Wotts, Lancashire**, and **Surrey** head the list with an equal number of points. At the close of the season considerable interest was evinced in the

question as to whether some other and better system than the prevailing one should not be adopted in estimating the value of drawn matches, the rule now being to credit each eleven with half a point. By general consent, however, it was admitted that the performances of *Notts* were the best, although, as the appended table of results indicate, both *Lancashire* and *Surrey* tie with the first-named for championship honours:—

| County. | Won | Dr. | Lost | Total | Tl.Pts. |
|------------------------------------|-----|-----|------|-------|---------|
| { <i>Notts</i> | 9 | 3 | 2 | 14 | 10½ |
| 1 <i>Lancashire</i> | 10 | 1 | 3 | 14 | 10½ |
| 4 <i>Surrey</i> | 10 | 1 | 3 | 14 | 10½ |
| 6 <i>Kent</i> | 7 | 1 | 5 | 13 | 7½ |
| 5 <i>Middlesex</i> | 3 | 3 | 5 | 11 | 4½ |
| 6 <i>Gloucestershire</i> | 3 | 4 | 7 | 14 | 5 |
| 7 <i>Yorkshire</i> | 2 | 2 | 10 | 14 | 3 |
| 8 <i>Sussex</i> | 1 | 1 | 10 | 12 | 1½ |

It should be added that the first match between *Kent* and *Middlesex* was abandoned owing to unfavourable weather, and both the latter county and *Sussex* failed to complete the full programme. The following are the centuries and highest averages in first-class county matches during the season: *Nottinghamshire*—Batting, *Gunn*, 378 for 674 runs; bowling, *Attewell*, 1044, with 31 wickets; centuries: *Gunn*, 118; *Shrewsbury*, 104; and *Barnes*, 102. *Lancashire*—Batting, *F. H. Sugg*, 322 for 578 runs; bowling, *Briggs*, 1161, with 88 wickets; century, *A. Ward*, 114 (not out). *Surrey*—Batting, *Mr. K. J. Key*, 2914 for 652 runs; bowling, *Lohmann*, 1293, with 116 wickets; centuries, *Mr. K. J. Key*, 121 (not out), and *Mr. W. W. Read*, 115. *Kent*—Batting, *Mr. L. Wilson*, 360 for 360 runs; bowling, *Wright*, 1239, with 81 wickets; centuries, *Mr. T. Marchant*, 176; *Mr. L. Wilson*, 132; *Mr. W. H. Patterson*, 115; and *G. G. Hearne*, 103. *Middlesex*—Batting, *Mr. T. C. O'Brien*, 435 for 306 runs; bowling, *Mr. E. A. Nepean*, 1827, with 41 wickets; centuries, *Mr. F. G. J. Ford*, 108, and *Mr. T. C. O'Brien*, 100 (not out). *Gloucestershire*—Batting, *Mr. W. G. Grace*, 3620, with 884 runs; bowling, *Mr. E. M. Grace*, 156, with 10 wickets, and *Woof*, 1628, with 65 wickets; centuries, *Mr. Cranston*, 130; *Mr. W. G. Grace*, 127 (not out); and *Mr. O. G. Radcliffe*, 101 (not out). *Yorkshire*—Batting, *Hall*, 2610 for 664 runs; bowling, *Peel*, 1510, with 80 wickets; century, *Peel*, 158. *Sussex*—Batting—*Mr. W. Newham*, 2422, with 508 runs; bowling, *Mr. C. J. M. Godfrey* virtually heads the averages with 150 for 8 wickets, but the figures are not so reliable as are those of *Humphreys* 2120 for 23 wickets, and *A. Hide* 2317 for 42. The batting figures in the first-class averages of the year were decidedly higher than in '88, the improvement being chiefly noticeable in the case of professional players. *Gunn* again heads the list with 387 for 1299 runs, *Shrewsbury* being next with 374 for 522 runs, and *Mr. L. Wilson* third with 360 for 360 runs; but it should be added that this latter pair did not play in anything like the number of matches as did many others. In all ten-batsmen—five amateurs and five professionals—scored over thirty runs per innings, the others being *Barnes* 3125 (1249 runs), *Maurice Read* 3322 (847 runs), *Mr. W. G. Grace* 3020 (1306 runs), *Mr. T. C. O'Brien* 3111 (786 runs), *Mr. J. Cranston* 3019 (709 runs), *Mr. Key* 3020 (1070 runs), and *A.*

Ward 3012 (822 runs). As regards the bowling averages in the same class, *Attewell* must be accorded pride of place, his figures reading 1115 with 140 wickets. *Briggs* and *Mold* have both an average of less than 120, with 140 and 102 wickets respectively; *Richardson*, *Watson*, *Wright*, and *Mr. Fox* average between 12 and 13, whilst *Lohmann* comes next with 1388 for 202 wickets. The last-named delivered by far the largest number of overs, having sent down 1614 as against 1314 by *Attewell*, 1220 by *Peel*, and 1040 by *Briggs*; and the *Surrey* crack bowled in 48 innings, as against *Peel*'s 43, *Attewell*'s 42, and *Briggs*'s 40. There are only four instances of 400 and over having been scored by a first-class side during the year, the two highest being credited to *Surrey*—614 against *Oxford University*, and 507 against *Middlesex*, both being made at *Kennington Oval*; 430 by *Cambridge University* against *Sussex* at *Brighton*, and 410 by *Kent* at *Gravesend*. Of small scores recorded, the most remarkable were the dismissal of the *South* by the *North* at the *Oval* for 35, precisely the same total for which *Kent* disposed of *Notts* at *Beckenham*. The *Oxford* and *Cambridge* match terminated at *Lord's* on July 2nd in favour of the *Light Blues* by an innings and 105 runs, a result in great measure due to the splendid batting display of *Mr. H. J. Mordaunt*, who scored 127 runs in faultless style, and the excellent bowling of *Mr. S. M. J. Woods*. Of the 55 contests decided between the *Universities*, *Oxford* have won 25, and *Cambridge* 27, the remainder having resulted in draws. The *Eton* and *Harrow* match, which always attracts a large and fashionable assemblage to *Lord's*, took place on July 12th and 13th, and ended in a more satisfactory manner than was expected when *Eton* began their second innings, about half-past three on the second afternoon. A draw seemed almost certain if the *Etonians* made anything of a stand; but in the result *Harrow* scored a brilliant victory, which fully realised the expectations of those who had followed the previous play of the *Eton Eleven*, and especially their poor performance against the *Winchester* boys. Certainly the victors had all the best of the luck, going in as they did on a capital wicket, which a rain-storm completely spoiled for their successors. The totals were: *Harrow*, first innings, 272, second, 50 for one wicket; *Eton*, first innings, 169, second, 152. This was the sixty-fourth match, ten of which were drawn, and *Harrow* by their last victory can lay claim to half of the remainder. At *Lord's*, on Aug. 1st, *Marlborough* beat *Rugby* by six wickets, but of the thirty-one matches played between these public schools *Rugby* have won nineteen, and their rivals nine, the remaining three having been drawn. At *Kennington Oval*, on July 6th, the *Players* beat the *Gentlemen* by seven wickets, and in the following week at *Lord's* the *Amateurs* were yet more decisively defeated, the verdict on this occasion being 10 wickets in favour of the *Professionals*. A team of *English Gentlemen* and *Players* made a tour through *South Africa* in August, and met with a large amount of success; whilst a team of *Gentlemen* sailed for a tour through *India* towards the close of October; and there is every probability of *Mr. Boyle* bringing over another *Australian* team to *England* next season ('89). Towards the early part of November the *Warwickshire Club* intimated its intention of moving, at the next

meeting of the Council, the following resolution: "In the interests of county cricket it is desirable that an official classification of counties should be made annually by the Council, and that a sub-committee, consisting of the president and three representatives from first-class and three from second-class shires, be appointed to recommend a scheme for the purpose"; but in deference to the wishes of other minor counties, they consented to add a clause to their motion, to the effect that such scheme include a system of promotion by merit, under which a county may rise from one class to another. Several of the most interesting records connected with the science are appended:—**Throwing the Cricket Ball:** 137 yds., out and home, by G. Brown, on Walderton Common, about 1819; 127 yds. 1 ft. 3 in., by W. H. Game, Oxford University Sports, March 13th, '73; 126½ yds., by E. B. Faucett, Brighton, June '58; and 122 yds. 1 ft. 9 in., by W. Forbes, Eton, March '75. **Largest Individual Scores:** A. E. Stoddart, 485 (Hampstead v. Stoics), Aug. 4th, '86; J. S. Carrick (not out), 419, '85; W. N. Roe (not out), 415, '81; E. F. B. Tylecote, 404 (not out); and, in a first-class cricket match, 344, by Mr. W. G. Grace. **Largest Gross Scores:** Orleans Club v. Rickling Green, 920, on Aug. 3rd, '82; Hampstead (eight wks. down) v. Stoics, 824, on Aug. 4th, '86; New South Wales v. Victoria, Australia, 775, on Feb. 13th, '82; West of Scotland (four wks. down) v. Priory Park, Chichester, 745, on July 14th, '85; United Service v. Nondescripts, 734, on Aug. 10th, '82; Royal Engineers (eight wickets down), 724, in '75; and Emmanuel Long Vacation Club (four wks. down) v. Caius Long Vacation Club, 708, on July 12th, '81. A meeting is annually held in December at Lord's, when the fixtures for the succeeding year are arranged. Consult "Cricket" (the Badminton Library).

Crime, Statistics of.—England and Wales. The last official returns, contained in a Parliamentary Blue Book entitled "Judicial Statistics" for '88, issued in October last, show that the total number of **Indictable Offences** for the year ending Oct. 1st, '88, was 43,336. As compared with the number for the previous year this gives an increase equal to 2½ per cent. The total number of apprehensions was 19,314, showing an increase of 1¼ per cent. as compared with '86-7. The apprehensions in '87-8 were in the proportion of 44½ per cent. to the number of crimes committed. Of the persons apprehended 28½ per cent. were discharged, 8½ were bailed to appear for trial, 0·3 were committed for want of sureties, and 62½ were committed for trial. The number of persons committed for trial for indictable offences during the year was 13,917; and of these it may be computed that about 75 per cent., being about the usual proportion, would be convicted. To this number, in order to show the total convictions during the year, may be added 538,930 summary convictions before the magistrates, being an increase in the number on the same calculation for the preceding year of 2¼ per cent. In considering this increase it must be remembered that of the summary convictions, however, a large proportion were for offences of a trifling character. The total number of persons proceeded against summarily before magistrates in '87-8 was 668,558. The summary convictions showed an increase of 1·8 per cent. compared with the return for the previous year. The number of persons sum-

marily proceeded against for each of the offences named in the following table was as follows for '86-7 and '87-8:—

| | 1886-7. | 1887-8. |
|--|---------|---------|
| Breaches of the peace and want of sureties, etc. | 15,791 | 14,840 |
| Cruelty to animals | 8,540 | 8,746 |
| Drunkenness, and drunk and disorderly | 162,772 | 166,366 |
| Other offences under the Licensing Act, 1872 | 12,043 | 10,263 |
| Elementary Education Act, offences against | 76,265 | 76,589 |
| Employers and Workmen Act, 1875 | 5,368 | 5,920 |
| Highway, Turnpike, Railways, Carriage Laws, etc. | 29,320 | 30,925 |
| Local Acts and Borough By-laws | 49,626 | 51,343 |
| Mutiny Acts | 4,614 | 5,124 |
| Nuisances and offences against health | 10,604 | 9,737 |
| Poor Law Acts | 11,022 | 11,499 |
| Police Acts | 17,045 | 16,938 |
| Prevention of Crimes Act, 1871 | 532 | 533 |
| Revenue Laws, offences against | 12,354 | 11,111 |
| Vaccination Acts | 2,515 | 2,111 |
| Vagrant Laws | 54,224 | 52,136 |
| Weights and Measures Act | 2,570 | 2,607 |
| The number of the criminal classes at large in England and Wales in '87-8 was 28,103, a decrease of about six hundred compared with the previous year. As regards crimes for which sentences of penal servitude are passed there has been a noticeable reduction of late. On Dec. 31st, '89, the number of convicts in custody was 11,660; on July 31st, '89, the number was only 6495. Ireland: The latest general report ('89) on the Criminal and Judicial Statistics of Ireland is for the year '88. A general review of the tables contained in the report points to the following conclusions: 1. That there was an increase in the total number of criminal offences in Ireland in '88 as compared with '87. 2. That the improvement as regards the more serious offences (those not determined summarily), noted in the reports for each year since '82, with the exception of '86, continued through '88, the number of those cases showing a decrease as compared with that for '87, and being both absolutely and in proportion to the estimated population lower than the number for any of the ten years '78-87, and much below the average for that period. 3. That the less serious offences (those determined summarily) were considerably in excess of the number for the preceding year, and in proportion to the estimated population were above the average for the ten years '78-87. In Scotland the total number of commitments to prison in '88 was 47,615; the commitments for serious crime were 114; the total number of commitments was in excess of the number in the previous year. | | |
| Criminal Evidence Bill. See Session, sect. 71. | | |
| Criminal Law and Procedure (Ireland) Act, '87, which is commonly spoken of as the "Crimes Bill" or "Coercion Bill" (see PARLIAMENTARY SESSION cd. '87), enacts that where a sworn information has been made, a resident magistrate may, upon the written order of the Attorney-General, hold a preliminary inquiry, although no person may be charged before him, and examine on oath every person whom he has reason to believe to be capable of giving | | |

material evidence, in regard to the committal of any felony or misdemeanour and any offence punishable under the Act, committed in a proclaimed district. Any person may be prosecuted before a court of summary jurisdiction who anywhere in Ireland takes part in a riot or unlawful assembly, or who, in a proclaimed district, takes part in any criminal conspiracy to compel or induce any person either not to fulfil his legal obligations, or not to let, hire, use, or occupy land, or not to deal with, work for, or hire any person in the ordinary course of business, or to interfere with the administration of the law; who wrongfully uses violence and intimidation; who within twelve months after the execution of any writ of possession of any house or land shall wrongfully take or hold forcible possession; who shall assault or resist any officer of the law in the execution or in consequence of the execution of his duty, or who shall incite to commit any of these offences. The High Court may, on application by the Attorney-General for Ireland, or a defendant, order that a trial at assizes of a defendant charged with having committed a crime in a proclaimed district shall be by special jury; and on application of the Attorney-General for Ireland the Court may order the removal of a trial from a court of assize or quarter sessions in a proclaimed district to some other court in Ireland. For the purposes of the preceding enactments the Lord-Lieut. may by proclamation declare that all or any of them which relate to proclaimed districts are to be in force within any specified part of Ireland, but any such proclamation shall be deemed to have expired if an address is presented by either House of Parliament praying that it shall not continue in force. If the Lord-Lieut. is satisfied that any association formed for the commission of crimes, or carrying on operations for or by the commission of crimes, or encouraging or aiding persons to commit crimes, inciting to violence or intimidation, or interfering with the administration of the law, exists in Ireland, he may, by the advice of the Privy Council, declare it by special proclamation to be dangerous, but such special proclamation shall not continue in force if an address against it is presented to Her Majesty by either House; and if when the special proclamation is issued Parliament is separated by such an adjournment or prorogation as will not expire within twenty days, it shall become void at the end of a week unless during that week Parliament shall be summoned to meet within twenty days. While the special proclamation is in force, the Lord-Lieut. in council may by order prohibit or suppress the proclaimed association in any specified district, after which any meeting of the association in that district will be unlawful, and any persons calling or taking part in a meeting thereof, or publishing any notice concerning it, shall be guilty of an offence, and may be prosecuted before a court of summary jurisdiction. Persons prosecuted before a court of summary jurisdiction under the Act are liable on conviction to imprisonment, with or without hard labour, for a term not exceeding six months. An agreement or combination which under the Trades Union Acts, or the Conspiracy and Protection of Property Act, '75, is legal, and any act done in pursuance of the same is excepted from the provisions of this Act respecting conspiracy, intimidation, and dan-

gerous associations. The Act is a permanent statute. The Peace Preservation (Ireland) Act, 1881, and the amending Act of '86, are continued for five years.

Criminal Prosecutions in '89. During the year a large number of raids were made upon gambling clubs, both in the West End and in the City of London. In the majority of cases a fine of £500 was inflicted upon the proprietors; but in one or two instances sentences of three months' imprisonment were passed. The persons found on the premises were, as a rule, bound over to refrain from visiting gambling clubs; but some of those who, despite this caution, were subsequently found in other raided clubs, were sent to prison. In view of these prosecutions, the opinion of Mr. Poland, Q.C., was taken as to whether *baccarat* could be habitually played in a *bona-fide* club, and an opinion was given in the negative. Among the most important raids was that on the Field Club, among those arrested being Lord Dudley, Lord Lurgan, Lord Henry Paulet, Mr. Charles Seaton, Mr. Samuel Lewis, and Mr. Ernest Benzon.—A charge of assault against the Duke of Cambridge, preferred by a journalist named Simms, excited a good deal of attention. On the 25th May, on the occasion of a fire brigade parade at the Horse Guards, there was a great deal of confusion, and it was alleged that the Duke, while being hustled by the crowd, violently assaulted the prosecutor. The case came before the magistrate at Bow Street police court, and the prosecutor having put his complaint into writing, a summons was refused on the ground that there was no evidence of a criminal assault. An application was subsequently made to the Queen's Bench Division (July 22nd) for a *mandamus*, but was refused on the ground that the magistrate had come to a proper conclusion that there was not such evidence of assault as would justify him in issuing a summons, and that, having heard and determined the matter, there was no jurisdiction to overrule the decision.—The prosecution of Georgina Champion, who was charged (May 9th) with endeavouring to incite an employee of the Government printers to steal a military examination paper, broke down on the ground that there was no intention to steal, as the prisoner simply wished to see the papers for a short time, in order to get the information they contained.—A series of deaths from poisoning in the neighbourhood of Deptford led to prolonged investigation, and the exhumation of several bodies which had been interred in Brockley Cemetery. It appeared that a woman named Winters had insured the lives of at least six or eight persons, including one old man, a pauper, and several children who were related to her, and that death had in several cases subsequently occurred from poisoning, although an ordinary medical certificate was granted. The woman Winters died before the investigation had been completed, and made a full confession of the crimes; but her daughter, Mrs. Elizabeth Jane Frost, who had been originally charged with her, was subsequently convicted of forging an order to obtain money from the Prudential Assurance Co., and sentenced to seven years' penal servitude. The case created a good deal of interest, as it demonstrated the comparative ease with which insurances for small amounts could be effected in several companies in respect of the same person, and without that person's knowledge.—During the

year there was a continuation of the horrible crimes known as the **Whitechapel murders** (*q.v.*), while some ghastly discoveries of mangled human remains were made at Rainham, in the river Thames, and in the cellars of the new police offices at Whitehall. In no case have the police authorities been able to trace the authors of the horrible crimes which the discoveries suggest. (See **MAYBRICK CASE**).—It has been held that where a person, with felonious intention, puts his hand into another man's empty pocket, and is then suddenly caught, he cannot be convicted of an attempt to steal. This decision was based upon the view that, as there was nothing to steal, no theft could have been actually committed, and that consequently no attempt in that direction could be regarded as criminal. The Court for the Consideration of Crown Cases Reserved has, however (Nov. '89), decided that this reasoning can no longer be treated as sound, and in future, therefore, pickpockets run equal risks, whether they happen on an empty pocket or a full one.

Crispi, Francesco, is a native of Ribera, in Sicily, where he was born in 1810. He was educated for the law, and was called to the Neapolitan bar. His early aspirations for the realisation of Italian unity, prompted him to take an active part in the revolutionary movement of '48, when the kingdom of the two Sicilies was overthrown. He inspired the resistance of the Sicilians during the insurrection of Palermo, and was compelled to fly to France. He subsequently landed with Garibaldi at Palermo, and distinguished himself by his courage and capacity. In '61 he was elected to the first Italian Parliament as member for Palermo. He rapidly rose to a position of great influence, and was recognised as the leader of the Constitutional party. On the death of Depretis, in '87, Signor Crispi, who had been Minister of the Interior, became President of the Council and Minister for Foreign Affairs. His correspondence, in August '88, with M. Goblet, the French Minister for Foreign Affairs, on the **Masowah** question, caused much excitement in political circles. In the same month Signor Crispi paid a visit to Prince Bismarck at Berlin. In Sept. '89, while out driving, he was wounded by a sharp stone thrown at him by an Italian, whose motive for the assault seems to have been to attract attention to his own poverty. At a great banquet given in his honour at Palermo, Oct. 15th, Signor Crispi defended his foreign and domestic policy in a powerful speech, in which he especially laid stress upon the determination of the Government, while respecting the spiritual independence of the Church, to guard against its encroachment upon the National rights. See **ITALIAN POLITICAL PARTIES**, and **ITALY**.

Croatia. See **AUSTRIA-HUNGARY**.

Croke, The Most Rev. Thomas W., Archbishop of Cashel, b. at Mallow 1824. Educated at Charleville School and the Irish Colleges in Paris and Rome, where he greatly distinguished himself. After graduating D.D. (1861) he returned to Ireland, and received an appointment in Carlow College two years later. In '49 he taught theology in the Irish College in Paris, and subsequently devoted himself to mission work in the diocese of Cloyne. He was appointed President of St. Columba's College, Fermoy, '58, and ('65) became Chancellor of the Diocese of Cloyne. From '70 to '74 he was Bishop of Auckland, New Zealand. Appointed Archbishop of Cashel '75.

Dr. C. is an ardent sympathiser with the Irish Nationalists, and has taken a prominent part in recent movements. He was one of the witnesses examined by the **Parnell Commission** (*q.v.*).

Crown Murder. See **UNITED STATES**.

Crown. The Crown of these realms is by common law and constitutional custom hereditary, and this in a manner peculiar to itself; but the right of inheritance from time to time may be changed or limited by Parliament, under which limitations the Crown still continues hereditary. The **Sovereign power** is limited to the heirs of Princess Sophia, the granddaughter of James I. (who was himself the heir of William the Conqueror and of Egbert), being Protestants; and the Crown on its demise passes to the next heir, males in the next degree in relationship being preferred to females, though any daughter stands in the order of succession before an uncle, nephew, or male cousin. The **Sovereign** enjoys various prerogatives by prescription, custom, and law, which assign to her the chief place in Parliament and the sole executive power. She is the head of society, the supreme head of the Church, appointing as such the archbishops, bishops, and deans. As the fountain of honour she awards all titles of nobility and honourable distinctions; as the fountain of justice she appoints the judges. Criminal prosecutions are carried on in her name, and she may pardon or abate the punishment of offenders; she is head of the army and navy, appoints their officers, and wages war or concludes peace; she sends and receives ambassadors, signs treaties, appoints the Viceroy of India, the Lord Lieutenant of Ireland, all governors of colonies and lords lieutenant of counties; she coins money for the use of her subjects, owns much landed property, receives and holds in law the entire revenue of the State, and appoints the ministers. The right of summoning, proroguing, or dissolving Parliament is vested exclusively in her, and every bill must receive her assent before it can become law. Finally, she can legally do no wrong. But the prerogatives are subject to many limitations, and in the coronation oath the Sovereign solemnly pledges herself to govern the people according to the statutes of Parliament and the law and customs of the same. Parliament must be called together at least once in three years, and its existence ceases at the end of seven years if it be not previously dissolved; while the necessity of annually voting supplies for the forces, and of continuing the Mutiny Act, renders it absolutely necessary Parliament should be convened once in every year. The royal assent has not been refused since the days of Anne. Although the Sovereign enjoys the chief place in Parliament, she cannot make, alter, or dispense with any law without the concurrence of the other constituent parts of the legislature. The Sovereign, although she appoints the judges, cannot remove any of them except at the request of both Houses, nor may she influence the decision of causes between subject and subject. She cannot maintain a standing army in time of peace without the assent of the Parliament. Though she alone can coin money, she cannot alter the standard. She is supreme head of the Church, but she cannot alter the established religion, nor call individuals to account for their religious opinions; she cannot be a Roman Catholic, nor marry one. The hereditary revenues of the Crown

are at the commencement of each reign surrendered in exchange for a fixed civil list; and though the public revenues are in law received and held by her, nothing can be expended for the public service which has not been granted to her by Parliament and primarily by the Commons. The executive power, though vested in the Crown, is exercised only under the advice of and through the responsible ministers; appointments are made, titles and honours are conferred, punishments are remitted, war is proclaimed and peace concluded, treaties signed, Parliament is assembled or dissolved,—in short, every act of the Crown, by the sign manual or otherwise, is covered by their counter-signature or their advice, so that the old constitutional maxim that the Crown is incapable of wrong is true to the letter. In one matter—the selection of a person to form a new administration when a ministry has resigned—the Sovereign has theoretically a free choice; but in practice the range is limited to the few members of the Opposition who could undertake the task with a prospect of success. See PARLIAMENT, MINISTRY.

Crown Agents for Colonies. See DIPLOMATIC.

Crown Colonies. See BRITISH EMPIRE, COLONIES, ETC.

Crown, The. Originally a mere fillet of linen, the crown was, in common with most of the regalia, borrowed from the East on the introduction of Christianity into Europe. It is now used only for coronations and at the openings of parliament. Until the time of the Reformation it was in the charge of the Dean and Chapter of Westminster; but has since been preserved in the Tower. In 1649, the regalia having been destroyed, new crowns were made for Charles II. at his coronation.

Cruelty to Children. See NATIONAL SOCIETY FOR PREVENTION OF; and SESSION, sect. 72.

Cuba. The largest of the West Indian islands, lying between Florida and the Caribbean Sea. The Queen of the Antilles, and the most important of all the Spanish colonial possessions. Divided into three provinces, containing 22 cities and towns and 204 villages. Capital, Havana, a splendid city, with pop. 250,000, connected with other towns by 1000 miles of railway.—In June '88 a severe rain-storm caused great damage at Havannah. See COLONIES OF EUROPEAN POWERS. Consult BATES' "Central and South America and West Indies."

Cumulative Voting. This principle in the conduct of public elections was introduced by the Elementary Education Act of 1870, which provides that at the election of a school board "every voter shall be entitled to a number of votes equal to the number of the members of the school board to be elected, and may give all such votes to one candidate or may distribute them among the candidates as he thinks fit."

Cunliffe-Owen, Sir Francis Philip, K.C.M.G., b. 1828. In '55 appointed one of the superintendents of the Paris Exhibition. In '57 he was made Deputy General Superintendent of the South Kensington Museum, and ('60) became Assistant Director of that institution. He succeeded Sir Henry Cole as Director ('73). He rendered valuable services in connection with the International Exhibition held in London in '62, the Paris Exhibitions of '67 and '76, Vienna Exhibition of '78, and the Centennial Exhibition in Philadelphia in '76, the British exhibitions at most of these gatherings

finding in him an able organiser. Knighted in '78, Sir Philip Cunliffe-Owen devoted his energies to secure the success of the series of exhibitions held in the grounds of the Royal Horticultural Society, the last of which, the Colonial Exhibition, took place in '86. He also actively aided the project to establish the Imperial Institute (q.v.), and has shown an interest in the temperance movement.

Curaçao. An island in the Caribbean Sea, off the coast of Venezuela. It is a Dutch possession, and chief of Holland's West Indian possessions. The celebrated liqueur "Curaçao" is prepared extensively. Cattle, sheep and goats are bred for exportation. See COLONIES OF EUROPEAN POWERS.

Currie, Sir Edmund Hay, b. in 1834, and ed. at Harrow. He is a grandson of the late Sir James Hay, K.C.B., and has for many years been associated with various movements for promoting the education and improving the social condition of the poor of East London. He was chiefly instrumental in promoting the success of the People's Palace (q.v.), and is chairman of the trustees of that institution. Sir Edmund was formerly a member of the School Board for London and the Metropolitan Asylums Board. He was knighted in '76.

Customs. See FINANCE, NATIONAL.

Customs and Inland Revenue Act, '89.

See SESSION, sect. 73.

Customs, Commissioners of, are Mr. H. Murray and Mr. Horace Seymour. Formerly there were three Commissioners, of whom the late Sir Charles Du Cane was chairman. The vacancy caused by the death of the latter last year has not been, and is not likely to be, filled up. The Commissioners annually issue a report showing the receipts of customs revenue (see FINANCE, NATIONAL) up to March 31st.

Cycling. The making of cycling records seems continuous, and, what with the rapid improvements both in machines and in the quality of the tracks, the latter, which are now specially constructed so as to avoid any diminution in speed whilst rounding the bends, and the advancement consequent upon greatly increased facilities for competition, fresh sets of tables are compilable every month or so. Of the many records beaten during the year '88, however, few are of general interest, the majority being of fractional distances. Foremost amongst those of importance are the times made on an ordinary bicycle, and the three-quarter mile record must be especially noted. Up to August 15th Mr. F. J. Osmond's time, 1 min. 53¹/₂ sec., stood as the best, but on that date Mr. H. Synyer accomplished the distance in 1 min. 52¹/₂ sec. from a level start. Mr. Synyer now holds both records at this distance, his 1 min. 51¹/₂ sec. with a flying start being as yet unbeaten. The records from thirty-three to fifty miles inclusive were also altered by Mr. J. H. Adams, Lewisham B.C., at Coventry on July 25th, he having wheeled the distances as follows: 83 miles, 1 h. 41 min. 55¹/₂ sec.; 84, 1 h. 44 min. 57¹/₂ sec.; 85, 1 h. 48 min. 6¹/₂ sec.; 86, 1 h. 51 min. 16¹/₂ sec.; 87, 1 h. 54 min. 19¹/₂ sec.; 88, 1 h. 57 min. 24 sec.; 89, 2 h. 24¹/₂ sec.; 90, 2 h. 3 min. 21¹/₂ sec.; 91, 2 h. 6 min. 21¹/₂ sec.; 92, 2 h. 9 min. 21¹/₂ sec.; 93, 2 h. 12 min. 23¹/₂ sec.; 94, 2 h. 15 min. 24 sec.; 95, 2 h. 18 min. 23¹/₂ sec.; 96, 2 h. 21 min. 24¹/₂ sec.; 97, 2 h. 24 min. 36 sec.; 98, 2 h. 27 min. 44 sec.; 99, 2 h. 30 min. 45¹/₂ sec.; and 100, 2 h. 33 min. 37¹/₂ sec.; thus beating his own records made at the

Crystal Palace on Aug. 22nd, '88, from 33 to 36, and those of Mr. C. Potter, Surrey B.C., made at Surbiton on Sept. 24th, '87, from 37 to 50. All the above records have been passed by the Records Committee. Of the safety records, Mr. W. Price, at Paddington on Aug. 27th, rode one mile in a min. 36½ sec., thus beating Mr. H. E. Laurie's time at Long Eaton on Aug. 31st, '88, by ½ sec. The two miles time made by Mr. Laurie on the same date has likewise now to be taken out of the list, Mr. W. C. Jones, on June 15th, at the **Paddington Recreation Ground**, having covered the distance in 5 min. 26½ sec., or five seconds quicker than Mr. Laurie's. Good speed rates have also been arrived at with **tricycles**. Mr. H. H. Sanson at **Bristol**, on Sept. 28th, rode a quarter of a mile with a flying start in 34½ sec., a feat never previously accomplished; and on Aug. 1st, at **Paddington**, Mr. E. B. Turner, of the Ripley Road Club, not only beat record from twenty-two miles to fifty inclusive, but also succeeded in covering a longer distance in two hours than had previously been traversed, viz., 38 miles 620 yards, the best performance up to that period being Mr. C. Potter's 37 miles 1420 yards at Surbiton on Sept. 24th, '87. Mr. Turner's times were as follows: 23 miles, 1 h. 6 min. 18½ sec.; 23, 1 h. 9 min. 20½ sec.; 24, 1 h. 12 min. 25½ sec.; 25, 1 h. 15 min. 32½ sec.; 26, 1 h. 18 min. 44½ sec.; 27, 1 h. 21 min. 57½ sec.; 28, 1 h. 25 min. 9½ sec.; 29, 1 h. 28 min. 20½ sec.; 30, 1 h. 31 min. 40½ sec.; 31, 1 h. 35 min. 15½ sec.; 32, 1 h. 38 min. 31½ sec.; 33, 1 h. 41 min. 50 sec.; 34, 1 h. 45 min. 9½ sec.; 35, 1 h. 48 min. 24½ sec.; 36, 1 h. 51 min. 40½ sec.; 37, 1 h. 55 min. 4 sec.; 38, 1 h. 58 min. 47½ sec.; 39, 2 h. 2 min. 10½ sec.; 40, 2 h. 5 min. 36½ sec.; 41, 2 h. 8 min. 58½ sec.; 42, 2 h. 12 min. 20½ sec.; 43, 2 h. 15 min. 46½ sec.; 44, 2 h. 19 min. 19½ sec.; 45, 2 h. 22 min. 23½ sec.; 46, 2 h. 26 min. 17½ sec.; 47, 2 h. 29 min. 34½ sec.; 48, 2 h. 32 min. 42½ sec.; 49, 2 h. 35 min. 48½ sec.; 50, 2 h. 38 min. 44½ sec. Mr. E. P. Moorhouse, North Road C. C., is also credited with fresh times, from fifty-one to fifty-five miles inclusive, he having ridden on the **Paddington** track, on Aug. 8th, those distances in the appended times which are now the fastest: 51 miles, 2 h. 53 min. 49½ sec.; 52, 2 h. 57 min., 41½ sec.; 53, 3 h. 1 min. 22½ sec.; 54, 3 h. 4 min. 58½ sec.; and 55, 3 h. 8 min. 22½ sec. In the **tandem** safety department, on June 15th, at **Paddington**, Mr. S. F. Edge and Mr. J. F. B. Archer rode a **Flying Quarter** in 35½ sec., beating Mr. F. Turner and Mr. P. L. Kiderlen's Long Eaton performance of July 8th, '87, by 2½ sec. A month later, viz., on July 16th, Mr. F. T. Bidlake and Mr. W. C. Goulding, of the North Road and Stanley C. C., at **Paddington**, altered the records from eleven miles to thirty inclusive, the appended being now the record return: 11 miles, 33 min. 18½ sec.; 12, 36 min. 22½ sec.; 13, 39 min. 30½ sec.; 14, 42 min. 39½ sec.; 15, 45 min. 48½ sec.; 16, 48 min. 40½ sec.; 17, 51 min. 45½ sec.; 18, 54 min. 54½ sec.; 19, 57 min. 58½ sec.; 20, 1 h. 51½ sec.; 21, 1 h. 4 min. 68½ sec.; 22, 1 h. 7 min. 14½ sec.; 23, 1 h. 10 min. 26½ sec.; 24, 1 h. 13 min. 41½ sec.; 25, 1 h. 16 min. 56½ sec.; 26, 1 h. 20 min. 15½ sec.; 27, 1 h. 23 min. 34½ sec.; 28, 1 h. 26 min. 51½ sec.; 29, 1 h. 30 min. 7½ sec.; and 30, 1 h. 33 min. 21½ sec. Good work has also been done on roads; and although road records, like grass records, are not officially acknowledged by the Committee, the riders themselves accept them as authentic, and consequently the most remarkable are worthy of

reference. On Aug. 26th Mr. M. A. Holbein and Mr. F. O. Wilson rode one hundred miles on a safety tandem in 7 h. 24 min. 7 sec. on the **North Road**; and nine days later the latter rider attempted to beat the famous coaching performance of the late Mr. James Selby, who, it will be remembered, drove from Hatchett's Hotel, Piccadilly, to the Old Ship at Brighton and back in 7 h. 50 min., but he failed in this attempt by 3 min. 10 sec. The outward journey, however, was accomplished in 21 min. 4 sec., quicker time than Mr. Selby's, Mr. Wilson negotiating the first half of the task in 3 h. 34 min. 56 sec., after which he fell off considerably in pace. On Sept. 7th, Mr. M. A. Holbein, also on the **Great North Road**, rode 223 miles on a safety within twenty-four hours, 175 miles being wheeled in twelve hours; and on Sept. 30th Mr. F. T. Bidlake made the famous **Dick Turpin** ride from **London** to **York**, 199 miles, in 18 h. 28 min. Visits of **American** and **French** cyclists have lent an international appearance to many of our large gatherings, and many **English** cyclists have distinguished themselves by their riding at **Continental meetings**.—The use of the cycle is now widely admitted both for business and military purposes, and the manufacture of the varying machines has now become an important industry. The **National Cyclists' Union** (Pres., Visct. Bury) has control of all "matters pertaining to the pastime in this country." Consult "Cycling" (the **Badminton Library**).

Cymmrodorion. See EISTEDDFOD.

Cyprus. An island and British colony in the Levant, 40 miles from Asia Minor, 60 from Syria, 258 from Port Said, and 1,117 from Malta. Area 3,584 sq. m., pop. 186,173. Divided into six districts. Capital **Nicosia**, pop. 11,500, inland. Chief produce, cotton, wine, salt, carobs, wheat, barley, wool, silk, spirits, sponges, raisins. Minerals: lead, building and ornamental stones, salt. The copper mines of Cyprus were of great importance in classical times, but no large deposits of the ore are now known. In '89 the Archbishop visited England to represent the unsatisfactory condition of the island. During his stay in London he was entertained by the Archbishop of Canterbury. The condition of Cyprus was the subject of several interpellations in the Houses of Parliament. Consult Lang's "Handbook to Cyprus," Brown's "Locust War in Cyprus," the *National Review* and *Blackwood's Magazine* for March '88, "In an Enchanted Island, or a Winter's Retreat in Cyprus," by W. H. Mallock, etc. ('89).

Cyprus Exploration Fund. Formed ('87) to undertake systematic archaeological researches in Cyprus, with a Committee on which the British Museum, the Universities of Oxford and Cambridge, and many leading archaeological societies, were represented. In the spring of '89 excavations were made in the **Neopolis of Arminio**, the modern **Poli**, which resulted in the discovery of numerous terra-cottas, fragments of vases, etc. In the approaching winter the Committee propose to undertake a thorough examination of the site of the ancient **Salamis**. The work is being carried out by students of the **British School at Athens**, under the supervision of the director, Mr. Ernest Gardner. Hon. Treas., Mr. Walter Leaf, M.A., Old 'Change, E.C. Hon. Sec., Mr. George Macmillan.

D

"Daily Chronicle." Morning newspaper. Originally a local paper for the whole of London, it was purchased by Mr. Lloyd (1876), and converted into an imperial Liberal organ with an independent line of action. It has a very large circulation. **Offices**, Fleet St., E.C.

"Daily Graphic." A new daily sixteen-page illustrated paper shortly to be published. It is to be of handy size, printed in clear, bold type, with concise and graphic articles on the questions of the day, long leading articles being avoided. It will be illustrated by rapid sketches from the hands of the cleverest artists. **Offices**, Milford House, Milford Lane, Strand, E.C.

"Daily News." A prominent Liberal daily paper, and is the organ of the Gladstonian party. Established 1846. It made much headway in '70-71, owing to its early and impartial telegrams respecting the Franco-German war; again in '76, when Mr. MacGahan, its special correspondent, first called attention to the Bulgarian Atrocities; and later during the Egyptian campaigns. Charles Dickens was its first editor, and it is at present edited by Mr. J. E. Robinson (q.v.). New and handsome buildings, lit throughout by the electric light, have recently been erected, in Bouverie St., E.C.

"Daily Telegraph." Morning newspaper; founded 1855. Circulation approximates to a quarter of a million daily. Its politics are Independent Liberal, and it takes a foremost part in the discussion of great social problems. Has special wires from Paris and Vienna. In late years it has employed Mr. Smith on his successful special commission to Assyria, and Mr. Henry M. Stanley to Central Africa. New features of interest have been added to the paper, under the titles of "London Day by Day" and "Paris Day by Day." **Offices**, Fleet St., E.C.

Dale, Robert William, M.A., D.D., LL.D., was b. in London, 1829. Educated at Spring Hill Coll., Birmingham, graduated M.A. Lond. Univ. '53, Hon. LL.D. Glasgow '83. He was appointed pastor of Carr's Lane Congregational Church, Birmingham, in '53, in conjunction with the late John Angell James, on whose death he took the entire charge of the church. In '68 Dr. D. held the office of **Chairman of the Congregational Union of England and Wales.** He accepted the **Lyman Beecher Lectureship of Yale Coll.**, Connecticut, in '77, when he lectured on Preaching at that Institution, the Senate of which conferred upon him the degree of D.D. He was a member of the **Royal Commission on the Elementary Education Acts, 86-88.** Dr. D. has published many theological works, the best known of which are "Laws of Christ for Common Life," "The Ultimate Principle of Protestantism," and "The Atonement"—a series of Lectures prepared at the request of the Congregational Union of England and Wales—which has been translated into French and German. Dr. D. is one of the most eloquent of modern preachers and platform speakers, and has long been regarded as a foremost champion of religious and political toleration. On the break-up of the Liberal party on Mr. Gladstone's Home Rule policy, Dr. D. lent his powerful aid to the Unionist Liberals. He has recently published "Impressions of Australia."

Dallinger, Rev. W. H., LL.D., F.R.S., F.L.S.,

was b. at Devonport, 1841. His father was a well-known artist. Dr. D. received his early education at a private school, and subsequently entered the Wesleyan ministry. He was stationed successively at Faversham, Cardiff, Bristol, and Liverpool, whence he removed on his acceptance of the presidency of Wesley College, Sheffield, which he resigned in '88. He early devoted himself to microscopical research, and has thrown much new light on the life histories of the minutest living organisms. His successful researches have also led to great improvements in the microscope. He was elected a Fellow of the Royal Society in '80, and **President of the Royal Microscopical Society** in '83. He has made most important contributions to the *Proceedings* of both these Societies.

Daman. A Portuguese seaport north of Bombay. See COLONIES OF EUROPEAN POWERS.

Damaraland. A German protectorate in West Africa, coast extending from Cape Frio to Walvisch Bay, inland to 20° E. long. Coast infertile and desolate; inland are richer tracts. Ovampoland is partly within this territory. Here, a few years since, there migrated overland from the Transvaal a party of Dopper Boers, an extreme religious sect. A settlement called **Upingtonia** was formed; but the exactions and pitiless oppression of the Boers caused the Ovampo tribes to rise against them. By last accounts the settlement had been broken up. All mining and other rights conceded to these settlers by the native chiefs have recently been purchased by the **German West African Society.**

Damien, Father. See OBITUARY; and consult "A Journey from Cashmere to his Home in Hawaii," by E. Clifford, '89.

Danish Colonies. See COLONIES AND DEPENDENCIES OF EUROPEAN POWERS.

Danish Political Parties. With a constitution at least equal in freedom to that of England, Denmark has, for the past decade and a half, been the scene of a stubborn political conflict, consequent on the refusal of the King to allow the majority (the **United Left**) to take office. The present ministry (of seven members) presided over by M. Jacob Brønnum Scavenius Estrup, was appointed June 11th, '75, and, with occasional modifications, has remained in power ever since, notwithstanding repeated defeats in the Folkething, and the absolute refusal of that body for the past five years to vote any financial measure. As a consequence the affairs of Denmark have, since March 31st, '85, been administered by provisional financial laws, which a clause in the charter authorises the King to promulgate. When parliament was dissolved on January 8th, '87, owing to its refusal to vote the budget, the **Opposition** numbered over 80, leaving the **Ministry** with less than 20 supporters out of a house of 102. The present Folkething was elected on Jan. 28th, '87, when the Ministry increased its following to 27, thus reducing the strength of the Opposition to 75. The chief stronghold of the Conservatives is Copenhagen, where they possess all the seats, except one. The leader of the Opposition is M. Berg, who up to the end of '87 united the functions of leader of the Opposition with that of speaker of the Folkething.

Danube (Iron Gates) Improvement. On May 28th, '88, the Hungarian Government brought into the Lower House a Bill to provide for the long talked-of improvement in the navigation of that portion of the Danube between Orsova and Turu-Beverin known as the Iron Gates. By the Berlin Treaty, the empire of Austro-Hungary was charged with this work, with provisions for levying tolls; but Austria undertaking the construction of the Arlberg Railway, which she completed, the Danube project fell to Hungary, but was hindered, it is said, by the local land-owners, who fear the imports of Roumanian wheat, etc. The work was formally taken in hand on the above date, but the first sitting of the Mixed Iron Gates Commission took place on April 16th, '89. Under date July 1st Mr. F. Knapp, of 12, Queen Victoria Street, London, wrote to the press to state that it had been decided to commence the works in the spring of '90; but that as trials of blasting apparatus, materials, etc., have to be made, the Minister of Public Works at Budapest was then ready to receive tenders. The cost is estimated at 9,000,000 florins. It is recorded that the scheme was first contemplated by the Emperor Trajan; it was taken up in '43 by Count Stephen Szechenyi, and was provided for in the Treaty of Paris, in the London Treaty of '71, and in the Berlin Treaty. Several plans and schemes have been submitted for this, one of the greatest works of the kind in Europe, and the one adopted is by a Hungarian engineer, M. Walland, who follows the English plan of cutting open canals through the rocks.

Dardanelles, or Hellespont, is the narrow strait, about forty miles long, and varying in width from one to four miles, between the European and Asiatic coasts of the Turkish Empire between the Sea of Marmora and the Grecian Archipelago. Its geographical position is of great importance, inasmuch as it is the key to Constantinople. Both sides of the strait are strongly fortified. It derived its ancient name of Hellespont from Helle, daughter of one of the kings of Thebes, who was drowned in it; and its modern name from the castles built at the south-west entrance by Mahomet IV, in 1658. The passage of the Dardanelles was forced by the British fleet, under Admiral Duckworth, in 1807.

Darwin, George Howard, M.A., F.R.S., b. 1846. Is an elder son of the famous naturalist. Graduated in the Mathematical tripos of '68 as second wrangler, second Smith's Prizeman; Fellow Trin. Coll. ('68). In the winter of 70-71 he took part in the *Helios Expedition* to Sicily. Fellow of the Royal Society ('79), on the Transactions of which Mr. D. has on many occasions contributed. He has also been a frequent contributor to *Nature*. Since '77 the greater part of his labour has been directed to investigation in physical astronomy. He is a member of the Council of the Meteorological Office. Assisted ('82) Sir W. Thomson in the preparation of the second part of the new edition of Thomson and Tait's "Natural Philosophy." Elected Plumian Professor of Astronomy and Experimental Philosophy, Cambridge ('83). Has recently published the life of his father.

Daudet, Alphonse, distinguished French novelist, born in humble circumstances at Nîmes, 1840. He commenced his career as a teacher, but after the publication of "Les Amoureuses" devoted himself to literature and journalism. In '61 he became secretary to

the Duke of Morny, under whose auspices he travelled in Italy and the East. Amongst his numerous works his greatest success was "Fromont Jeune et Râler Aîné," a work which went through more than forty editions, and was crowned by the Academy. His dramatisation of "Numa Roumestan" was performed at the Odéon at Paris, Feb. '87. M. Daudet in '88 published "L'Immortel," a translation of which, under the title of "One of the Forty," appeared in the *Universal Review*. His latest play, "La Lutte pour la Vie," was produced at the Gymnase at Paris, Oct. '89.

Davey, Sir Horace, Q.C., b. 1833, and after a distinguished career at Oxford, was called to the bar ('61), Q.C. ('75), and is the leader of the Chancery Bar, as Sir Charles Russell is leader of the Common Law Bar. Mr. Davey became Solicitor-General when Mr. Gladstone formed his last Government, although he had had the misfortune to lose his seat at Christchurch. His subsequent attempts to secure election resulted in defeat on each occasion. During the Parliament of '80-85 Sir Horace Davey rendered good service to the Liberal party in a quiet way, and was always heard by the House with interest, especially when his remarks related to legal subjects. He was counsel for the prosecution at the recent trial of the Bishop of Lincoln (*q.v.*), at Lambeth. Elected for Stockton by a greatly reduced Radical majority on the retirement of Mr. Dods, in the last week of Dec. '88.

Davidson, Rev. Samuel, D.D., LL.D., one of the most eminent of living authorities on biblical criticism, was b. 1817, at Ballymena, Ireland. Educated at Queen's Coll., Belfast. He entered the Presbyterian ministry in '35, but subsequently went over to the English Congregationalists, and in '42 was appointed Professor of Biblical Literature and Oriental Languages at the Lancashire Independent College. He is the only living Englishman who has received the honorary degree of D.D. from the University of Halle. The liberality of his views respecting the writings of the Sacred Scriptures has given offence to orthodox theologians, and some years ago he found it necessary to resign his professorship. Amongst the best known of his works are "Biblical Criticism," "The Canon of the Bible," and his *Critical and Exegetical Introductions* both to the Old and New Testaments.

Davies, Mrs. Mary, popular vocalist, b. in London of Welsh parents. At the age of 14 she late Mr. Brinley Richards commenced to take an interest in her musical studies, and allowed her when only sixteen to make her *début* at one of his concerts in Hanover Square Rooms. She won a scholarship at the Royal Academy of Music, where she became a pupil of Signor Randegger, and greatly distinguished herself in her studies, taking among other honours the Parepa-Rosa gold medal and the Christine Nilsson prize. In '78 she made her first appearance at the Ballad Concerts. Miss D. created the part of Marguerite in Berlioz's dramatic cantata "Faust," on the occasion of its first performance in English in this country, with which her name is identified. In '88 she was married to Mr. W. C. Davies, secretary and registrar of the University College of North Wales (*q.v.*).

Davis, Henry William Banks, R.A., b. at Finchley 1833, was a successful student of the Royal Academy, of which he was A.R.A. ('73). A frequent exhibitor at Burlington House.

His "Trotting Bull," in bronze, shown in '72, obtained a medal for sculpture at the Vienna Exhibition, while his "Returning to the Fold," exhibited in '80, was purchased by the president and council of the Royal Academy under the terms of the Chantry bequest. R.A. ('77). He exhibited at last year's Royal Academy Exhibition "On the Low Ground."

Davitt, Michael, b. 1846 in the village of Straide, co. Mayo. His father, who was a small farmer, was evicted when Davitt was but four years of age; and he has frequently referred in speeches and writings to this event, as colouring his whole life, and forming the groundwork of his political creed and action. For several years he lived at Haslingden, Lancashire; when a boy he lost his right arm, through an accident in a mill. After this he turned his attention to self-education, and was greatly helped by being employed by a stationer of the town. He became connected with the Fenian movement, and was present at the attack on Chester castle. Afterwards he was engaged in buying and transporting arms to Ireland, and being detected, was tried, convicted, and sentenced to fifteen years' penal servitude. He has given full accounts of his prison life in evidence before the committees of parliament on convict treatment, in a pamphlet published after his release, and in "Leaves from a Prison Diary." He was released after seven years and seven months of his sentence had expired. He then went on a lecturing tour through England, Ireland, and Scotland, and afterwards through various cities in America. While in the latter country he fell in with some leading Irish Americans, who had conceived the idea of a new land movement in Ireland, on the basis of peasant proprietary, and accepted their views. On his return to Ireland he succeeded, after many difficulties, in gaining the adhesion of several influential persons—and finally of Mr. Parnell—to his views. He organised a number of meetings first in County Mayo, where, owing to the three bad harvests of '77-8 and '79, there was great distress and a general inability to meet the existing rents. The first meeting was held at Irishtown, in that county, in April '79, and from this meeting the birth of the Land League is usually dated. Davitt was not present, owing to some accident. He then took a very active part in organising the new movement; again visited America; and shortly after his return was again arrested, and sent back to penal servitude. He was released after fifteen months' imprisonment. Since that period he has lectured and written a good deal on the Irish question. He was one of the parties concerned in the charges made in the articles on "Parnellism and Crime," and conducted his own case, making a powerful and effective speech in his own defence, '89 (see PARNELL COMMISSION).

Dawson, Sir John William, LL.D., F.R.S., F.G.S., geologist and naturalist, b. at Picton, Nova Scotia, 1820. Educated at Edinburgh Univ., and returning home devoted himself to the study of the natural history and geology of Nova Scotia and New Brunswick. Accompanied Sir Charles Lyell ('42 and '52) in his explorations in Nova Scotia, aiding him materially in his investigations. He has made important discoveries, amongst these being *Eosoon Canadense*, the oldest known foraminifer. In '50 he was appointed Superintendent of

Education for Nova Scotia. Principal of the McGill University ('55) at Montreal, of which he is now Vice-Chancellor. Author of "The Story of the Earth and Man" ('72), in which he combats the Darwinian theory of the origin of species. Created C.M.G. ('81). Selected by the late Gov.-General (the Marquis of Lorne) as President of the Royal Society of Canada ('82). Was President of the British Association for '86. In '88 Sir J. W. D. issued "Modern Science in Bible Lands."

Day, Sir John Charles, b. 1826. Joined the Middle Temple ('45). Called to the bar ('49); Q.C. ('72). Appointed a judge of the Queen's Bench division ('82). Mr. Justice D., who is a Roman Catholic, was chairman of the Belfast Riots Commission in '86, and was subsequently appointed one of the judges on the Parnell Commission (q.v.). He is the editor of the "Common Law Procedure Acts," and of Roscoe's "Nisi Prius."

Days of Commemoration. See COMMEMORATION, DAYS OF.

Days of Devotion. The Red-Letter Saints' Days of the Anglican Calendar, together with Easter Monday, Easter Tuesday, Whit Monday and Whit Tuesday, on which the faithful attend mass through devotion (*de fide*).

Days of Obligation. All Sundays, and Christmas, the Circumcision, Epiphany, the Ascension, and All Saints' days, on which the faithful attend mass through obligation (*de obligatione*).

Dean and Chapter. A corporate body, consisting of the Dean, who is president, together with his canons or prebendaries, who form the Chapter. They are the council of a Bishop, govern the cathedral under him, and also assist in the celebration of divine service.

Deans. From Latin *decanus*. The term dean was originally applied to heads of chapters, because they presided over ten prebendaries, or canons. Formerly the chapter was regarded as (1) the bishop's council, (2) a collegiate institution, and (3) a body of learned canonists charged with the maintenance of rubrical strictness in the discipline of the Church.

Deans Peculiar. This term is applied to the following nominal heads of obsolete capitular bodies: Dean of Battle (Very Rev. E. R. Currie), Deans (two) of Bocking (Very Revs. H. Carrington and E. Spooner), Dean of Guernsey (Very Rev. C. Brock), Dean of Stamford (Rev. W. W. Howard). The Dean of Jersey presides over a council of twelve rectors, in whose direction are the affairs of the Church in the Channel Islands.—**Royal Peculiar** is the deaneries of Westminster and Windsor. The term is also applied to another class of dignitaries, such as Dean of the Closet, Dean of the Chapel Royal and to the chaplains of Knightly Orders, e.g., Dean of the Thistle, who is a Presbyterian. Ancient collegiate chapters which have been suppressed are those of Middleham (extinguished 1856), Wolverhampton (extinguished by 3 & 4 Vict. c. 123), and Southwell collegiate church, now the cathedral church of that see.—**Greater and Lesser Chapters.** Nominally the chapter comprises all canons and prebendaries who have been appointed to stalls by the bishop, but statutorily only the prebendaries of the old foundation are competent to transact capitular business. Of late it has been sometimes the practice to invite all prebendaries, including honorary canons, into consultation with the dean and statutory

canons. It has been decided that the dean is not responsible to the bishop for the conduct of divine service in any cathedral church. St. Albans, Liverpool, Southwell, Wakefield, and Newcastle are without deans. The Bishop of Truro is also dean of St. Mary's Cathedral, Truro. The dean of Bristol ranks with the dean of Gloucester in the diocese of Gloucester and Bristol.—**Rural Dean** (see **DIOCESE**), an honorary office involving the right of observing and reporting to the archdeacon or bishop in matters concerning the welfare of parishes within a specified district, and in examining candidates for confirmation.—**Dean Cardinal**. The senior Cardinal Bishop of the Sacred College of Cardinals at Rome, who, amongst other honours, receives the first visits of foreign ambassadors, and consecrates the Pope, should he not be a bishop.—**Dean of Faculty**, also called **Master of Faculty**, is the head of the Faculty Committee, a tribunal pertaining to the Archbishop of Canterbury, which creates rights to pews, monuments, burials, grants, dispensations, etc.

Death, Accidental. See **CORONERS' INQUESTS**.

Deaths. See **POPULATION**.

Debates and Proceedings in Parliament. See **SESSION**.

Declaration of Paris. This Declaration deals with the right of seizing enemy's goods in neutral vessels in time of war, and is an annexe to protocol No. 23 of the Treaty of Paris of March 20th, '56. It sets forth that maritime law in time of war having long been the object of regrettable contestation, it is advantageous to establish a uniform doctrine and to introduce into international relations fixed principles in this respect. On a proposal made by the English and French plenipotentiaries, and which the plenipotentiaries of Austria and Russia declared themselves without power to accept or even consider, it was solemnly agreed: (1) Privateering is, and remains, abolished. (2) The neutral flag covers enemy's merchandise with the exception of contraband of war. (3) Neutral merchandise, with the exception of contraband of war, is not capturable under the enemy's flag. (4) Blockades in order to be obligatory must be effective—that is to say maintained by a force sufficient to really prevent access to the coast of the enemy. The Governments of the plenipotentiaries pledged themselves to bring the Declaration to the knowledge of the States which had not been invited to participate in the Congress, and to invite them to accede to it, in the conviction that the maxims proclaimed therein "could only be received with gratitude by the whole world." The Declaration is not obligatory except between the Powers acceding to it. Subsequently the Russian and Austrian plenipotentiaries announced that they had received authority to sign it, and accordingly it was signed by all the members of the Conference. The genesis of this Declaration is obscure, and the principles enunciated in it have long been the subject of controversy. From the eleventh century the authority of the greatest publicists has been in affirmation of the right of every nation when at war to capture an enemy's property on the high seas, whether that property be found in the enemy's own or in neutral vessels; and denials of the right had their origin in attempts to weaken the naval supremacy of England. This country, however, consistently resisted attacks upon it, and as

late as February '54 Lord Clarendon, then Secretary of State for Foreign Affairs, declared, when questioned relative to the imminence of the war with Russia, that England would exercise the right. Yet, in the *London Gazette* of Mar. 28th, '54, an unsigned notification appeared that the Government of Great Britain had determined to waive during the war the right of commissioning privateers and of seizing enemy's goods (except contraband of war) in neutral vessels. This mysterious waiving of the right has remained unexplained; and it is argued by the opponents of the Declaration that the Plenipotentiaries of this country had no authority whatever to sign it at the Congress, their instructions being limited to full powers to make a treaty of peace between the allies and Russia. No sign-manual of the Sovereign has been affixed to the Declaration, and from the argument of imperfect authority has arisen the contention that it is null and void (see "The National Defence and Commerce as Affected by the Declaration of Paris of '56," by Thomas Gibson Bowles, R.N.R.). Those who take this view hold that Great Britain is in honour, though not legally, bound by the Declaration unless and until it is formally repudiated; and that it should be formally repudiated in time of peace rather than, to quote Mr. Bowles, "let it stand on its own inherent baselessness and simply disregard it whenever war may arise."

Decree nisi. A decree nisi is a provisional decree, which will be made absolute within a given time unless some reason is shown to the court why it should not be made absolute. It means literally a "decree unless" (Latin *nisi*). If within the time appointed good reason can be shown for such a proceeding, the decree nisi will be reversed, or a further inquiry will be ordered. See **DIVORCE**.

Dee Dock Scheme. It was reported in July '88 that a party of American steamship owners, who had been examining various places on the western coast in search of a suitable point for the construction of docks, had fixed upon Mostyn, in the estuary of the Dee. It is stated that at low water there is a depth of 16 to 20 ft., and at high water 40 to 46 ft., while the L. & N. W. Railway main line from Holyhead to London is within 300 yards of the proposed site. Further, the bar at the mouth of the Dee has from 3 to 6 ft. more water over it than the Mersey bar; the distance to Mostyn is only four miles, and the anchorage outside Mostyn would, it is said, accommodate all the navies of Europe.

Dee Railway Bridge. The first cylinder of a new railway bridge between Chester and Flint was laid on Aug. 16th, '87, by Mr. Gladstone. The work was undertaken by the Manchester, Sheffield, & Lincolnshire Railway Co., who, taking the necessary steps in '84, determined to extend the Cheshire railway lines from Chester to Connah's Quay by means of a low-level opening bridge across the Dee; thus, by means of the Wirral line and the Mersey Tunnel, Liverpool will be within half an hour of North Wales. (See ed. '88.) It is stated that as now completed the bridge exceeds the span of every other bridge over a navigable river in the United Kingdom. This is the second bridge connecting North Wales with England, and it is expected will prove a valuable outlet for this portion of the Principality, especially for coal, the field being

estimated to contain 4,450,000,000 tons, with a present annual output of 3,000,000. On Sept. 4th, '88, Mr. Gladstone formally opened the first portion of the **Hawarden loop line**, the first link in a railway chain which, by means of the Dee Bridge, will connect Lancashire and Yorkshire at one extreme and Flintshire, etc., at the other. The total length of the loop is $4\frac{1}{2}$ miles, but only $2\frac{1}{2}$ were complete at the time of the ceremony. It was stated at Liverpool towards the end of November that the M., S. & L. Railway Co. had acquired from the Wirral Co. their powers for a line from the Dee Bridge to Birkenhead. The bridge was successfully swung by hand power on May 11th, '89, in the presence of Sir E. Watkin, the engineer (Mr. F. Fox), and the contractors (Messrs. John Cochrane & Sons). At the time the structure, which is said to be the largest swinging bridge in the world, was described as having a swinging girder of 287 ft. in length, height 16 ft., and a clear width of open span 140 ft., with two fixed spans of 120 ft. each. The bridge was opened by Mrs. Gladstone, Aug. 3rd.

Delagoa Bay. Situated on the E. coast of South Africa, on the twenty-sixth parallel of S. latitude. It forms the southern extremity of the Portuguese territory of Mozambique. The port and settlement is **Lourenço Marquez**, a young town now rapidly growing. Delagoa Bay is available for vessels of large tonnage; the Olifants or Krokodil river, flowing into it, is navigable for steam launches for a considerable distance; but there are swamps around the coast, and some malarial fever is prevalent. The Transvaal border begins 52 miles inland. Concessions for the construction of a railway from the Bay to Pretoria were granted by the King of Portugal in '76. See ed. '88, and *infra*.

Delagoa Bay and Gold-fields Railway. On Nov. 1st, '87, the Portuguese Government announced the completion of this line. It is to be extended to Pretoria by a company working with a subsidy from the Transvaal Government, and the money required was subscribed in Amsterdam and Berlin by the time the Delagoa portion was completed. The Delagoa Company's frontier station is at the river Komati, which pierces the mountain chain a little to the south of the northern road to Lydenburg. The extension to Pretoria will pass through that gold region, with a branch to Barberton in the De Kaap district. A despatch, dated Durban Dec. 14th, stated that the first section to Komati was opened on that day by the Governor-General amid great rejoicings. On Feb. 20th, '89, whilst inviting subscriptions for an issue of 7 per cent. debentures (£100,000 at 98 per cent.), the directors stated that the negotiations between the Portuguese and Transvaal governments rendered it probable that the frontier would be fixed about 10 kilometres further on than the railway had reached, thus necessitating a short extension of the line. The survey had been made, and there were no engineering difficulties to be encountered. (For history during '88 see ed. '89.) On the morning of May 8th, '89, it was announced that Col. McMurdo, the concessionaire of the Delagoa Bay Railway, had expired suddenly. It was reported from Lisbon, under date May 10th, that this unlooked-for event had given a fresh impulse to a discussion which had been going on in parliament and the press about the railway. On that day the

Minister of Foreign Affairs said in the Chamber of Deputies that the Government would not extend the term allotted for the construction of the line, which expired in June. In the House of Commons, on June 24th, Sir James Fergusson, in reply to Mr. Mills, said that Her Majesty's Government were bringing what pressure they could to bear on the Portuguese Government to induce them to at least postpone action. Lord Salisbury made a similar reply to Lord Castletown in the House of Peers the following day. The official journal of Lisbon, on June 26th, published a decree of the Minister of the Colonies cancelling the railway concession on the ground that the company had not carried out the terms of its engagements. The Government, it was added, would carry on the work, taking over the property at a valuation. A general meeting of the bond and shareholders of the Company was held in London on the 28th, when energetic protests were made against the action of the Portuguese authorities, the British Government was called upon to intercede, and an appeal made to the United States Government on behalf of the widow of Col. McMurdo, an American citizen. The following day the line was seized by Portuguese soldiers, who tore up the rails and made one or two arrests. An extraordinary letter by "One who Knows" appeared in the *Times* of July 1st, giving an account of some supposed secret compact for acquiring the line entered into between the Portuguese and Transvaal Governments and the Netherlands Railway Co., whose controlling interest was German. An official statement of the whole case was made by the financial agent of the Portuguese Government and published in the *Times* of July 2nd. This was answered next day by the Company. In the House of Lords the Marquis of Salisbury, in reply to Lord Rosebery, stated that three men-of-war had been ordered to Delagoa Bay, that he considered the action of Portugal unjust, and that warning had been given that she would be held responsible for any loss to British subjects; questions were also asked in the Commons. A further statement of the case was made to the *Times* Lisbon correspondent, on July 3rd, by the Minister of Foreign Affairs, and a telegram from Durban of the same date stated that the Portuguese were proceeding with the construction of the line. A despatch dated Lisbon, July 5th, stated that an arbitration between the Portuguese Government and the Railway Co. had been decided upon. Lord Castletown, in the House of Lords on July 9th, proposed a motion to the effect that steps be taken to obtain adequate compensation on behalf of the British stockholders from the Portuguese Government. After a discussion, and on receiving what he described as a satisfactory reply from the Marquis of Salisbury, his lordship withdrew the motion.

De La Rue, Warren, M.A., D.C.L., F.R.S., a son of the head of the well known firm of De La Rue & Co., is a native of Guernsey, where he was b. 1815. After attending the college of St. Barde, Paris, he entered his father's business, where he successfully devoted his scientific genius to the invention of machinery and new processes of colour printing. He is one of the most eminent of living electricians, and has rendered immense service by successful physical researches in the application of electricity to practical purposes. In

conjunction with Dr. Hugo Müller, he has carried on a series of remarkable experiments in his private physical laboratory, with a view to the observation and explanation of the phenomena of the electrical discharge. He has recently presented some valuable instruments to the laboratory of New Coll., Oxford. He is a corresponding member of the Institute of France, and Fellow of many learned societies. He succeeded the late Mr. Spottiswoode as **Secretary to the Royal Institution**. Has been Pres. of the Royal Astronomical and Chemical Societies and of the London Institution.

Delegations. See AUSTRIAN POLITICAL PARTIES.

Delitzsch, Dr. See ASSYRIOLOGY.

Demerara. One of the three counties of British Guiana (*q.v.*).

Denison, The Ven. Geo. Anthony, Archdeacon of Taunton, nephew of the late Viscount Ossington, Speaker of the House of Commons (1857-72), was b. 1805. Educated at Eton and Christ Ch., Oxford, graduating First Class in Classical Honours '26. Elected Fellow of Oriel '28. He held successively the curacy of Cuddesdon, Oxon, and the vicarages of Broadwindsor, Dorset, and East Brent, Somerset. He was appointed to the **Archdeaconry of Taunton** '51. He resigned his examining chaplaincy to the Bishop of Bath and Wells in '53, when Dr. Spencer charged him with holding views on the **Doctrine of the Real Presence** contrary to those sanctioned by the Articles of the Church. In consequence of three sermons which he preached on that subject in Wells Cathedral '54, he was deprived of his preferments by an Ecclesiastical Court presided over by the primate at Bath. On his appeal, however, to the Court of Arches (*q.v.*) his sentence was set aside, and on further appeal to the Privy Council (*q.v.*) in '58, the decision of the Court of Arches was confirmed. Archdeacon D. was **Chairman of the respective Committees of the Lower House of Convocation, which condemned the "Essays and Reviews" and Bishop Colenso's Comments on the Pentateuch.** He has long been an active member of the **Church Union** (*q.v.*), and has frequently afforded evidence of his strong individuality and tenacious grasp of his private opinions by his vigorous **opposition to the School Board System** and other democratic movements. Archdeacon D. was for many years editor of the "**Church and State Review**," and has written "**Notes of my Life**" ('78), and "**Mr. Gladstone**," a pamphlet which had a large sale, in '85. He petitioned the **Pan-Anglican Synod** in '88 in favour of admitting to **Church Schools** only such children as have been baptised in accordance with the rites of the Church of England.

Denman, the Hon. George, the fourth son of the first Lord Denman; b. 1810. Educated at Cambridge. Called to the bar ('46). After two unsuccessful attempts to enter Parliament, Mr. Denman was elected member for Tiverton, his colleague in the Liberal interest being Lord Palmerston. He continued to sit for Tiverton, with a brief exception, until '72, and carried through Parliament two useful measures modifying the laws of evidence. In '72 he was appointed a judge of the Court of Common Pleas, and is now, by the operation of the Judicature Act, a judge of the High Court.

Denmark. Kingdom under Christian IX., of Glücksburg. By charter of 1849 (modified in '55, '63, and '65) the executive power is

vested in king and ministers, the legislative in the Rigsdag or Diet jointly with the sovereign. The Rigsdag is composed of the Landsthing (or Upper House of 66 members; 12 crown nominees, and 54 indirectly elected by the people for eight years), and of the Folksthing (or House of Commons of 102 members directly elected by universal suffrage for three years). The Rigsdag must meet every October, and all money bills be submitted to the Folksthing. Colonies comprise Iceland (which has its own constitution and assembly of 36 members, with a minister nominated by the king), the Faroe Islands, Greenland, and three small West Indian Islands. The state religion is Lutheran, but all others are tolerated, and there are no civil disabilities to dissenters. Area (excluding Faeroe Islands), 13,784 sq. m.; estimated pop. in '86 2,108,000. **Budget estimates for '89-90: revenue, 55,000,000 kr.; expenditure, 59,000,000 kr. Total public debt, 193,017,689 kr.; but State investments, about 84,000,000 kr., reduce to nearly one-half. Imports ('86), 211,613,697 kr.; exports, 166,746,742 kr. (krone = 1s. 1d.)** The United Kingdom ranks second in the trade with Denmark, coming next after Germany. **Chief exports** to Great Britain, butter and tallow, cattle, eggs, lard; **chief imports**, cotton and woollen manufactures, iron, sugar. The **agricultural returns** for the past three or four years show that the foreign demand for Danish agricultural produce continues to increase. Cattle breeding is at the same time taking more and more the place of arable farming. Above all, dairy farming (*q.v.*) is being pursued with unparalleled skill and success. The export of butter and other dairy produce is now the main source of the wealth of Denmark. (For army and navy see **FOREIGN ARMIES AND NAVIES**; and for history '73-87 see previous eds.). Among the principal events in the little kingdom in '88 have been the submission of the **arbitration of the long-standing dispute between Denmark and the United States** to Sir E. Monson, British Minister at Athens. The question is one of the demand of the United States for the payment of a considerable sum as compensation for the action of the Danish commander at St. Thomas, who in '54 gave orders to fire upon the American vessel *Benjamin Franklin* while she was leaving the port without permission. **Royal visits** during the year were paid by the King of Greece, the Tzar and the Imperial Family, the Empress Frederick of Germany, the Princess of Wales and the Princesses Victoria and Maude (Aug.); the Princess of Wales and sons, and the Duchess of Cumberland (Sept.). **The King and Queen** visited Greece to attend the wedding of the Duke of Sparta (Oct.). **A vote of want of confidence** in the Government (25th) proposed by M. Berg, former president of the Houses, in the Folkething, arising out of the proposal that the provisional Budget, which had been promulgated without the sanction of the Rigsdag, should be referred to a committee for consideration, was negatived by 64 to 11.

Département. (From the French.) One of the principal territorial divisions of France under the administration of a prefect (*prefet*), who is the head representative of the Government. The administrative seat of a prefect is called **prefecture**, and is always situated in the capital town of the **département**. A **département** is subdivided into **arrondissements** (districts). A French **département** is like an English county. **Derby, The.** See TURF.

Desirade. A French West Indian island, four miles west of *Guadeloupe* (*q.v.*), of which it is a political dependency. It is four miles long by two broad, high, rocky, and unfertile. Cotton is grown, but fishing is the leading pursuit. See *COLONIES AND DEPENDENCIES OF FOREIGN POWERS*.

Dewar, James, M.A., F.R.S., b. 1842, at Kincardine. Educated at Dollar Academy and the University of Edinburgh. Appointed assistant to Dr. Lyon Playfair, then Professor of Chemistry in the University of Edinburgh (1863). Studied subsequently at Ghent. Is Jacksonian Professor of Natural Experimental Philosophy in the University of Cambridge, and Fullerian Professor of Chemistry in the Royal Institution. He is the author of several papers, and also published the well-known investigation on the "*Physiological Action of Light*," in connection with Professor Kendrick, of Glasgow, in which the authors proved that the effect of light on the living retina is to produce a sudden alteration of its electrical condition. Delivered in '83 a series of lectures on "*Clouds and Cloudland*" at the Royal Institution.

Dhuleep Singh, Maharajah, b. 1828, and while yet an infant succeeded his father, Runjeet Singh, "The Lion of the Punjab." On the annexation of that province by Lord Dalhousie, a pension of £40,000 per annum was settled upon the infant Prince. He subsequently took up his residence in England, where he lived for many years. It is stated that he recently visited Moscow to offer his services to the Russian Government. Dhuleep Singh's chief grievance against the British Government is their refusal to return to him the *Koh-i-noor* diamond, which belonged to his father, and was "annexed" with the Punjab by the British. This precious gem weighs 123 carats, and is valued at £120,664. Dhuleep's father is said to have extorted it from the unfortunate Shah Soojah of Afghanistan. Dhuleep, who during his residence in England professed Christianity, has recently reverted to Sikhism. He now resides in Paris.

Diamond Sculls. See *AQUATICS*.

Diamonds, Production of. Until within the last six years no official returns of diamond production were kept, but between '73 and '80 the output was variously estimated up to three million carats. The official returns for the year '83 were 2,312,234 carats, of a valuation of £2,350,406, averaging 20s. 4½d.; in '84 the production was 2,904,786 carats, of a valuation of £2,562,623, the average being 23s. 2½d.; in '85, 2,287,261 carats were produced, of a value of £2,228,678, the average being 19s. 5½d.; in '86 the production reached 3,047,699 carats of the value of £3,261,574, average 21s. 6d.; in '87, 3,646,889 carats, value £4,033,582, and the average price 22s. 1½d.; and in '88 the output was 3,565,782 carats of the value of £3,608,217, the total for the last two years being 7,641,799 carats, and the average about 21s. 6d.

Dictionary, New English, on historical principles, founded mainly on the materials collected by the Philological Society; edited by James A. H. Murray, LL.D., assisted by many scholars and men of science, and published at the Clarendon Press. In order to insure complete accuracy and thoroughness, an entirely fresh selection of representative extracts from the original works themselves has been made from over 5,000 of the chief

English writers of all ages; and when completed there will be about 1,000,000 distinct quotations in the dictionary. The work will be completed in six volumes, each containing four parts; and each part will be issued at intervals of six months. The headquarters of the staff are at Oxford, and the publisher is Mr. Henry Frowde, Amen Corner, London, E.C.

Diego Garcia. An island in the Indian Ocean. It is chief of the *Oil Islands*, a group forming part of the *Chagos Archipelago* (*q.v.*), and has an excellent harbour.

Diego Suarez Bay, or British Sound, a fine harbour, near the north extremity of *Madagascar* (*q.v.*). By the treaty of December 1885, made between the French and Malagasy Governments, this bay was ceded to France.

Diggle, Rev. Joseph Richard, M.A., Chairman of the School Board for London (*q.v.*), is a native of Lancashire and was b. 1845. Ed. at Wadham Coll., Oxford, where he graduated. Ordained priest '75, and for four years was curate of St. Mary's, Bryanston Square, during the time that the present Canon Fremantle was vicar of that church. Elected a member of the London School Board for Marylebone in '82, and chairman of the Board in succession to Mr. E. N. Buxton, progressist, who was defeated by the newly-turned clerical majority (of which Mr. Diggle was leader), on the reassembling of the Board in '85. Re-elected to the chair '88.

Dillon, John, M.P., L.R.C.S.I., son of the late John Dillon, M.P., of '48 celebrity, was b. 1851. Educated at the Catholic University of Dublin. Returned as Nationalist for Tipperary ('80), but owing to ill health resigned the seat. Elected for East Mayo in '85, and again in '86. Mr. Dillon has recently been identified with the "*Plan of Campaign*" (*q.v.*); and in Nov. '86, while carrying that plan into operation at Loughrea by receiving the rents of the tenants, was arrested by the police. He was subsequently tried for the offence, and bound over in heavy securities to keep the peace. Mr. D. was twice imprisoned under Mr. Forster's Coercion Act, and has been repeatedly suspended by the House of Commons. He is one of the most powerful speakers in that assembly. At the Mell Petty Sessions, Drogheda, on May 11th, '88, for "having on April 8th, at Tullyallen, co. Louth, taken part in the criminal conspiracy known as the *Plan of Campaign*," Mr. D. was sentenced to six months' imprisonment. The sentence was confirmed on appeal on June 21st. Mr. D. was sent to *Tullamore Prison*, and was liberated Sept. '88. He has recently been making a tour of the *Australian Colonies*, where he has met with an enthusiastic reception and collected large contributions to the funds of the Irish Nationalist party.

Dindings. An island and territory of the *Straits Settlements* (*q.v.*).

Diocesan Courts. Ecclesiastical courts for exercising general jurisdiction in diocesan affairs. They consist of the Consistory Courts, the Courts of Commissaries, and the Courts of Archdeacons (see *infra*).

Diocese. Anciently the Established Church of England (*q.v.*) was divided into three provinces—viz., Canterbury, York, and Caerleon. The latter, however, was abolished and the

several dioceses in it added to the Province of Canterbury in 1147. Including these, the number of dioceses now contained in the Province of Canterbury is twenty-five; those of the Province of York numbering ten. (See **ANGLICAN CHURCH**.) Immediately under the authority of the Bishops are the **Bishops Suffragan**. The dioceses which now possess such an assistant prelate are Canterbury (Dr. Parry, Bishop of Dover), London (Dr. Earle, Bishop of Marlborough, and Dr. Billing, Bishop of Bedford), Winchester (Dr. Sumner, Bishop of Guildford), Lichfield (Sir Lovelace Stamer, Bishop of Shrewsbury), Lincoln (Dr. Trollope, Bishop of Nottingham), Peterborough (Dr. Mitchinson, assistant Bishop), St. Albans (Dr. Blomfield, Bishop of Colchester), Durham (Dr. Sandford, Coadjutor Bishop), Manchester (Dr. Cramer Roberts, Coadjutor Bishop), Oxford (Dr. Randall, Bishop of Reading), Ripon (Dr. Pullcine, Bishop of Penrith), and Southwell (Dr. Warre). Next in rank are **Deans** (*q.v.*), and **CONVOCACTION**, with whom come the **Greater Chapter**, including the Archdeacons holding stalls. The **Minor Canons** read the prayers and control the musical part of the services in cathedrals. The Bishop nominates **resident chaplains** and **examining chaplains**, the latter being employed in examining candidates for ordination by the Bishop. The **other diocesan officials**, lay and clerical, are as follows:—Chancellor (usually a lawyer), diocesan inspectors (charged with the inspection of Church schools), Pluralities Act commissioners, secretaries, registrar, architect, chapter-clerk, and organist. The **principal lay officers** are the two vicars-general (Sir J. Parker Deane and Lord Grimthorpe). Territorially, each diocese is subdivided into **archdeaconries** and again into **rural deaneries**. The office of the archdeacon is to act as **oculus episcopi**—the Bishop's eye; while that of rural dean is to assist the archdeacon. Both are entitled to be heard in the Bishop's Court. Most of the cathedral patronage is vested in the Chapter, while that of the diocese is vested in the Bishop. **Geographically** the limits of diocesan jurisdiction are usually continuous with county divisions, though there are several important exceptions. The Northern Province is divided from the Southern by a zigzag line extending from the Mersey to the Humber, touching Newcastle-under-Lyme at its south-western and Hull at its north-eastern extremities. Jurisdiction in London and suburbs is shared by no less than four bishops—viz., London (Middlesex), St. Albans (Essex), Rochester (Surrey), and Canterbury (Kent). The largest diocese in point of acreage is St. Davids, with 2,360,000, and the smallest London, with 181,000. London has the greatest population, viz., 2,920,000, and Bangor the least, 226,000. The diocese of Norwich has the greatest number of benefices, 908, to 1,006 clergy, while London has the largest number of clergy, 1,106, to 566 benefices. The **Roman Catholic** dioceses in England are fifteen in number—viz., Westminster (Archbishop and Metropolitan, Cardinal Manning), and, in order of foundation, Birmingham (1857), Clifton, Hexham and Newcastle, Leeds, Liverpool, Middlesbrough, Newport and Menevia, Northampton, Nottingham, Plymouth, Portsmouth, Salford, Shrewsbury, and Southwark (1885). For information respecting **Scottish and Irish** dioceses see **CHURCH OF IRELAND**, and **SCOTLAND**, **EPISCOPAL CHURCH OF**, etc.

TONGAREVA. *French Resident*, M. Reinart.

TRANSVAAL. *President*, S. J. Paul Krüger.—*Vice-President*, U. J. Smit.—*President of Legislative Council (Volksraad)*, J. J. Hoffman.—*Secretary of State*—J. V. Eduard Bok.—*British Resident*, R. C. Williams.

TRINIDAD AND TOBAGO. *Governor*, Sir William Robinson, K.C.M.G.

TRIPOLI. *Governor-General*, Ahmed Rassim Pasha.—*British Consul-General*, Frank R. D. Hay.—*Vice-Consul*, Alfred Dickson.

TUNIS. *Prime Minister*, Sidi el Aziz Bon Attour.—*French Governing Resident*—M. Masciaut.—*Secretary-General to Tunisian Government*, M. Regnault.—*Finance*, Depienne.—*Public Works*, Michaud.—*British Consul at Tunis*, R. Drummond-Hay. See also **ALGERIA**.

TURKEY. See **OTTOMAN EMPIRE**.

UNITED STATES OF AMERICA. *President of the United States and of the Cabinet*, Benjamin Harrison.—*Vice-President*, Levi P. Morton.

—*Secretary of State*, James G. Blaine.—*Secretary of the Treasury*, William Windom.—*War*, Redfield Proctor.—*Navy*, Benjamin F. Tracy.—*Postmaster-General*, John Wanamaker.—*Interior*, John W. Noble.—*Attorney-General*, William H. H. Miller.—*Secretary of Agriculture*, Jeremiah M. Rusk. (The above form the Cabinet.)—*Solicitor-General*, George A. Jenks.—*President of the Board of Health*, James M. Cabell, M.D.—*Minister in London*, Robert T. Lincoln, 123, Victoria Street, S.W.—*Secretaries*, Henry White and Robert McCormick.—*Consul-General to Great Britain and Ireland*, Jno. C. New, 12, St. Helen's Place, Bishopsgate Street, E.C.—*Vice-Consul-General*, O. R. Johnson.—*Deputy Consuls-General*, Edmund J. Moffat and Francis W. Frigout.—*British Minister at Washington*, Sir Julian Pauncefote, G.C.M.G., K.C.B.

URUGUAY. *President*, General Tajes.—*Interior*, Dr. Julio Herrera y Obes.—*Foreign Affairs*, Dr. Ildefonso Garcia Lagos.—*Finance*, D. Jacobo Varela.—*Public Instruction*, Dr. Martin Berinduague.—*War and Marine*, Col. Pedro de Leon.—*Minister and Consul-General in London*, Dr. Alberto Nin, 27, Throgmorton Street, E.C.—*British Minister at Monte Video*, E. M. Satow, C.M.G.

VENEZUELA. *Ministry: Interior and Justice*, R. A. Palacio.—*Foreign*, A. Parejo.—*War and Marine*, R. Fonseca.—*Finance*, J. Coronads.—*Public Works*, J. M. Tébar.—*Instruction*, González Guinan.—*Consul in London*, Nathaniel G. Burch, 4, Tokenhouse Bldgs., E.C.

VICTORIA. *Governor*, The Rt. Hon. the Earl of Hopetoun, G.C.M.G. *Premier, Treasurer, Commissioner of Railways and Minister of Mines*, Hon. Duncan Gillies.—*Chief Secretary and Minister of Water Supply*, Hon. Alfred Deakin.—*Attorney-General*, Hon. Henry Wrixon.—*Minister of Lands and Agriculture*, Hon. John Dow.—*Minister of Public Instruction*, Hon. Charles Pearson.—*Commissioner of Public Works*, Hon. D. H. Davies.—*Commissioner of Trade and Customs*, Hon. J. B. Patterson.—*Minister of Justice*, Hon. Henry Cuthbert.—*Minister of Defence*, Hon. James Bell.—*Postmaster-General*, Hon. F. T. Derham.—*Agent-General*, Sir Graham Berry, K.C.M.G., 8, Victoria Chambers, S.W.—*Secretary to the Agent-General*, J. Cashel Hoey, C.M.G.

WEST AFRICAN COAST. **OLD CALABAR:** *British Consul*, E. H. Hewett, C.M.G. **CAMEROONS AND BIGHTS OF BENIN AND BIAFRA:** *British Consul* (vacant).—**MOZAMBIQUE:** *British Consul*, H. H. Johnston.

WEST AFRICA SETTLEMENTS. *Executive Council: Governor-in-Chief and Consul for Liberia*, James Shaw Day Eyre, C.M.G.—*Colonial Secretary and Treasurer*, T. R. Griffith.—*Chief Justice*, W. Quayle Jones.—*Queen's Advocate*, J. K. Donaldson.

WINDWARD ISLANDS. *Governor*, The Hon. Sir W. F. Hely-Hutchinson, K.C.M.G.

WÜRTENBERG. *President of Ministry*, Dr. Von Mittnacht.—*Finance*, Dr. Von Renner.—*Public Worship*, Dr. Von Sarwey.—*Instruction*, Von Sick.—*War*, Von Steinhell.—*Justice*, Dr. Von Faber.—*British Minister*, Stuttgart, Sir Henry Page T. Barron, Bart., C.M.G.

ZANZIBAR. *British Political Agent and Consul-General*, Col. C. B. Euan-Smith, C.S.I.

ZULULAND.—*Governor*, The Governor of Natal.—*Resident Commissioner*, M. Osborn, C.M.G.

Disestablishment. While the State does not concern itself about the affairs of other religious bodies, the Churches of England and Scotland are national church establishments; and disestablishment means the placing of them on exactly the same footing, as regards the laws and government of the country, as those other bodies. The Protestant Episcopal Church in Ireland was established at one period, but was disestablished by an Act of Parliament passed in 1869. The advocates of disestablishment object to church establishments because (1) the national legislature, which represents everybody, ought not to confer privileges on particular religious bodies, and thereby to create religious inequality; (2) because Parliament is an unfit body to deal with the affairs of churches, and cannot do so compatibly with its other duties; (3) because established churches being necessarily subject to state-control, cannot possess the liberty required to adapt their operations to changing circumstances; (4) because establishments obstruct political and social reforms, waste much national property by applying it in an ineffectual way, and also injure religion by associating it with injustice, and occasioning discontent and division. It is specially objected to the establishment of the Church of Scotland that its adherents probably do not embrace more than about one-third of the population. The disestablishment of the Church of England in Wales is demanded on the ground that it is the church of probably only one-sixth of the Welsh people; and at the general election of '86 every Liberal member returned declared in favour of disestablishment. It is further alleged that the steps already taken towards religious equality and disestablishment—such as Catholic emancipation, the admission of Jews to Parliament, the abolition of compulsory church rates, the admission of Dissenters to the national universities, and the legalisation of Nonconformist burial services in churchyards—have all had a distinctly beneficial effect; and that as Parliament has thrown the established churches more and more on their own resources their activity and usefulness have greatly increased. On the other hand, those who object to disestablishment, while they acknowledge that it would be objectionable to set up establishments now for the first time, assert that the amount of good which they effect justifies their continued existence; that disestablishment would be very difficult, and would be injurious to the State; while disendowment, which, it is admitted, must accompany disestablishment, would seriously cripple the resources of the churches. With regard to disendowment, it should be stated that the advocates of disestablishment propose to scrupulously respect all existing life interests, and also to leave the disestablished churches in possession of the buildings and endowments which have been the result of their own liberality during the last sixty years. The organisation which is most closely identified with the disestablishment movement is popularly known as "The Liberation Society," its full title being *The Society for the Liberation of Religion from State Patronage and Control*. It was founded in the year 1844, under the title of *The British Anti-State Church Association*, that title having been changed in 1853. Its chief office and depot for publications is 2, Serjeant's Inn, Fleet Street,

Secretaries, Mr. John Fisher and Mr. Sydney Robbings. On the other side *The Church Defence Institution* (Office: 62 to 67, Palace Chambers, Westminster, S.W.; Secretary, Rev. H. G. Dickinson, M.A.) is organised for defence of the Church (see CHURCH OF ENGLAND). Consult (*pro*) "The Case for Disestablishment"; (*contra*) Lord Selborne "The Case against Disestablishment"; and for Disestablishment in Wales see SESSION, sect. 34.

Dishorning Cattle. Law on, in '89. The question whether the dishorning of cattle is an illegal practice was decided in the Queen's Bench Division (May). By a former decision it was laid down that pain may lawfully be inflicted on an animal if it is done with an honest belief, however erroneous, that the result will be beneficial to the owner. The Lord Chief Justice and Mr. Justice Hawkins, however, have overruled this decision, and decided that mere ignorance cannot be an excuse, nor can the owner of an animal inflict pain upon it for his own benefit. Both learned judges denounced the practice as being not only cruel, but as demoralising in its influence.

Dissolution. See PARLIAMENT.

Distilling Industry of the United Kingdom. The number of distilleries in operation during the year ending Sept. 30th, '88 (latest returns) were 10 in England, 127 in Scotland, and 29 in Ireland, being a decrease of one in England and two in Scotland, and an increase of one in Ireland, as compared with the previous year. The number of proof gallons of British spirits distilled for the year ending the 31st of March, '89, was 39,095,900, of which 9,017,442 were produced in England, 18,721,374 in Scotland, and 11,357,181 in Ireland. The estimated quantities of the principal materials used include 8,803,7 quarters of malt, 1,021,381 quarters of unmalting grain, 210,621 cwt. of molasses, 75,157 cwt. of rice, 38,317 cwt. of sugar, and 10,374 cwt. of jawarree, an Indian seed, which has for the first time been brought into serious use during the year in question. The relative proportions of the various materials remain practically unchanged, except that a small increase is shown in molasses, and large ones in rice and sugar—probably attributable to the bad quality of last season's barley. The number of proof gallons of British and Irish spirits in bonded warehouses on the 31st March was: English, 9,194,173; Scotch, 46,688,797; and Irish, 25,256,788; total 81,088,758, as against 76,511,109 for the corresponding period of the previous year. For the year ended on 31st March the number of detections made by the Excise authorities in connection with illicit distillation were 89 in England, 31 in Scotland, and 1739 in Ireland.

Distinguished Service Order. Her Majesty having taken into consideration that the means of adequately rewarding the distinguished services of officers in the naval and military services who had been honourably mentioned in despatches were limited, instituted and created for the purpose of rewarding individual instances of meritorious and distinguished service in war a new naval and military Order of distinction. The statutes of the Order, which are dated Balmoral, Sept. 6th, '86, but which were not issued from the War Office until Nov. 6th in that year, provide that no person shall be eligible for the distinction who does not hold, at the time of his nomination, a commission in the navy, in the land forces, or marines, or the Indian or Colonial naval or military forces, or a

commission in one of the departments of the army or navy the holder of which is entitled to honorary or relative navy or army rank; nor shall any person be nominated unless his services shall have been marked by the especial mention of his name by the admiral or senior naval officer commanding a squadron or detached naval force, or by the commander-in-chief of the forces in the field, in despatches for meritorious or distinguished service in the field or before the enemy. **Foreign officers** who have been associated in naval and military operations with our forces are eligible to be honorary members; and the Order ranks next to the Order of the Indian Empire. The **badge**, which consists of a gold cross, enamelled white, edged gold, having on one side the coat of the centre, within a wreath of laurel enamelled green, the Imperial Crown in gold upon a red enamelled ground, and on the reverse, within a similar wreath and on a similar red ground, the Imperial and Royal cypher V.R.I., is to be suspended from the left breast by a red riband edged blue of one inch in width.

Distress. Law of, in '89. Although warrants for distress of rent are often executed by persons other than those to whom they are directed, yet, where a distress warrant is issued under a special statutory authority, it can only be executed by the person to whom it is directed. This was laid down in a case in the Queen's Bench Division, May 28th, where a distress warrant was issued for a sewers rate in the West Ham district.

Diu. A Portuguese seaport and island, off coast of Kattywar, India, 170 m. N.W. of Bombay. Has belonged to Portugal since 1515. See COLONIES OF EUROPEAN POWERS.

Divisions. At the conclusion of a debate in the **House of Commons** the Speaker puts the question, and calls upon as many as are of that opinion to say "**Aye**," the contrary "**No**," and declares whether in his opinion the "**Ayes**" or the "**Noes**" have it. Unless his opinion be acquiesced in by the minority, the question is determined by a division. The Speaker calls upon **strangers** to withdraw, and the Clerk turns a two-minute sand-glass. When this has run out and the strangers below the bar have retired, the doors are locked and the question again put in the same form; the Speaker directs the "**Ayes**" to go into the right lobby and the "**Noes**" into the left lobby, and appoints two tellers for each party. In a great party division the tellers are usually the whips on either side. Should there not be two tellers on either side the Speaker declares the resolution of the House; and when in his opinion a division is frivolously or vexatiously claimed, he may take the vote of the House by calling upon members to rise in their places (see PARLIAMENTARY PROCEDURE). Every member in returning from either lobby is counted by the tellers, and his name is recorded by the division clerks on a large printed sheet of names. If a member go into the **wrong lobby** he is not permitted to correct his error. No member may speak after the question has been put except upon a point of order which may arise, and then he must, while speaking, remain sitting and covered. **Divisions in committee** are taken in the same manner as in the House itself. The two sides in a Lords division are termed "**Contents**" and "**Not-Contents**."

Divorce. See ed. '88, and consult "Law Practice and Procedure in Divorce in Matrimo-

nial Cases," by W. J. Dixon; and "Epitome of Probate and Divorce," by J. G. Harrison.

Dobrukscha. A slice of Turkey, at the mouth of the Danube, which was bestowed in 1878 by Russia upon Roumania as a set-off for the Bessarabian district on the opposite side of the river, wrested by the Tzar from that kingdom. The country is flat and marshy, and its acquisition involved a loss rather than a gain.

Dobson, Wm. Charles T., R.A., b. 1817, evinced an early taste for art, and, after studying at the British Museum, became a student of the Royal Academy in '36. He was appointed headmaster of the Government School of Design at Birmingham ('43), where he taught pattern-drawing and flower-painting. He resigned this office ('45), and subsequently proceeded to Italy and Germany, studying art in both countries. Elected A.R.A. ('60), R.A. ('72). He is also a member of the Society of Painters in Water Colours. Many of Mr. Dobson's pictures have been engraved. He exhibited in '89 "**A Reminiscence of Venice**" at the Royal Academy.

Dods, Rev. Marcus, D.D., was b. 1834 at Belford, Northumberland, where his father was minister of the Pres. Church. Ed. at the Edinburgh Academy and University, graduated M.A. in '54; subsequently entered Free Church Coll., Edinburgh, and passed through its four years' curriculum. Ordained minister of Renfield Free Church, Glasgow, in '64, and appointed **Professor of New Testament Exegesis in Edinburgh New College '89.** Dr. Dods is the author of works on the Parables, Genesis, 1 Corinthians, in the Expositor's Bible; "Mohammed, Buddha, and Christ;" "Israel's Iron Age," etc.

Döllinger, John Joseph Ignatius, was b. at Bamberg in Bavaria in 1799. Took priest's orders in the Church of Rome, 1822. Devoted himself to the study of **Church History**, and acquired considerable distinction by the publication of numerous treatises on that subject. In '45 he was returned by the University of Munich to the Bavarian parliament, and in '51 to the parliament of Frankfurt. He became a vigorous advocate for the separation of the Church from the State, and when by decree of the Vatican Council, in '70, the doctrine of **Papal Infallibility** was made an article of the Roman faith, Dr. Dollinger refused to assent to it. This made him immensely popular with the Protestants, and also with that party within the Church itself which tended towards religious liberalism. He was subsequently **excommunicated**, but received many honours, both from the Bavarian Government and from various foreign societies and institutions. From the University of Oxford he received the honorary degree of D.C.L. in '71, and from Edinburgh that of LL.D. in '72. In the following year he was appointed **President of the Academy of Science at Munich.** At the celebrated **Conference of the Old Catholic Party**, held at Bonn in '74, Dr. D. presided, and drew up the **declaration**, unanimously adopted on that occasion, against the orthodox view of the Eucharistic celebration. Amongst the best known of his works are "Origins of Christianity" ('33-35), "The Reformation" ('46-48), "The Church and the Churches" ('60), "Prophecies and the Prophetic Spirit in the Christian Era" ('72), and "The History of the Council of Trent" ('74). A **congratulatory address**, signed by a large number of the members of the **Universities of Oxford and Cambridge**, including the Bishops of Oxford and

Salisbury, was forwarded to him on the occasion of his nineteenth birthday, in February '89.

Dominica. An island in the West Indies forming a Presidency of the British colony of the *Leeward Islands*. Area 275 sq. m., pop. 28,221. Capital, *Roseau*; second town *St. Joseph*.—The island is mountainous, rising to 6,000 feet. Volcanic rocks and hot springs abound, and there are large deposits of sulphur. The island is well timbered and well watered, and the arable parts are very fertile. Less than one-third is under cultivation, the rest being clothed with fine forest. Sugar, cacao, lime-juice, coffee, fruits, and spices, are the chief productions. The people are generally Catholics, of French descent. A few aborigines (Caribs) still exist here. There was a volcanic eruption in 1880.—A President and Local Council administer internal affairs, subject to the Federal Government. For statistics see *BRITISH EMPIRE*, etc. (table). Crown lands, uncleared, are purchasable at £1 per acre.—The island was taken from the French in 1756, and confirmed to Great Britain in 1763. There were French invasions subsequently.

Dominican Republic. See *HAYTI*; and for Ministry, etc., see *DIPLOMATIC*.

Don and Volga Canal. It was reported in Nov. '88 that a project was on foot to connect these two rivers by a canal, starting from the Volga just below Tsaritsin and joining the Don at Karparka fall. As the Volga discharges itself into the Caspian Sea at Astrakhan, and the Don flows into the Sea of Azov, which communicates with the Black Sea through the Yenikale Straits, the importance of the project is at once apparent. The total length of the canal will be 53 miles, and vessels with a tonnage of 500 or 600 tons would be able to make the passage. There will be, in all, 15 bridges and 17 reservoirs, with a surface of 25,000,000 square metres to supply the canal with water. The total cost, including buildings, bridges, lighting, etc., is put down at £4,800,000.

Donaldson, James, M.A., LL.D., F.R.S.E., b. at Aberdeen 1831. Educated at the Grammar School and Univ. Aberdeen, New Coll., Lond., and Berlin Univ. Appointed Greek Tutor in Edin. Univ. '53, Classical Master in the High School of Edin. '56, Rector of the same '66, Prof. of Humanity in Aberdeen Univ. '81, and Senior Principal of St. Andrews Univ. '86. Edited for some years the *Museum*, or *English Journal of Education*; and has contributed to the *Encyclopædia Britannica* and the *Cyclopædia of Education*, and the leading periodicals. He is the author of "*Lyra Græca*," "Specimens of the Greek Lyric Poets," "Critical History of Christian Literature and Doctrine from the Death of the Apostles to the Nicene Council" ('64-66), "Lectures on the History of Education in Russia and England," '74. Edited, '67, in conjunction with Rev. A. Roberts, D.D., the "*Ante-Nicene Christian Library*."

Dowden, Edward, LL.D.; b. in Cork 1843. Educated at Queen's Coll., Cork, and Trin. Coll., Dublin, where he gained the Vice-Chancellor's prizes for English Verse and Prose. In '63, he obtained the Senior Moderators'hip in Logic and Ethics. He became ('67) a candidate for the Erasmus Smith's Professorship of Oratory in Dublin Univ., which he obtained by examination, being afterwards appointed Professor of English Literature. Prof. D. is the author of "Shakespeare Primer," "Poems," "Shakespeare: a Study of his Mind

and Art"; "Southey's Correspondence with Caroline Bowles"; a *Life of Southey* for the series entitled "English Men of Letters"; a "Life of Percy Bysshe Shelley," and "Correspondence of Henry Taylor." He is also a contributor to Cassell's "International Shakespeare." Pres. of the Goethe Society (q.v.).

Dowell, Admiral Sir William Montague. K.C.B., b. 1825. Entered the navy (1839). Present at the bombardment and capture of Amoy ('42). Served in the Black Sea, in the Crimean War, as lieutenant of the *Agamemnon*, and for his services with the naval brigade before Sebastopol, was promoted to the rank of Commander. Commander in the naval brigade ('57) at the capture of Canton. Aide-de-camp to Her Majesty ('70-75). Second in command of the Channel Squadron, '77-78 and '82-83. Appointed ('84) Commander-in-Chief of the China Station.

Drama, '89. The hope of a good year for the Shakespearian and poetic drama generally, that was raised by the costly revivals of *Macbeth*, of *Richard III.*, and of *The Merry Wives of Windsor* at the Lyceum, the Globe, and the Haymarket Theatres respectively, was destined not to be realised. In the earlier months these plays were running together, but with the exception of *King John*, in which Mr. Beerbohm Tree (q.v.) appeared at the Crystal Palace in September, no further essays were made in this direction. For a while romantic drama and serious plays reflecting modern character and manners have taken the place of poetical works. Happily, the plays that may be said to have temporarily ousted Shakespeare from the Metropolis are healthy both in tone and sentiment. In most cases they strike at recognised abuses and social shortcomings of the age, and the moral enforced is unmistakable. Sound and honest dramas are in such demand, indeed, that the public are not unwilling for the time being to cordially recognise intention when the execution is scarcely so satisfactory as had been anticipated. Playwrights who, whilst conforming to such stage rules as are apparently unalterable, seek to be original, or at least out of the common, in their selection of subject, need no longer be discouraged. There is now a market for their wares, and judgment will not be passed in haste or without due care. Instances of this occur in what are the best two of the original plays produced during the year—namely, Mr. Pinero's (q.v.) *The Fiddler* (which with in April Mr. John Hare opened his new theatre the Garrick, so conveniently near Charing Cross), and Mr. Henry Arthur Jones's *The Middleman*, written for Mr. Willard at the Shaftesbury. Both these works would, by reason of their divergence from the beaten track, have been somewhat risky productions for a manager only a few years ago. They are plays penned with a purpose so plain that it is impossible to ignore it whilst estimating their worth, whether from the stage or from the literary point of view. True, *The Middleman* was accidentally favoured by being brought forward just when the strike of dock labourers (q.v.) was the sole theme of conversation in the Metropolis; but even without this aid to a powerful hold upon the interest of the community, there can be little doubt that the author's skilful limning of character and the fine acting of Mr. Willard and his companions would have secured attention and

heartily praise. Yet freer from conventionalities is *The Profligate*, in which Mr. Pinero administers a rebuke to male transgressors even more forcible and pointed than he does in *Sweet Lavender*, the charming piece that has for so many months held its own at Terry's Theatre. The good workmanship, earnestness, and vigour so noticeable in *The Profligate* were assisted in the claim for support by the pathetic acting of Miss Kate Rorke and Mr. Forbes Robertson, who fully grasped the significance of two situations that are positively tragic in their intensity.—The revival of *Macbeth* at the Lyceum naturally renewed the controversy respecting the true nature of the murderer thane that had waged thirteen years before, when Mr. Henry Irving (*q.v.*) first played the part in London. To most people, however, it was evident that the popular actor's idea of *Macbeth* had undergone some change. In the later scenes of the play his thoughtful impersonation was marked by a decided accession of nerve and impulse, whilst the suggestion of abstraction derived from the thane's attempt to peer into the future and gain a firm foothold ere taking another step towards his fell design was as deftly displayed as before. Altogether new was the *Lady Macbeth* of Miss Ellen Terry (*q.v.*), who to a considerable extent accounted for *Macbeth* being so much under the domination of his spouse by making her a dangerously fascinating woman, so absorbed in love for her husband and so proud of his military achievements as to feel it a duty to sacrifice everything to the gratification of his ambition. Miss Terry's highly intellectual, diametrically finished, and refined reading of the character proved eminently attractive, even to those she failed to convince. Probably no other actress would have had the courage to introduce such a *Lady Macbeth* as this to the stage, and it is certain that none could so persuasively expound and illustrate the theories favoured. The acting of the two principals, no less than the picturesque beauty and completeness of the stage mounting, carried the revival with crowded houses to the annual recess, when Mr. Irving intimated that he intended to commence his winter season with *The Dead Heart*, an Adelphi play of a superior class, by the late Mr. Watts-Phillips, that made its mark thirty years ago, when the leading part was played by Mr. Benjamin Webster. More than ordinary curiosity was manifested in the experiment, but the result justified the managerial venture. To the noble-minded *Robert Landry*—one of the victims of the Bastille—Mr. Henry Irving gave new life; the cruelly deceived heroine was represented with the utmost grace and feeling by Miss Ellen Terry; and Mr. Bancroft, who had been absent from the stage since he relinquished management, made his re-entrance as the crafty Abbé Latour. The realistic demeanour of the Revolutionary crowds and the accuracy of the costumes were among the evidences of scrupulous and untiring endeavour to do justice to the revived play.—There was very much to admire in Mr. Richard Mansfield's reproduction of *King Richard III.* at the Globe. Without adhering so closely to the Shakespearian text as did Mr. Irving in the Lyceum revival over ten years ago, he presented more of the original play than was the custom with tragedians of a bygone generation. He depicted the subtlety of the treacherous Duke of Gloucester with a

dramatic effect that was occasionally startling, he engaged competent performers for the other important parts, and in the spectacular features—every point of which had been studiously considered without regard to expense—adroitly evaded the difficulties presented by a comparatively small stage for such scenes of turmoil as are embraced in the concluding incidents of the play. The revival held the boards until the close of the season, when it was announced that Mr. Mansfield intended to take *Richard III.* to America.—Emboldened by the applause he had obtained as *Falstaff* at matinee performances of the *Merry Wives of Windsor* at the Crystal Palace, Mr. Beerbohm Tree early in January revived the witty comedy at the Haymarket in a worthy style. A better all-round cast than he provided does not live in the memory of the oldest playgoer, whilst the most was made of the mock fairy revels beneath Herne's Oak at midnight. Mr. Tree's "make-up" as the fat knight seemed wonderful to those who knew the natural form and figure of the skilful actor, whilst his impersonation so steadily ripened in humour as to become altogether commendable to veterans who have fixed notions of what *Falstaff* should be. His performance was a veritable triumph of artistic contrivance, that was strikingly accentuated when Mr. Tree played *The Ballad Monger* as an afterpiece, and, putting aside the huge frame of *Falstaff*, appeared as the lean and hungry poet Gringore. The Shakespearian revival was highly profitable, and helped to remind the public of the exceptional versatility of Mr. Tree. The next production here was an ambitious play by Mr. Henry Arthur Jones, entitled *Wealth*, in which Mr. Tree played with much force an aged millionaire, strong in will, whose vast fortune proves a curse instead of a blessing to its possessor. For his autumn season the actor-manager offered a very neat version, by Mr. Robert Buchanan (*q.v.*), of the successful French drama *Roger la Honte*. The alterations made in the original, ere *A Man's Shadow* was submitted, were extensive, and allowed of Mr. Tree playing both the unjustly condemned hero and the malignant villain. This was a happy device that did much to win cordial and spontaneous approval for the drama.—Before starting upon a second tour in America, Mr. Wilson Barrett came back to his old quarters at the Princess's Theatre to play *Hamlet*, *Claudian*, and *Wilfred Denver (The Silver King)*, and to introduce two entirely new pieces. The first of these to be played was *Good Old Times*, a melodrama by Messrs. Hail Caine and Wilson Barrett (*q.v.*), which was favourably received. Of a fresher type was *Now-a-Days*, a sporting drama by Mr. Barrett alone, in which the author surprised many of his London admirers by embodying an elderly plain-spoken Yorkshireman. The spirit and fidelity of this cheery performance afforded proof that a wider range of assumption was within Mr. Wilson Barrett's reach than had been generally supposed.—Mr. and Mrs. Kendal also bade their Metropolitan friends farewell before crossing the Atlantic, and also brought with them two new pieces. These novelties had been tried in the provinces, but were subjected to a few changes ere presented to London audiences. They opened at the Court Theatre in March with Mr. Pinero's serious comedy *The Weak Spot*, which two months later made room for Mr. Grundy's comedy *A White Lie*.

Their final appearance was in the middle of July; and the next night Mrs. John Wood produced Mr. Lumley's farcical comedy *Aunt Jack*, which in its particular line was one of the notable successes of the year.—The principal theatrical topic during the summer months was the position of Henrik Ibsen, the Norwegian author, as a playwright and moralist. The discussion had reached an acute stage when Miss Janet Achurch and Mr. Charles Charrington, who early in the year had revived at the Vaudeville Mr. Pierre Leclercq's domestic drama *A Love Story*, took the Novelty Theatre for a few weeks to produce a translation of *A Doll's House*, a considerably altered version of which, written by Messrs. Jones and Herman, was tried four or five years ago with only moderate success at the Prince of Wales's Theatre. In the latest version no endeavour was made to modify the peculiar views of the author; and this straightforwardness of purpose, together with Miss Achurch's sympathetic impersonation of the heroine, elicited more than ordinary notice. The experiment was daring, but, without probably increasing the list of Ibsen's admirers to any appreciable extent, it was so successful that Miss Achurch and Mr. Charrington were induced to postpone until the latest possible period their departure for Australia. The next month a single performance of the same author's *The Pillars of Society* took place at the Opera Comique, with Mr. W. H. Vernon as the hypocritical consul, who, posing as a philanthropist, is willing to wink even at murder in order to preserve his reputation among his fellow-men. Eight or ten years previously this adaptation (by Mr. William Archer) had been seen at the Gaiety, with the same principal actor. After this the Ibsen fever subsided.—The Adelphi relied as usual upon melodrama. When the attraction of Messrs. Sims and Pettitt's *The Silver Falls* began to wane, the policy of revivals was adopted until the same authors had another new piece ready in *London Day by Day*.—The only novelty tried at the Criterion by Mr. Charles Wyndham (*q.v.*), who was due in America at the fall of the year, was a farcical trifle called *The Headless Man*, which did not long remain on the bills. Prior to this *Still Waters Run Deep*—with Mr. Wyndham as John Mildmay and Mrs. Bernard Beere (*q.v.*) as Mrs. Sternhold—kept its place for several months. After Mr. Wyndham had departed, revivals of Mr. Burnand's *Betsy* and Mr. Tom Robertson's *Oaste* were well received.—Mrs. Beringer, who had taken the Opera Comique for the return of *The Real Little Lord Fauntleroy* (represented by her clever daughter Miss Vera Beringer), reproduced in January her striking drama *Tares*, but was less fortunate with her next managerial essay, a drama called *The Panel Picture*, by Mr. Outram Tristram. Also at the Opera Comique (in May) Miss Genevieve Ward gave a few performances of *Forget-me-Not*.—But few serious dramas remain to be mentioned, except *True Heart*, a stirring nautical piece given at the Princess's Theatre in the summer; *In Danger*, by Lestocq and Creswell, an autumn reproduction at the Vaudeville; and the historical play *The Royal Oak*, by Messrs. Hamilton and Harris, with which the Drury Lane autumn season began.—Of original fantastic drama, Mr. Robert Buchanan's *That Doctor Cupid* (the Vaudeville in January) was the only specimen. In June, also at the Vaudeville, another piece

by this prolific author, a domestic comedy called *The Old Home*, was given with fair success.—Among the multitude of farcical pieces, were Messrs. Darnley and Manville Fenn's *The Balloon* (a reproduction), which ascended from the Strand for many weeks; Mr. J. P. Hurst's *Esop's Fables* (the Strand, afterwards the Comedy); Mr. Grundy's *Merry Margate* (the Comedy); Mr. J. W. Pigott's *The Bookmaker* (introduced by Mr. Terry at a *matinée* at his own theatre); *Angelina*, an adaptation from the French (the Vaudeville); Mr. H. M. Paull's *Tentarhooks* (the Comedy); *Our Flat* (with which Mr. Willie Edouin made a hit at the Opera Comique, and afterwards at the Strand); and Mr. Fred Horner's *The Bungalow* (Toole's Theatre in the autumn).—Miss Loie Fuller, an American actress, opened the Globe Theatre in October, and played the principal character in a homely piece called *Gaiety*, which had been received with favour on the other side of the Atlantic for four or five years.—The more notable burlesques were Richard Henry's *Lancelot the Lovely*, written for Mr. Arthur Roberts at the Avenue; *Ruy Blas*, or the *Blasé Bond*, in which Miss E. Faren, Mr. Fred Leslie, and other Gaiety favourites, made their reappearance after their tour in America and Australia; and Mr. Geoffrey Thorne's *Dandy Dick Turpin* (the Grand).—The Alhambra and the Empire flourished with brilliant ballets as the staple feature.—The Royalty was open for French plays in January, and in May Mdme. Jane Hading (*q.v.*) and M. Coquelin went through a round of their more celebrated assumptions at the Gaiety. A few weeks afterwards Madame Sarah Bernhardt (*q.v.*) arrived at the Lyceum, and among other characters played Lena Despard (Mrs. Bernard Beere's original part) in a French version of *As in a Looking Glass*, just previously played in Paris.—In the early part of '89 the question of the employment of children in theatres was much debated, both in parliament and in the press. Numerous meetings were held on the subject, and a deputation of theatrical managers waited upon Earl Dunraven (July 17th) with respect to the clause prohibiting children under ten years of age from taking part in theatrical performances. See Session '89, sect. 72 (Cruelty to Children Prevention Acts).

Drinking, Excessive. See CORONERS' INQUESTS.

Drummond, Prof. Henry, was b at Stirling and ed. at the University of Edinburgh. He subsequently passed through the Free Church Divinity Hall, and after his ordination was appointed to a mission station in Malta. On his return to Scotland he was appointed a lecturer in science at the Free Church College, Glasgow, and also took charge of a Working Men's Mission in that city. He subsequently travelled with Professor Geikie (*q.v.*) in the *Rocky Mountains and South Africa* (which he has recently revisited). His popularity as a writer is based on his "*Natural Law in the Spiritual World*." Professor D. has also written some interesting accounts of his travels. He is an attractive preacher, and his addresses delivered at Grosvenor House (the residence of the Duke of Westminster), in '86 and subsequently, drew large and fashionable audiences. Prof. D.'s most recent work, "*The Greatest Thing in the World*," appeared Nov. '89.

Dublin University. The University of Dublin, commonly known as Trinity College,

Dublin, was founded in 1591 by Queen Elizabeth, who also established in the same year a college under the style of the Holy and Undivided Trinity near Dublin. Its constitution has been altered by numerous Royal charters. In the Treaty of Union between Great Britain and Ireland (1800) it is spoken of as the University of Trinity College. The Chancellor of the University is the Earl of Rosse, and the Vice-chancellor, Right Hon. J. T. Ball, LL.D. The undergraduates exceed 800. Certificates of proficiency granted to women. **Degrees.**—D.D. (*hood scarlet cloth, lined with black silk*); B.D. (*h. plain black silk*); M.A. (*h. black silk, lined with blue silk*); B.A. (*h. black silk or stuff, lined with white fur*); M.D. (*h. scarlet cloth, lined with crimson silk*); M.B. (*h. black silk, lined with white fur*); M.Ch. (*h. crimson silk, lined with white silk*); B.Ch. (*h. crimson silk, lined with black silk*); LL.D. (*h. scarlet cloth, lined with pink silk*); LL.B. (*h. black silk, lined with white silk*); Mus.D. (*h. crimson cloth, lined with white silk*); Mus.B. (*h. blue silk, hemmed with white fur*); M.Engin. (*h. white silk, lined with green silk*); B.Engin. (*h. black silk, lined with green silk*). **Parliamentary representatives.**—Rt. Hon. D. Plunket and Mr. D. H. Madden, Q.C. **Some alumni:** Isaac Butt; Tom Moore, the poet; Robert Emmett, the Revolutionist; and Burke, the orator. Consult *Dublin University Calendar*.

Du Chaillu, Paul Belloni, b. in Paris 1835. His father was a West African trader, and at an early age Paul commenced his career as an explorer. He published in '61 "*Explorations and Adventures in Equatorial Africa*," and in '67 "*A Journey to Ashango Land*." He subsequently travelled through the United States, and settled in New York. M. du Chaillu has also travelled extensively in Scandinavia, Lapland, and Finland, of which he has given a description in his "*Land of the Midnight Sun*." He has also published a number of books for children, including "Stories of the Gorilla Country," "Wild Life under the Equator," "Lost in the Jungle," and "*The Viking Age*" ('89). At the **British Association** (q.v.) in September, M. du C. propounded the theory that the Vikings, rather than the Saxons, Angles, and Jutes, were the ancestors of the English.

Dufferin and Ava, Frederick Temple Hamilton-Blackwood, P.C., 1st Marquis of (creat. 1889), 1st Earl of Dufferin (1871); Baron Dufferin (1800); was b. at Florence 1826. His lordship is a lineal descendant of Sheridan. Assumed the name of Hamilton by royal licence ('62); succeeded his father in the English barony and the Irish honours (41). Educated at Christ Church, Oxford; was a Lord-in-waiting to the Queen (49-52 and '54-58); was attached to Earl Russell's special mission to Vienna (Feb. '55); sent as British commissioner to Syria in relation to the massacre of Christians ('60); was Under-Secretary of State for India (Nov. '64 to Feb. '66), and Under-Secretary for War from the last date till June following; Chancellor of the Duchy of Lancaster (Dec. '68 to April '79); **Governor-General of the Dominion of Canada** (72-78); Ambassador at St. Petersburg (79-81), when he was appointed to Constantinople. He was subsequently sent on a special mission to Egypt; and in '84 succeeded Lord Ripon as **Viceroy of India**; resigned '88. He was entertained at a banquet at the Mansion House,

May 29th, '89, when the freedom of the city was conferred on his lordship. A similar honour in October was received from his native borough of Kirkcaldy. Is at present **Ambassador at Rome**. His lordship married in '62 a daughter of the late Mr. Archibald R. Hamilton, of Killyleagh Castle, Down. **Lady Dufferin** has done a great work in connection with the education of women as **medical practitioners in India**. She published last year an interesting "Record of Three Years' Work" in respect of this movement, and a volume entitled "Our Viceregal Life in India."

Dulwich College. Alleyns' College of God's Gift" at Dulwich. Dulwich College was founded in the year A.D. 1619, by **Edward Alleyn, the Actor**, under Letters Patent of King James I., by which licence was granted to Alleyn to establish a College, "to endure and remain for ever;" and to be called "The College of God's Gift in Dulwich, in the County of Surrey." Reconstituted '58, and removed to new site and new building '70. **Present numbers** in the school, 580. No boy may enter the school before the age of 10, or remain after the age of 19. Fees £21 per annum. Endowment about £4,000 per annum. Eight exhibitions of £50 each a year for four years to either University. **Distinguished alumni:** P. H. Clifford, M.A., Fellow of Christ's Coll., Cambridge, M. G. Glazebrook, M.A., Head Master of Manchester Grammar School; T. Franks, M.A., Fellow of Univ. Coll., Oxford; L. L. Price, M.A., Fellow of Oriel, Oxford; E. Jeaks, Fellow of King's Coll., Cambridge, etc. **Head Master**, A. H. Gilkes, M.A.; **School Sec.**, Rev. G. C. Allen, M.A. *Motto*—*Deiur Gloria Soli Deo*.

Dumas fils (Alexandre), French novelist and dramatist, was b. at Paris, July 28th, 1824. He is the son of Alexandre Dumas *père*, the well-known author of "Monte Cristo." He was educated at the Collège Bourbon, and at the age of seventeen published a little volume of poems, "Péchés de Jeunesse." He then accompanied his father on travels in Spain and in North Africa. On his return he published numerous novels, the most characteristic being "*La Dame aux Camélias*," which created a general sensation. His drama entitled "*Francillon*," was produced Jan. 17th, '87, at the Théâtre Français. In '75 he was elected to the French Academy. M. Dumas is a most voluminous writer. He contributed a long letter to the *Daily Telegraph* on Aug. 22nd, '88, on the marriage question. M. Dumas has recently been promoted to the rank of **Commander of the Legion of Honour**.

Du Maurier, George L. F. B., b. 1834; a naturalised British subject. Coming to England at the age of seventeen, he entered as a student of chemistry at Univ. Coll., Lond., and afterwards returned to Paris to study painting under M. Gleyre. He made his *début* as an artist with contributions of sketches to *Once a Week*, and afterwards contributed to the *Cornhill Magazine* and *Punch*. He subsequently joined the staff of the latter periodical, the pages of which he has enriched with the well-known *caricature sketches of society life*, as typified by "Mrs. Ponsonby de Tomkyns" and others. Mr. Du Maurier has also illustrated Thackeray's "Esmond"; and "Ballads," and other books.

D'Urban. Port of Natal (q.v.), pop. 17,127. **Durham, Bt. Rev. Joseph Barber Lightfoot**, Lord Bishop of. The see was founded in 635. His lordship, the 83rd bishop, was

B. at Liverpool April 13th, 1828. Educated at Trinity Coll., Cambridge; B.A., Sen. Classic, 32nd Wrangler, and Sen. Chan. Medallist ('51); Norrisian Prizeman ('53); M.A. ('54), is D.D. Cambridge, Durham, and Edinburgh; D.C.L. Oxford; L.L.D. Glasgow and Dublin ('88). **Deacon** ('54), priest ('58); Hon. Fellow of his college ('72). Lord Bishop of Durham ('79). Hon. Chaplain-in-ordinary to the Queen ('62-79); Canon Resident of St. Paul's Cathedral ('71-79); Margaret Prof. of Divinity at Cambridge ('75-79). His lordship is well known for his numerous commentaries on the Epistles and Apostolic Fathers. Has contributed to Smith's "Dictionary of the Bible" and to "Christian Antiquities"; to *Journal of Philology*, *Contemporary Review*, and other periodicals. In '89 he published "Essays on a Work entitled 'Supernatural Religion,'" to which the author of that book replied.

Durham University, founded 1832, comprises **University College** ('37), **Bishop Hatfield's Hall** ('56), and **College of Medicine and Science** at Newcastle-upon-Tyne. Bishop Cosin's Hall ('51), another college connected with the University, was shut up in '64, and the students transferred to University College and Bishop Hatfield's Hall. On Nov. 5th, '88, at Newcastle-upon-Tyne, H.R.H. Princess Louise opened a new building for the faculties of science and engineering of this University. The portion opened, though only a third of the entire structure intended, cost £23,000. The students number about 400. Unattached students first admitted '71. **Affiliated** are Coddington College. Barbadoes, and Fourch Bay College, Sierra Leone. **Warden**, the Dean of Durham, W. C. Lake, D.D., who is also **President of the College of Science**; **President of the College of Medicine**, G. Y. Meath, M.D. **Degrees**.—D.D. (*hood* scarlet cashmere, lined with palatinate purple silk); B.D. (*h.* black silk); M.A. (*h.* black silk, lined with palatinate purple silk); B.A. (*h.* black cord, edged with white fur); D.C.L. (*h.* scarlet

cashmere, lined with white silk); B.O.L. (*h.* palatinate purple silk, edged with white fur); M.D. (*h.* scarlet cashmere, lined scarlet silk, faced with palatinate purple silk); M.B. (*h.* scarlet silk, lined palatinate purple silk, edged with white fur); Mus.D. (*h.* white brocaded satin, lined with palatinate purple silk); Mus.B. (*h.* scarlet silk, lined with palatinate purple silk, edged with white fur); L.Th. (*h.* black silk, faced with velvet and bound palatinate purple silk); B.S. (*h.* rose silk, lined palatinate purple, edged with white fur); M.S. (*h.* rose silk, lined palatinate purple). **Certificates of proficiency** in sanitary science and general education also given in connection with this University. Consult *Dublin University Calendar*.

Dutch Colonies. See COLONIES AND DEPENDENCIES OF EUROPEAN POWERS.

Dutch East Indies. Comprise various island, of the Malay Archipelago; total area 710,674 sq. m., pop. 29,030,102. Divided into Java with Madura, and the "Outposts." The latter are ruled by various officials, and in many cases are practically independent. See JAVA, BORNEO, COLONIES OF EUROPEAN POWERS, etc.

Dvorak, Anton (pronounced Dvorshak). One of the foremost of our younger musicians, is a Bohemian, b. 1841, at Mühlhausen-on-the-Moldau, the son of an innkeeper. He learnt music first from the gipsies, but at sixteen entered the Prague Conservatoire, finally obtaining a living as bandsman and organist. Applying for help to the Minister of Public Instruction, his case was referred to Brahms, who befriended him. Dvorak's symphonies and his Slavonic rhapsodies are very fine original works; but his "Stabat Mater," produced under the composer's direction in London in '83, has stamped him as a really great composer. His "Spectro Bride," composed for the Birmingham Festival of '85, met with a very enthusiastic reception. His oratorio "St. Ludmila" was introduced at the Leeds Festival in October '86.

E

Earl Marshal, The, is one of the great officers of State, and takes precedence next after the Lord High Constable. The latter office ceased to be hereditary in 1521, since which it has been only temporarily revived for successive coronations, and once for a trial by combat, which, however, did not take place. One of the functions of this exalted personage is, in company with the Earl Marshal, to usher the **King's Champion** into Westminster Hall just before the second course of the coronation banquet. It is usual to appoint to the office some person of high rank and great distinction, and the first **Duke of Wellington** was selected to fill it at the coronations of George IV., William IV., and Her Majesty. The L. H. C. and the E. M. were formerly judges of the ancient Court of Chivalry; but when the former office ceased to be hereditary, the sole jurisdiction in questions of honour and arms was vested in the E. M., who is head of the College of Arms (see GARTER KING-OF-ARMS). The office of E. M. is hereditary in the family of the Duke of Norfolk. **Office**, Queen Victoria Street, E.C.

Early Closing Association and Traders' Parliamentary Alliance. Founded for promoting: (1) An abridgment of the hours of labour in all departments of industrial life, wherever unduly prolonged—especially on Saturday nights; (2) The adoption of a Saturday or other weekly half-holiday; (3) The abolition of unnecessary Sunday labour; (4) The early payment of wages; (5) The promotion, as far as possible, of a profitable employment of leisure hours; (6) To watch over and promote the interests of traders and their assistants in matters requiring municipal or legislative control. Assistants, by subscribing as. 6d. half-yearly, are entitled to receive gratuitous medical advice from any of the Society's honorary medical staff.—On Nov. 1st, '86, the **Shop Hours Regulation Act** came into operation, by which the hours of labour of young persons under 18 were limited to seventy-four in a week. Sir John Lubbock, the author of the measure, however, introduced in the first session of '87 a Bill for the compulsory closing of all shops at eight o'clock on five

days in the week and at ten o'clock on Saturday, but he was unsuccessful. A new Bill, the "Shops (Weekly Half-holiday) Bill," will be pressed forward next Session, and will receive far greater support than the compulsory Eight o'clock Bill of '87. The income of the Association is about £1400 a year. Sec., James A. Stacey. Offices, 100, Fleet St., E.C.

Earthquakes may be defined as disturbances of the earth's crust, generally subterranean, propagated by the elasticity of the rocks. The study of earthquakes is termed **seismology**; and instruments for measuring the earthquake waves are called **seismometers**. The late Robert Mallet laid the foundation of modern seismology, and his "Report on the Great Neapolitan Earthquake of 1857" is a classical work. Serious objections have, however, been raised to some of his methods of investigation. The centre of disturbance is known technically as the **seismic focus**, and the point on the surface vertically above the focus is the **epicentrum**. From the focus, which Mallet believed was never seated at a very great depth, waves of elastic compression are propagated in all directions; and he believed that the wave-paths and their angles of emergence at the surface might be determined from observations on the fractures in walls and buildings, and on the situation of objects which have been overturned by the shock. Professor Milne is of opinion that in the Empire of Japan alone there occurs, on an average, at least one earthquake per day. The opportunities for studying seismic phenomena are so favourable in Japan that a **Seismological Society** has been established at Tokyo. The best English work of reference is Milne's "Earthquakes" (International Science Series, '86). Mr. Sekiya, Professor of Seismology in the Imperial University of Japan, at Tokyo, has recently constructed a model showing the actual path of a particle on the earth's surface during a severe earthquake shock from data furnished by Professor Ewing's seismograph. The model shows the great complexity of earthquake movement. During '89 the most serious earthquakes were those in **Eastern Turkestan** and in **Japan**. Professor Falb, of Vienna, claims that some of his predictions, founded on astronomical considerations, have been verified. Several **minor earthquakes** have occurred recently in **Britain**. Just as '88 was closing (Dec. 29th) shocks were felt in Hampshire. On Jan 18th, '89, a notable disturbance proceeded apparently from the Pentland Hills, and passed through Edinburgh. On Feb. 10th East Lancashire suffered; and on June 22nd the Little Rhondda Valley, in South Wales, was visited by an earthquake. The most marked disturbance was on May 30th, when shocks were felt over a large area, being especially violent in the Channel Islands; and passing thence on the one hand to northern France, and on the other to the south of England, being felt in London, and even farther to the north. On July 8th Guernsey was again visited, and on Oct. 7th a shock was felt in Cornwall.

Eastern Roumelia. Autonomous province created by the Treaty of Berlin in '78; since the revolution of Sept. 17th, '85, united to Bulgaria (*q.v.*), and now usually known as **Southern Bulgaria**.

East of Europe Railways. Early in '89 a Commission, consisting of four delegates representing Austria, Servia, Bulgaria, and Turkey,

was formed to regulate the traffic on the Eastern Railways (for particulars as to construction of the line see previous eds.); and it was reported from Belgrade (April 26th) that they had decided that the Eastern Express should run twice a week. Efforts were then being made by the Commission to arrange the **postal service** by the Eastern trains, and to introduce a **direct goods traffic**. A **Railway Tariff Conference** had several sittings at Constantinople; but early in May the Bulgarian delegates returned to Sofia, being unable to come to a settlement with those of the Oriental Railway Company, the latter arguing that Eastern Roumelia did not form part of Bulgaria. On May 13th the inauguration of the construction of the **Jambol-Bourgas Railway** took place at the latter town, Prince Ferdinand of Bulgaria performing the ceremony of turning the first sod, which he did with a pickaxe. The line will have a length of 103 kilometres, and is to cost 7,000,000 fr., including cost of rails and waggons, and was to be finished in a year. No elaborate engineering works are required, as the railway passes over a plain with one bridge of 120 metres in length of wood, and three of 10 metres each of iron supported on brickwork.

Eastward Position. The rubrics which regulate the position of the officiating priest during the Communion Service of the Church of England direct, in the first place, that he shall stand "at the north side of the table," and at the Prayer of Consecration he is spoken of as "standing before the table." The evangelical, or "**Low Church**" party, generally interpret "north side" as identical with north end, while the "**High Church**" party hold it to mean the northern part of the west side—north, that is to say, of an imaginary line drawn east and west through the middle of the table. In this latter case the priest faces to the east—or almost so—and away from the congregation. The eastward position is supposed to emphasize the representative character of the celebrating priest, and was on this ground opposed by the Puritans—who, however, did not interpret "side" to mean "end," but altered the position of the table so as to make its sides north and south and its ends east and west. This endeavour was defeated, but the dispute remains. Antiquity, no doubt, is on the side of the Eastward Position; but the legal question is more difficult. In the case of *Hibbert v. Purchas* (1870) the Court of Arches and the Judicial Committee of the Privy Council decided that the Eastward Position at the Prayer of Consecration was illegal; but that judgment has been held to have been given *in personam*, and not *in rem*, and, though enforced by suspension against Mr. Purchas, has never been acted upon by the Bishops, nor has the question been again raised. The present rubric dates from 1559, that of Edward VI.'s first Prayer-Book (1549) having been "the priest standing humbly afore the midst of the altar." A very ancient custom, not wholly extinct even now, was for the holy table to be placed at some distance from the east end of the church, with the officiating priest on the eastern side of it, facing the people across it. In the coronation service of Queen Victoria (1838) the direction ran "the Queen kneeleth down at the faldstool (in the midst of the area over against the altar), and the Archbishop standing at the north side of the altar, saith this prayer or blessing over her." Here "north side" could only mean the

northern part of the west side. The adoption of the Eastward Position is every year more common, and is accompanied by less offence, even to those who see no advantage in it.

Ecclesiastical Commissioners. The, owe their origin to the Act 6 and 7 Will. IV., c. 77. Incorporated for the purpose of making schemes to carry out the recommendations of certain earlier commissions appointed to inquire into the endowment of bishoprics, the state of cathedral and collegiate churches, the best way of providing for the cure of souls, etc. The Act provides that the two Archbishops, the Bishop of London, the Lord Chancellor, Lord President, and First Lord of the Treasury for the time being, as well as a Secretary of State named by the sovereign, with three others therein named, should be of the commission. A subsequent Act added all the remaining bishops in England and Wales, the Chief Justice, and others. Membership of the Church of England has always been an indispensable condition of holding the office. A number of Acts have from time to time imposed fresh duties upon the Commissioners. By an Act of 1856 the Church Building Commissioners had their powers transferred to the Ecclesiastical Commissioners. By Acts of 1843, 1844, and 1856, the Commissioners were empowered to form new parishes wherever necessary, and to contribute out of the funds under their control to the endowment of the livings therein. An Act of 1850 created a Church Estates Commission, whose members acted as an estates committee to the Ecclesiastical Commission as well. To the Estates Commissioners were transferred all the estates held in trust for the Ecclesiastical Commissioners, with all powers of management, etc. In general, it may be said that the function of the Ecclesiastical Commissioners is to provide for the adjustment of Church endowments to the wants of the Church. In the annual report for '89 a new departure was announced in administrative policy. Whereas, heretofore, the Commissioners have allotted yearly grants towards the endowment of new churches, in future this can only be done when sufficient capital has been subscribed and invested to meet such annual charge. Office, 10, Whitehall Place, S.W.

Ecclesiastical Courts. These are of three degrees of jurisdiction. First there are the purely spiritual courts, including the Archdeacon's Court, the Bishop's Consistory, and the Archbishop's Court; second, courts of mixed spiritual and secular jurisdiction—e.g., the Court of Arches and the Court of the Official Principal of York; and, third, courts of purely secular constitution—e.g., the Judicial Committee of Privy Council, which is the Court of Final Appeal in ecclesiastical causes. Practically none of these courts now pretends to undisputed authority. The report of the Royal Commission on Ecclesiastical Courts ('83), while vindicating the historical position of them all, bewailed the confusion into which the administration of ecclesiastical law had fallen, and urged the adoption of various reforms. Absolute power, however, meanwhile rests with Lord Penzance, "Judge of the Provincial Courts of Canterbury and York," under the Public Worship Regulation Act, '74, and, as such, Dean of the Arches and Master of the Faculties (see ARCHES, COURT OF). By the

issue of writs *de contumacia capiendo* clergymen have been, and may be, imprisoned by defying sentences of monition, inhibition, suspension, or deprivation decreed by this court. The judgments of the Judicial Committee may be upheld and enforced by any of the High Courts of Justice. The Archdeacon's Court is a survival, and nothing more. It is a court of first instance, and appeals lie to the bishop, but its aid is seldom invoked. That at one time the Court was no sinecure is proved by the fact that the Archdeacon of Cornwall so lately as 1840 had a particular jurisdiction to grant probates of wills.—**Consistory.** Every bishop has his Consistory Court held before his Chancellor or Commissary, in his cathedral church, or other convenient place in his diocese. In this court are granted *faculties* for the alteration, repair, and renovation of churches. Nothing can be added to, or taken from, the *ornaments of the Church* (see ORNAMENTS RUBRIC) without a faculty. The Archbishop's Court, distinguished from the Provincial Court, is the canonical tribunal for the hearing of spiritual causes. Until the modification of the Court of Arches by the P. W. R. Act, '74, its revival was not demanded. It is specially prominent just now because the highest secular courts have decided that the Archbishop of Canterbury has power to try in person the Bishop of Lincoln (Dr. King), who is charged with practising and countenancing illegalities of ritual and doctrine. (See ORNAMENTS RUBRIC, and RITUALISM.) Lord Penzance's Court, or the old Court of Arches modified as stated, unites the powers of the *jus canonicum* with new powers conceded by the Church Discipline Act, '41, and the similar statute of '74, exercising authority in both Provinces. Lastly, the Judicial Committee of Privy Council, as representing the Royal Supremacy, is the absolute though not the canonical court of final appeal. Its judgments have been much criticised, and it has been accused of basing its decisions rather upon State policy than upon law. When a clergyman had administered water to communicants, there being no wine available, he was admonished by the Dean of Arches (*Beddoe v. Hawkes*, Feb. '88) not to repeat the offence. The correct course, the Court held, would have been to have made a short statement or dismissed the congregation.

Ecclesiastical Law, Cases in. '89. There were two important ecclesiastical cases during the year. One related to the new *reredos* (*q.v.*) at St. Paul's Cathedral, and the other to the alleged ritualistic practices of the Bishop of Lincoln. In the former case proceedings had been taken under the Public Worship Act, requiring the Bishop of London to consider the complaint. The proposed proceedings had for their object the determination of the question whether a *reredos* showing our Lord upon the cross above the Communion table and also the Blessed Virgin Mary with the Child in a conspicuous position a few feet above has any tendency to idolatry, and whether its erection is permitted by law. The Bishop of London held that such a structure was lawful, basing his decision upon the Exeter case, where a *reredos*, showing a figure of our Lord ascending to heaven, and placed in a conspicuous position immediately above the Communion table, was held to have been lawfully erected. He therefore refused to entertain the complaint, and the complainants thereupon applied

to the Queen's Bench Division for a *mandamus* to compel the Bishop to proceed. The Court was divided in opinion, Lord Coleridge and Mr. Justice Manisty holding that the Bishop ought to allow the proceeding to go on, and Mr. Baron Pollock being of a contrary opinion. As the former opinion prevailed, the Bishop was directed to remove the reredos. He subsequently gave notice of appeal.—In the case of *Reed and others v. the Bishop of Lincoln*, the trial has so far got little beyond the preliminary stages, but the Archbishop of Canterbury has decided that he has jurisdiction to try Dr. King for the alleged offences. These consist chiefly of having lighted candles on the Communion table during celebration; of mixing water with the Communion wine; of using the sign of the cross and the eastward position; and preventing the communicants from seeing him break the bread and take the cup. In his responsive plea, which was delivered on August 13th, the respondent denies that any of the alleged practices are illegal. As a proof of the interest with which the proceedings in the case are watched, it may be mentioned that a defence fund raised on behalf of the Bishop of Lincoln reached the sum of £2,000.—The case of *Swayne v. Benson* was a proceeding under the Church Discipline Act against the Rev. P. G. Benson, M.A., vicar of Hoo St. Werburgh, Rochester. The respondent had refused to admit the promoter, the wife of a surgeon in his parish, to the Sacrament of the Holy Communion, on the ground that she had attended a Wesleyan chapel, the respondent's contention being that such conduct on the part of the lady constituted schism. In the result Lord Penzance, Dean of Arches, directed the suspension of the clergyman from his benefice for a period of twelve months, but intimated that if he administered the sacrament to Mrs. Swayne the matter might be brought before him again. Subsequently Mr. Benson set Lord Penzance's mandate at defiance, and refused to permit a substitute, appointed by the Bishop, to preach for him. See also *Restoration of St. Albans, in re Gibbs*.

"Echo, The" (an evening paper, established Dec., 1868). Its principles are Liberal. *The Echo* gives daily, in a condensed form, the chief and latest news of the day, foreign, home, and commercial, of which it treats in an independent manner. Several new features have recently been introduced in *The Echo*, special prominence being given to topics of social interest. **Office**, 22, Catherine Street, Strand, W.C.

Ecuador. A republic of equatorial South America, governed by a President, with the assistance of a Congress composed of a Senate representing the provinces, and a Chamber of Deputies, the people. Area 248,370 sq. miles; pop. 1,004,651. Capital Quito, pop. 70,000. Revenue (1886-7), 4,447,067 sucres; expenditure, 4,674,713 s. (sucré = 3s.); debt £3,704,680. The foreign commerce is largely with the United Kingdom, and centres in Guayaquil. Exports, cocoa, indiarubber, hides, coffee, ivory. Army about 1,600 men. The history of Ecuador since 1870 presents few features of importance, beyond the civil wars and pronunciamientos, almost normal in the district. Railway extension is in progress. In '88 (March) Señor Antonio Flores was elected President. For Ministry, etc., see **"DIPLOMATIC CONSULT"** "Central and South America," by H. W. Bates, and *The Statesman's Year Book*.

Edinburgh, Alfred Alexander William Ernest Albert, R.S.B., Prince, 1st Duke of (creat. 1866), P.C., K.G., K.T., K.E., G.C.S.I., G.C.M.G. was b. 1844; second son of the Queen. Mar. (74) the Grand Duchess Marie Alexandrovna, dau. of the late Alexander II. of Russia. Entered the Royal Navy ('58); **Admiral** in command of the *Mediterranean Squadron* ('86). Is Master of the Trinity House, and heir presumptive to the Duchy of Saxe-Coburg and Gotha. In '88 H.R.H., in command of the Mediterranean Squadron, visited some of the chief continental capitals. In June he was promoted to the honorary rank of a **General of Infantry** in the German army, and was invested with the **Order of the Golden Fleece** by the Queen-Regent of Spain on the occasion of his visit to Madrid. He returned to England in July '89, to give evidence at the official inquiry into the loss of H.M.S. *Sultan*. The illness of H.R.H. during the early part of '89 occasioned much concern. H.R.H. has during the past year resided on the Continent.

"Edinburgh Review," the well-known quarterly review was founded in 1802, its first editor being F. Jeffrey, afterwards Lord Jeffrey. The name of Sidney Smith was associated with the *Review*, as also that of Lord Brougham, Lord Macaulay, and other distinguished men in English literature. The *Review* has been edited by Macvey Napier, Sir George Cornwall Lewis, and the present Editor (since '55), Henry Reeve, C.B., D.C.L.

Edinburgh University, founded 1582, has since become one of the chief medical centres in the world. Of 3,551 students, more than half belong to the faculty of medicine. **Chancellor**, the Rt. Hon. John Inglis, LL.D., etc.; **Lord Justice General of Scotland**; **Principal and Vice-Chancellor**, Sir Wm. Muir, K.C.S.I., LL.D., etc.; **Lord Rector**, the Marquis of Lothian (appointed '88). Conjointly with **St. Andrews** it sends a representative to Parliament; present member Mr. Stormonth Darling, Q.C. Its **Degrees** are—**M.A.** (hood black silk lined with white silk); **B.D.** (h. black silk lined with purple silk, bordered with white fur); **D.D.** (h. black cloth lined with purple silk; LL.B. and B.L. (h. black silk lined with blue silk, bordered with white fur); **LL.D.** (h. black cloth lined with blue silk); **M.B., C.M.** (h. black silk lined with crimson silk, bordered with white fur); **M.D.** (h. black cloth with appended cape, lined and faced with crimson silk); **B.Sc.** (h. black silk lined with green silk, bordered with white fur); **D.Sc.** (h. black cloth lined with green silk. Also grants degrees in mental science, philology, mathematical science, physical experimental sciences, natural sciences, engineering, public health, and agriculture. Connected with it is the **Edinburgh Association for the University Education of Women**, which prepares candidates for the Univ. Pass Certificate Examinations, the equivalent of the M.A. examinations for males. E. U. has recently developed a scheme of **University Extension. Alumni** (some), Sir William Hamilton, Carlyle, Hume; **Nasmyth**, the engineer; Sir Walter Scott, Mungo Park, James Mill, Owen, the anatomist, Sir C. Wyville Thomson, scientific chief of the *Challenger* expedition; Dugald Stewart, Lord Brougham, and R. Louis Stevenson (g.v.), the author. See, of **Senatus**, Prof. Kirkpatrick. Consult *Edinburgh University Calendar*.

Education, Commercial. See **COMMERCIAL EDUCATION**.

Education Commissions. See *infra*.

Education. The educational system of the United Kingdom is a complex arrangement, the nature of which can only be understood by a reference to the history of its development in its various aspects. In its technical aspect the subject will be found treated in a separate article (see **TECHNICAL EDUCATION**). It remains for us here to deal with it in its three aspects—primary, secondary, and higher education. (1) **PRIMARY, OR ELEMENTARY EDUCATION.**—The history of the movement which led to the adoption of the present educational law, as regards public elementary education, dates from a comparatively recent period. Previous to '39, when the first Parliamentary grant for educational purposes was made, the education of the country was left entirely to private individuals and the religious bodies, and it was not until '39 that Parliament exercised direct control over the administration of the funds periodically voted for education. Early in the century a great impetus was given to the popular demand for instruction by various voluntary associations—the chief of which were the *British and Foreign School Society*, founded through the efforts of Joseph Lancaster, supported by the Society of Friends and the Nonconformist bodies; and the *National Society for Promoting the Education of the Poor*, founded in '11, chiefly through the influence of Lancaster's rival, Dr. Bell. The first grant of £20,000 voted by Parliament, in '39, was towards the building of schools in connection with one or other of these societies. A building grant of the same amount was made annually until '39, when the vote was increased to £30,000, and a committee of the Privy Council (The Committee of Council on Education), was appointed to administer it. In '46 a new departure was made by granting subsidies in augmentation of teachers' salaries. In the same year the Queen's Scholarships, for enabling pupil teachers to attend training colleges, which are also aided by Government grants, were instituted. In '53 the capitation grant was instituted. In '58 the Duke of Newcastle's Commission was appointed, to inquire into the whole system of education in England and Wales. It was reported that the interference of the State had been beneficial, that the supply of efficient schools was inadequate, that only one in eight of the population attended any school, and of these only one-fourth, consisting of children of the upper classes, were efficiently instructed. Trained teachers were found to be superior to other teachers, and the Committee recommended that examinations should be conducted in every school where grants were to be paid, and that these grants should be apportioned upon the examination of individual children—i.e., on the principle of payment by results. This system is peculiar to this country, and is now condemned by many educational authorities. The Newcastle Commission was also the parent of the Revised Code, drawn up by Mr. Robert Lowe (now Lord Sherbrooke) in '62. Under the Revised Code direct payments of Government grants to teachers were abolished, and school managers, or committees of unpaid local representatives were appointed, and power was given to them, to select certified teachers and to pay to them the grant earned. The Code has undergone subsequent revisions, and that now in force is known as the *Mundella Code*. It is a schedule of all the elementary education

Acts, which together constitute the elementary education law. In '70 the sum voted by Parliament for educational purposes had reached £840,000. The extension of the Parliamentary franchise to the working classes had, however, created the demand for the education of all children of school age, and at that time only a small portion of them were under instruction. The celebrated *Elementary Education Act* (q.v.), introduced by the late Mr. W. E. Forster on Feb. 17th, '70, and adopted on Aug. 9th of the same year, was the result of this popular demand. The Act provided that the whole of the country should be divided into school districts, the Metropolis forming one itself, the boroughs another set, and the rural parishes the rest. Under the Act sufficient school accommodation was to be found in every district for all the resident children. *School Boards* (q.v.) were established under this Act. The Act was further amended in '73, in '76, when compulsory education was adopted and *school attendance committees* (q.v.) were appointed; and in '80, when children were required to pass a certain standard before they could go to work, and a school authority was everywhere appointed to enforce attendance. Notwithstanding this provision, however, the law relating to compulsion has failed in operation, owing to the refusal of many magistrates to convict parents for non-compliance with it. In '86 a *Royal Commission* was appointed to inquire into the working of these Acts. The Commission consisted of the following members: Lord Cross, chairman; Cardinal Manning, the Duke of Norfolk, Lord Harrowby, Lord Beauchamp, the Bishop of London, Lord Norton, Sir F. Sandford, Mr. L. Stanley, Sir J. Lubbock, M.P., Sir B. Samuelson, Bart., M.P., Rev. Dr. Rigg, Dr. Dale, Canon Gregory, Canon Smith, Rev. T. D. C. Morse, Mr. C. H. Alderson, Mr. J. G. Talbot, M.P., Mr. S. Buxton, M.P., Mr. T. E. Heller, Mr. Rathbone, the late Mr. H. Richard, M.P., Mr. G. Shipton, Mr. Mundella, M.P., and Mr. B. Molloy, M.P. (retired). The Commission published their report in '88. It consists of nine parts, and is one of the most voluminous documents ever issued. Amongst its numerous recommendations is one which has provoked great opposition, on the ground that it is an attempt to upset the compromise on the subject of religious instruction agreed to in '70. This recommendation is that assistance from the rates should be given to voluntary or denominational schools. This report was signed only by a majority of the Commissioners. A minority report, protesting against this proposal, and objecting to other recommendations of the majority, was signed by Sir John Lubbock, Sir B. Samuelson, Dr. Dale, Mr. Lyulph Stanley, Mr. Henry Richard, Mr. G. Shipton, Mr. Heller, and Mr. S. Buxton. In Scotland an excellent system of elementary education was adopted long before the passing of the *Scottish Elementary Education Act* in '74. Just as in Germany the intellectual impulse was given by Luther, so in Scotland education was born of the reforming energy of John Knox. In 1696 a law was passed establishing a school in every parish of Scotland. The great secession from the Church of Scotland in '43, which led to the establishment of the Free Church, effected the break-down of the parochial school system. The Free Church schools were set up side by side with the schools of the Establishment, and the division of interests and the means of support was not conducive to educational efficiency.

Hence, two years after the adoption of Mr. Forster's Act in England and Wales the **Scotch Education Act** was passed, establishing a **School Board** in every Scottish parish, and giving it the control of all parochial schools, not only elementary schools, but also the academies and high schools, and empowering it to erect and maintain new schools, according to the needs of the population. Grants are given to all schools under school boards, except those defined as "high-class public schools." The Scotch Education Act is administered by a Committee of the Privy Council, called the **Scotch Education Department**. The Scotch Code differs from that of England and Wales, in that it provides for the teaching of more advanced subjects, and differently defines the term "training college." In Scotland many of the training colleges are "non-resident," but in England and Wales they are all "resident." Free elementary education has now been generally adopted in Scotland under the powers of an Act last session. In Ireland national education is of under the control of the **Commissioners of National Education** in Ireland, consisting of twenty members, of whom ten are Protestant and ten Roman Catholic. The Commissioners, who are appointed by the Lord Lieutenant, administer the **Government Grants**, which are made to **Vested Schools**, maintained as National Schools, directly by the Commissioners or by trustees; **Non-vested Schools**, belonging to private individuals, but under the control of patrons or managers; **Model Schools**, in which young people are trained as teachers; **Agricultural National Schools**; certain **Technical Schools**, in which instruction is given in embroidery; **Convent and Monastery Schools** (Vested and Non-vested); and **Workhouse National Schools**. The Commissioners have framed regulations for withdrawing any child from religious instruction of which its parents or guardians do not approve. **Statistics**.—On Aug. 31st, '88, the date to which the last return (published in Sept. '89) is made up, there were in **England and Wales** 19,328 elementary schools inspected, with accommodation for 5,385,643 scholars. The average daily attendance was 3,614,767. The Government grant amounted to £3,166,110, or 17s. 6^d. per scholar in average attendance. This shows an increase over the amount granted in the year previous. An idea of the progress that has been made in the provision of elementary education since '70 may be formed from the fact that in that year accommodation was only provided for 8·75 per cent. of the population, whereas in '88 the percentage was 18·71. Since the adoption of the first Education Act, in '70, the elementary education of the country has been conducted by two powerful organisations—the one consisting of the **School Boards**, under the direct control of the ratepayers; the other of the **Voluntary Schools** of the Church of England and various other religious denominations. These schools, though earning the Government capitation grant, are not under the control of the ratepayers. The cost of education per head steadily increased after the passing of the first Education Act. In '71 the cost per head was £7 7s. 5^d.; in '81, £1 16s. 10^d.; in '85, £1 19s. 1^d.; and in '88, £2 6s. 7^d. See also **SCHOOL BOARD FOR LONDON and SCHOOL BOARDS**. The amount raised during '88 (latest returns) for purposes of public elementary education in England and Wales will be seen from the following table:—

| SCHOOLS. | INCOME. | | | | | |
|-------------------|-------------|---------------------|--------------|--------------------------|--------------------|---------------------------|
| | Endowment. | School Board Rates. | | Voluntary Contributions. | | School Pence. |
| | £ s. d. | £ s. d. | £ s. d. | Paid by Scholars. | Paid by Guardians. | |
| Church of England | 140,696 2 4 | — | 582,081 10 7 | 846,110 19 10 | 31,870 1 8 | £ s. d. 1,383,998 14 2 |
| Wesleyan | 645 14 11 | — | 15,682 4 5 | 101,867 4 11 | 2,544 17 4 | 29,741 0 6 |
| Roman Catholic | 2,375 18 10 | — | 65,993 18 4 | 75,115 16 10 | 11,539 17 0 | 3,371 8 1 |
| British and other | 18,461 13 5 | — | 81,672 11 2 | 167,172 9 4 | 4,067 1 7 | 930 0 1 |

| | | | | | | 3,093,367 15 3 |
| | | | | | | 7,154,116 0 8 |

In Scotland, for which the last returns are made up to Sept. 30th, '87, there were at that date 3,111 schools inspected, furnishing accommodation for 677,984 scholars, of whom 491,735 were in average daily attendance. The parliamentary grant amounted to £455,924, or 18s. 6½d. per head. In Ireland in the same year the number of schools inspected was 8,028, providing accommodation for 734,381 scholars, with an average attendance of 497,923.—**SECONDARY EDUCATION.** In Scotland secondary or intermediate education is, as we have seen, to a great extent under the control of school boards, and in Ireland certain inadequate provision for it has been made by the Government. But in England and Wales secondary education is entirely in the hands of trustees of endowments, companies, and private individuals. In Scotland a great step towards systematising secondary education was taken in Jan. '86, when the Scotch Education Department instituted examinations for Leaving Certificates in the higher-class schools, the head-masters or rectors of which willingly co-operated in promoting the success of this innovation. A fresh impetus will doubtless be given to higher education in Scotland by the *Scottish Universities Act of '89*. (See Session, PARLIAMENTARY, ccc 124.) In England and Wales, though the state has at present exercised no direct control over secondary education, it has instituted several inquiries into its condition, presumably with the view to future legislation on the subject. In '61 a *Royal Commission*, under the chairmanship of the Earl of Clarendon, was appointed to inquire into the condition of "certain public schools in England." These public schools were nine—viz., Eton, Winchester, Westminster, Charterhouse, St. Paul's, Merchant Taylors', Harrow, Rugby, and Shrewsbury. (See under their several headings.) In '64 another *Royal Commission* was appointed, under the chairmanship of Lord Taunton, to inquire into the condition of all schools other than those receiving the parliamentary grant and the nine great public schools already referred to. The *Commissioners* divided the schools they examined into (1) Endowed (grammar schools), (2) Private, and (3) Proprietary. They reported that reform must begin with the endowed schools, and drew up a series of recommendations which led to the adoption of the *Endowed Schools Act of '69*. This Act is administered by the Charity Commissioners. The inquiry of the Commission was also especially interesting on account of the evidence they took on the secondary education of girls. Their report gave great stimulus to the movement for promoting this object, and its publication was followed by the formation of "The National Union for improving the Education of Women," of which the leading spirits were the Princess Louise, Mrs. William Grey, and Miss Shirreff. It was under the auspices of this Association that the *Girls' Public Day Schools Company* was established. In Wales the state of secondary education formed the subject of a *Departmental Committee of Inquiry*, under the chairmanship of Lord Aberdare in '80. With regard to secondary schools the committee recommended: (1) That existing endowed schools should be made efficient and suitable. (2) That in the reorganisation of endowments, (a) all schools should be made unsectarian; (b) the governing bodies should be to a large extent properly chosen; (c) schools should be adapted to local requirements. (3) Where there were

no endowments available, schools should be provided from other funds. A bill framed on the lines of these recommendations was introduced into Parliament last session.—**HIGHER EDUCATION** is comprehended in the work of the Universities and Colleges of University rank. (See Universities and Provincial Colleges under their several headings, and for the Higher Education of Women see ed. '87.) A grant of £15,000 (which will probably be annually voted) for the assistance of university colleges in Great Britain was adopted by Parliament last Session. At the close of the year '88 an important controversy arose on the subject of competitive examinations, suggested by a protest signed by a large number of M.P.s and well-known educationists, published in the *Nineteenth Century* (Nov.). This article produced a rejoinder in the *Universal Review* (Dec.), and a defence of the system in the report of the *Civil Service Commissioners* (for competitive examinations), published in Aug. '89 (*Eyre & Spottiswoode*). Consult for elementary education "Annual Report of the Committee of Council on Education" (*Eyre & Spottiswoode*); for higher education the calendars of the various Universities (issued annually), and for the subject generally the *Cyclopædia of Education* (editor, A. F. Fletcher), and the following educational journals:—*The Journal of Education* (editor, F. Storr); *The Educational Times* (editor, Dr. Wormell); *The Private Schoolmaster* (editor, E. Markwick) (monthly); *The Schoolmaster*; *The Schoolmistress*; *The School Guardian*; *The School Board Chronicle* (editor, R. Gowing); and *The Teachers' Aid* (weekly).

Education Department is a committee of the Privy Council, in which are included the President of the Council and the Vice-President for education, assisted by a large permanent staff. The greater share of ministerial work falls upon the vice-president, who is responsible to the House of Commons. The Department distributes the Parliamentary grant, frames the code, appoints a staff of inspectors by whom schools in receipt of the grant are visited and the scholars examined, and training schools for teachers are inspected; it sanctions the borrowing of loans by School Boards on the security of the rates, and may grant provisional orders for the compulsory acquisition of land for school sites. Council office, Whitehall, S.W. (See EDUCATION, ELEMENTARY EDUCATION ACTS, SCHOOL ATTENDANCE COMMITTEES, etc.) There is a separate Department for Scotland. Office, Dover House, Whitehall.

Egypt. A state, nominally dependent on Turkey, consisting of the Nile Delta and the valley of the Nile as far south as Wady Halfa, under the rule of Mohammed Thewfik, sixth of the dynasty founded by Mohammed Aly, his great-grandfather. The first four rulers bore the title of *Vaî* or *Viceroy*, but in '66 Ismail, then ruler, received from the Sultan the title of *Khédive* or king, and the succession was made direct from father to son, instead of descending, in accordance with the original treaty, to the eldest male of the family of Mohammed Aly. In '73 the right of concluding commercial treaties with foreign powers, of issuing coinage, and of maintaining an army, was also conceded. Area of Egypt, 394,240 sq. m. Cultivable area, 5,185,000 acres. Pop. ('82), 6,806,381. Principal products, cotton, sugar, and cereals. (For history from '81 to '89, see editions of '86, '87, '88, '89.)—History of the year. In Nov. '88 the low level of Nile

caused considerable anxiety. All hopes of a large cotton crop, which had been prevalent during the summer, were abandoned, and the result of this chief Egyptian staple proved inferior, both in quantity and quality, to the previous year. The low Nile had further failed to inundate a considerable quantity of land, which thus became uncultivable for the year '89. It has been proposed to spend an amount of about £400,000 on works destined to prevent a recurrence of the disaster, but the execution of this and similar beneficial measures must depend to a great extent on the financial position, which, though promising, does not leave large funds for remunerative expenditure. Sir Edgar Vincent, as Financial Adviser to the Egyptian Government, closed the accounts for the year '88 with a surplus of £69,000, and a reserve of over £600,000—a brilliant result, which earned him the congratulations of Lord Salisbury. In Feb. '89 he opened negotiations for a conversion of the Egyptian Preference Loan from a 5 per cent. to a 4 per cent. stock, a measure which would have insured a yearly economy of £160,000. Sir Charles Russell and Sir Horace Davey pronounced against the legality of the proposed conversion, but in May the Egyptian Government determined to proceed with the measure, and on the 17th a contract was signed in London by Lord Rothschild on behalf of a group of bankers, and by Baron Richtofen on behalf of Egypt, whereby the former undertook to effect the operation provided the principal European powers gave their consent by June 30th. On the 6th of that month Great Britain and Germany gave that consent, as did Austria and Italy on the next day, and Russia on the 17th. France, however, declined, unless a date was fixed for the evacuation by British troops. Lord Salisbury declined to associate the questions, and negotiations were broken off. Later Mons. Spüller, French Minister of Foreign Affairs, seemed willing to re-open negotiations, and Riaz Pasha (*q.v.*), the Egyptian Premier, made a second appeal to him without success. The sons of the Khedive, having visited Paris (Sept.), were entertained by Mons. Spüller, who, in proposing their health, assured them that Egypt could always rely on France for sympathy and support. The Egyptian Government seized this opportunity to entreat that these professions might be interpreted by acts, and again requested the consent of France to a measure of necessary economy, but with the same want of success; and in this, as in all previous years since '82, the French Government has done its utmost to obstruct the Anglo-Egyptian administration. In the meanwhile the action of the Dervishes in the Soudan proved sufficiently the impossibility of evacuation. On Nov. 8th, '88, General Grenfell, after reconnoitring position of Dervishes at Suakin, returned to Cairo, and urged reinforcements. General Dornier had meanwhile inspected the Assouan—Wady Halfa—frontier, and found it satisfactory. On the 18th the Black regiments were ordered to proceed from Assouan to Suakin, their place being taken by British regiments from Cairo and Alexandria. On the 23rd the *Times* urged strongly that British troops should also be sent to Suakin, and two days later the British Government adopted the suggestion. On Dec. 1st General Grenfell left Cairo to take command of a Suakin expeditionary force, consisting of British and Egyptian troops. He arrived there

on the 7th, and found that the Dervishes were bombarding the forts, and that the artist correspondent of the *Graphic* had been killed within the lines. On the same day the Egyptian cavalry, under Colonels Barrow and Kitchener, reconnoitred the position of the enemy, and had to retire with some loss. On the 14th the Khalifa Abdalla announced through Osman Digna, commanding the Dervish force at Suakin, that he had captured Emin Pasha (*q.v.*) and Stanley (*q.v.*). On the 16th General Grenfell made a satisfactory reconnaissance, and on the 20th, his force being completed, he attacked and carried the Dervish lines with a loss of four killed and sixty wounded. The attack was made almost entirely by Egyptian troops, but supported by British. The Dervish loss was estimated at a thousand. These events occasioned frequent debates in the House of Commons (see Session '89), but the country round Suakin was pacified, and the British troops returned to Cairo by Jan. 12th. General Grenfell was received with enthusiasm in Cairo, and received from his own Government the K.C.M.G. Very shortly after his return Sir Francis Grenfell proceeded to inspect the Nile defences, returning to Cairo April 26th. Five days later the Dervishes made a raid north of Wady Halfa, and were repulsed by Egyptians under Major Dunning and Captain Hickman. By May 14th the force gathered by the Dervishes was about 600 men, on the strength of which the Khalifa Abdalla sent envoys into our lines with letters addressed to the Queen, the Khedive, and Sir Evelyn Baring, exhorting them to embrace Mahdism, and so avoid destruction at his hands. On June 4th, and again on the 17th, unimportant raids were repulsed, but by the 21st the Dervish force, commanded by Wad el Nejumi, advancing by the west bank of the Nile, reached Semneh, and was estimated at 2,000 men. Egyptian reinforcements were hurried up the Nile, and all officers on leave were recalled to duty. By the 30th Nejumi was at Maluka, but his forces were defeated on July 3rd in a smart engagement at Argouin. Egyptian loss, 70 killed and wounded, against estimated Dervish loss of 500. The enemy, notwithstanding, continued to march north, watched by gunboats, which endeavoured to keep them from the water, and Sir Francis Grenfell started up the river. British troops were ordered to follow him under General de Montmorency, and further troops were sent from Malta to replace those withdrawn from Cairo. On the 10th Grenfell interviewed the principal sheiks, and after reconnoitring the enemy on the 16th, he summoned Wad el Nejumi and his followers to surrender, and returned north to meet General Montmorency and concert operations. On the 26th Makir el Nur, another Emir, effected a junction with Nejumi, and on the 28th they struck camp, and continued their march north. On August 1st Major D'Aguilar had a successful skirmish, killing sixty of the enemy; and two days later Sir Francis Grenfell advanced with his full Egyptian force and a small body of English cavalry on Toski, and completely routed the enemy, killing Wad el Nejumi, 12 other Emirs, and about 2,000 Dervishes, besides capturing 50 standards. This victory secures the Nile frontier from attack for some time. General Grenfell received from the Khedive a sword of honour, and left for England on well-earned leave. Of events passing in the Soudan beyond

our frontier little is known. Lupton Pasha appears to have died on May 8th, '88. The rumour that the Mahdists had conquered the Equatorial provinces, and taken prisoners both Emin and Stanley, proved to be false. On April 28th it was reported that the Senoussites had taken Khartoum, and that the Khalifa had fled; but this also proved false, and it seems more probable that the Senoussites were defeated. That the Abyssinians (see ABYSSINIA) were defeated by the Mahdists during April is probable,—that King John was killed certain; and it may be mentioned in this connection that Menelek appears to have been recognised as his successor. In June it was reported from Massowah that native irregulars under Italian officers had taken and occupied Sanheit, on the Abyssinian frontier, and that Menelek was sending an embassy to Rome.—The Prince of Wales, accompanied by Prince George, visited Egypt, and was received at Cairo (Nov. 1st) by the Khedive. Brilliant illuminations and entertainments characterised the reception. Subsequently T.R.H. accompanied by the Khedive, visited the Pyramids. The re-election of a Governor for Alexandria took place quietly (and).—The other events of Egypt proper are of small importance, and are mainly administrative changes. Mr. Timmerman, the French member of the Railway Board, having resigned his appointment, gave an opportunity to the Egyptian Government of making economies in the appointment of his successor, but the French Government opposed. Similarly in the International Tribunals they have claimed and obtained increased representation. Mr. Schmidt, deputy Director-General of Customs, has resigned, and been succeeded by Mr. Ornstein, C.M.G. Sir Edgar Vincent has been appointed Director-General of the Imperial Ottoman Bank at Constantinople, and was succeeded by Mr. Elwin Palmer, C.M.G. (q.v.). The Nile commenced rising on June 18th, and is so far satisfactory. The Public Works Department continues to do excellent service, and is extending the railway service of Egypt. The Government registry offices at Alexandria destroyed by fire (Feb. 28th).—**Egyptian finance, commerce, &c.** (The figures given throughout are Egyptian pounds, worth 20s. 6d.) The closed accounts for the year '88 showed receipts, 9,661,436; expenses, 9,591,960; surplus, 69,476. The total debt of Egypt on Dec. 31st, '88, was 103,935,640, made up as follows: Guaranteed loan, 9,152,100; privileged debt, 22,296,800; unified debt, 55,989,440; domains loan, 5,530,820; Daira loan, 8,636,480; 4½ per cent. loan, 2,330,000. The charge on this debt is 4,220,830. The tribute paid to Turkey is 678,203. The reserve fund was 610,066 on Dec. 31st, '88. Exports from Egypt ('88), 10,408,923, of which 6,534,355 were to England. The imports for same year were 7,687,834, of which 2,673,411 were from England. In specie the imports were 2,038,955, and the exports 2,642,900. The prospects for Egyptian finance are still fairly encouraging; the principal difficulties have been surmounted; the revenue is indeed not capable of much increase, but with an improving administration the expenditure can gradually be diminished. The obstinacy of the French Government has hindered an economy of £160,000 per annum in the debt charge, but conversion can hardly be long delayed. In five years the Government is relieved of the charge of £200,000 annually for the Suez Canal shares, and should British

administration be undisturbed during the intervening period there is every prospect that Egypt will then be safely through her financial troubles. Mr. Palmer, the Financial Adviser, submitted to the Ministers (Nov. 28th) his Budget proposals for '90. The chief features are: (1) The suppression of the professional tax in all but the largest towns; (2) the suppression of all octrois at Rosetta; (3) the abolition of the octroi on rice; (4) the abolition of all weighing dues; (5) a reduction in the internal postage, combined with house-to-house delivery and an extension of the rural service; (6) an increased educational budget. The first five represent a reduction in the receipts of £121,000, directly or indirectly reducing taxation to a greater extent; the other anticipated receipts fall short of last year's estimate by a further sum of £141,000. This diminution is nearly covered by the increased receipts anticipated from the Land Tax, owing to a more favourable Nile, and a further increase in the estimates. The total estimated receipts amount to £100,000 in excess of last year's. On the expenditure side the increased outlay, which is mainly on the extension of the railway system and on the education grant, is more than balanced by economies, mainly in the Daira and Domains administrations; so that the total anticipated expenditure is £70,000 less than last year's. The total revenue is set down at £9,650,000, and the expenditure at £9,500,000, showing a surplus of £150,000.

Egypt Exploration Fund, The. Founded 1883, under the presidency of the late Sir Erasmus Wilson (d. 1884), for the purpose of historical investigation in Egypt, conducted in a scientific manner, with the object of solving some of the many important questions that await the result of excavation. Special attention has been directed to all that can bear on the history of the sojourn and exodus of the Israelites, and the early sources of Greek art. The work is conducted on the principle of careful examination of all details and preservation of the objects found. These objects are of great interest in illustrating comparative art by the influences of Egyptian, Greek, and Syrian styles on one another, the technical processes of metal work, metrology and the ceramic arts. The antiquities found, after the claims of the National Museum have been satisfied, are divided between the British Museum, the Boston Museum (U.S.A.), and various local museums in England and the Colonies. The distribution depends mainly on the amount of local support which has been contributed by the several districts represented by the museums. Annual volumes are published, giving the results of each season's work, with maps and plates. In February '89 M. Naville, again assisted by Mr. F. Llewellyn Griffith and Count d'Huist, as well as by the Rev. W. MacGregor, resumed work at Tel Basta, on the site of the famous temple of Bast in the city of Bubastis; this being the third season devoted to the excavation of that magnificent red granite structure (Herodotus, Bk. II., chap. 138), whose vast ruins were first brought to light in '87. Among the wrecks of the Hypostyle Hall and the Hall of Osorkon II. were found innumerable monuments of the Vith, XIIth, XXIInd, and XXIIRD dynasties. These consist mainly of bas-relief sculptures, portrait-statues

of all sizes, from miniature to colossal, and a multitude of beautiful lotus and Hathor-headed columns of various periods. The most striking discoveries related to the mysterious Hyksos rulers who dominated Egypt for 500 years. Bubastis proves to have been a great Hyksos settlement, and there were found two colossal black granite statues of that unmistakable type which is as rare in Egyptian art as its presence is suggestive of some of the most deeply interesting and important racial and historic problems. The heads presumably represent Apepi, the last king of the Hyksos period. But, in addition to these, were found in the hypostyle hall of the temple the lower part of a XIIIth dynasty statue, its feet on the nine bows, and on its throne the cartouches of a hitherto unknown king, whose name may be read as Ra-ian, or perhaps as Ka-ian. According to Arab tradition, the Pharaoh under whom Joseph served as prime minister was named Rayyan ibn al-Walid, and this statue has been conjecturally identified as one of that king. The question is yet under discussion, and awaits solution. The great ruins of this huge temple have now been exhaustively examined, with the result of showing that its history extended over 3300 years. Stone fragments have been found bearing the names of Khufu, builder of the Second Pyramid; of Pepi-Merira, the great temple-builder of the VIth dynasty, and of kings of the XIIth, XIIIth, XVIIIth, XIXth, XXIInd, XXIIIrd, XXVth, XXIXth, and XXXth dynasties as well as of the Ptolemaic period. Such of the finer monuments as have not been retained for the Egyptian National collection have been presented to the British Museum, to the Museum of Fine Arts at Boston, to museums in Sydney, Montreal, and the larger provincial towns of Great Britain. The selection and transport of these weighty, yet fragile, objects from Bubastis to their ultimate destinations have been a severe tax upon the means of the Society and upon the time of its officials. The latest work published by the Egypt Exploration Fund contains the second part of "Tanis," as well as Mr. Petrie's Memoir on Nebesheh (Am), and on Defennch (Tahpanhes). The second volume of "Naukratis," and the third edition of M. Naville's "Pithom," have also been published. "The City of Onias" and the first volume of "Bubastis" are in preparation. The offices of the Egypt Exploration Fund are at 17, Oxford Mansion, Oxford Circus.

W. President, Sir John Fowler, K.C.M.G.; Sec., H. Gosselin; Hon. Sec., Miss Amelia B. Edwards, LL.D., etc., Westbury-on-Trym, Bristol.

Egyptology, '89. The magnificent papyrus now in the British Museum, which came from a Theban tomb of the XIXth or XXth Dynasty, and which, in its beauty, fulness, dimensions, and state of preservation, as described last year, is the finest example of the Book of the Dead at present above ground in any country of the world, has become known as the Ani papyrus, after the person for whom it was written. The title of this dignitary was "scribe of the sacred revenue of all the gods"; which appears to be identical with an officer who, in the Egyptian hierarchy, according to the Hood papyrus, took precedence of the "prophets" and "sacred fathers." It has been discovered that one of the religious texts contained in the Ani papyrus is found also on a tablet dated the forty-fifth year of

Rameses II. Very soon after the arrival in England of this magnificent and unique copy or edition of the Book of the Dead, it was found that the splendour of the whites of the illuminations and other designs was palpably obscured by contact with the climate of London. From further experience it is now concluded that our atmosphere is destined to be equally disastrous to all the pigments. It was mentioned last year that the trustees of the British Museum have ordered the preparation of coloured photographs of this rare work at a popular price. As a precaution against atmospheric influences, it was found necessary to cut the papyrus into uniform lengths of about two feet, which, being appropriately mounted, have been practically hermetically sealed with a covering of glass. The copies thus produced approximately represent the glory of the colours as they left the hands of the Egyptian scribe or artist.—In the spring of '87, Mr. Edouard Naville and Mr. F. Ll. Griffith were induced to settle at Bubastis, the Pi-beseth of Ezekiel, and close to Zagazig, between Cairo and Suez, and a junction of several lines of railway, for the purpose of conducting excavations. Their first attempts showed that the great temple described by Herodotus had not disappeared; for the earth concealed heaps of granite blocks and gigantic columns. The task, therefore, of the excavators was to lay bare all the field of ruins, the extent of which they could judge to be considerable; and they applied themselves to this work during the winter of '88-9. Not only did they remove all the earth which covered the stones, but, in order to be quite certain that nothing was left hidden, they pulled down the heaps of stones which had been piled up by the fall of the walls of the first two halls. They rolled and turned every block, and this long and costly proceeding yielded inscriptions and monuments of the greatest value. Mr. Naville and Mr. Flinders Petrie still continue the excavations at Bubastis and some XIIIth Dynasty sites in the Delta of the Nile. Mr. Griffith, now of the British Museum, has just published copies of the Inscriptions of Siut and Dér Rifeh, with numerous annotations and additions from various sources; a very important work on a subject never before so completely treated, and instalments of which were given in a short series of articles in successive numbers of the *Babylonian and Oriental Record* for '89. Mr. Griffith has also furnished an Appendix to the *Naukratis* of Mr. Ernest A. Gardner, at present the Director of the British School of Archaeology at Athens. The identity of the co-excavator of Bubastis with the interpreter of the Siut inscriptions has accidentally given him a place in the Egyptian bibliography of the past year which belongs by right of his subject to Dr. Rudolf Virchow, who, as a physiologist and anthropologist, has made some noteworthy researches into the origin of the ancient Egyptian people. For this object he went to Egypt, and examined all the royal mummies that were accessible, of all of which, both of their skulls and bodies, he took minute measurements, and arrived at the conclusion that the Egyptians were not allied in any degree to the negro. From the application of the same canons and treatment to the animal mummies, Dr. Virchow concludes also that the cattle of Egypt were not African, but Asian, perhaps even Caucasian. Dr. Virchow has embodied

these results of his investigations in a Report to the Berlin *Akademie der Wissenschaften*. Another contribution by Dr. Virchow to the scientific literature of Egypt appears in *Globus*, vol. iv., and is entitled *Über Land und Leute in Ägypten*. M. Maspero has also made an excursion into the palaces of mummydom, the results of which he has published in a work entitled *Les Momies Royales de Dér el-Bahari*. His descriptions are characterised by extreme minuteness, and can scarcely claim to share the dignity and decorum of the new parts, for '89, of the *Mémoires* described last year as being issued under the auspices of the French *Ministère de l'Instruction publique*. The *Mémoires* are brought out under the general editorship of M. Bouriant, *Directeur de la Mission archéologique au Caire*, by the members of which they are prepared. In continuation of his descriptions of *Les Hypogées royales de Thèbes*, M. Eugène Lefébure has issued his illustrations and inscriptions of the *Tombeau de Ramses IV.*: whilst from the editorial hand of M. Philippe Virey has come an account of the *Tombeau de Rekmara*, a high official who was governor-general of Thebes in the time of Thothmes III. Still further attention is due to Professor Maspero, who has lately published in the *Journal Asiatique* a translation, which he had originally prepared for his public lectures at the *Collège de France*, from a manuscript, the *Rhod papyrus*, namely, of the British Museum, which forms a manual of Egyptian rank in official, military, ecclesiastical, and social life. Finally, M. Maspero has contributed an article on Egyptian Mythology, to the *Révue de l'Histoire des Religions*, in which he propounds a view of which the only possible effect is to reduce the ancient Egyptian religion to its barest matter-of-fact presentation, and to convict it of being one of the most savage systems of Nature-worship to be found in all the perverted piety of mankind. He imputes to figures and symbols the hardest and grossest literalism. One of the phases of the ancient Egyptian religion has also been treated in the eighth volume of the *Muséon*, in which a contribution appears from the pen of Dr. A. Wiedemann, entitled *Le Culte des Animaux en Égypte*. Professor E. Amélineau, who has devoted much study to the Christian antiquities of Egypt, has during the year published many historical and ecclesiastical Coptic fragments in different French periodicals; and in particular he should be mentioned as having contributed to the *Journal Asiatique*, December '88, an important article on the *Conquest of Egypt by the Arabs*. It has taken seven volumes instead of six to cover the whole scheme of *Signor Simeone Levi's Vocabolario geraglyphico copto-ebraico*, of which the concluding volume has been issued in the course of the past year. Other contributions to Egyptian learning include a paper on *Egyptian Phonology*, read by Mr. Renouf, the President, before the February meeting of the Society of Biblical Archaeology (see its *Proceedings*); and an important paper of Professor Adolf Erman, *Eine neue Art der ägyptischen Conjugation*, published in the *Zeitschrift für ägyptische Sprache*, and giving a form of verbal conjugation in Egyptian very much like that of the perfect tense of the Semitic languages. The similarity is so striking that it is supposed to be due to something more than mere accident. Mr. E. A. Wallis Budge has published an *Egyptian Reading Book*, of a kind

never before attempted, and offering a mass of material collected and transcribed from hieratic texts heretofore practically inaccessible, on account, *inter alia*, of the expense and labour of gathering them up from their distribution in the pages of volumes scattered widely apart from each other. Lastly, to the works of the year, completed or in progress, Brugsch Bey has added an instalment of a work which, like his productions in general, is destined to be of permanent value, entitled *Ägyptologie*; in which he gives, or is to give, a summary of all that has been done since the modern recovery of the history, geography, religion, and hieroglyphic interpretation of the Nile Valley, and of Egyptian archaeology in all its branches. Consult Dr. Birch's Preface to the second edition of Bunsen's "Egypt's Place in Universal History"; Preface to second volume of "Records of the Past"; Inaugural Address in "Transactions of the Second Session of the International Congress of Orientalists"; Introduction to the Study of the Egyptian Hieroglyphs, in Sir J. Gardner Wilkinson's "Egyptians in the Time of the Pharaohs"; "Egypt from the Earliest Times to a.c. 300"; Rede Lecture on the "Monumental History of Egypt"; Sir J. Gardner Wilkinson's "Manners and Customs of the Ancient Egyptians"; Lenormant and Chevalier's "Manual of the Ancient History of the East"; Dr. E. Richmond Hodges' "Egyptian Hieroglyphics and their Decipherment," in the third edition of Cory's "Ancient Fragments"; Rev. A. H. Sayce's "Fresh Light from the Ancient Monuments"; Mr. E. A. W. Budge's "Dwellers on the Nile"; "Egyptian Archaeology," by Professor G. Maspero and Amelia B. Edwards, LL.D., etc., etc.

Eiffel, Gustave, Engineer of the Eiffel Tower (*q.v.*), was b. at Dijon in the Côte d'Or, 1843, and educated at the Central School of Arts and Manufactures at Paris. His professional reputation was established by his construction of the *Bordeaux Bridge*, the Garabit viaduct, and other important works. He has introduced many improvements in the art of bridge building upon arches.

Eiffel Tower (Paris Exhibition, '89). It was decided to erect in the Champs de Mars, Paris, in connection with the Exhibition of '89 (*q.v.*), the highest iron tower yet known. The height is 984 feet, and the estimated cost was £200,000. To this sum the Assembly in Nov. '86 voted £60,000, and the remainder of the money was to be found by the contractors, who in return receive a concession of the tower for twenty years. M. Eiffel, the engineer who originated the project, urges that the column will be of great value for astronomical and meteorological purposes. The form of the erection is that of a square of four arches, sloping inward and upward to a platform upon which rises the iron column, from four feet, sloping into graceful lines very much after the fashion of a lighthouse. At the end of '87 the tower had reached the height of 179 feet, the four arches of the base had been joined, and the great platform for the rooms of the first stage was being constructed. On May 19th, '88, it was stated that considerable uneasiness was being felt as to this tower; that the foundations were doubtful, that the labourers were attacked with giddiness, and that they could with difficulty be got to work. On July 4th M. Eiffel entertained the Parisian journalists to breakfast on the first story of the edifice,

60 mètres high. A technical description of the ingenious spiral lifts for the carriage of passengers from the second to the third story of the tower, taken from the *Globe Civil*, was given in the *Engineer* of August 3rd. A strike amongst the workmen took place on Sept 18th, and a demand was made for an advance of 20 c. an hour in the wages of the 160 labourers engaged on the erection (which was then 140 mètres high). MM. Eiffel and Campagno met the delegates, and offered a general increase of 5 c. an hour, to be followed in a month by another 5 c. to deserving workmen, while they offered to establish a canteen on the first storey, and sell food at 50 per cent. less than below. It may be observed here that the working day was one of eleven hours, which was reduced to about ten by the ascent and descent from the second storey, which required twenty-five minutes each way. On Sept. 20th M. Eiffel announced the settlement of the dispute; a further sou to be given the carpenters when the season reduced the day to nine hours, and a gift of 50 fr. to all on reaching the third platform. On Nov. 30th the tower had reached the great height of 200 mètres, or about 660 feet, and it was expected to be ready for the painters earlier than was contracted for. The ceremony of hoisting the first flag from the summit was performed on March 31st, '89, M. Eiffel being present. The flag measured 7½ mètres long by 4½ mètres wide—bore the letters "R. F."; and its appearance was saluted by a salvo of twenty guns. After the engineer, M. Condamin, had addressed those present on the platform, the descent was made, this—there being then no lift—lasting forty minutes. A banquet, to which guests and two hundred workmen had been invited, followed. A technical description of the lifts designed to be used for the tower was given and illustrated in the *Engineer*, March 22nd. In the *Paris Temps* of April 8th it was shown that the real limit of vision from the tower, which had been much discussed, was forty miles, which takes in Fontainebleau, Mantes, and Pontoise; but this area could only be viewed in exceptionally clear weather. On May 7th, the day after the opening of the Exhibition (*q.v.*), the workmen who had been engaged on the tower were presented to the President of the Republic, headed by M. Compagnon, who had charge of the workyard, and had recently been appointed a Chevalier of the Legion of Honour. The workmen presented M. Carnot with a model of the tower in iron and steel, a silk flag, and an album in which they had written their names, the distinguished recipient being apparently much pleased with this mark of attention. On May 29th an experiment was made with the Otis lift, intended for use to the second platform, which proved quite successful; for when detached from its cables of steel wire it fell with such a gradual motion upon the brake that not a pane of glass was cracked. The lift weighed 11,000 kilos., and was weighted with 3000 kilos. of lead. The Edown lift was requisitioned above the second platform. An elaborate description of the tower from a popular point of view was given in the *Times* of April 30th, when it was asserted that it was a certain M. Nouguiet, a young engineer in M. Eiffel's employment, who first conceived the idea, and worked it out with the aid of an architectural friend. A violent storm of thunder and lightning passed over Paris on Aug. 20th, and it was believed that the tower

had been struck; but the following morning it appeared to be little the worse, the *paratonnerres* being slightly bent. The people on the platforms felt no shock. In November, after the closing of the French Exhibition, it was stated that the receipts at the Tower had been 6,500,000 fr. It was closed Dec. 1st.

Eight Hours Question. This, has incidentally been much discussed during the year, and the leaders of the Socialistic section of the working classes have lost no opportunity of forcing it into the arena of public discussion and practical politics. As the subject promises to form a part of the advanced Radical programme, it will be advisable to give the latest form it has assumed. The Fabian Society has made a practical attempt to define the question by drafting a Bill in the form of an amendment to the Factory and Workshops Act of '78. The draft is not for a universal eight hours bill, but its opening clause gives an eight hours day as the general normal working-day in the absence of special agreement to the contrary. It would provide that no person employed under the Crown in the United Kingdom or in any department of the public service other than military or naval, or by any municipal or other public administrative authority, shall, except in cases of special emergency to be notified by the Secretary of State in the *Gazette*, be employed for a longer period than eight hours in any one day, nor for more than forty-eight hours in any one week. For railway servants employed wholly or mainly to work railway signals or points, it would limit continuous employment to eight hours, and provide that no person employed as engine-driver, fireman, guard, or in shunting, should work for more than twelve hours continuously, nor for more than forty-eight hours in any one week. It is proposed that contravention of this should render railway managers liable to a fine of £100. The eight hours per day and forty-eight per week would be compulsory for miners, and a breach would carry with it a similar fine to the above. The draft measure contains option clauses, providing that where it is proved that a majority of persons employed in any one trade are in favour of working not more than a maximum of sixty hours a week they shall be allowed to consult their wishes. This option would be extended to all monopolies such as docks, harbours, tramways, markets, gas and water works, etc. All new enterprises under parliamentary powers, and working by local or private Acts, would be prevented from working any person for more than forty-eight hours per week. This is an outline of the latest attempt to give definite form to the demand for the statutory restriction of the hours of adult labour in this country to eight. The subject has only been before the working classes during the last two or three years, and opinion is much divided upon it. It was first prominently discussed at the Swansea Trades Union Congress in '87; in October '88 there was a demonstration in favour of an eight hours day in Birmingham; and early in '89 there was a great deal of discussion in the press of the North of England, where the movement found much favour among the miners. A deputation of workmen of Newcastle-on-Tyne had an interview with Mr. John Morley, M.P., on the question, when the right hon. gentleman announced his opposition to legislative interference with the hours of labour in the direction indicated. Following upon the Swansea

Trades Union Congress an attempt was made to test the opinion of Trades Unionists upon the question; and at the next Congress, at Bradford in '88, the Parliamentary committee reported that only a small proportion of the unions had replied to questions put to them. Taking the societies which had voted by members, it was found that 3,926 members had voted in favour of an eight hours agitation being undertaken, and 8,194 had voted against it. There was thus a large majority against an agitation; but this view was modified by the voting upon other questions. To the question "Are you in favour of an eight hours working day or forty-eight hours per week?" 22,720 voted "Yes" and 4097 "No." To the question "Are you in favour of Parliament enforcing an eight hours day or a Saturday holiday by law?" 17,267 voted in favour and 3819 against. The last question was, "Are you in favour of obtaining either of these privileges by the free and united efforts of the organised trades of the kingdom?" 17,267 voted in favour and 3819 against. Thus these figures do not give a clear idea of working-class opinion. The Parliamentary Committee, however, claimed that the result was that 24,351 votes were in favour of an eight hours day and 7,304 against; while there were 17,267 in favour of obtaining it by legislative enactment and 7,395 by combination. Taking the collective opinion of Societies, ten voted in favour of an eight hours bill, and eleven against; but the membership of the latter Societies was said to be more than two to one greater than that of the former. The result of the voting was considered to be unsatisfactory and confusing, so that the Parliamentary Committee were instructed to take another vote upon these specific questions: (1) "Are you in favour of an eight hours working day?" and (2) "Are you in favour of it being obtained by Act of Parliament?" Only those who answered the first question in the affirmative were to be allowed to vote upon the second. The vote was taken accordingly; and at the last Trades Union Congress (Dundee, Sept. 4th), the report of the Parliamentary Committee showed that only 33 societies, representing a total membership of 169,540, had made returns. This, the report stated, was only a comparatively small proportion of the trade unionists in the kingdom. There were 39,629 votes in favour of an eight hours working day and 62,883 against. On the next point only those had a vote who were in favour of an eight hours day. For having the eight hours day obtained by Act of Parliament there voted 28,489, and 12,274 against; and in favour of it being obtained by the action of the organised trades the number of votes recorded was 102,512, and the majority against an eight hours day was 23,254. If the number who voted against an eight hours working day were added to the vote against parliamentary interference, they had a majority of 46,668 opposed to parliamentary interference with the hours of labour. A resolution was put to the Congress by a delegate proposing as a basis of legislation that "the maximum working day for all industrial trades be eight hours," but after a debate an amendment in the direct negative was carried by 88 votes to 63. The Socialistic section impeached the accuracy of the returns, and they claim that the Trades Union investigation has been conducted in a purposely misleading way, and with the

object of prejudicing the minds of Trades Unionists upon the subject. During the labour agitation following the Dock Strike (see STRIKES), a statutory eight hours day was held out to the men as the ultimate goal of the movement for shorter hours. On the Continent an eight hours day is regarded as the chief item in the advanced labour programme, various workmen's organisations in France, Germany, Belgium, Spain, Holland, Denmark, and Sweden having declared in its favour. In America the labour organisations have decided to demand an eight hours day on May 1st, '90, and there the subject is widely discussed. The advocates of the movement in this country apparently confine their objects at present to the establishment of the principle of an eight hours day in all Government establishments, municipalities, chartered companies, and all concerns deriving powers of working from the Act of Parliament; and they claim that when that principle is laid down by the legislature a universal eight hours day in all trades will follow as a matter of course by mutual arrangement between private employers and employed. Their argument is that an eight hours day would absorb all the unemployed, and add to the productive power of the country; and they point to the success of the ten hours and the nine hours movements as supporting their contention that a reduction in the hours of labour not only means added production, but diminished cost of production, and also improvement in the material condition of the workers. The advocates of a statutory eight hours day chiefly belong to the Socialist school of political thought; and their teaching upon this matter is in direct opposition to the principle of voluntary combination, upon which Trades Unionists rely.

Eisteddfod. The name of an annual bardic congress in Wales, having for its objects the preservation of the music and the general literature of the Principality, the maintenance of the Welsh language and ancient national customs, and the cultivation of a spirit of patriotism among the people. Its origin is lost in antiquity, but it is certain that three such congresses were held in the reign of Edward III., one of them being under the patronage of Earl Mortimer. (For history of E. see ed. '88.) On Oct. 23rd, 1566, Queen Elizabeth issued a "letter of commission," calling another Eisteddfod at Caerwys for May 26th, 1568. This royal letter is dated from Chester. Fifty-five musical and bardic degrees were conferred at this meeting, entitling their possessors to live by the wandering minstrel profession. So far as we know, the next Eisteddfod which was held was also at Caerwys, in 1798, under the patronage of the Society of "Gwyneddigion," or natives of North Wales, a society established in London, which has since developed into the *Gymreaddigion* (Aborigines) Society. The Society has established the Eisteddfod as a living and working institution. Frequent meetings were held after this date. The meeting for 1887 was held in the Royal Albert Hall, and was graced by the presence of the Prince and Princess of Wales, with their daughters. A preliminary Gorsedd (this word means throne, but in an Eisteddfodic sense it signifies the four-and-twenty stones of the Druidic circle, whence a year and a day beforehand the Eisteddfod is proclaimed "in the face of the sun, the eye of light," and where bardic and musical degrees

are conferred), is held at the place selected, where a year and a day's notice of the event is given. The Eisteddfod was held in '88 at Wrexham, when Mr. Gladstone attended, and delivered a speech on the power of poetry and song. The '89 meeting was held at Brecon, Aug. 27th, when the usual addresses and contests in song and speech were gone through, and the enthusiasm of the huge audience was raised to its highest pitch by the singing of *Mdme. Adelina Patti*, who graciously gave her services.

Ekwes. An English newspaper corruption of *Etohowe* (pron. et-show'e), the political centre of British Zululand (*q.v.*).

Election, Law on, in '89. A question was raised before Mr. Justice Stirling (Chancery Division, April 16th), as to whether occupiers who do not pay rates are entitled to vote upon the question of the adoption of the Free Libraries Act. It was decided that, as under the Poor Rate Act of '69 the payment of rates by occupier or owner is equivalent, occupiers are entitled to vote. The point arose in connection with the adoption of the Free Libraries Act by the borough of Croydon.

Election of a Member of Parliament. Under the provisions of the Ballot Act, the returning officer is required, in the case of a county election within two days after the day on which he receives the writ, and in the case of a borough election on the day on which he receives the writ or the following day, to give notice of election. The day of nomination is to be fixed as follows: in the case of an election for a county or district borough, not later than the ninth day after the day on which he receives the writ, with an interval of not less than three clear days between the day on which he gives the notice and the day of nomination; and in the case of an election for any borough other than a district borough, not later than the fourth day after the day on which he receives the writ, with an interval of not less than two clear days between the day on which he gives the notice and the day of nomination. The candidate is nominated in writing, subscribed by two registered electors as proposer and seconder, and by eight other electors, who must also be registered in the same constituency. If at the expiration of one hour after the time appointed for the election not more candidates stand nominated than there are vacancies to be filled up, the returning officer is to forthwith declare the candidate nominated to be elected; but if at the end of one hour more candidates stand nominated than there are seats to be filled up, the returning officer is to adjourn the election and take a poll. The poll is to take place on such day as the returning officer may appoint, not being, in the case of an election for a county or district borough, less than two or more than six clear days, and not being, in the case of an election for a borough other than a district borough, more than three clear days after the day fixed for the nomination. Sundays, Christmas Day, Good Friday, and any day set apart for a public fast or thanksgiving, are not counted. The following calendar, which will probably make the matter quite clear, shows the time for nomination and poll in boroughs and counties, assuming that the writ has been received by

the returning officer on the 1st of any given month:—

| <i>Day of Month.</i> | <i>County.</i> |
|----------------------|---|
| 1 | Receipt of writ. |
| 2 | |
| 3 | Last possible day for notice of election. |
| 4 | |
| 5 | First possible day for nomination. |
| 6 | |
| 7 | First possible day for poll. |
| 8 | |
| 9 | |
| 10 | Last possible day for nomination. |
| 11 | |
| 12 | |
| 13 | |
| 14 | |
| 15 | |
| 16 | |
| 17 | Last possible day for poll. |
| <i>Borough.</i> | |
| 1 | Receipt of writ. |
| | Last possible day for notice of election. |
| | First possible day for nomination. |
| | Last possible day for nomination. |
| | First possible day for poll. |
| 9 | Last possible day for poll. |

In using either table, regard must be had to the intimation given above, that *Sundays, Christmas Day, &c., do not count.* Thus, if an election in a county be fixed for the latest possible day, the poll would, on account of the Sundays, be at least two days later, or on the nineteenth, and in some cases three days later, or on the twentieth day. There is a special allowance of time in the case of the constituency of Orkney and Shetland. Where an equality of votes is found to exist between any candidates at an election for a county or borough, and the addition of a vote would entitle any of such candidates to be declared elected, the returning officer, if a registered elector of such county or borough, may give such additional vote, but shall not in any other case be entitled to vote at an election for which he is returning officer. But the returning officer may, if qualified, decline to give the casting vote; and if he be not qualified, or if he decline to act, the names of the two candidates are endorsed on the writ and a double return made. Neither candidate returned may vote until the right to the seat has been determined. A petition may be presented by a person qualified to vote, a person claiming to have the right to be returned, and by a person alleging himself to have been the candidate; the petition may be presented on various grounds, and it may allege bribery and corruption. Thus, where there has been an equality of votes, and the casting vote has been given by the returning officer, or where a double return has been made, the seat may be claimed on petition. The voting papers would then be scrutinised by the Court, and some deductions would probably be made on the ground of spoiled papers, disqualification of the voter, &c., which would reduce one party's number more than it would

the figure of the other. All election petitions are tried by two judges, who determine and report to the Speaker whether the member petitioned against, or what other person, if any, was duly elected, or whether the election was void; and when corrupt practices have been alleged, the judges report also whether any such practices have been committed, and, if so, whether it was with the knowledge or consent of any candidate, and the nature thereof; the names of the persons proved to have been guilty of such corrupt practices; and whether during the election there was an extensive prevalence of corrupt practices. When such a report as the latter is made to the House, it is usual to appoint a *Royal Commission*, on whose report, if it disclose a serious state of things, the writs for a fresh election may be suspended, so that the constituency remains temporarily unrepresented. Any member returned for two or more places in any part of the United Kingdom is to make his selection for which of the places he will serve within one week after it shall appear that there is no question upon the return for that place. See also *WRITS, CORRUPT PRACTICES, PARLIAMENT, HOUSE OF COMMONS, etc.*

Electric Lighting. The year '89 witnessed an enormous development of electric lighting enterprise, especially in London. Various causes had combined to delay schemes for the lighting of the Metropolis. In the first place the experiments that had been made in street lighting by the new illuminant did not prove satisfactory enough to create any strong desire for the adoption of the light; and in the second place the terms of the earlier Acts dealing with the subject were such as to make electric lighting companies take a second thought before embarking in extensive installations under the provisional orders which some of them obtained. The *Electric Lighting Amendment Act of '88* gave a different complexion to matters, and as soon as it came into force, steps were taken which will result ere long in a great part of the Metropolis being lighted by electricity. Company after company was formed to deal with certain areas, and at the present moment the aggregate capital of these companies amounts to something like three millions sterling. About five years ago Sir *Coutts Lindsay* introduced the electric light at the *Grosvenor Gallery* (q.v.), and having laid down plant more than sufficient for his own requirements, he undertook to supply some of his neighbours with light. The locality was a favourable one for the extension of the new illuminant, and Sir *Coutts* was induced by the demands of proprietors of shops and other establishments in the neighbourhood to increase from time to time his installation until it became the largest in the Metropolis. Under the *Electric Lighting Amendment Act* the *Grosvenor Gallery* electric lighting concern was remodelled and assumed greatly increased dimensions as the *London Electric Supply Corporation*, with a capital of a million and a half sterling. Having secured a provisional order assigning the lighting of certain areas to them, the Company began operations on a bold plan. They determined to use high tension electricity, and to distribute it all from one station, a site for which was acquired at Deptford. The station is a very large building, and it is being filled with powerful machinery. Four steam-engines of 10,000 horse-power each

have been erected as a beginning, and space is provided for eight more engines of like power—the grand aggregate being 120,000 horse-power. The dynamos used are of gigantic dimensions, and the four first brought into operation have an aggregate capacity of 200,000 ten-candle-power lamps. Mr. *Ferranti*, the Company's chief engineer, has designed all the works, and the mains for the distribution of the electric currents are his special invention. The Company has obtained powers for the lighting of the following areas, and it is estimated that when they have fully developed their business they will have no fewer than two million lamps in their circuits: The part of *St. Martin's-in-the-Fields* lying to the south of the Strand, and west of *St. Martin's Lane*; the portion of *St. Margaret and St. John, Westminster*, lying to the north of *Victoria Street*, excepting that portion of *St. Margaret's* lying to the west of *St. George, Hanover Square*; *St. James, Westminster*; *St. George, Hanover Square*; *Chelsea*; the *Greenwich district*, *St. Mary, Rotherhithe*; *St. Mary, Bermondsey*; the district of *St. Olave*; the district of *St. Saviour, Christchurch*; and that portion of *St. Mary, Lambeth*, lying to the north of *Westminster Bridge Road*. The *Metropolitan Electric Supply Association*, with a capital of £500,000, comes next in rank to the "London," but their mode of operation is different. Instead of having only one central station they have, to begin with, six stations, and they have refrained from committing themselves to any particular type of machinery. Their mains are divided into circuits for the supply of one thousand lamps each, and extraordinary precautions have been taken to provide against the possibility of a breakdown. Not only has each station a reserve of power, but all the stations are connected by trunk mains, so that should one or more get out of order the others can be drawn upon to maintain the needful current. The six stations are designed to supply an aggregate of 400,000 lights, in the following areas:—*St. Giles-in-the-Fields*, *St. George, Bloomsbury*; *St. Andrew, Holborn-above-Bars*; *St. George the Martyr, St. Sepulchre*; *Saffron Hill*; *Hatton Garden*; *Ely Rents and Ely Place*; the *Liberty of Glasshouse Yard*; *St. Anne, Soho*; *St. Paul, Covent Garden*; *St. John the Baptist*; *Savoy or precinct of Savoy*; *St. Mary-le-Strand*; *St. Clement Danes* and the *Liberty of the Rolls*, together with the extra-parochial places known as the *Charterhouse*, *Gray's Inn*, *Lincoln's Inn*, and *Furnival's Inn*; *St. Martin's-in-the-Fields*, except that portion lying west of *St. Martin's Lane* and north of *Trafalgar Square*. The lighting of the district of London known as "Clubland" has been undertaken by the *St. James's and Pall Mall Electric Lighting Company*. The area is bounded on the south by *Pall Mall*, on the north by *Piccadilly*, on the west by *Regent Street* and on the east by *St. James's Street*. The Company was organised by Messrs. *Latimer Clark, Muirhead & Co.*, and the chief generating station is in *Mason's Yard*, behind *Duke Street*. Another station is being established in the area, from which it is proposed to supply electricity for motive purposes. Several of the more important clubs have already been supplied with the new illuminant. The *Westminster Electric Supply Corporation* has been formed to deal with the districts of *St. Margaret's* and *St. John's, Westminster*; the *Chelsea Electrical Supply Company* is operating

in the district whence it takes its name; the **Notting Hill Electric Lighting Company** covers parts of Kensington as well as Notting Hill; the **House to House Electric Supply Company** is working chiefly in Kensington; the **Palea Electric Lighting Company** is supplying Holborn and a portion of the Strand, and contracts for lighting the City have been entered into with the Metropolitan, the London, and the Brush companies respectively. In addition to all the enterprises enumerated there are a considerable number of private installations throughout the Metropolis. In most of the larger towns it has been introduced to a greater or less extent, and numerous schemes for permanent town lighting are under consideration, the Board of Trade having received no fewer than three hundred applications for provisional orders. In the lighting of ships, railway trains, and mines, also, electricity is coming into extended use. Consult "The Law relating to Electric

fund, out of which all expenses are to be defrayed, and any deficiency be met out of the rates. The school board is to serve on the rating authority its precept requiring payment of a sum therein specified, which the rating authority must pay to the school board treasurer. Should the rating authority make default, all its rating powers may be exercised by officers appointed for that purpose by the school board. No religious catechism or formula distinctive of any denomination is to be taught in a board school, nor is a child to receive any religious instruction contrary to the wish of his parent, nor is a Government Inspector to examine any child in any religious subject. For other provisions see text of Acts. The Acts are supplemented by the Code annually issued by the Education Department, which is laid upon the tables of both Houses of Parliament, and, if not objected to within a certain time, has the force of law. The Acts are further supplemented by the *bye-laws* made by the several school authorities. The Report of the **Royal Commission** was issued in '88, and at once led to a revival of the dormant discussion as to voluntary schools receiving aid from the rates. The controversy, which for a time engaged public attention, soon died away on the announcement by the Vice-President of the Council in the House of Commons that it was not the present intention of the Government to act on the Majority Report of the Commissioners.

Ely, Rt. Rev. Lord Alwyne Compton, Lord Bishop of. The diocese was founded 1109. The present income is £5,500. His lordship, the 59th bishop in order of succession, son of the late Marquis of Northampton, and brother to the present Marquis, was born July 18th, 1825. He was educated at Trinity College, Cambridge, where he graduated as 14th Wrangler (1848), and proceeded D.D. (1879). Ordained (1850). Formerly his lordship was rector of Castle Ashby, Northamptonshire (1852-79), Hon. Canon of Peterborough (1856-79), Rural Dean of Preston and Archdeacon of Oakham (1874), Dean of Worcester and High Almoner to Her Majesty (1879), Prolocutor of the Lower House of Convocation of Province of Canterbury (1880). Consecrated Lord Bishop of Ely (1886), is Visitor of the Colleges of St. John, Cambridge, and St. Peter, Cambridge, and of St. Mary, Cambridge.

Rev. Robert Anderson, vicar of the now famous Trinity Church, Brighton.

Ember Days. The derivation of the term is doubtful, but it probably has no connection with penitential "ashes" or "embers." In the early Christian centuries a week in each of the four seasons was set apart for fasting and prayer on behalf of the fruits of the ground. The **English Church** keeps the Wednesday, Friday, and Saturday in these weeks as days of abstinence and prayer for a blessing on those about to be ordained ministers of the Church. These days are taken after the First Sunday in Lent, Whit Sunday, September 14th, and December 14th.

Emigrants' Information Office. This office has been established under the supervision of the Colonial Office for the purpose of supplying intended emigrants with useful and trustworthy information respecting the British Colonies. The classes chiefly required in the Colonies at present are farm labourers and others connected with the land, female

Acts contain all the statute law regarding the public provision of elementary education in England. The administrative area for the purpose of elementary education is either the borough or the parish. Any area may have a school board if those who would have votes for a school board apply to the Education Department; and any area must have one if the school accommodation already provided is not sufficient. The board is elected outside the Metropolis by the burgesses of the borough or the ratepayers of the parish; within the Metropolis by those who would be entitled to vote for common councilmen in the City of London, or for vestrymen in other districts. Each voter has as many votes as there are members to be elected, and may give them all to one candidate. Outside the Metropolis the school board must number not less than five, nor more than fifteen. Members hold office for three years. In any area in which there is no school board there must be a school attendance committee, of not more than twelve nor less than six, annually appointed out of their own number, by the town council if it be a borough, or by the guardians of the union if it be a parish. The school board, or school attendance committee, must see that every child of school age receives sufficient elementary instruction in reading, writing, and arithmetic, and that

of proficiency (unless such child comes under the provisions of the Factory and Workshops Act, 1878). The school board, moreover, is to provide for any deficiency of school accommodation, and for that purpose has powers of compulsory purchase. It may establish a free school anywhere within its district, having first satisfied the Education Department that such a school is needed. It may contribute to, or, with the consent of the Education Department, establish an industrial school. It may take over, upon certain conditions, any elementary school already established in its district. A parent who is unable to pay the school fees may apply to the guardians of the poor, and if he prove his inability they are to pay the fees without his thereby incurring any disqualification. All fees, parliamentary grants, sums borrowed, etc., must be carried to the school

domestic servants, and farmers with a little capital. Hardly any assisted passages are now granted, Queensland and the Cape and Natal giving the most encouragement. The importance of the subject is shown by the fact that the exodus from Great Britain has averaged during the last decade about 200,000 persons annually, of whom about three-fourths now go to the United States. (See table, *infra*.) Printed particulars, which are revised quarterly, are exhibited at every post-office; and fuller details can be obtained on application by post or personally to the Chief Clerk, at 31, Broadway, Westminster, S.W. See also SELF-HELP EMIGRATION SOCIETY.

Emigration and Immigration. The official statistics issued during '89 give tables relating to emigration and immigration from and into the United Kingdom during the year '88.

Emigration '86, '87, and '88.

| | Total, including Foreigners. | Emigrants of British and Irish Origin only. |
|-------------------------|------------------------------------|---|
| No. of emigrants in '88 | 398,494 | 279,925 |
| " " '87 | 396,494 | 281,487 |
| " " '86 | 330,801 | 232,900 |
| Increase in '87 | 65,693 | 48,587 |
| " " '86 | 66,416 | 48,256 |

It will be noticed that while there is a slight increase in the total emigration, foreigners as well as British and Irish included, there is a slight decrease in the number of emigrants of British and Irish origin only—viz., from 281,487 in '87 to 279,925 in '88.

Immigration in '86, '87, '88.

| | Total, including Foreigners. | Immigrants of British and Irish Origin only. |
|--------------------------|------------------------------------|--|
| No. of immigrants in '89 | 128,879 | 94,153 |
| " " '87 | 119,013 | 85,475 |
| " " '86 | 108,879 | 80,018 |
| Increase in '89 | 9866 | 8658 |
| Increase in '87 | 10,134 | 5457 |

Excess of Emigrants.

| | Total Number of Pas- sengers. | Passengers of British and Irish Origin only. |
|--------------------------------|--|--|
| No. of Emigrants in '88 | 398,494 | 281,487 |
| " Immigrants " | 128,879 | 94,133 |
| Excess of Emigrants '88 | 269,615 | 185,805 |
| Corresponding excess in '87 | 277,481 | 196,012 |
| Corresponding excess in '86 | 221,922 | 152,882 |

The total surplus emigration (*i.e.* including foreigners) thus decreased during '88, as did also the net emigration of persons of British and Irish origin only. There was in '88 a continued increase in the number of emigrants going to British North America, and a decrease in the number going to the Australasian Colonies.

Emigration and Immigration, Committee on. See SEASION, sect. 128.

Emin Pasha (Eduard Schnitzler) was b. March 28th, 1840, in Oppeln, Silesia. In '42 his family moved to Neisse, where Emin's mother and sister still reside. He was educated at the Neisse Gymnasium, and at the medical schools of Breslau and Berlin, where he graduated in '64. He subsequently acquired the mastery of several European and Asiatic languages. About '65 he set out for Turkey, where he fell in with Hakkî Pasha, whom he accompanied on official journeys through Armenia, Syria, and Arabia. In '68 he took up his residence at Scutari, and secured the close friendship of Ismail, the Governor. On the disgrace of the latter, Emin accompanied him in his exile to Trebizond. Ismail was restored to favour, and Emin shared his good fortune. It was probably under the influence of Ismail, or his widow, whom Emin married, that he became a convert from Judaism to Mohammedanism. In '75 he returned home, only to stay, however, for a few months; for in '76 we find him acting as surgeon in the Egyptian army as Dr. Emin Effendi, and in that capacity he was ordered to Khartoum. In '78, when General Gordon was Governor of the Soudan, Emin was appointed Governor of the Equatorial Provinces of Egypt. In '86 he appealed for help. In consequence of this appeal a relief expedition, under Stanley, was sent out in Jan. '87 (*vide infra*). Letters published on Nov. 26th, '88, gave the information that Mr. Stanley and Emin had safely reached German territory at Mpwapwa. See STANLEY, and consult "Emin Pasha in Central Africa," "Emin Pasha," by Rev. H. W. Little, and an article in *Scribner* for Nov. '89, "Where Emin is."

Emin Pasha Relief Expedition. Early in '87 an expedition was formed to relieve Emin Pasha (*q.v.*), who was cut off from communication with the civilised world after the Mahdist rising, but had kept together a garrison sufficient to hold his province. His chief station was Wadelai, on Lake Albert Nyanza, where he has two steamers on the lake. The command of the relief expedition was given to Mr. H. M. Stanley by the Egyptian government, and his plans have been sanctioned and aided by the Administration of the Congo Free State. Taking with him Major E. Barttelot and other European officers, with a force of several hundred Zanzibari and Soudanese soldiers and carriers, Stanley made his way up the Congo, and then up its great tributary the Aruwimi. Some 150 miles up this last river he established a camp, which he left in charge of Major Barttelot, who has since been killed. Thence Stanley and the main body set forth to march overland to the Albert Nyanza. Meanwhile Tippoo Tib, an influential Arab trader whom Stanley had attached to the expedition, was sent with a strong force up the Congo to Stanley Falls. In November '88 an expedition, conducted by Lieut. Wissmann, proceeded to the relief of the distinguished traveller. In a telegram received by Sir William

Mackinnon, chairman of the Emin Relief Committee, Nov. 21st, from Mr. H. M. Stanley, he stated that himself and all the party had arrived at Mpwapwa on the 10th of the month. Mr. Stanley's letter, dated Aug. 5th, '89, gave a lengthy account of his journeyings and final meeting with Emin, to whom he sent a pressing invitation to join him, with his followers, at Kavallis; and on Feb. 13th, '89, Emin arrived at this camp, to the great satisfaction of the Expedition. See STANLEY.

Employers' Liability Act, '80. Before the passing of this Act, a master was not liable to his servant for injury caused by the negligence of a fellow-servant. The Act provides that where injury has been caused to a workman by reason of any defect in the works, machinery, etc., or of the negligence of any person in his employer's service intrusted with superintendence or with authority over the injured man, or of any act or omission done or made in obedience to the orders or byelaws of the employer, or of the negligence of any person in charge of railway signals, points, etc.; the injured workman, or if the injury results in death, his personal representatives, shall have the same right of compensation against the employer as if he had not been in the employer's service. Certain exceptions are made, to protect an employer morally innocent of the injury. An action under the Act must be brought within six months from the time of the accident, or twelve months from the time of death, as the case may be, and notice that injury has been sustained must be given within six weeks. The compensation recoverable is not to exceed the equivalent of three years' earnings of a person in the same employment and district. Any money payable by the employer to the workman as a penalty under any other Act of Parliament is to be deducted from the compensation recovered under this Act. Actions under the Act are to be brought in the county court, but may be removed into a superior court in the same manner as other actions. The Act came into operation on Jan. 1st, 1880.

Endowed Schools Acts. For concise report of a Select Committee of the House of Commons, appointed in '86 to inquire into the operation of the Endowed Schools Act, '69, and the amending Acts, and to consider and report how far it might be expedient to amend the powers exercised under them by the Charity Commissioner. See ed. '88.

Engineering. Details of some of the most important of the great industrial engineering schemes either in progress or planned out in different parts of the world at the present time are given under their respective alphabetical headings.

English Church Union. This was formed in 1859, after the Protestant riots at St. George's-in-the-East, for the purpose of uniting clergy and laity "in defence of the doctrine and discipline of the Church of England, and of the rights and liberties of her faithful children." Viscount Halifax is the President, and the vice-presidents include 25 Bishops and Archdeacons. Denison, the Rev. Canon Carter, the Earl of Limerick, the Earl of Glasgow, and Mr. Shaw Stewart. Amongst the members of the Council are the Deans of Manchester, Durham, Rochester, and Bangor, Canons Body, Churton, Cooke, Perry, Hockin, Gray, Courtenay, Chapman, Bodington,

and Malcolm MacColl, the lay members including the Duke of Newcastle, Lord Sackville Cecil, Lord Edward Churchill, Sir Charles Turner, Sir Theodore Hope, and Sir Walter Phillimore. Those only who are communicants of the Church of England, or of churches in communion with her, can be elected and enrolled. The Union comprises 25 bishops, 3,600 other clergy, and 25,500 laity. Its main object is to defend and maintain unimpaired the doctrine, discipline, and ritual of the Church of England against Erastianism, Rationalism, and Puritanism. Of late years the mere litigating business of the Union has materially decreased, owing to the "policy of peace" inaugurated by the late Archbishop of Canterbury, and supported by the late Bishop of London, which has influenced the leaders of the Evangelical party against their previous policy of ritual prosecutions. Another reason for this decline is that the Union has refused to recognise the jurisdiction of Lord Penzance in spiritual matters, and clergymen who have been prosecuted by agents of the Church Association (*q.v.*) since the passing of the Public Worship Regulation Act have mostly neither appeared in person nor been represented by counsel, but have allowed judgment to go against them by default. In 1877 a Sustentation Fund was created to supply the loss of income incurred by those who had been proceeded against; and amongst those to whom grants have been made are the Revs. T. P. Dale, R. W. Enraght, S. F. Green, the late A. H. Mackonochie, Arthur Tooth, J. Baghot de la Bere, J. Bell Cox, etc. The President and Council emphatically repudiate any political bias or party character in the organisation. Evening communions are condemned by the English Church Union, but the use of vestments and other ritual adjuncts is encouraged, as being, in their view, sanctioned by the Ornaments Rubric of the Prayer Book. *Organ, The Church Union Gazette.* Offices, 35, Wellington St., Strand. Sec., Col. John Brathwaite Hardy.

English Harbour. A West Indian naval station. See ANTIGUA.

English Political Parties. It may be assumed that, under the universal household franchise now established by law, the various political parties in the country find their fair measure of representation in the popular branch of the Legislature. Upon this premise an analysis of the composition of the House of Commons will afford the best test of the strength of the respective schools of political thought throughout the three kingdoms. The present House of Commons was elected in July-Aug. '86, and consisted of 670 members, of whom 393 were Unionists and 277 Home Rulers. The leading principle of the first-named party is the maintenance of the union of the parliaments of Great Britain and Ireland as settled by the Act of Union of 1801. The Home Rulers, on the contrary, advocate the abrogation of the Act of Union and the restoration to Ireland of a separate parliament. This main division of parties dates only from the summer of '86, when Mr. Gladstone, up to that time the acknowledged head of the whole Liberal party, declared himself in favour of Irish Home Rule, and united his forces, or so many of them as he could carry with him in his new departure, with those of the Irish Nationalists led by Mr. Parnell. A considerable minority of Liberals, resenting Mr. Gladstone's sudden change of front, declined to continue their

support, and combined with the Conservatives to form that Unionist majority which succeeded in defeating the Home Rule Bill, first in the House of Commons, and afterwards and more decidedly at the polling-booths. The anti-Home Rule Liberals, although cordially working with and supporting the Conservative Government which necessarily resulted from the successful combination, retained their independence, and formed themselves, indeed, into a separate party, with a separate organisation, separate leaders, and separate whips. They called themselves **Liberal Unionists**, but were described by the Gladstonians as **Dissentient Liberals**. Their principal leaders were Lord Hartington, Mr. Goschen, and Mr. Chamberlain, the former two representing those who had belonged to the Whig section, and the latter those who had been included in the Radical section of the old Liberal party. The **Liberal Unionists**, or **Dissentient Liberals**, numbered 77, and the **Conservatives** 316, thus bringing up the total of Unionists to 393, and giving them a majority of 116 over their opponents. As the Conservatives did not of themselves form a majority of the whole House, the Government could only exist by reason of the support of the **Liberal Unionists**. The 277 **Home Rulers** were made up of 192 **English, Welsh, and Scotch Liberals and Radicals** (led by Mr. Gladstone, with Sir W. Harcourt and Mr. John Morley as his principal lieutenants), and (including the seat subsequently gained on petition at Londonderry city) 86 **Irish Nationalists**, or **Parnellites**—so named after their leader, Mr. Charles Stuart Parnell. Of these 86 sit for Irish constituencies, and one, Mr. F. P. O'Connor, for the Scotland division of Liverpool. By their opponents the **Home Rulers** are often termed **Separatists**, although they warmly repudiate the imputation that the measures they advocate involve the separation of the two countries. In the **Home Rule** total are also comprehended a number of members who for certain subsidiary purposes form separate parties—such as the **Labour representatives**, the advocates of **Church Disestablishment**, and some five or six gentlemen returned by Scotch constituencies specially to watch over the interests of the **Highland Crofters**. Strange to say, the **Social Democrats**, who have been making some stir in the Metropolis and elsewhere, have not a single representative in Parliament. The **Conservatives**, or, as they are sometimes called, **Tories** or **Constitutionalists**, form a more homogeneous party than their Liberal opponents, having fewer and less conspicuous internal divisions. Their professed policy is the maintenance of the Empire at all cost, the preservation of the Constitution as represented by the three estates of Crown, Lords, and Commons, the union of Church and State, and the upholding of the rights of property. Subject to these principles, the **Conservatives** have shown themselves to be as well disposed towards useful legislation and the reform of abuses as any other party in the State. The **Gladstonian Home Rulers** base their claim to public support on the superiority of their legislation, the greater purity of their administration, and their devotion to the principles of peace, retrenchment, and reform. They are divided in opinion as to the maintenance of the State Church and the House of Lords. The sole programme of the **Parnellite** party consists of the demand for an Irish Parliament.

They treat every other political question as of subordinate importance. Since the last General Election the Unionist strength in the Commons has somewhat diminished. The **Liberal Unionists** have sustained at successive bye-elections a net loss of three seats, and the **Conservatives** a net loss of eight seats, while Sir T. Grove, Mr. Hingley, and Sir H. Vivian, formerly **Liberal Unionists**, now usually vote against the Government on questions of Irish policy. The present relative strength of parties is (Nov. 20th, '89), allowing for these changes, about as follows:—**Liberal Unionists** 70, **Conservatives** 308—total Unionist strength 378; **Gladstonians** 206, **Parnellites** 86—total 292; **Unionist majority** 86. (For further details see summary at end of Commons, House of, and Pollings at Bye-Elections.) Despite their slight falling off in numbers, the **Liberal Unionists** are still masters of the situation. The party as a body has consistently voted with the Government on all vital questions, and early in '88 Mr. Parnell was forced to recognise that on any matter affecting the Union the **Home Rulers** could not hope to break the ranks of their opponents in the House of Commons as then constituted. Attempts to compose the difference between the **Liberal Unionists** and **Gladstonians** have been made, notably at the Round Table Conference (*q.v.* ed. '88), but without success. Lord E. Churchill's resignation placed the Government in a somewhat critical position, but the acceptance by Mr. Goschen, with the sanction of Lord Hartington, of the Chancellorship of the Exchequer, and the brilliant financial proposals which he has since laid before Parliament, have more than compensated for the defection of Lord Randolph. During the session of '89 the Radical wing of the Gladstonian section of the Opposition organised themselves for separate action when necessary, appointing their own whips, and acting as a rule under the leadership of Mr. Labouchere; and on more than one occasion, notably on the question of Royal Grants (see Session, sect. 47), voted quite independently, and indeed in downright opposition to Mr. Gladstone. Partly in consequence of their principles, but also in punning allusion to the name of one of their whips, this independent section of the Opposition have been styled "**Jacobins**."

Envoys and Plenipotentiaries. See **DIPLOMACY**.

Eras, The Five. These are the Greek (Olympiads); the Roman; the Christian; the Julian Period; and the Mohammedan Era.

Erzeroum. An important Turkish strategic centre in Armenia, which, since the annexation of Kars by Russia (1878), has become the principal frontier fortress and point of resistance to a Russian advance from the Caucasus to Constantinople. It is about 100 miles south-west of Trebizond, on the great commercial highway leading from that town over the plateau to the Persian frontier, and is a chief halting place for pilgrim caravans from Teheran to Mecca. The population is variously estimated at from 30,000 to 60,000, and as the administrative capital of a Turkish vilayet, covering 27,000 square miles, with population 675,000, it attracts a fair amount of trade. It has a Catholic bishop of the Armenian rite.

Esher, William Balfour Brett, 1st Baron

(creat. 1885); b. 1818. Educated at Westminster, and at Caius Coll., Camb. (B.A., senior opt., 1836, M.A. 1840). Called to the bar at Lincoln's Inn (1846), made Q.C. (1860); was Solicitor-General (1868), a justice of the Common Pleas (1868-75), a judge of the High Court of Justice, Common Pleas Div. (1875-6), and a Lord Justice of Appeal (1876-83), in which latter year he was appointed *Master of the Rolls*. Was M.P. for Helston (1866-68). His lordship presided at the trial of the London gas stokers for conspiracy some years ago. Since Lord E.'s appointment as Master of the Rolls, he has on more than one occasion held *conversazioni* at the Public Record Office, for the purpose of displaying its interesting treasures. Lord Esher wrote a letter to the *Times* (Aug. 17th, '89), favouring the creation of a Court of Criminal Appeal.

Esquimaux. A harbour and naval station on the south-east of Vancouver Island, about three miles from Victoria, capital of the province of British Columbia, in the Dominion of Canada. Since the opening of the Canadian Pacific Railway its importance has become evident, and it is now being fortified and provided with strong armaments and all the necessaries of a first-class naval arsenal. A large graving-dock has recently been constructed, and the place is connected by rail with the large coal mines at Nanaimo. Both the British and Canadian Governments have voted large sums for the creation of a *place d'armes*, and the latter is raising a permanent artillery force for its defence. See BRITISH COLUMBIA, and CANADA.

Essequibo. One of the three counties of British Guiana (*q.v.*).

Essex County Council for. See COUNTY COUNCILS.

Established Church. See CHURCH OF ENGLAND.

Eton and Harrow Cricket Match. See CRICKET.

Eton School. Founded 1440. Endowment exceeds £20,000 per annum. Pupils consist of King's scholars or "Collegers" (of whom there are 70, and who enter college between twelve and fourteen years of age), and of *Oppidans* or "Town-boys," who enter between ten and fourteen years of age. Exhibitions and scholarships to both Universities, ranging from £50 for four years downwards. *Motto*—*Floreat Etona Alumni* (some distinguished)—Horace Walpole; Bolingbroke; Porson; Hallam; Gray, the poet; Shelley; Wellington; Pitt; Canning; Fox; Lord North; Cheney, the late editor of the *Times*; Dean Milman; W. E. Gladstone; Dr. Pusey; Lord Idlesleigh; Rowland Hill; Lord Brabourne; Sir John Lubbock; Goldwin Smith; Lord Salisbury; A. J. Balfour; Lord Coleridge, Lord Justice Cotton, and Bishops of Chichester and Winchester. *Head Master*, Rev. Edmond Warre, D.D. A mission is supported by past and present Etonians at Hackney Wick. On May 18th, '88, the memorial stone of the Queen's Schools and Lower Chapel were laid by H.M. the Queen. Consult the *College Calendar*, and "History of Eton College, 1444-1814," by H. C. Maxwell.

Euphrates Valley Railway. See TURKISH RAILWAYS.

European Telegrams. See TELEGRAPHS.

Evangelical Alliance. The. Founded 1845-6, to enable Evangelical Christians of different denominations, and of all countries, to manifest their true unity in the essential doctrines of the Gospel, and in the defence of religious liberty. *International meetings* of the Alliance have been held in London, Paris, Berlin, Amsterdam, New York, Geneva, Basel, and Copenhagen, besides *Annual Conferences* in various towns in the United Kingdom, and great national Conferences in other countries where there are branches of the Alliance. A *Week of Universal Prayer* is observed in the early part of January each year throughout the whole world. During '89 several appeals have been made on behalf of persecuted Christians in Turkey, Spain, etc., with most successful results, and in some cases with release from imprisonment. *President*, Lord Polwarth. *Secs.*, Lt.-Gen. Field, C.B., and A. J. Arnold. *Office*, 7, Adam St., Strand, W.C.

Evans, John, hon. D.C.L. Oxford, and LL.D. Dublin, Treasurer and Vice-President R.S., F.S.A., F.G.S., etc., b. 1823. Author of several works on the ancient coins, implements, weapons, and ornaments of Great Britain and Ireland, and has contributed a variety of papers in the *Archæologia*, and in the *Numismatic Chronicle*, of which he is one of the editors. President of the Geological Society (1875-6), and of the Anthropological Institute (1878-9); Pres. Numismatic Society since 1873.

"Evening News and Post." A daily paper of Democratic and Conservative principles. It is an amalgamation (May '89) of the *Evening News* and the *Evening Post*. It gives the latest political, general, and financial intelligence of the hour, and pays special attention to labour problems. It is the exponent of the new and progressive Toryism. Sporting news is a prominent feature. Editor, Mr. W. E. Lawson. *Office*, 12, Whitefriars St., E.C.

"Evening Standard." See "STANDARD."

Exchequer, The, is said to be at least coeval with the Norman Conquest, and to have been from its earliest institution looked to as a check upon the Lord High Treasurer, and a protection for the king, as well as for the subjects, in the custody, payment, and issue of the public money. The chief financial officer, the Chancellor of the Exchequer, formerly sat in the Court of Exchequer above the barons. *Exchequer receipts*—i.e., the public revenues—are paid into the Bank of England, or the Bank of Ireland, to the account of the Exchequer, and form the Consolidated Fund. In '66 an Act was passed to consolidate the powers and duties of the Comptroller of the Exchequer and of the Commissioners for auditing the public accounts, to unite in one department the business hitherto conducted by the separate establishments under them, and to make other provisions for the more complete examination of the public accounts. Under this Act was founded the *Exchequer and Audit Department*, at the head of which is the official known as the Comptroller and Auditor General, but whose full title is Comptroller General of the Receipt and issue of H.M. Exchequer and Auditor General of Public Accounts. He cannot sit in Parliament, nor be removed from office except upon a joint address by the two Houses (present Comptroller and Auditor General, Sir Charles Lister Ryan, K.C.B.). He is advised daily of

all issues or transfers made from the Exchequer accounts; and when money has been granted by Parliament for the public services he, on receipt of a royal order under the sign manual countersigned by the Treasury, grants the necessary credits on the Consolidated Fund. He and the department under him also audit the accounts of all other departments, including, under recent legislation, the expenditure authorised by the Naval Defence Act, and the manufacturing and shipbuilding and other like accounts of the Army and Navy, and see that the expenditure of each is in accordance with the authorities received from the Treasury. See **TREASURY AND FINANCE**.

Exchequer and Audit Department. See **CIVIL SERVICE**.

Excise. See **FINANCE, NATIONAL**.

Execution by Electricity. Some attention has recently been given here to this method of capital punishment, through the Governor of the State of New York having sanctioned and signed a bill for its adoption. The new law is the outcome of the following recommendation of the Governor in '85:—"The present mode of executing criminals, by hanging, has come down to us from the dark ages, and it may well be questioned whether the science of the present day cannot provide means for taking the lives of such as are condemned to die in a less barbarous manner. I commend this suggestion to the consideration of the Legislature." In '86 a commission was appointed to report upon the existing system, with the result of recommending a change. The law came into operation in Jan. '89. The condemned man is placed in a portable hut; he stands upon a metallic plate connected with a battery, a second connection being made near to and over his head, so that when the circuit is closed an electric shock passes through the body. The effect of the electric discharge is an instantaneous extinction of life; but it must be said that this result is not in all cases a foregone conclusion.

Executor. It is the custom in making a will in personal estate to name an executor or executors. Immediately upon the testator's death the executor becomes entitled to all the testator's personal property. He is bound first of all to bury the deceased and prove his will, then to pay out of it any debts due by the testator; and then to distribute the property, so far as it will go, in accordance with the will. Should there be more than one executor, each can exercise all the powers of the office, except that all must join in bringing any action respecting the estate. The office continues to the survivors or survivor. Should the executor renounce, or die, before taking out probate, or not appear when cited to take probate, his rights of executorship cease entirely. But when the last surviving executor dies, then his executors are also executors of the original testator. If the executor is an infant, the Probate, Divorce, and Admiralty Division of the High Court will grant administration to his guardian or some other person who becomes administrator *durante minore aetate* (during the minority). An executor merely in virtue of his appointment is released

from any debts due from him to the testator, and may retain out of the assets any debt due from the testator to him in priority to all other debts of the same degree; but this provision is so guarded in equity as to be practically of no effect. Any person who takes upon himself to be executor without having been appointed, is said to be an executor *de son tort* ("of his own wrong"), and is not allowed to derive any benefit from the office. Should no executor be available, the Court will grant letters of administration *cum testamento annexo* (with the will annexed), as distinct from the ordinary letters of administration granted when a person dies without making a will.

Exeter, Rt. Rev. Edward Henry Bickersteth, Lord Bishop of. The see was founded in 1046, the earlier prelates taking the title of Bishops of Devonshire from the year 909. The present income is £4,200. His lordship, the 63rd bishop in succession, was b. 1825, and is the nephew of Lord Langdale and only son of the late Rev. Edward Bickersteth, rector of Walton, Herts. Educated at Cambridge, Trinity College. Was Chancellor's English Medallist three years in succession (1844-5-6), graduated B.A., Sen. Opt., and 3rd class Classical Tripos (1847), M.A. (1850), and took the Seatonian prize (1854). Hon. D.D. (1885). Deacon (1848), and priest (1849). Vicar of Christ Church, Hampstead (1855-85); and rural dean of Highgate (1878-85). Appointed Dean of Gloucester (1885), and in the same year consecrated Lord Bishop of Exeter. As an author and editor his lordship is well known. Among his chief works are "The Blessed Dead" (1863), "Jesus and the Resurrection" (1870), "Poems" (1849), "The Reef and Other Parables" (1874—2nd edition 1885), "Yesterday, To-day, and For Ever—a Poem in Twelve Books" (1866: 15th edition 1884). His Lordship has edited many of his father's discourses; a volume of "Family Prayers for Working Men" (1879), the "Hymnal Companion to the Book of Common Prayer" (1870-71-80), and has written beside a "Commentary on the New Testament."

Exeter Hall, Strand, London. Erected in 1830-31 by Deering, for the holding of religious and philanthropic meetings. Celebrated as the scene of the religious meetings held in the month of May. Now the property of the Young Men's Christian Association, having been purchased and presented to that body by six gentlemen at a cost of £25,000. The Exeter Hall Gymnasium in Long Acre was opened in '88 by the Prince of Wales.

"Expositor, The." was founded 1875, under the editorial care of Rev. Samuel Cox, D.D. The first and second series, consisting of twenty volumes, were completed 1884. The third series, under the editorship of Rev. W. B. Nicoll, M.A., was commenced 1885. The *Expositor* is intended to give the results of the best scholarship of the day, derived from the clergy and theologians of all denominations, in addition to Bible studies and exegesis.

F

Factory and Workshop Act, '78. This Act consolidates a series of statutes for the regulation of factories and workshops extending from the commencement of the century down to the present time. It contains practically all the law dealing with this subject, and extends to a hundred and seven sections. The first part contains the general provisions for drainage, ventilation, and fencing of dangerous machinery, vats, etc., as well as the rules regulating the hours of labour for women, young persons and children. In textile factories the hours of labour for women and young persons are not to exceed ten, and Saturday is to be a half-holiday. The hours of labour for children are fixed at half of those allowed to women or young persons. These rules are modified in their application to other factories and workshops. Provision is made for holidays; for insuring the attendance at school of children employed in factories or workshops; for certificates of fitness for employment to be obtained by children and young persons; for giving notice of accidents to inspectors and certifying surgeons appointed under the Act. The second part contains special provisions relating to particular classes of factories and workshops—e.g., to insure lime-washing, etc.; restriction upon the employment of women, young persons or children in special industries, and exceptions relaxing the law in favour of certain industries, etc. The third part regulates the appointment and functions of inspectors and certifying surgeons, fixes penalties and provides for their recovery before a court of summary jurisdiction. The fourth part contains miscellaneous provisions, and defines a "child" as any person under fourteen years of age, and "young person" as any person between the ages of fourteen and eighteen years.

Faculties, Court of. A court of the Archbishop of Canterbury, presided over by the Master of the Faculties. To him must be made all applications for admitting notaries to or removing them from their office. The judge of the Provincial Courts of Canterbury and York is *ex-officio* Master of the Faculties. Consult Phillimore's "Ecclesiastical Law."

Faed, Thomas, R.A., b. at Burley Mill, Kirkcudbright, 1826; devoted himself first to water-colours; subsequently he commenced painting in oils. Associate of the Royal Scottish Academy (1849). His popular picture, "Scott and his Friends at Abbotsford," brought him prominently into notice. He settled in London in 1852. His work "The Mitherless Bairn," shown at the Royal Academy Exhibition in 1855, was spoken of as "the picture of the season." He has since been a frequent contributor to the Royal Academy Exhibitions. Amongst other of his famous pictures are "The First Break in the Family," "Sunday in the Backwoods," and "The Last of the Clan." Elected R.A. '64. He is also an hon. member of the Vienna R.A. Mr. F. exhibited at the R.A. Exhibition of '89 a characteristic picture entitled "Kuah! Let him Sleep."

Faeroe Islands ("Sheep Islands"). A group in the North Atlantic forming a Danish dependency. Capital *Thorshavn*, on Stromoe Island. The islands (22 in number, 17 inhabited) are represented in the legislature of Denmark by

a deputy, named by the king. See COLONIES OF FOREIGN POWERS.

Fahrenheit. (From Gabriel Daniel Fahrenheit, b. at Danzig 1686, d. 1736.) The name of one of the three scales used in thermometers. The freezing-point of water is on the Fahrenheit scale marked 32°, the boiling-point 212°. The space between the freezing- and the boiling-points is divided into 180 (212 - 32) equal parts, each of which is called a degree. Fahrenheit's reasons for using the numbers 32 and 212 respectively for the freezing- and boiling-points of water was that 180 was a number breaking up easily into aliquot parts, and that the lowest temperature attained by him, by mixing ice water and sal ammoniac, corresponded with 32 of such 180 degrees below the freezing-point of water. To express the number of degrees of temperature registered on the Fahrenheit scale in terms of the Centigrade, subtract 32, multiply by 5 and divide by 9. Thus 212° F. are equivalent to 212 - 32 = 180 × 5 ÷ 9 = 100° C. To turn Fahrenheit to Réaumur subtract 32, multiply by 4, and divide by 9. Thus 212° F. are equivalent to 212 - 32 = 180 × 4 ÷ 9 = 80° R.

Fairbairn, Rev. A. M., M.A., D.D., Principal of Mansfield Coll., Oxford, was b. 1838, near Edinburgh, and was ed. at the universities of Edinburgh, Glasgow, and Berlin. Commenced ministry '60 at Bathgate, Linlithgow, afterwards removing to Aberdeen. In '77 he became Principal of Airedale Coll., Bradford, where he soon achieved a reputation for brilliant exposition. For five years Dr. F. lectured at his *alma mater*, Edinburgh University, on "The Comparative History of Religions," and in '83 was selected as Chairman of the Congregational Union of England and Wales. The great work of his life, however, commenced with his removal in '86 to Oxford, and his appointment to the principalship of Mansfield Coll. (q.v.), at the opening of which (Oct. '89) he delivered a masterly address on what he deemed to be the work of the College. A frequent contributor to the *Contemporary Review* (in the November number of which Prof. F.'s Inaugural Address appears), he has also written many books, including "Studies in the Philosophy of Religion and History," "Studies in the Life of Christ," and "Religion in the History and Life of To-day." As an eloquent preacher, Dr. F. has acquired considerable popularity among the students of Oxford.

Faithfull, Emily, b. at Headley rectory, Surrey, '35. In '60 she started a "composing" room in Great Coram Street, for the training of females in type-setting. The Queen granted her a warrant appointing her printer and publisher in ordinary to Her Majesty. In the *Victoria Magazine* and other periodicals, Miss Faithfull has been a powerful advocate of the claims of women to remunerative employment. She is the author of a capital novel, "Change upon Change." For many years she was a popular lecturer. She was the founder of the *West London Express*, in the printing of which she employed a large number of female compositors. In '88 Miss F. received a pleasing mark of royal favour in the shape of an autographed portrait of the Queen.

Falkland Islands. Otherwise called *Las Isles Malouines*. A British colony situated in the

South Atlantic, about 240 miles east of Magellan's Straits. Capital and port Stanley, on East Falkland, which island contains 3,000 sq. m.; West Falkland has an area of 2,300 sq. m., and lesser islands about 1,200. **South Georgia**, an island 800 miles E.S.E., has been annexed to the colony. Its area is 1,570 sq. m., but it is snow-covered, sterile, and uninhabited. The Falklands consist of low, hilly grass and moorland. The flora and fauna are Patagonian. Frozen mutton is exported to England. The islands were discovered by Davis in 1592, visited by a French vessel from St. Malo in 1710 (and named *Iles Malouines*), and annexed by Britain in 1833. The people are of British and Spanish American descent. The Governor is assisted by an Executive and a Legislative Council; administration being that of a Crown colony. For statistics see **BRITISH EMPIRE**, etc. (table).

Farmers' Alliance, The. The following are the objects of this Alliance. (1) To secure the adequate representation of tenant farmers in parliament,—not necessarily by tenant-farmer members, although it is desirable that several practical tenant farmers should sit in parliament, but by members representing fairly the views of the Alliance. (2) To stimulate the cultivation of the land by obtaining full security for the capital of tenants invested in the improvement of their holdings and greater freedom in the cultivation of the soil and the disposal of its produce—that is, such security as would entirely abolish the legal power of a landowner to appropriate his tenants' improvements without paying for them. (3) To promote the reform of laws relating to the ownership and transfer of land. "Landed property should be as easy to sell and cheap transfer as a ship." (4) To encourage an increase in the number of small holdings, so as to provide for a natural growth of the rural population. (5) To obtain the abolition of the law of distress. (6) To procure the further reform of the game laws. (7) To secure to ratepayers their legitimate share in county government—that is, by the direct representation of the ratepayers on county boards. (8) To obtain a fair apportionment of local burdens between landlord and tenant. (9) To obtain a readjustment of the tithe rent-charge; the ordinary rent-charge should be collected from the owners and not from the occupiers of land. (10) To watch over the interest of farmers in connection with railway charges; especially as to excessive and illegal charges, and as to unfair and illegal preference to the foreigner. (11) To obtain and secure the enforcement of effective regulations in respect of cattle disease—that is, such regulations as will be effectual in keeping diseased foreign animals from conveying infection to British and Irish live stock, and suitable provisions for stamping out epidemics which have broken out in the country. (12) To advocate legislation for preventing the sale of spurious butter as a genuine commodity, or beer made with other materials than malt and hops, without proper notice to that effect. Subscription, 5s. per annum, or 4s. for life. During '88 several **Conferences and Public Meetings** in connection with the F. A. were held at Bridge House Hotel, having reference chiefly to the **Tithe Rent Charge Bill**, the **Local Government Bill**, and other legislative measures affecting the agricultural interest. **President**, Mr. W. J. Henman, Caversham, Reading; **Econ. Sec.**, Mr. Albert Bath, Sevenoaks.

Farming, Co-operative. See **CO-OPERATION**.

Farrar, Frederick William, D.D., F.R.S., Archdeacon of Westminster, was b. at Bombay 1831. Educated at Cambridge, where he graduated with first-class classical honours, and became a Fellow of Trinity College. He obtained the Chancellor's prize for English verse. Ordained '57. Subsequently assistant master at Harrow, and **Head Master of Marlborough School, Chaplain in Ordinary to the Queen**, '73. Canon of Westminster and rector of St. Margaret's (1876); also Archdeacon of Westminster and Rural Dean, '83. Canon Farrar is an eloquent preacher and writer, his chief works being "*Life of Christ*" (1874), "*Life of St. Paul*," "*The Early Days of Christianity*," "*Everyday Christian Life; or, Sermons by the Way*" ('87), "*Lives of the Fathers*" ('88), "*Sketches of Church History*," ('89), etc. Canon Farrar has also been an able contributor to educational literature. He edited ('68) "*Essays on a Liberal Education*." He visited the United States in '85, where he met with a most enthusiastic reception. He is a temperance reformer, and in his address at a recent Vegetarian Conference spoke favourably of the adoption of their principles in a modified form. He has recently associated himself with the movement for the institution of an Anglican monastic order with modern aims. See **BROTHERHOODS, ANGLICAN**.

Fawcett, Mrs. Henry, the widow of the late Rt. Hon. Henry Fawcett, Postmaster-General, was b. (1847) at Aldeburgh, Suffolk. She is the author of several works, amongst which may be mentioned "*Political Economy for Beginners*," and "*Tales in Political Economy*." Mrs. Fawcett possesses oratorical powers of a very high order, and she is a frequent speaker at social meetings in London. A few years ago there was a considerable enlargement of the female staff at the Postal Telegraph Office, and it is understood that Mrs. Fawcett was instrumental in bringing about this increased employment of female labour. Mrs. F. is an advocate of **Higher Female Education**, and has always taken a great interest in the movement for extending the **parliamentary franchise to women**. She has recently greatly interested herself on behalf of children employed in theatres and music halls, the neglect of whose education she brought under the notice of the Education Commission which sat in '87. She was in '89 appointed **President of the Women's Unionist Association**. Mrs. F. interested herself in the question of the **employment of children in theatres**, and wrote a letter to the *Times* (July 18th) in support of the Cruelty to Children (Prevention) Act '89. See **SESSION '89**, sect. 72.

"**F. C. S.**" See **LLOYD'S CLAUSES**.

Federation, Australasian. See **IMPERIAL FEDERATION**.

Federation, Imperial. See **IMPERIAL FEDERATION**.

Ferdinand, Prince of Bulgaria, b. in Vienna, 1861, youngest son of Prince Augustus of Saxe-Coburg and Princess Clementine of Bourbon-Orleans, a daughter of Louis Philippe. The Prince served as an officer in the Austrian army, and possesses large estates in Hungary. After the deposition of Prince Alexander, Prince Ferdinand received a deputation from the *Sobranje* in '87, offering him the vacant throne. He accepted the offer, and on the 14th August took the oath to the **Bulgarian constitution** at Tirnova. His sovereignty, however, has not been formally recognised by the

Powers, and his tenure of power is believed to be very precarious, as it is known that Russia is firmly opposed to his continuance on the throne. His reception by the Bulgarian nation has been most enthusiastic; and in Oct. '89 he had so far restored tranquillity to the country as to be able to leave it, and go on a visit to Paris, Munich, and elsewhere. See BULGARIA.

Perghana. A province of Turkestan, the former Khanate of Khokand (*q.v.*).

Fernando Po. A volcanic island in the Gulf of Guinea. Discovered in 1472 by a Portuguese sailor of same name, and ceded by Portugal to Spain in 1778. Capital **Clarence Cove**, originally an English settlement, established in 1827. Dense forests, luxuriant vegetation, picturesque scenery. The natives, Anyo or "Boobies," stupid and repulsive in appearance. Exports, india rubber and palm oil. Now used as a place of exile for political offenders. See COLONIES OF EUROPEAN POWERS.

Ferrier, David, M.D., LL.D., F.R.S., Physician to King's Coll. Hospital and the Hospital for the Paralyzed and Epileptic, and an eminent authority on the functions and diseases of the brain and nervous systems, was b. in Aberdeen 1813. Educated at the Aberdeen and Edinburgh Universities, where he brilliantly distinguished himself. Dr. F. claims to have practised vivisection with important results, and has thereby aroused the opposition of the anti-vivisectionists. He is the author of "Functions of the Brain."

Ferry, Jules François Camille, distinguished French jurisconsult and statesman, b. at St. Dié, Department of the Vosges, 1832. He was called to the French bar '54. Making himself conspicuous by his opposition to the Empire, and as one of the "thirteen," he was, in '64, tried and condemned. In '69 he was returned for the Corps Législatif, and became from that time a prominent member of the Left under the Empire. The revolution of Sept. 4th, '70, made him a member of the Government of National Defence. In '71 he was returned to the National Assembly for his native department of the Vosges. He was afterwards **Prefect of the Seine**, but soon resigned. From '72 to '73 he was appointed **French Minister at Athens**. He was returned at the general election for his native *arrondissement* ('76-7). In May '78 he was one of the vice-presidents of the Budget Committee, and in '79 **Minister of Public Instruction and the Fine Arts**. As **Minister of Education** he brought in a bill directed against the Jesuits and their influence in schools. The Chamber of Deputies passed the bill by large majorities, but the Senate rejected it ('79 and '80). The cabinet revised disused laws and expelled the Jesuits by decree. Difference of opinion arose, and the Ministry fell. M. Ferry was **Prime Minister** ('80-81), his cabinet resigning on the question of the **Expedition to Tunis**. He became **Prime Minister** again (Feb. '83), but his ministry was overthrown ('84) by an adverse vote relative to the war with China. M. Ferry was, with M. de Freycinet, the leading candidate for the **Presidency** on the resignation of M. Grévy, but he, as well as M. de Freycinet, was distrusted, especially by the Reds, on account of his policy in Tunis and Tonquin; and it was to prevent either of these ministers from becoming chief magistrate of the Republic that the

different factions united in favour of M. Carnot. Soon after the Presidential election, M. Ferry had a narrow escape from assassination (Dec. '87) by a madman named Aubertin. In April '89 he spoke against **Boulangism** and the revival of the Moderate Republican party at the annual meeting of the Republic Centenary Association. In a letter to the *Estafette* (Oct. 21st) M. Ferry wrote on the relations of Italy to France in respect of the occupation of Tunis by the latter country, and drew an analogy from the annexation of Cyprus by England. At the **General Election** in September he was rejected by his old constituents.

Feuillet, Octave, French novelist; b. at Saint-Lô (Manche), August 11th, 1820. His first literary production was "Le Grand Vieillard," a novel under the *nom-de-plume* of "Désire Hazard," which appeared in the columns of the *National*. "Le Roman d'un Jeune Homme Pauvre" ('54) raised Feuillet to the first rank of the novelists of the day; this work was also dramatised. Feuillet was elected member of the Academy in '62. In '63 he was made an Officer of the Legion of Honour. Under the Empire, Feuillet was the librarian of the imperial residences.

Field, Sir William Ventriss, b. 1813, practised as a solicitor in London ('40-43), but was called to the bar ('50). He gained a large practice both in commercial cases and before the Privy Council. Q.C. ('64). He subsequently became a bencher of his Inn (Inner Temple), and leader of the Midland Circuit. In '75 he was nominated a Judge of the Queen's Bench division.

Fieri facias, Writ (f. fa.). A writ of execution, that is to say, a writ issued for the purpose of giving effect to the judgment of a court of justice. It is a command to the sheriff that of the goods and chattels of the party, he cause to be made (whence the Latin name of the writ), the sum recovered by the judgment, with interest thereon at 4 per cent. from the day of judgment or order (or from the day on which the money was directed to be paid, or from which interest was directed to run as the case may be), together with the costs and the interest thereon similarly accruing, and that he have the money and interest in court immediately after such execution to be paid to the party who sued out the writ, and that he have the writ itself before the court, immediately after execution.

Fiji. An island group and British Crown colony in the South Pacific. Name a corruption of Viti, the native name. Consists of two considerable islands: **Viti Levu**, 4,250 sq. m.; **Vanu Levu**, 2,600 sq. m.; and 225 smaller. Total area 7,740 sq. m.; total pop. 127,444. Capital **Suva**, in Viti Levu; second town **Lavaka**, in Ovalau. Port of call for steamers is **Kartavu**, the southernmost island of the group. Colony divided into sixteen provinces. Island of **Rotumah** (pop. 2,409), to the north, annexed to Fiji in 1881. The islands are mountainous, well wooded, with luxuriant vegetation and fertile soil, tropical, the larger being of volcanic origin, the smaller of coral formation. Peaks attain 5,000 feet. Reefs and rocks abound in the seas. Various important rivers: the Rewa, in Viti Levu, is navigable 40 miles up. Forests contain valuable timber. Birds and fishes abundant, but hardly any animals except stock introduced. Minerals are iron, with, it is said, copper and gold. Natural productions are

fruits, pearl-shell, bêche-de-mer, timber, dye and scent woods, etc. Climate tropical, but healthy and favourable to Europeans.—Fiji is a Crown Colony under a Governor, who is also Her Majesty's High Commissioner and Consul-General for the Western Pacific. The Legislative Council consists of six official and six unofficial members appointed by the Governor. The Colony is represented in the Federal Council of Australasia. Two provinces and Rotumah are administered by English commissioners; fourteen provinces are locally governed by chiefs called Roko Tui. Religion and missionary work divided among Church of England, Roman Catholic, Wesleyan, and Presbyterian. Prior to the introduction of Christianity, cannibalism and human sacrifices prevailed to a most alarming extent. Two State-aided public schools. For defence a body of about one hundred native constabulary. Industries are growing sugar, coffee, cotton, coconuts, arrow-root, tapioca, etc., which form the exports. For financial statistics see BRITISH EMPIRE, etc. (table). Natives Polynesian with Papuan intermixture; are peaceable, orderly, becoming christianised and civilised. Europeans number 3,567, and there are some 10,000 Indian and Polynesian labourers. During the American civil war European cotton growers first appeared in Fiji. The principal chief, "king" Thakombau, then offered sovereignty to England, which was refused. White adventurers mingled in his government about 1870, and disturbances ensued. In 1874 the "king" and chiefs gladly ceded the group to England. An epidemic of measles soon after carried off one-third of the native population. Boundaries determined in 1880. Consult Horne's "Year in Fiji"; Cooper's "Coral Lands"; Petherick's "Catalogue of the York Gate Library"; Gordon and Gotch's "Australian Handbook"; *The Torch*; "Coral Lands of the Pacific," by H. Stoneham Cooper; *The Statesman's Year Book*; *Almanach de Gotha*; etc. For Executive Council see DIPLOMATIC.

Finance, National. The public revenue is now derived from customs and excise duties, probate and legacy, etc., duties, stamps, land tax, house duty, property and income tax, the post office, the telegraph service, the hereditary revenues of the Crown from woods, forests, and land, and a number of miscellaneous sources, including fee and patent stamps. Little more than half a century ago, scarcely a necessary of life, not to mention luxuries, escaped taxation; and an idea of the extent to which the system was carried may be gained from the statement that whereas the total number of articles and subdivisions of articles in the English Tariff of Import Duties was 53 in 1875, in '59 it was 307, and in '40 no less than 1,046. [Figures showing the revenue and expenditure in each year from 1870-1 to 1888 7 are given in our '88 edition, with some statistics showing the very large extent to which the increased taxation has fallen on payers of direct taxes.] The public expenditure may be classed under two heads:—(1) Consolidated Fund Services, or sums the payment of which from the Consolidated Fund has been already authorised by Acts of Parliament, and which are issued at the proper time without the annual intervention of Parliament; and (2) Supply Services, which are the numerous items brought forward every year in Committee of Supply. Under the first head are included the charges

| INCOME. | Exchequer receipts, 1888-89. | Budget estimate, 1888-90. | EXPENDITURE. | | Exchequer issues, 1888-89. | Budget estimate, 1888-90. |

for interest and management of the National Debt, the Civil List and Annuities to the Royal Family, and many salaries and pensions which are set forth in some detail below, and which in the national balance-sheet are included under "Other Consolidated Fund Charges." The total expenditure for Consolidated Fund Services in '88-9 was £27,854,580, and for Supply Services, £57,819,292. The financial year ends on March 31st, and generally after but sometimes before that day the Chancellor of the Exchequer makes the financial statement of income, expenditure, and national indebtedness, known as the Budget. There is a standing committee of the House of Commons for the examination of the accounts showing the appropriation of the sums granted by Parliament to meet the public expenditure; and the Comptroller and Auditor-General, who has the duty of auditing all public accounts, reports to this committee whether or not the expenditure has been in accordance with the purpose for which it was granted.—The Civil Service votes, given in detail below, will be found well worthy of study. In these estimates were formerly included a number of grants in aid of local taxation, and charges transferred from Local to Imperial Funds, which are now replaced by the transfer to local authorities of certain sources of taxation producing a considerably larger sum than the discontinued grants in aid (see editions '88 and '89). Appended are the totals of the grants in aid in '88-9 and the estimates for '89-90 (see also Budget on previous page):—

| | 1889-90. | 1888-89. |
|---|--------------------|------------------|
| | £ | £ |
| England and Wales | 972,454 | 3,263,098 |
| Scotland | 499,168 | 507,124 |
| Ireland | 2,123,099 | 2,114,572 |
| Total for Great Britain and Ireland. | £ 3,594,721 | 5,884,794 |

It will be seen that there is a decrease so far as England and Wales are concerned of £2,290,644, but the actual decrease in England and Wales due to the operation of the Local Government Act was no less than £2,303,392. On the opposite page is given the National Balance Sheet for the year ending March 31st, '89, with the Budget Estimate for the current financial year which commenced on the 1st April. Taking the heads of revenue received during '88-9 in their order, the following is a statement of the net produce from the principal articles contributing to Customs:—

| | |
|--------------------------------------|-----------|
| Beer, Mum, Spruce, etc. | £11,289 |
| Chicory | 66,293 |
| Cocoa and Chocolate | 90,570 |
| Coffee | 184,292 |
| Currants | 351,894 |
| Figs | 33,609 |
| Plate (Gold and Silver) | 9,332 |
| Plums (Dried or Preserved) | 11,833 |
| Prunes | 6,453 |
| Raisins | 173,640 |
| Spirits (Colonial and Foreign): | |
| Rum | 1,977,463 |
| Brandy | 1,257,035 |
| Geneva | 130,555 |
| Other Sorts | 931,581 |

| | |
|-----------------------------|------------|
| Tea | £4,629,901 |
| Tobacco and Snuff | 8,858,781 |
| Wine | 1,210,537 |

The following is the net produce under different heads of Exise duties:—

| | |
|--|------------|
| Beer | 8,770,295 |
| Railways | 311,506 |
| Spirits | 12,879,152 |
| Chicory | 1,047 |
| Tobacco (Home-grown) | 91 |
| Coffee Mixture Labels | 2,687 |
| Licences, viz.: | |
| Auctioneers, Appraisers, etc. | 79,475 |
| Beer and Cider, and Beer and Wine | 183,703 |
| Brewers | 18,703 |
| Dog | 368,603 |
| Establishment, viz.: | |
| Armorial Bearings | 74,379 |
| Carriages | 496,218 |
| Male Servants | 137,835 |
| Game | 169,505 |
| Gold and Silver Plate | 48,750 |
| Gun | 84,217 |
| Hawkers and Pedlars | 15,093 |
| Medicine (Patent) Vendors | 5,565 |
| Pawnbrokers | 30,157 |
| Refreshment House | 7,347 |
| Spirits: | |
| Distillers and Rectifiers | 9,319 |
| Dealers | 199,386 |
| Publicans, including Grocers in Scotland and Ireland | 1,487,036 |
| Tobacco | 84,668 |
| Wine and Sweets | 67,191 |
| Other than the foregoing | 10,414 |

Stamps.—Appended are the net amounts received under the different heads of duty:—

| | |
|--|-----------|
| Probate and Account Duty | 4,231,559 |
| Less one-third due to Local Taxation Account | 1,410,520 |
| | 2,821,039 |
| Legacy Duty | 2,830,378 |
| Succession Duty | 906,469 |

| | |
|---|-----------|
| Total Death Duties | 6,557,886 |
| Corporation Duty | 40,734 |
| Deeds and other Instruments not included under the following heads | 3,153,084 |
| Bills of Exchange | 700,918 |
| Receipts, Drafts, and other <i>id.</i> Stamps | 1,041,247 |
| Bankers' Notes | 149 |
| Composition for the Duties on Bills and Notes of the Banks of England and Ireland, and of Country Bankers | 122,413 |
| Cards | 16,505 |
| Gold and Silver Plate, viz.: | |
| Gold | 22,209 |
| Silver | 49,604 |
| Licences and Certificates | 159,400 |
| Life Insurances | 45,228 |
| Marine Insurances | 129,203 |
| Medicines (Patent) | 202,375 |

The items Land Tax and House Duty speak for themselves. In regard to the Property and Income Tax, which was at the rate of 6d. in the £ with arrears of the prior year at 7d. in the £, an approximate appropriation of the net sum produced under the different schedules, if based on the statistics of assessments for '87-8, would be:—Schedule A, Lands, Tenements, etc., £4,211,992; Schedule B, Occupation of Lands, Tenements, etc., £265,667; Schedule C, Annu-

ties, Dividends, etc., £1,137,117; **Schedule D**, Professions, Trades, etc., £6,055,527; **Schedule E**, Public Offices, etc., £805,066.—The gross **Post Office** receipts were composed of postage collected by postmasters in the country and Metropolis, postage stamps sold, commission on money orders (£129,063), commission on postal orders (£176,523), and other items. The figures given in the balance-sheet above show the net receipts. The sum which appears against the heading of **Crown Lands** is the net produce of the Woods, Forests and Land Revenues of the Crown, which is paid over and consolidated with the rest of the public revenue in return for the Royal Civil List. The interest received on the Sardinian Loan amounted to £28,128, on the Cape Railway Loan to £14,000, and the interest on the purchase money of Suez Canal Shares received from the Egyptian Government was £198,829. "**Miscellaneous**" contains numerous features of interest. Small branches of the hereditary revenue, under which is included £745 for "Rents and Royalties of Guano, etc., Islands," brought in £69,514; in the total of £1,300,589. Receipts by Civil Departments are included, £370,079 fees and fines received at County Courts, £986 received at the Foreign Office for passport fees, £900 received in fees at the Friendly Societies Registry, £6,091 received at the Home Offices for fees on appointments, naturalisation, under the Explosives Act, from pedlars in the Metropolis, and for chimney-sweepers' licences in the Metropolis; £21,931 received in fees at the House of Commons, £22,292 net, fees received at the House of Lords, £61,263. Supreme Court of Judicature, England; Mint (including £207,823, seigniorage on silver purchased for coinage, £32,658 profit on bronze coinage, and £9,503 repayment of expenses of coinage and specimen dies for Colonial and Foreign Governments, etc., and £335 gold and silver sweep) £251,060; admission fees to the National Gallery, £1,011; fines and fees at the Police Courts, London, Chatham, and Sheerness, £11,505; South Kensington Museum, admissions and fees, £4,920; Stationery Office (including sale of publications, £38,238; sale of waste paper, £8,846; sale of ordnance maps, £11,942; income of London, Edinburgh, and Dublin *Gazettes*, £6,748—this sum is in addition to £20,494, revenue of the London *Gazette* collected in stamps), £93,370; fees received from visitors to the Jewel House, Tower of London, £1,435; candidates' fees, University of London, £13,661. The Revenue Departments (including Packet service) contributed to Miscellaneous Revenue £505,265, which was made up of such items as rent of Crown premises, and of goods deposited in bonded warehouses; £33,053 in respect of fines, seizures and penalties credited to Inland Revenue; and £346,652 received by the Post Office from the National Debt Commissioners on account of charges of management of Post Office Savings Banks and Government Annuities and Insurances. Under the head of Post Office Savings Banks is shown £78,805 surplus of interest accrued to 31st December, '89, from securities to the credit of the Post Office Savings Bank Fund, beyond the interest paid and credited to the depositors, etc. The last great item under the head of Miscellaneous is £706,973, for Fee and Patent Stamps. Among the large sums which went to make up this total were Companies' Registration, £50,412; County

Courts, Ireland, £29,952; District Audit, £29,321; Judicature, England, £365,904; Judicature, Ireland, £36,321; Metropolitan Police Courts, £9,573; Patents for Inventions, £148,562.—Turning to the **Expenditure** for '89-90, some references to the **National Debt Charges**, and to the capital of the Debt, will be found lower down. The second column of the table, being the Budget Estimate for '89-90, is also dealt with later on. Analysing item 3, "**Other Consolidated Fund Services**," there is first the sum of £410,555 issued on account of the Civil List, which is made up of £60,000 for Her Majesty's Privy Purse; £131,260 for salaries of Her Majesty's household and retired allowances; £172,500 expenses of Her Majesty's household; £13,200 for Royal Bounty, Alms, and Special Services; £8,040 unappropriated; and £25,555 for pensions on the Civil List limited to £1,200 per annum (see CIVIL LIST PENSIONS). Next comes a charge of £158,000, being the amount of the annuities to the **Royal Family**. In addition there is a list of pensions for naval and military services, the amount and the duration of the grants being: Lord Rodney (and all the heirs male to whom the title shall descend), £2,000; Earl Nelson (and to whom the title shall descend), £5,000; Duke of Wellington (for life of the present duke), £4,000; Viscount Combermere (to present viscount and next heir male on whom the title shall descend), £2,000; Viscount Exmouth (and to the heirs male on whom the title shall descend), £2,000; Lord Seaton (for life of present baron), £2,000; Lord Keane (for life of present baron), £2,000; Viscount Hardinge (to present viscount and next heir male who may succeed to the title), £3,000; Viscount Gough (to present viscount and next heir male who may succeed to the title), £2,000; Lord Raglan (for life), £2,000; Sir H. Havelock-Allan, Bart. (for life), £1,000; Lord Napier of Magdala (to present baron and his heir male), £2,000; and the heirs of the Duke of Schomberg, £720 total, £20,720. Pensions for political and civil services amounted during the year to £19,748, and the recipients included the Countess of Elgin and the Countess of Mayo, widows of Governors-General of India; Mr. S. H. Walpole, £2,000; Mr. Childers, M.P., £1,133; Mr. C. P. Villiers, M.P., £1,200; Mr. Shaw-Lefevre, £1,200 (this pension was resigned from 7th Feb. '89); Lord Emly, £1,200. Viscounts Eversley and Hampden each received pensions at the rate of £4,000 a year as late Speakers of the House of Commons, the amount paid to the former for part of the year, he having died Dec. 28, '88, being £3,908. Pensions for judicial services (England) amounted to £47,275; among the recipients being the Earl of Selborne, £5,000; Lord Herschell, £5,000; Lord Blackburn, £3,750; Sir J. Bacon, Lord Bramwell, Sir W. Grove, Lord Penzance, and Sir M. E. Smith, retired judges, each £3,500; and several retired county court judges—who as a rule received £1,000 each. A large sum is paid by way of compensation, some amounts being issued to persons formerly attached to the old Courts of Requests, the Marshalsea, and the Ecclesiastical and Prerogative Courts. Other sums were paid as judicial pensions to retired judges in Scotland and Ireland; and there were a few pensions for diplomatic services granted prior to 1869, the pensions granted for these services since that time being now voted in the Civil

Service Estimates. The miscellaneous pensions, amounting to the comparatively small sum of £4,837, include two pensions formerly on the Civil List of George III. The salaries and allowances comprise the sums of £5,000 paid to the Speaker of the House of Commons, £30,000 to the Lord Lieutenant of Ireland; the salaries of the judges, the Lords of Appeal in Ordinary receiving £6,000 per annum each, the judges of the Court of Appeal, of the Chancery Division, and of the Queen's Bench Division receiving £5,000 each, with the exceptions of the Master of the Rolls, whose salary is £6,000, and the Lord Chief Justice, who is paid £8,000; the salaries of the county court judges, who are paid £1,500 a year each; the salaries of the Metropolitan police magistrates, one at £1,800 and twenty-four at £1,500 per annum; the salaries of the Scotch judges, sheriffs and sheriffs' substitutes, and of the Irish judges. Miscellaneous services charged on the Consolidated Fund include £62,910, being the amount of annuities for ten years payable to the National Debt Commissioners, and created to redeem perpetual annuities and pensions. Several other items on the Expenditure side of the balance-sheet speak for themselves; reference to the cost of the "Army" and "Navy" will be found under those headings; and the following is a list of the **Civil Service Votes** granted during the financial year '88-9, with the estimates for '89-90:—

The totals of the several classes were, in '88-9, £18,037,730; the estimated totals of the several classes for '89-90 is £15,739,092. There is an increase of £176,808 in Class IV., but a decrease in the other classes amounting to £2,475,446, the net decrease being therefore £2,298,638. As explained above, the decrease in the estimates for '89-90, due to the operation of the Local Government Act, was £2,303,392. Deducting for purposes of comparison the grants in aid of local purposes charged on the estimates in '88-9, and discontinued in '89-90, the totals of the several classes would be in '88-9 £15,732,338, as compared with £15,739,092 in '89-90, the net increase being therefore only £6,754. To the total estimates for '89-90, as first presented and as given above, should be added a few additional and supplementary votes, as follows:—Class II., The Mint, to defray the expenses of the withdrawal of worn gold coin from circulation, £50,000; Class III., Criminal Prosecutions, etc., £18,000; Class IV., Royal Society, grant in aid of the final completion and publication of the reports on the results of the Deep Sea Exploring Expedition in H.M.S. *Challenger*, £1,600; Class V., Expenses connected with the visit of H.M. the Shah to this country, £7,650; slave trade services, £6,000; Class VII., repayments to the Civil Contingencies Fund, £2,348 (which includes £1,600, being £800 each to Michael Brannagh and

Peter Murphy, in trust, as compensation for wrongful imprisonment; Repayment to the Local Loan Funds, £1,850; O'Reilly Dease Estate, £4,507; Crofters' Colonisation, £1,885; Post-office Telegraphs, £49,900, to defray the salaries and working expenses of the Post-office Telegraph Service, in consequence of the new arrangements for working the submarine telegraph cables between England and Belgium, France, Germany, and Holland; and £67,163, to defray the expenses connected with the acquisition of the Submarine Telegraph Company's property required for the Post-office Telegraph Service: total, £210,912. Having discussed the income and expenditure for '88-9, and as far so the supply services are concerned, the expenditure for '89-90, we may pass on to consider the state of the great burden upon the country, which is known as the **National Debt**. This debt was instituted by William III., whose first regular loan, obtained in 1694, consisted of £1,200,000. Since that time other advances have been made by the Bank, and also by the Bank of Ireland, and enormous loans have been negotiated for the Government. Thus, at the accession of Anne the debt had grown to nearly thirteen millions; when George III. ascended the throne it amounted to more than a hundred millions; at the conclusion of the **American War**, in 1784, it stood at £249,851,000, and though there was a small decrease during the period of peace, 1784-93, additions amounting to £601,500,000 were made during the **French War**, and after the battle of Waterloo the debt reached the startling figure of £385,000,000. Since that year it has been considerably reduced. Thus, at the end of the year 1856-7 the total debt funded (including stock held on account of unclaimed dividends), unfunded, and the capital value of terminable annuities in £3 per cent. stock at par, was £837,144,579; at the end of '66-7 it was £802,210,413; end of '73-4 £772,934,938; '76-7, £770,014,723; end of '79-80, £771,605,908; end of '85-6, £742,282,411; end of '88-7, £736,278,688; end of '87-8, £705,575,073; and at the end of the last financial year (March 31st, '89), £698,430,571. The **gross totals of debt** on March 31st, '88, and March 31st, '89, were made up as follows:—

| | 1888 | 1889 |
|--------------------------|--------------|--------------|
| (1) Funded Debt | £609,740,743 | £607,057,811 |
| (2) Terminable Annuities | 78,449,230 | 75,279,438 |
| (3) Unfunded Debt | 17,385,100 | 16,093,322 |

Total National Debt (D) £705,575,073 £698,430,571
 (1) This consists of the various stocks, and of the debts to the Banks of England and Ireland. In the year ended 31st March, '89, £321,700,933 Consolidated 3 per cents., £63,301,666 Reduced 3 per cents., and £105,637,358 New 3 per cents., were converted into an equal nominal amount of 2½ per cent. Consolidated Stock, under the National Debt (Conversion) Act, '88; and on March 31st, '89, the Funded Debt was made up as follows:—

| | |
|---------------------------------|-------------|
| 3½ per cents. | 225,746 |
| Consols (3 per cents.) | 35,606,575 |
| Reduced 3 per cents. | 5,610,767 |
| 2½ per cent. Consols | 514,149,320 |
| 2½ per cents. (1905) | 4,647,799 |
| 2½ per cents. | 32,753,434 |
| Exchequer Bonds (2½ per cents.) | 418,300 |

593,411,941

The debts to the Banks of England and Ireland at 3 per cent. — £13,645,809 — added to the total at the end of the previous column, will be seen to produce a grand total of £607,057,810. (2) These are annuities in which the payment is made for lives or terms of years, after which it ceases altogether, the return made being increased as the period of time is shortened; in other words, a portion of the principal is repaid with the interest in each year while the arrangement continues. In estimating the amount of the Debt, these annuities are capitalised. (3) This consists of temporary loans raised upon the security of bills and bonds issued by the Exchequer and Treasury. We may now turn for a moment to a matter which was formerly mixed up with, but is now separated from, the National Debt. The State has for nearly a century made advances of money to bodies and individuals in furtherance of objects approved by Parliament, which advances have been managed by the Treasury, Public Works Loan Commissioners and West Indian Incumbered Estates Commissioners, the Irish Board of Works and the Paymaster of Civil Services, and the Irish Land Commissioners. Up to March 31st, '89, there had been advanced in this way a total of £113,031,535, of which £61,600,190 had been repaid, £12,022,323 had been remitted, and £665,778 had been written off from the account of assets, the assets of the Local Loans Fund on the above date being estimated at £38,745,244. The **Local Loans Debt** was always treated as a part of the National Debt until, under the Act of '87, Mr. Goschen separated the accounts, while in the course of the year '86-7 he reduced the National Debt by £26,558,959, being stock exchanged for Local Loans stock and cancelled. This separation of accounts must be taken into consideration in comparing the totals of Debt given above for '88 and '89 with the totals for previous years, when the total included the amount outstanding for local loans. To the figure (D) of £698,430,571 there are to be added certain capital liabilities amounting to £870,198, and deducted certain assets (including the nominal value of the Suez Canal shares, £3,532,040), amounting in all to £5,311,136; also the balances at the Banks of England and Ireland, amounting on March 31st, '89, to £5,592,002. With these readjustments the net national indebtedness amounted, March 31st, '89, to £688,397,631, as compared with £693,557,592 on the corresponding day of the preceding year, both estimates being made upon the same basis. The total charge for the service of the Debt was, in 1818, £32,457,000; in '86-7, £26,074,871; '73-4, £26,706,726; '76-7, £27,002,834; '79-80, £28,762,874; '85-6, £23,449,678; '88-7, £27,958,023; '87-8, £26,213,911; '88-9, £26,224,594. The amount of the charge in any year depends upon the sum required for interest plus the sum, if any, devoted by the operation of terminable annuities and sinking funds to the repayment of capital. In 1875 Sir S. Northcote fixed a sum for the annual service of the Debt inside the Permanent Annual Charge of the Debt, which fixed sum included all charges connected with the Debt except such as related to that part of the funded and unfunded debt which had been specifically created for local loans and other reproductive purposes. The sum payable for interest was considerably within this fixed charge, and the balance was to be applied to reduction of capital; and as

the amount required for interest decreased year by year the annual reduction would in course of time have grown very large. Although the scheme was, owing to extraordinary financial requirements, partly suspended at times, large reductions of capital were effected by it. [For details see '88 ed.] Mr. Goschen in his '87-8 Budget reduced the fixed charge from £8,037,000 to £26,000,000. This left £5,000,000 a year applicable to the redemption of Debt, which he then said would redeem at par £600,000,000 in about fifty-two years, and £700,000,000 (practically the whole Debt) in about fifty-seven years. The most material change made for many years in regard to the service for the Debt was, however, effected under the National Debt (Conversion) Act, '88, which provided for a reduction of interest from 3 per cent. to 2½, and ultimately to 2½. (For details see ed. '89). The saving to the country by the operation will be about £1,400,000 a year from 1889 to 1903, and from 1903 about £8,000,000 per annum. Mr. Goschen unfolded his Budget for '89-90 on April 15th. So far as the year '88-9 was concerned, the revenue had exceeded the estimate by £1,645,812, and the expenditure had been less than the estimate by £941,072, so that instead of the surplus he had estimated for, of £212,056, he had a surplus of £2,798,940. [The actual receipts and expenditure for '88-9 are given in the table above; and may be compared with the Budget Estimates given in our '89 ed.] His excess of income over expenditure was the largest since '73-4; and the next largest since '73-4 was that of the year '87-8, which amounted to £2,378,609. Both of these surpluses were appropriated to the service of the Debt, which on March 31st, '89, was lower than it had been for eighty years (see D above). In '88-9 special expenditure in connection with the conversion had to be met, amounting to £3,009,957; of this there was borrowed £1,000,000, the remainder being paid out of revenue—that is to say, out of the surplus of income over ordinary expenditure (see table). With regard to the current financial year, '89-90, he had to meet the following additional demands: £1,500,000 more than in '88-9 towards the Local Taxation Account [for details of the financial proposals in connection with the Local Government Scheme see ed. '89]; an increase of the ordinary Army and Navy Estimates amounting to £1,250,000, and £1,430,000 for the Naval Defence Account, this being the first annual contribution towards the special fund of £10,000,000 which is to be raised for strengthening the navy (see Session, sect. 40). He estimated his expenditure on the basis of total existing liability at £86,966,827, and his revenue at the then rate of taxation at £85,050,000, so that he had to make up an estimated deficit of £1,916,827, and allow something for a margin. The Conversion Scheme, by reducing the interest on the Debt, placed about £1,500,000 at his disposal during the current year, and of this sum he appropriated £1,000,000, reducing the fixed charge for the Debt from £26,000,000 to £25,000,000. He added 1 per cent. to the death duties payable on all estates valued at £10,000 and upwards, and brought under duty certain properties which had hitherto escaped payment, the estimated produce from these sources being £800,000; and he altered the specific gravity on which the beer duty is based; estimated produce £300,000. The following shows the financial effect of these proposals:—

| | |
|--|--------------|
| First estimate of revenue | £ 85,050,000 |
| Increase of death duties | 800,000 |
| Modification of beer duty | 300,000 |
| Final estimate of revenue, '89-90 | 86,150,000 |
| First estimate of expenditure | £ 86,966,827 |
| Deduct part of sum saved by conversion of Debt | 1,000,000 |
| Final estimated surplus | 85,966,827 |
| | 183,173 |

(For details see table above.) The Budget proposals became law after discussion (see Session, sect. 73).

Fire Brigade, Metropolitan. See METROPOLITAN FIRE BRIGADE.

Fireworks, Sale and Public Use of. The Explosives Act 1875, secs. 31 and 39, prohibits the sale of any explosive, including fireworks, to any child apparently under the age of 13 years. Penalty £5. A similar penalty by sec. 30 is also incurred by any one throwing, casting, or firing any firework, in or into any highway, street, thoroughfare, or public place.

First-Commissioner of Works is chief of a nominal commission which has in charge the royal palaces, parks and pleasure gardens, Tower of London, Houses of Parliament, Government offices, county court buildings, Metropolitan police courts, Science and Art Department buildings, British Museum buildings, and certain diplomatic and consular and other buildings, for the repair and maintenance of which Parliament makes an annual grant. He is also guardian of certain Ancient Monuments (see ANCIENT MONUMENTS PROTECTION ACT, 1882, in ed. '88). By the London Parks and Works Act 1887 certain Metropolitan open spaces were removed from his charge, and are now maintained by the London County Council. Office, 12, Whitehall Place, S.W.

Fish Culture. The art of fish culture is divided into two branches: (1) that in which the natural conditions under which fish live and thrive are brought up to the highest pitch of perfection—without, however, interfering directly with the ordinary processes of nature; and (2) that in which artificial interference is so far-reaching as to change the character of the natural circumstances under which fish breed and exist, if not actually to supersede them altogether. The first branch of fish culture has been practised ever since the time when the Romans used to import oysters from Britain, and place them in Lake Fusaro, where special provision was made for their reception, and for the rearing of the spat; and when they introduced exotic fish, such as the *varius*, from the waters of the *Ægean* Sea into those of the Italian coasts. The abbots and monks of the Middle Ages also practised this branch of fish culture when they bred and fattened carp and other fish in ponds or "stews" which they invariably constructed in the immediate neighbourhood of their monasteries and abbeys. The second branch of the art is of much more recent date. It originated in the discovery that the eggs of fish—those of salmon were first experimented upon—can be taken from the body of the parent fish, impregnated with the milt extracted from the male, and "hatched" in tanks

through which a continual flow of water passes. So far, indeed, can nature be departed from in the case of fluvial fish eggs, that whereas under natural conditions the female fish deposits her eggs upon gravelly locations or upon aquatic plants, where they are immediately afterwards impregnated by the milt of the male fish, the ova can be taken from one fish and deposited in an open vessel, and the milt may be taken from another fish, and provided it be meanwhile excluded from the air, the two may be mixed together many hours—even days—afterwards, and impregnation will be effected as successfully if no water is used as if the whole process were conducted under natural conditions. After the ova become fertilised, they are placed in suitable vessels, either with or without a layer of gravel at the bottom (in imitation of the bed of a stream), or on glass grills. According to the temperature of the water, so the development of the embryo fish proceeds, but the usual time occupied in the process of incubation is from about ninety to a hundred days. The fry exist without taking food from exterior sources, being nourished by the *umbilical sac* attached to them. After the sac is absorbed the allivins are turned into ponds or streams, and, when necessary, they are regularly supplied with food, but are often turned into waters and left to look after themselves under natural conditions. The two branches of fish culture may thus be likened in one respect to agriculture in the open field, where art only interferes to keep down weeds and destructive enemies, and to encourage or supplement the natural supply of nutriment; and, in another respect to the culture of tropical plants, where art supplants nature altogether and supplies everything that is needed. As in agriculture, so in fish culture, the two systems may be combined; and like seedlings artificially forced and afterwards planted in the open, the young fish artificially bred may be turned out into the natural stream. The development of salmon and trout eggs may be retarded, by keeping them at a reduced temperature (just above freezing point), sufficiently long to enable them to be transported to Australia or New Zealand; and in this way trout have been introduced into the waters of the Antipodes, to which they are not indigenous. The ova of marine forms, such as the mackerel, cod, herring, and other fish have also been artificially impregnated and hatched; but the difficulties attending the process are greater than those accompanying the propagation of trout and salmon. In America the practice has been carried out on a very large scale both by the Canadian and the United States Governments, and has been productive of practical results. The growth of the science of pisciculture in this country, although tardy, is steady. The Midland Counties' Fish Culture Establishment, founded by the late Mr. Wm. Burgess, at Malvern Wells, is the largest of its kind in England. It contains 100 ponds and two hatcheries, each capable of accommodating six millions of ova. In order to assist Fishery Boards and other public bodies in developing fish life in the waters under their control, Mr. Burgess is hatching ova for them free of charge, and turning the fry into their respective rivers and streams. During '89 consignments of the ova of various *transatlantic salmonides* were received by the late Mr. Burgess from the United States Commissioners of Fish and Fisheries, together with ova of the American whitefish, *Coregonus*

albus, which were incubated successfully and the young fish have thriven. The naturalisation of this valuable food form has excited much interest. Among the foreign fish which are being reared in this country are the Californian (Rainbow) trout, the American brook char, and Landlocked salmon. Fish culture has, during the past year, made decided progress; and, with a view to stimulating increased interest, a series of lectures was given by Mr. W. August Carter in London and the provinces, one of which was delivered by him at the South Kensington Museum, with the Marquis of Lorne in the chair. From the Midland Counties Fish Culture Establishment consignments of perch and tench were successfully transmitted to Japan last summer. London sec. of the establishment, Mr. W. August Carter, 24, Wood Vale, Lordship Lane, S.E. Fisheries Preservation Association—Office, 11, Seymour Street, Portman Square, W.

Flax was first planted in England in 1532-3, and in 1783 bounties were paid to encourage its cultivation. Two years later we imported 17,695 tons of hemp and flax from Russia; while in 1842 an import tax was imposed on all foreign flax, but this was taken off three years later. Flax growing has made but little progress in England, and of late years the acreage has been getting less and less, for in '67 the area was 20,000 acres, while now it is only 1,856 acres. The Irish returns give 253,257 acres in '67, and 89,225 acres in '84, the acreage being divided as follows:—Ulster, 87,917; Leinster, 803; Connaught, 204; Munster, 211. The decline is chiefly attributed to the encroachment of the very cheap fabrics made from cotton, and also the substitution of wool, which is being used largely instead of linen for outer clothing in foreign countries. In '87 the area was 130,282 acres, but in '88 it is only 113,586 acres, or a decline of 16,698 on the '87 acreage. The total production in Ireland in '87 was estimated at 16,357 tons, and the British supply was 465 tons. During the past ten years Irish production averaged 20,762 tons, British, 880 tons, and the imports 82,911 tons, or a total of 104,553 tons. Ireland is essentially a flax-growing country, owing to its insular position, and the moisture of the climate, which is the first condition to successful flax culture. The Rev. R. M. Barrington, M.A., LL.B., in an address on the drought of '87, referred to the effects of moisture on the flax plant. Subsequent information obtained proved that the larger the rainfall the higher the yield. Donegal, for instance, with over 80 per cent. of rain over one half, and 60 to 80 per cent. over the other half, yielded 27 stones to the acre. Antrim, with two-fifths of its surface, above 80 per cent. rainfall, and on three-fifths 60 to 80 per cent., gave 24 stones per acre, while Cavan and Monaghan, having each about 50 to 60 per cent. and one-half 40 to 50 per cent. rain, yielded but 16 stones. Other counties show proportionate returns. It is difficult to ascertain the number of hands employed in the manipulation of the raw material, as the habit in Ireland has been for a large class of farmers to conduct the operations with the aid of their own families. The number of persons employed in the flax mills and factories in Ireland was returned in '85 as 61,749, from children under thirteen years of age and upwards. There are now sixty spinning mills, two concerns having been broken up in '86, which reduces the number of

spindles from 973,780 to 843,590 in '87; sixty weaving factories containing 27,300 power looms, making in all 120 concerns. The *South Mills* in Ireland show a falling off of 59·6 per cent. in Leinster, Munster, and Connaught during the past ten years, reducing the number to twenty-one, while the number in Ulster is 1,033, or a decline of 12·5 per cent.

Floquet, Charles Thomas, President or Speaker of the French Chamber of Deputies; b. Oct. 28th, 1828, at St. Jean Pied de Port, in the Lower Pyrenees. Called to the Paris bar ('51), and practised for many years; he was also a frequent contributor to the democratic press of Paris. After the fall of the empire he became deputy mayor and member of the National Assembly, but resigned both positions during the Commune. For suspected participation in the latter he was arrested at Biarritz, and interned at Pau until the end of '71. He subsequently became president of the Municipal Council, and member of the Chamber, where he sat with the Extreme Left. In Jan. '82, he succeeded M. Herold as *Prefect of the Seine*, a position he resigned a few months later in consequence of a dispute with the Government. Again elected to the Chamber in Oct. '82, he twice became its *vice-president*, and on M. Henri Brisson forming a cabinet, M. Floquet was elected *president*, an office he filled with tact and dignity. He sits as one of the 38 members for Paris, having been returned second on the list. He was nominated for the *Presidency of the French Republic* on M. Grevy's retirement, but received very scant support. On the resignation of the Tirard Cabinet, in April '88, M. Floquet undertook the task of forming a Ministry, he himself taking the offices of *President of the Council* and *Minister of the Interior*. M. Floquet, though the ablest of the many Prime Ministers France has had of late years, allowed himself, in the heat of debate, to be so far provoked by General Boulanger as to challenge him to a duel, which was fought with rapiers in Comte Dillon's grounds in July '88, and resulted in a victory for M. Floquet, who inflicted a serious wound in the neck of his adversary. M. Floquet in Oct. '88 introduced a Bill for the revision of the French Senate. A debate on this question resulted in the defeat of the Ministry by 307 to 218, and the resignation of M. Floquet on Feb. 14th, '89. Elected *President of the Chamber* (Nov. 17th) for the Session '89-90.

Flotsam, Jetsam, and Ligan. These terms are defined by Stephen in his "Commentaries," (vol. ii., p. 545), as follows: "Flotsam is where goods are cast into the sea, and there continue swimming on the surface of the waves; jetsam is where they sink and remain under water; ligan is where they are sunk in the sea, but tied to a cork or buoy, in order to be found again. When found, such goods may be returned to the owner if he appear; if he do not, they are the property of the Crown."

Flower Sermon. The annual sermon, preached at St. Katharine Cree, Leadenhall St., E.C., by the rector, Rev. W. M. Whittemore, D.D., instituted by him in 1853. The discourse is founded upon some floral subject, in harmony with the occasion.

Folk Lore—originally the lore (learning) of the "folk" or people, i.e. the natural or uncultured classes of mankind as opposed to the

cultured (later literary) classes—is a science the ultimate object of which is the investigation of the primitive mind of man in its various phases towards God and nature. It is thus the handmaid of comparative mythology, and bears directly on psychology and anthropology. Its methods are to collect, collate, and classify all surviving relics of primitive beliefs and superstitions, and to extract the essential and original elements from popular customs, usages, festivals, and games; proverbs, enigmas, saws, and jests; recipes, astrological and weather prophesies; and folk tales and songs. The scope of folk lore is frequently enlarged to include also witchcraft, religious symbolism, and similar subjects; but it is better to restrict the term to traditional lore, and to leave the remainder to the comparative mythologist. The word was first coined by Mr. W. J. Thoms (*d.* 1885), though on the Continent the term *Volkkunde* has been the name of an accepted science since Grimm first wrote, at the commencement of this century. In 1878 a *Folk Lore Society* was established by Mr. Thoms, and it has since published several important collections of folk-tales, etc., and regularly issues a periodical. Considerable interest in F. L. has recently been awakened in America and the Continent. A congress was held in Paris, July '89. President, Mr. Andrew Lang (*q.v.*). Hon. sec., Mr. J. J. Foster, 36, Alma Square, St. John's Wood, N.W.

Football. Although of some antiquity, football was, twenty years back, chiefly confined to our public schools and colleges, and was practically unknown to the general public. Now, however, all is changed; and although the game has been censured as rough and brutalising, and has probably met with more opposition than any other of our pastimes, yet none has grown so rapidly in popularity during the last decade. The great contests under both codes decided during the past year have been as full of interest as ever, and the season of '88-9 will long be memorable as that in which a team of *New Zealand players* first visited England. Unhappily accidents were, perhaps, more frequent; and considerable disappointment was naturally felt by the more keen supporters of the game that another season closed without the decision of any Rugby international match in which England was engaged. Unfortunately the difficulty existing between the *English Union* and the *three sister Unions* remains as far off solution as ever, and there is little or no likelihood of England meeting either Scotland, Ireland, or Wales under the "handling" code during the ensuing winter. The visit of the *New Zealanders* was a decided novelty, and few people were prepared for the intimate knowledge of football displayed by them. They showed that, though by no means a polished team, they had physique, speed, tackling powers, and sufficient knowledge of the science of the game to prove worthy opponents to some of our best fifteens. This was evidenced by the fact that, out of 74 matches played during their six months' tour, victory was gained by our visitors in 49, 20 were lost, and five only were drawn. They scored in all 92 goals and 113 tries, whilst their rivals were only credited with 43 goals and 50 tries. The indulgence of some members of the team in rough play and other malpractices in several of the matches drew forth much unfavourable criticism, whilst

the bad form exhibited by several of the New Zealanders in connection with their match against England at Blackheath necessitated the Rugby Union demanding an apology, which was given. The new rules adopted by the Rugby Union for the prevention of unfair and rough play worked well, though objections were at first raised at placing so much power in the referees. The goal from a penalty-kick, however, was, at the close of the season, deemed too great a punishment, and at the general meeting held in the spring it was decided to reduce its value from three to two points. To compensate in some degree for the absence of international matches, the Rugby Union, as in the year '88, arranged two contests between the North and South of England. The first of these came off at Blackheath on Dec. 15th, under most adverse circumstances as regards the weather. A dense fog enveloped the ground, and at a little distance it was impossible to distinguish individual players. The sides were well matched, more especially the forwards, and the play, so far as could be seen, was much more even than the score. The game ended in the victory of the North by two goals to a try. The return match came off at Bradford on Feb. 2nd, when the North won by three goals to *nil*. What was the nearest approach to an international match in which England was engaged came off at Blackheath a fortnight later, when the representatives of England opposed the New Zealanders, and beat them somewhat easily by one goal and four tries to *nil*. A new fixture, and one which is likely to become very popular, was instituted by the Rugby Union towards the close of the season. It was between the Champion County and the Rest of England. Yorkshire was dubbed the champion county by the Rugby Union Committee, who also selected the fifteen to do battle on behalf of England, and the contest was decided at Bradford on Feb. 23rd. The game was a grand one all round, and resulted in England being declared winner by three goals to *nil*. With the loss of the English contests, the Unions of Ireland, Scotland, and Wales could only play international matches among themselves. The first of these was decided at Edinburgh on Feb. 2nd, between Scotland and Wales. Though scarcely so strong as in the preceding year, when they achieved their first victory over the Scotch, the Welshmen were undoubtedly a very powerful lot; and although they suffered defeat by two tries to *nil*, their performance was a highly creditable one. On the 16th of the same month the Scotch fifteen journeyed to Belfast, to try conclusions with the representatives of the Emerald Isle, the result being in favour of the visitors by a dropped goal to *nil*. The game, however, was much more one-sided than the score would seem to indicate. Swansea was the venue of the third and last of the international matches under Rugby Union rules, and in this contest Wales was opposed by Ireland, the latter winning by two tries. County matches under Rugby rules have been more numerous than ever, and the improvement shown in county football in the preceding year has been on the whole more than maintained. Yorkshire headed the list, and fairly earned the title of champion county, as their fixtures included matches with the strongest counties in England, and they underwent the ordeal with an unbeaten record. They gained victories over Lancashire, Northumberland, Durham, Surrey, Cheshire, Somerset, and

the Maoris, although in the first of the two matches with the New Zealanders, when they by no means had their full strength, they suffered a reverse. Defeat also awaited them in their encounter against the Rest of England, as previously stated. Lancashire, though beaten easily by Yorkshire, were little inferior to former years, and obtained the second place among the northern shires. Northumberland played six county matches, victories and defeats being equal. Durham, as in the previous years, had a strong forward team, but were weak behind the scrimmage, and only obtained one victory. Of the eastern counties Essex proved the strongest, having only once suffered defeat. Suffolk only won one of four matches, whilst, of a similar number, Norfolk lost two, won one, and drew the other. In the Midlands, Northamptonshire and the Midland Counties' Union displayed more vitality than usual. Reverting to the Metropolitan counties, Surrey showed the most energy, and had five engagements, though they were only once successful. Of the other southern counties, Sussex put a fairly strong team in the field, and won three of their four engagements. In the west, Somersetshire was scarcely so powerful as in the previous season. They commenced badly, but displayed greatly improved form as the season advanced, and their only inter-county match lost was that was with Yorkshire. Gloucestershire's best show was made against the New Zealanders, neither of their county engagements ending in victories. The results of the season's engagements between the different counties will be gathered from the following table:—

| COUNTIES. | Matches played. | Matches won. | Matches lost. | Matches drawn. | Points for. | Points against. |
|----------------------------|-----------------|--------------|---------------|----------------|-------------|-----------------|
| Cheshire | 5 | 2 | 3 | ... | 11 | 23 |
| Cornwall | 2 | ... | 2 | ... | ... | 2 |
| Cumberland | 2 | ... | 2 | ... | 5 | 8 |
| Durham | 4 | 1 | 3 | ... | 4 | 15 |
| Devonshire | 4 | 2 | 1 | 1 | 4 | 17 |
| Essex | 5 | 3 | 1 | 1 | 21 | 10 |
| Gloucestershire | 2 | ... | 1 | 1 | 2 | 5 |
| Kent | 2 | ... | 1 | ... | 5 | 12 |
| Lancashire | 6 | 4 | 2 | ... | 36 | 28 |
| Midland Counties | 2 | 2 | ... | ... | 20 | 4 |
| Northumberland | 6 | 3 | 3 | ... | 14 | 42 |
| Norfolk | 4 | 1 | 2 | 1 | 10 | 16 |
| Northamptonshire | 2 | ... | 2 | ... | 1 | 23 |
| Somerset | 4 | 3 | 1 | ... | 22 | 9 |
| Suffolk | 5 | 1 | 4 | ... | 13 | 35 |
| Surrey | 3 | 1 | 2 | ... | 15 | 16 |
| Sussex | 4 | 3 | 1 | ... | 23 | 4 |
| Westmoreland | 2 | ... | 2 | ... | ... | 5 |
| Yorkshire | 6 | 6 | ... | ... | 71 | 6 |

In addition to the above inter-county engagements, Middlesex, Lancashire, and Yorkshire played the New Zealanders and won, while Surrey, Northamptonshire, Kent, Midland Counties (twice), Cumberland, Somerset, Westmoreland, Devon, and Gloucestershire were defeated by the Colonials, and Northumberland drew. Club matches during the year were, if anything, more interesting than in '88. This

was in no small measure due to the greater number of clubs which reached the first rank of proficiency in the game, and the growing tendency of making tours. Oxford had to succumb to Cambridge in the sixteenth annual encounter between the two universities, which came off at the Queen's Club ground, West Kensington, on Dec. 10th. A goal and two tries to nothing was the Cantabs' score, and by this victory the balance of matches has been made equal, each side having won six, while four have been drawn.—The first important match played under the auspices of the Football Association was the annual contest between the two divisions of the country, which came off at Sunderland on Jan. 10th. The game was robbed of much of its interest through the action of the Northern executive excluding from the eleven players who had already attained high honours. Still the Northerners made a bold bid for victory, and were only beaten by two goals to one.—Of the six international fixtures under Association rules, that between England and Wales came first, the match taking place at Stoke-on-Trent on Feb. 23rd, when the Englishmen won by four goals to one. A week later England and Ireland met at Everton, when a one-sided struggle resulted in the success of England by six goals to one. On March 9th, in Ibrox Park, Glasgow, the Irish eleven experienced a more crushing defeat than that inflicted on them at Liverpool. At all points the Scotch outplayed their rivals, who lost by seven goals to none. Scotland was also successful in the international match against England, which came off at Kennington Oval on April 13th, and ended in favour of the Scots by three goals to two. On the following Monday Scotland tried conclusions with Wales at Wrexham, where the home side had rather the better of a drawn game—neither scoring. The Welshmen, however, proved stronger than Ireland, and won by three goals to one.—Of inter-Association matches there was no lack. London, as usual, experienced much difficulty in respect of securing representative teams, though they only had five first-class engagements to fulfil. Opening the season with a drawn game against Sussex at Brighton, the Metropolitan contingent journeyed to Birmingham on Dec. 1st, when the representatives of the local Association won decisively by five goals to none. London also had to succumb to a combined team from the Universities. This contest came off at Kennington Oval, where the Londoners subsequently secured their only victory—against Sheffield. The usual match between London and Glasgow was decided at the latter city towards the end of March, when the Scots gained an easy victory by five goals to one. Sheffield, the oldest of the provincial associations, also had a very unsatisfactory season. Staffordshire, however, displayed remarkably good form, as did Birmingham. Northants also had a very successful season, gaining nine successive victories. In the west, Somerset, like their rivals of the "handling" code, showed the greatest energy in the football field, whilst in the south, Sussex, though displaying much activity, was scarcely so powerful as was expected. Of other associations, Cambridgeshire, Gloucestershire, Hampshire, Middlesex, and Surrey showed no lack of energy. The following table shows the number and results of inter-Association matches played by the principal associations during the past season:—

| ASSOCIATIONS. | Matches played. | Matches won. | Matches lost. | Matches drawn. | Goals for. | Goals against. |
|------------------------|-----------------|--------------|---------------|----------------|------------|----------------|
| Berks and Bucks . . . | 7 | 4 | 3 | ... | 21 | 12 |
| Birmingham . . . | 5 | 3 | 1 | 1 | 20 | 8 |
| Cambridgeshire . . . | 8 | 1 | 5 | 2 | 18 | 26 |
| Derbyshire . . . | 4 | 2 | 2 | ... | 6 | 8 |
| Essex . . . | 3 | 2 | 1 | ... | 7 | 9 |
| Gloucestershire . . . | 5 | 1 | 4 | ... | 5 | 16 |
| Hampshire . . . | 4 | 2 | 0 | 2 | 4 | 2 |
| Kent . . . | 3 | 1 | 2 | ... | 4 | 8 |
| Lancashire . . . | 2 | 2 | ... | ... | 10 | 3 |
| London . . . | 5 | 1 | 3 | 1 | 11 | 14 |
| Middlesex . . . | 4 | 1 | 3 | ... | 8 | 7 |
| Northamptonshire . . . | 7 | 7 | ... | ... | 36 | 13 |
| Norfolk . . . | 4 | 1 | 2 | 1 | 5 | 6 |
| Nottinghamshire . . . | 2 | 1 | 1 | ... | 5 | 3 |
| Sheffield . . . | 5 | 1 | 4 | ... | 8 | 28 |
| Somersetshire . . . | 8 | 4 | 3 | 1 | 25 | 23 |
| Staffordshire . . . | 5 | 3 | 2 | ... | 19 | 11 |
| Suffolk . . . | 5 | 3 | 1 | 1 | 17 | 14 |
| Surrey . . . | 5 | 1 | 2 | 2 | 9 | 11 |
| Sussex . . . | 6 | 2 | 2 | 2 | 14 | 12 |
| Wiltshire . . . | 6 | 3 | 2 | 1 | 13 | 11 |

Although the new conditions under which the earlier stages of the Football Association Challenge Cup competition were decided, certainly detracted from the general interest in the struggle during the first few months of the season, it seemed to invest the competition proper with fresh interest and greater excitement. West Bromwich Albion, last year's winners, were beaten in the penultimate round by Preston North End, whilst the Wolverhampton Wanderers vanquished the Blackburn Rovers. Thus Preston North End and the Wolverhampton Wanderers were left to do battle in the final tie, and the scene at Kennington Oval on the Oxford and Cambridge Boat Race day, when the two teams met, was not one easily to be forgotten. Over 25,000 football enthusiasts surrounded the field of play, and the greatest excitement prevailed. Dewhurst, Goodall, and Thomson scored for the Prestonians, and their opponents failing to score, the Lancashire club won by three goals to none. The Football League, instituted at the close of the previous season, proved very successful, the various matches played under the auspices of that organisation creating the greatest interest until the championship was won. Preston North End, who won the national trophy, headed the list with an extraordinary record, having played its twenty-two matches without defeat, and scoring 74 goals against 15. The Association teams at both the Universities had fairly good seasons. Oxford played twenty-three matches, and of these they won twelve, drew five, and suffered half a dozen defeats. Like their rivals, Cambridge also played twenty-three matches; but they won seventeen, drew five, and lost only one. The annual match between the sister Universities was played at West Kensington, and for the first time in the history of the game the result was a draw—one goal each.—The season of '89-90 promises to be even more interesting than the previous one. Nine international matches have been arranged, and

all the leading counties have extended their list of engagements. Several interesting contests have already been decided under both rules. Under the Rugby code the Midland Counties beat London on Oct. 31st, by a goal to a try, and a week later a fifteen culled from these two teams met and decisively defeated the Western Counties by four goals and a try to a goal; whilst on Nov. 13th a team representing the Metropolis, the Midlands and the Western Counties found little difficulty in vanquishing one representing Oxford and Cambridge Universities by three goals and two tries to *nil*. Yorkshire bids fair to maintain its last season's reputation, and has already defeated Durham, Cumberland, and Northumberland. On Nov. 9th the Lancashire team gained an easy victory over Cheshire, although the Cestrians had ten days previously defeated Westmoreland. Under the Association rules London gives promise of being stronger than they have been for several years. They opened the season by obtaining an easy victory over Sussex on Oct. 20th, although in their second fixture (*v.* Sheffield), when but poorly represented, they were beaten by a goal to love. Middlesex played a drawn game with Kent on Nov. 6th, each side scoring twice; and on Nov. 18th the Corinthians—the famous amateur combination—met and defeated the Preston North End eleven, which was, with one exception, composed of professionals, by five goals to none. Both the Universities appear to be stronger than last year. **The Association—President:** Major Marindin, R.E., C.M.G. (Old Etonians); **Secretary:** C. W. Alcock (Old Harrovians); **Rugby Union—President:** A. Budd (Blackheath); **Secretary:** G. Rowland Hill (Kent County).

Forbes, Archibald, b. in Morayshire '38; ed. at Aberdeen Univ. Subsequently enlisted in the Royal Dragoons. On leaving the army he obtained an appointment on the *Daily News*, for which journal he acted as war correspondent during the Franco-German war. He accompanied the German army through the whole course of the campaign. Later, he witnessed the close of the Paris Commune. He also acted as correspondent for the same journal during the Prince of Wales's Indian tour, and in the Russo-Turkish and South African campaigns. His graphic letters from the scenes of the great battles of the Franco-German war were republished in volume form. In addition to his "Experiences of the War between France and Germany," he has published "Drawn from Life," and a series of sketches entitled "Soldiering and Scribbling." Mr. F. is a popular platform speaker, and has undertaken a most successful lecturing tour through the United Kingdom, the United States, and the Australian Colonies.

Foreign Armies. Under this heading will be found the latest particulars relating to the military power of the countries of Europe, Japan, and the United States.

AUSTRIA. The total strength of the standing army is 267,000, composed as follows: **Cavalry** (35,700)—14 regiments of Dragoons, 16 of Hussars, 11 of Uhlans (Lancers), each regiment consisting of 7 squadrons (6 active and 1 depot). **Artillery** (25,600)—14 regiments of field artillery, each of 15 batteries of 8 guns; 12 battalions garrison (fortress) artillery of 6 companies each (5 active and 1 cadre). **Engineers** (4,600)—2 regiments of 5 battalions each.

Infantry (144,400)—80 regiments of the line, each of 5 battalions (3 active and 3 reserve, with 1 depot battalion); the "Kaiser Jäger" Regiment (Tyrolean Rifles), 7 battalions; and 33 other rifle regiments of 1 battalion each. **Pioneers and Train** (5,200). **Departments**, etc. (23,800). **War strength.**—In case of war the Emperor could put in the field, at lowest computation, exclusive of reserves and garrisons, an army of 1,140,000, with 200,000 horses and 1,720 guns. **Constitution.**—The army is recruited by conscription on the universal liability system; term of service ten years, three with the colours and seven in reserve. By voluntary enlistment, self-equipment, etc., the male adult can commute his three years' active service to one before passing to reserve. The Cavalry is recruited principally as follows: Dragoons from Germans and Bohemians, Uhlans from Poles, Hussars from Hungarians. The infantry and artillery are principally made up of Germans, Slavs, and Hungarians; the rifle regiments are recruited principally from the highlands of the Tyrol, the Styrian Alps, and the Carpathians. The Austrian army possesses no Guards or *Corps d'élite*. See AUSTRIA-HUNGARY, New Army Bill.

BELGIUM. The total strength of the army on a peace footing with the colours, including Gendarmerie, is 46,380 men, 10,160 horses, and 204 guns. **Cavalry** (7,400)—2 regiments of Chasseurs, 2 of Guides, and 4 of Lancers. Each regiment consists of 4 squadrons active and 1 reserve. To the above have to be added the Gendarmerie (1,720 men). **Artillery** (7,900)—made up of 7 regiment—, comprising a total of 34 field batteries of 6 guns each, with 6 batteries in reserve; 48 siege batteries, 3 in reserve; and 3 depot batteries. **Engineers** (1,400)—1 regiment of 3 battalions. **Infantry** (26,300)—Made up of 14 regiments of the line, of 4 battalions of 4 companies each, 3 active and 1 reserve battalion; 1 regiment of Grenadiers, similarly organised; 1 regiment of Carabiniers of 6 battalions (4 active and 2 reserve), and 3 regiments of rifles. **Constitution.**—The war strength is fixed at 142,000 men. Every able-bodied man who has attained his nineteenth year is liable to serve, but substitution is permitted. The term of service is eight years—two years and eight months with the colours. By royal decree (Oct. 25th) it was announced that the Mauser model repeating rifle of '89 had been adopted for the infantry and sappers and miners.

BULGARIA. The peace strength of the standing army is 22,400, as follows: **Cavalry**, 1,400; **Artillery**, 1,740; **Engineers**, 880; **Infantry**, 16,800; **Gendarmerie**, 1,600. The war strength is 32,220, with 102 guns. Besides this the Reserves are estimated at 24,000, and the Land-sturm at 7,200, making altogether 63,420.

DENMARK. The army consists of 34,500 regulars and 13,000 second reserves. **Cavalry** (2,200)—5 regiments made up of 16 squadrons. **Artillery** (4,750) 2 regiments of field artillery of 12 batteries each with 8 guns; 2 battalions garrison artillery of 6 companies each. **Engineers** (620). **Infantry** (27,000)—31 battalions of the line. **Constitution.**—Service is obligatory on all able-bodied men who have reached the age of 22. Terms of service, eight years with the colours and eight in the reserves. The war strength is 49,000.

FRANCE. The army is divided into Four Classes, viz.:—(1) Men who have been fully

trained in Active Army from three to five years. (3) Men who have had one year's training. (3) Men who have only been trained when called out with the Reserve. (4) Men without training (intended for non-combatant duties). The 1st Line consists of Active Army 654,899, Reserve 373,890, total 1,028,789; the 2nd Line—Territorial Army 426,366, Reserve 570,104, total 996,464; giving for the Field Army a total of 2,025,253 men. There are still to fall back upon Classes 2, 3, and 4, made up as follows. Class 2: Active Army 170,062, Reserve 156,354, total 326,416; the 2nd Line—Territorial Army 178,296, Reserve 191,360, total 369,656. Class 3: Reserve 203,940; the 2nd Line—Territorial Army 232,506, Reserve 249,600, total 482,106. Class 4: Active Army 503,940, Reserve 88,374; the 2nd Line—Territorial Army 100,776, Reserve 108,140. The "detail of arms" is as follows:—Cavalry (68,750)—12 regiments of Cuirassiers, 26 regiments of Dragoons, 20 regiments of Chasseurs, 12 regiments of Hussars, 4 regiments of Chasseurs d'Afrique, 3 regiments of Spahis. Artillery (68,760)—38 regiments, comprising altogether 437 batteries; 2 regiments of Pontonniers of 14 companies, 13 companies Ouvriers d'Artillerie and Artificers, 57 companies of Artillery Train. Engineers (11,000)—4 regiments of Sappers and Miners, of 5 battalions each. Equipages Militaires (11,600)—20 squadrons, 12 companies, etc. Infantry (283,500)—144 regiments of the line, each of 4 battalions; 30 battalions of Chasseurs à pied, each of 4 companies; 4 regiments of Zouaves, of 4 battalions; 3 regiments of Tirailleurs Algériens, of 5 battalions; 6 battalions Foreign Legion, 3 battalions of Infanterie Légère d'Afrique. To the above have to be added 18,000 Commissariat, 26,000 Gendarmes, and 36,000 for staff and administration. The French law enacts universal liability to serve, but it is not strictly enforced. By the law of 1872 the total duration of service was fixed at twenty years—five with the colours, four in the active reserve, five in the territorial army, and six in the reserve of the territorial army; but in France the constant changes of government rather militate against the chances of any fixture either of establishment or condition of service, and this has to be allowed for. The total strength of the French army, on a war footing, is fixed at 4,100,000. See FRANCE.

GERMANY. The German Army is in all respects a model of military perfection, and it has formed the basis upon which the military establishments of most of the other European states have been reorganised of late years. It may be useful, therefore, to review the organisation as explaining the advance made by Continental nations generally in the direction of warlike preparations. When France and Prussia were fast friends, in the time of Frederick the Great, the admiration for each other was carried so far as imitation in tactics, but Frederick and his successors fell into absurdities which the French avoided, and the defeat of the Prussian arms in the wars following the Revolution of 1793 was the result. Then it was that the need became apparent for a decided change in the construction and management of the army; and soon a system was adopted which, with constant improvements, has developed into its present dimensions. Recruitment was fixed early in the present century at three years of active service,

two years in the reserve, and seven years in the first ban of the Landwehr, which meant the securing of 300,000 men in the first line, 150,000 in the first ban of the Landwehr, and 150,000 in the second ban, or an effective of 470,000; the standing army being maintained at 130,000. The Crimean War brought to light discrepancies which had never before been seen, which were more and more emphasised in the few following years by the then prevailing excitement in Italy. Here was the opportunity of Kaiser Wilhelm to reform his army, which he readily grasped—at the same time taking into his counsel Prince Bismarck, himself struggling against strenuous opposition in the Prussian Parliament to become a prominent man. In '60, then, this new scheme was effected, and the army was divided into eighty-one regiments of infantry and forty-eight of cavalry. The old Landwehr was done away with, and the effective troops were greatly augmented in numbers. The term of active service was raised to seven years, with four years in the Reserve and five in the Landwehr. By this means the annual contingent reached from 40,000 to 60,000 men, and the entire army, which before '59 was 525,000 strong, now had a strength of 625,000 men, remarkable for its excellent discipline and the celerity of its movements. Six years later, when Prussia contended against Austria, the army placed in the field consisted of 326,000 soldiers, and the short, sharp, and decisive campaign, together with the rapid movement of the forces, spoke to its superiority over preceding armies. Whenever it was felt necessary to scatter the forces to save them from the enemy's fire, it was done without reluctance, and the discipline to which they had been subjected rendered the re-formation a matter of perfect ease. The Franco-Prussian War in '71, although it added lustre to the German Army, gave rise to consideration of further improvement; and since that time various laws have been passed for the purpose of bringing these about. Three years of active service, four years in the Reserve, and two in the Landwehr, are now the terms; while in addition there are five years to be served in the Landsturm; but the latter branch is only used as a "cry of distress" when the standing army and the Landwehr have been found insufficient for the requirements. It includes all the young men between seventeen and twenty, and those who have previously passed through the twelve years required in the other branches. At the beginning of November each year the recruiting into the Landwehr of young men of twenty commences. To facilitate this business the Empire is divided into "regions," each occupied permanently by an army corps, which draws from it in time of peace, as well as in time of mobilisation all its effective. The regions are each divided into seventeen districts, under the control of a similar number of officers. Four districts are expected to recruit a brigade, and ten an army corps. There is a further division of districts into company districts, each in charge of a sergeant-major. These grouped in twos, form eight "circumscriptions" for the recruitment of the Landwehr, and of a regiment of infantry. There is besides a battalion district for the reserve of the Landwehr, to complete the numbers lacking in the less populous districts. The recruiting service for the Guard, consisting of the tallest and finest looking men, is carried out by a commission

consisting of officers specially nominated for the purpose. On a day appointed they meet at certain specified places, and here the young men are required to appear before them. The census reports, of course, give all information as to the names and addresses of inhabitants, and those within the prescribed age are called up, and passed or exempted, as the case may be. It is the duty of another official body to then revise the lists thus obtained, make a report to the Minister, and decide where the new arrivals shall be stationed. Under this system of recruiting, it may readily be imagined there are always more men than necessary to keep up the army strength. As to the term of service, it may be stated that, if the recruit be apt, the full three years are not demanded; two years sometimes suffice, and at the end of that period, if he can pass certain tests, he is granted leave of absence for the remaining year. In the standing army, at the close of three years' service, a further period of four years has to be reckoned with, during which time there are held every year reviews and other manoeuvres, occupying about four months. The second term at an end, the recruit passes into the Landwehr. Here the duties are lessened—the annual review, and a couple of periods of exercise of fourteen days each, being the extent of the demand made. But no one in Germany can consider himself safe from being called upon for military duty until he is past forty-two years of age, unless he be in feeble health. At any time he is liable to a recruitment in the Reserve. If it were possible for Germany to call up every man it has power to do by the various methods of recruitment, it could put into the field an army of 3,200,000 men, made up by 400,000 in the three active classes, 700,000 reserve of recruitment, 500,000 reserve of active army, 600,000 Landwehr, and 1,000,000 Landsturm. The peace effective, however, is only about 401,000, an eighth of this number being non-commissioned officers. The approximate strength of the field and garrison armies when organised for active service, according to the "plan of mobilisation," is—Field troops: 19 army corps, completely equipped, with trams, 714,115 officers and men, 1,938 field guns horsed, 210,539 horses; 9 cavalry divisions, 41,976 officers and men, 108 field guns horsed, 45,577 horses; 18 reserve divisions of all arms, completely equipped, with trams, 311,796 officers and men, 630 field guns, 69,679 horses; miscellaneous formations, including railway and Etappen troops, siege trams (with 720 siege guns), reserves for replacing casualties, foot artillery for fortresses, etc., 216,757 officers and men, 27,640 horses. Total field troops, 1,344,644 officers and men, 2,676 field guns horsed, 353,435 horses. Garrison troops: 18 reserve divisions, equipped with trams for taking the field, 332,170 officers and men, 432 field guns horsed, 59,893 horses. Depot troops, which would remain at the Landwehr battalion districts, available for replacing casualties at the front: 551,939 officers and men, 450 field guns horsed, 33,431 horses. Total garrison troops, 884,109 officers and men, 882 field guns, 86,344 horses.—Grand total of mobilised army (exclusive of the Landsturm) 2,228,753 officers and men, 3,558 field guns, 499,759 horses. The effective mobilised strength of the army in '70 was 1,183,380 officers and men, 250,373 horses, and 2,040 field guns. The order of battle of the army in the field, and the distribution of the

garrison army, is already settled in time of peace; and at the very moment of mobilisation the commanders and staff officers are appointed. One hundred and sixty-one regiments of three battalions go to form the infantry. Each battalion has four companies, numbered from one to twelve. The infantry company has 5 officers, 20 non-commissioned officers, 202 soldiers and drummers, and a few needed for various services, bringing up the aggregate to 244. A regiment's aggregate is 3,189. Besides the 161 regiments named, there are 20 regiments of Chasseurs, with a personnel of 1,055 each. The cavalry, which is divided between the Prussian Guard and the German army, consists of 93 regiments. The latter section has eight regiments of Cuirassiers, 28 of Dragoons, 19 of Hussars, 22 of Uhlans, one of Saxon artillery, one of Saxon Carabiniers, two of heavy Bavarrians, and six of light-horse Bavarrians. The Prussian Guard consists of a regiment of the Corps de Gardes, one of Cuirassiers, two of Dragoons, one of Hussars, and three of Uhlans. The entire cavalry organisation is formed into three categories: the heavy cavalry—having ten regiments of Cuirassiers, one of which is the body, and one the ordinary guard; cavalry of the line—25 regiments of Uhlans; and two of the heavy Bavarrians; and light cavalry—28 regiments of Dragoons, 20 of Hussars, and six of Bavarian light horse. Every regiment has five squadrons, four for the field and one for depot guard, with a colonel, lieutenant-colonel, and a major, with an extra major for commandant; officers and men included, it numbers 648 men, while a division has 4,763 men, 5,107 horses, 18 field pieces, and 107 various vehicles. The Cuirassiers carry the straight sabre and the revolver; the Hussars a curved sabre with steel handle, and a carbine; the Uhlans a sabre, a carbine, a revolver, and a lance 10½ feet long, at the top of which flutters a streamer. The artillery, so greatly admired for their dash, is composed of 37 regiments, furnishing 205 mounted batteries, attached to the cavalry—and six horse batteries—attached to the infantry. The mounted batteries have six 3½-inch cannon; the others use cannon a trifle smaller. Then there are 116 companies of unmounted artillery. It goes without saying that there is an ambulance corps, with physicians, litters, ambulances, nurses, etc., the organisation of which is simply complete. The thoroughness of the military education in Germany is well known, the Empire having nine schools, six of which receive pupils at ten to fifteen years of age, who afterwards finish at either Lichtenfeld, Dresden, or Munich. The studies pursued at all of these three are very severe, and the pupils, even after passing through the preliminary course, are often sent back on examination to receive further tuition. The War Academy at Berlin is the highest of the military academics, but this is open only to lieutenants and captains who have served three years. Beyond all these institutions, which are military in the strict sense, there are other schools for artillery, marksmanship, riding, gymnastics, medicine, and surgery, and veterinary practice. The general staff of officers of the army, at the head of which is Count Waldersee (q.v.), is made up of the officers of the different armies temporarily attached. They form seven divisions, three study at a theatre of war, one occupies itself with the

railroads, one with military history, one with geography and statistics, and the seventh with geodesy and topography. This staff of officers has access to a library which has been in formation for the last seventy years, and includes 60,000 volumes. With such a complete organisation, and such excellent opportunities for preparation in matters military, there can be little wonder that Germany is a nation of soldiers. This it certainly is, and its military atmosphere and bearing is apparent as soon as one enters the country.

GREECE. The peace establishment of the army is fixed at 30,000. Of these 1,500 are Cavalry, 4,300 Artillery and Engineers, and 17,000 Infantry. In case of war, it is understood that the force which Greece could put into the field would amount to fully 80,000 men.

ITALY. The standing army on a peace footing numbers 183,280 men, made up as follows: Cavalry—Comprising 22 regiments, 18,867 men. Artillery—80 batteries, 9,646, and 6 companies of Artillery artificers, 1,174 men. Engineers—4,132. Infantry—102 regiments, 128,000 men; 40 battalions of Bersaglieri, 16,165 men; Train, 2,460 men. Administrative Corps, 3,173 men. According to the new organisation it is computed that the army, including all forces, militia and reserve, will number 2,119,250 officers and men actually available for active employment. The army is organised in 12 army corps, 427,000 under arms, besides 12,000 for Alpine regiments, 100,000 movable Militia and the Territorial army. The system is based on the principle of universal service.

JAPAN. The standing army on a peace footing comprises 38,425 men. In case of war the number can be increased to 131,475.

MONTENEGRO. No standing army. The national army, a sort of Militia, is fixed at 30,000.

NETHERLANDS. The strength of the active army is about 62,000, the approximate numbers being—Cavalry, 4,500; Artillery, 13,000; Engineers, 1,400; Infantry, 42,700. In addition there is a "Schutteryeen" of 114,000 men. The Netherlands possess in addition a Colonial army of about 38,000 men, of whom only 14,400 are Europeans. The home army is recruited partly by voluntary enlistment and partly by conscription.

PORTUGAL. The peace establishment is fixed at 24,000, in the following proportions: Cavalry, 3,700; Artillery, 3,580, with 92 guns; Engineers, 600; Infantry, 15,680; miscellaneous, 440. The war establishment is 120,000 men, with 264 guns. There is in addition a Colonial army of 8,500. Compulsory service is the law, but the rules of exemption are most liberal, a sum of money paid to the Government being accepted as an equivalent.

ROMANIA. The active army is 124,000, made up as follows: Cavalry, 10,000; Artillery, 8,500, with 218 guns; Engineers, 4,000; Infantry, 85,000; staff and general services, 17,000. The reserve army is 35,000, making a total of upwards of 160,000.

RUSSIA. The army on a peace footing gives a total of about 800,000 men. It is made up of the regular army, 457,872; the First Reserve, 180,740; and the Second Reserve, which makes up the number. Besides these there are irregular troops, such as the Cossacks, all of whom between the ages of fifteen and sixty are compelled to render service. The number of Cossacks serving under ordinary circumstances is 56,000. The war strength of the army is fixed

at 2,490,000 men, as follows: Cavalry, 104,000, including 48,000 Cossacks; Artillery, 88,000, with 2,624 guns; Engineers, 35,000; Infantry, 758,000; Riflemen, 53,000; general services, 103,000. These form the active army, numbering 1,137,000. To them must be added the reserve army, 1,064,000; frontier battalions, 41,000; Cossacks, 142,000, with 222 guns. Besides these it is calculated that Russia could on an emergency raise 2,000,000 more men from Territorial Reserve and 1,200,000 from the National Militia, making altogether the enormous total of 5,500,000.

SERBIA. The field army is estimated at 60,000, with 264 guns; Reserves, 65,000, with 135 guns; Landsturm, 45,000; total, 170,000, with 409 guns.

SPAIN. The army, on a peace footing, is 100,000 men with 510 guns. The colonial forces, including militia, are estimated at 236,000. Service is compulsory for the regular army for 8 years, and in the colonies for 4 years.

SWEDEN AND NORWAY. The strength of the standing army of Sweden is about 39,000 men: viz., Cavalry, 4,500; Artillery, 4,700; Engineers, 900; and Infantry about 27,500. The army of Norway consists of about 750 officers and 18,000 men. This number, however, is gradually being increased, and will shortly be raised to nearer 50,000 men.

SWITZERLAND. The strength of the Federal army, consisting of all able-bodied men between 20 and 32, is about 100,000; Cavalry 20,000, Artillery 280 Krupp field guns and 22 mountain guns; that of the Landwehr, composed of all men from 33 to 43, about 80,000—giving a total of about 180,000.

TURKEY. The army is divided into the Nizam, or active army; the Redif, or reserves; and the Mustaphiz, or Landsturm. Under the new organisation the strength is calculated at—Nizam: Cavalry, 37,800; Artillery, 37,800, with 1,512 guns; Engineers, 18,000; Infantry, 468,000—total, 588,600; Redif, 20,400; Mustaphiz (including irregulars), 370,000; making a total of 1,161,600, with 3,148 guns.

UNITED STATES. The strength of the army is put down at 2,200 officers and 24,236 men. Service is purely voluntary. A prize of £120 was offered, Feb. '89, by M. Marcourta, a senator of Spain, for the best essay on the burdens of production caused by taxation necessary to maintain the overgrown armies of Central Europe. This prize is open to French, Spanish, and English competitors.

. In consequence of the constant changes in the armies of Foreign Powers, these figures are liable to variation.

Foreign Exchanges. The Foreign Exchanges are the rates at which the money of one country is exchanged into that of others. For instance, the intrinsic value of £1 sterling in French money is 25'224 francs, and this is called the "Mint par of exchange." In actual business this rate is constantly changing—sometimes it is higher and sometimes lower—and to study the exchanges means to study the causes which bring about these fluctuations. If A wants to transmit £1,000 to Paris, he must either send the gold to Paris and exchange it there into French money, or he must send a cheque drawn on somebody in Paris. It is obvious that the cheque can be transmitted through the post much more cheaply than the gold, and hence every one who wishes to make payments abroad always tries first to buy a

cheque or bill. If there are plenty of cheques in the market the sender may be able to secure the Mint par of exchange, or even more, for each of his sovereigns; but if, on the other hand, cheques are scarce and the demand for them strong, the holders of cheques will naturally sell them more dearly—that is, give less than the Mint par of exchange for the sovereign. The extent to which this fall in the exchange below the Mint par can be carried, however, is limited. It costs about ten centimes per sovereign to transmit gold from London to Paris, so that if the holder of a cheque on Paris, when such cheques are scarce, reduces the exchange to less than 25'12½ francs, or ten centimes below the Mint par, it is obvious that it would be cheaper for a merchant on this side to remit gold than to buy a cheque. The exchange is said to have touched the unfavourable "specie point" when it reaches this level of 25'12½ francs. By the same line of reasoning it is easy to show that the exchange between London and Paris cannot rise higher, when specie payments are maintained in both countries, than about 25'32½ francs, or ten centimes higher than the Mint par. This point is called the favourable "specie point." Thus, suppose that there is an abundance of cheques on Paris in London, and few buyers of them, in such case the holders of cheques would be anxious to give more francs and centimes for the £1 sterling than the Mint par, for otherwise they could not convert their cheques on France into English gold. If, however, holders of English gold demanded more than 25'32½ francs per £1 sterling, it would be obviously cheaper for these holders to send their cheques to France, get them cashed in gold there, and the gold remitted to this side. Another important point which should be clearly understood whilst dealing with the Foreign Exchanges is that the price in London of cheques, say, on Paris, and the price in Paris of cheques on London, always tends to be identical. The two kinds of cheques may seem different things, but in reality they are the same, for they merely represent so much gold. In short, the fixed article dealt with is the number of grains of gold contained in the English sovereign. In practice the prices of French cheques in London and of English cheques in Paris are of course constantly differing, for news as to the future prospects of exchange may reach either city hours before the other. People speculate in exchange in exactly the same way as they do in Stock Exchange securities. It is this circumstance that opens up the question whether, when we have debts to pay to a foreign country, it is better for us to buy cheques or bills on that country and remit them, or to ask our correspondents to draw upon us and sell the cheques or bills so drawn in their own market. For instance, if the cheque on London was quoted in Paris at 25'15 francs, and the cheque on Paris was quoted in London at 25'19 francs, a little consideration would show that buying bills on London in Paris would be preferable to drawing on Paris, whilst buying cheques on Paris in London would be preferable to drawing on London. What we have so far established is:—(1) That the prices of cheques fluctuate according to the laws of supply and demand; (2) That cheques tend to rise above the Mint par if the demand for them be less than the supply, and that they tend to fall below the Mint par if the demand exceeds the supply; (3) That the fluctua-

tions in an exchange, either above or below the Mint par, cannot exceed the cost of transmitting gold, and that the extreme points which the exchanges can touch are styled the specie points; (4) That theoretically the cheque exchanges between two centres, as quoted in the two markets, tend to be identical at all times. We have hitherto, in order to simplify matters, considered most transactions as having been done in cheques. In actual practice this is not the case, bills drawn payable at various dates taking the place of cheques to an immense extent. This introduces two new elements which have their effect upon the rate of exchange. In the first place there is the consideration of the credit of the drawer and acceptor of the bill, and in the second place the question arises what deduction should be made from the price in consequence of the bill, which is bought for ready money, not being payable until a certain date. Presuming that credit is excellent, the difference between the quotation for cheques, and for, say, a three months' bill, represents the rate of interest for three months in the city where the acceptor resides. Thus, London may quote three months' bills, on Paris 25'45 francs, and if the discount rate at Paris is 4 per cent. this would make the short London quotation on Paris 25'19 francs, the difference between these two rates being the interest on £1 at three months. It is, however, the prices of short bills or cheques, and not those of bills which have some time to run, which determines the course of bullion shipments. Most of the primary elements of value affect long and short bills equally, but the rate of interest and the question of credit exercise an additional influence upon the former, and so modify the fluctuations in price as to render them unreliable as indications of the currents of gold. If there is a demand for bills on any particular day, the price of all such bills, whether long or short, will rise—that is the general tendency. If, however, in the city in question the rate of interest were at a high point, it is evident that the price of long bills would not rise in the same proportion as that of short, for the purchaser must bear the discount which has to be deducted from the long bill before it can become available as a short bill; and for any increase in this discount he requires to be compensated by a so much cheaper price. Every quotation of exchange between two places is given by taking the money of one place as fixed, and that of the other as variable. We have, therefore, to make a distinction between the quotations when the English money is giving the fixed amount, and when the English money receives the fixed amount in foreign money. An example of the former is the Paris exchange, in which £1 is quoted as worth so many francs and centimes, and of the latter the Russian exchange, in which the rouble is quoted as worth so many pence. When we talk of the Foreign Exchanges being favourable, we mean that the £1 sterling is worth more francs, more marks, or more dollars. On the same principle, if the Russian exchange were to show a rise, it would in reality be unfavourable to this country, for the rouble would be worth more pence and the sovereign worth less roubles. In countries where the currency is not on a metallic basis, as the Argentine Republic, or where the leading bank of the country has, under certain circumstances, the power to refuse gold in exchange

for its notes, as in France, the exchanges often fluctuate beyond the limits of the specie points, the reason being obvious. The most important centres to this country as regards exchange business are Paris, Berlin, and New York, and the exchanges and bullion movements between London and those centres have always a very powerful influence upon the course of our money market.

Foreign Moneys, and Approximate Value in English.

It should be noted that English money of each denomination is current in most British Colonies, also that the rate of exchange for all coins varies from time to time. Some silver coins vary according to the price of standard silver. Some countries are also labouring under the evils of a forced paper currency. Consult Tate's "Modern Cambist," 21st ed.

Foreign Navies. Subjoined are the latest details as to the naval power of European countries, and the chief Eastern and Western maritime nations:—

AUSTRIA. (See also ed. '88 and '89.) The armoured cruiser of 4000 tons displacement provided for in the appropriations of last year has been commenced, and also a torpedo cruiser of the *Meteor* class called the *Trabant*. The protected cruiser *Frans Joseph* was launched at

the St. Rocco yard, near Trieste, May 18th, '89. The vessel is of steel, with ram bow, complete protective deck, and belt of cellulose. The battery consists of two 27-ton Krupps, mounted *en barbette*, with 3½-inch armour protection. Six 6-ton Krupps are mounted on sponsons, one on each side of the upper deck between the barrette towers, and two on each broadside on deck below, the forward with bow, the after with stern fire. Eleven smaller guns are carried and torpedo dischargers. Estimated speed is 17½ knots with natural, and 19 knots with forced draught. Another vessel of this type, now building, has been given the name of *Kaiserin Elisabeth*. There are but two other modern armouredclads in the Austrian fleet—the *Kron Prinz Rudolph* and the *Kron Prinzessin Stephanie*, and they would be more correctly described as armoured cruisers. Their protection consists of a belt of steel nine inches thick, with protective deck and shields for all guns. In torpedo craft Austria maintains the position which the possession of such fast and fine vessels as the *Panther* and *Meteor* gave her. In the end of '88 two vessels of this class, the *Komet* and *Blitz*, were launched at Elbing, Prussia. Their estimated speed is 20 knots. The *Planet* also was launched from Palmer's yard at Jarro, on June 25th, '89. Her dimensions are: length 210 feet, beam 23 feet, depth 13 feet, and displacement 480 tons. The *Trabant* is now building at the same establishment. The Austro-Hungarian Government is said to be desirous of establishing a flotilla on the Danube consisting of 12 monitors and some small cruiser, and that the naval section of the War Office is preparing a plan for the construction of docks and wharves at Budapest, with a fortified ship-building establishment. The chief naval port of Austria-Hungary is Pola. It occupies an excellent position for the defence of the Istrian coasts as well as of Fiume and Trieste. The arsenal was established in '56, and all repairs to the fleet are carried out there; other ports are Trieste, Sabenico, Gravosa, and Cattaro.

BRAZIL. The Brazilian Government, it is stated, has ordered two 16-knot cruisers and three 11-knot gunboats in England. The former, of 2200 tons displacement and 270 feet length, are to have steel belts. The gunboats are to be between 500 and 700 tons displacement. In the *Aquidalian* and *Riachuelo* Brazil already possesses two armoured cruisers of good quality; these, however, are the only vessels in her numerous navy which would be of use outside her ports. The remainder of her ships are old or of insufficient strength and speed; many of them, however, are capital vessels for coast or river work. The principal arsenal is at Rio Janeiro, where there is a good naval school. There are four smaller yards. The personnel consists of 350 officers and 5000 seamen.

CHILI. The commission appointed in '87 to determine the naval requirements of this State have decided to have built in Europe one 6000-ton armoured ship, two fast cruisers, two gunboats, and two torpedo vessels. The three first are to be built by the Société des Forges et Chantiers de la Méditerranée. The armoured ship is in length 326 ft., beam 60 ft. 8 in., mean draught 21 ft. 10 in., with a displacement of 6901 tons. The armament consists of four 24 c. 9.45 in. B.L. in barbettes, and eight 12 c. 4.75 in. B.L. The guns are arranged on the French plan, two being placed in sponsons, one on either beam, and two in high barrette towers, with forward

* Subject to fluctuations.

and aft fire; the smaller guns are placed in turrets on fore-castle and poop. The protection for the hull is a complete steel water-line belt, over 6 ft. 5 in. wide, with maximum thickness of 11½ in., complete steel deck and light central redoubt 3'94 in. thick, and 134 ft. 6 in. long, giving the appearance in plan of a box battery. The cost is £391,000. The protected cruisers are 268 ft. 4 in. length, 35 ft. 9 in. beam, in draught 14 ft. 5 in., and displacement of 3080 tons. The guns are four 15 c. 5'91 in. B.L., and two 12 c. 4'72 in., with smaller kinds. The contract speed is with natural draught 17 knots, and forced draught 19 knots. Total horse power 3550 and 5400; four 3-furnace boilers supply the steam, and horizontal triple-expansion engines work twin screws; no sail power. Thin protective decks with cellular belts and sheathing is contracted for. The same contractors will build the two gun-vessels of about 800 tons displacement each. Two torpedo gunboats of 735 tons displacement, *Sharpshooter* type, are to be built in England at Laird's yard, Birkenhead.

CHINA. (See also ed. '88 and '89.) No new vessels have been added to the Chinese navy since '88. It now consists of about 50 ships, including two armoureds of 7000 tons, two armoured corvettes, four armoured cruisers 2500 tons each, two protected cruisers 2200 tons each, four partially protected cruisers of 1400 tons displacement, and six fast unprotected steel cruisers. A scheme has been drawn up and approved for establishing an armed flotilla on the Songari river. It is proposed that this flotilla shall consist of one large gunboat, with two guns, of two medium-sized gunboats, each with two guns, and of nine small boats, with one gun each. The headquarters of the flotilla will be at Sansing, Altchuc, and Petuna. The Dockyard at Port Arthur is rapidly progressing towards completion, and fort armed with heavy guns are to be constructed at Keelung, Tamsin, Takow, and on the Pescadores; 31 steel guns have been shipped from Elswick for this work.

DENMARK. (See also ed. '88 and '89.) The building programme for the Danish navy comprises a small ironclad for coast defence similar to the *Hvitfeldt*, and some five-and-twenty torpedo boats. The result of the trials of the protected cruiser *Valkyrien* have not yet been made public.

FRANCE. (See also ed. '88, '89.) The most important of the Continental navies, its standard of strength has been fixed by a Parliamentary Committee as equal in numbers to the two most powerful navies of Continental Europe; England's standard being a fleet superior to a combination of any two of the Continental navies. The fleets of both navies are below the standard thus fixed, but of the two the maritime strength of France approaches more nearly to its ideal proportions. Although several successive ministers have followed one another to the Marine Bureau since the present British Board of Admiralty took office, the policy of progressiveness has little altered, and reforms of all kinds have been pushed on. Under the energetic management of Admiral Krantz, however, who took office as Minister of Marine in Jan. '88, and continued to hold it with the exception of a couple of months, when Admiral Juarez superseded him in Feb. '89, until Nov. '89, still greater activity has been displayed in every department. More ships have been put afloat, the personnel has been in-

creased, and large sums for the navy have been granted. Owing to a difference of opinion on the question of the superiority of civil over naval control in Tonquin, Admiral Krantz resigned his portfolio in Nov. '89, and was succeeded by M. Barbey, a retired naval officer, who has had previous experience in this office, having succeeded Admiral Aube in '85. He promised to follow the plans of Admiral Krantz. France has afloat 15 powerful and effective armoureds, the two latest additions being the *Baudin* and *Formidable*. They have complete belts of armour from 20 to 21 inches thick, and armoured shafts to barbette towers placed one forward, one aft, and one in the centre of the ship. These towers are plated with 16½ inches of armour, and are each armed with a 75-ton gun. The displacement of these vessels is 11,250 tons. The *Caiman* and *Requin*, twin ironclads of 7000 tons, also carrying 75-ton guns, have during the year been completed at Toulon and Brest, but they have not yet made their trials. Five ironclads of the older programme are still under construction; the *Hoch*, of 10,480 tons, which should be completed this year at L'Orient, the *Marsouin*, of the same displacement, is to be completed at Toulon in '90. The *Neptune*, at Brest, and *Magenta*, at Toulon, of 10,480 tons, in '91, and the *Brennus*, of 9780 tons, in '93. The heaviest guns carried by ships are of 52 tons. Of the eight armoured gunboats of 1600 tons displacement, each mounting one 28-ton gun, the *Grenade* and *Phlegon* have been launched, and the *Syr* is the only one left on the stocks. The new construction includes four coast defence armoureds of the *Furieux* type, of which one, to be built at L'Orient, has been named the *Trehouart*. These ships will be of about 6000 tons displacement, length 279 ft., beam 58 ft., and draught of water 24 ft. They will carry 22-ton guns in turrets, have an estimated horsepower of 7500, and speed of 16½ knots. The thickest armour is 18 inches. They are to be completed by '96. Three of these vessels will be built by contract. As an answer to the belted cruisers, which are becoming somewhat more popular, five 20-knot steel-clad frigates are to be constructed; the *Dupuy de Lôme*, at Brest, of 6,000 tons, and four others; the *Bruix* at Toulon, *Charnier* at Rochefort, and two by contract. The decks and sides of these ships are to be well covered with 3½ to 4 inches of steel, cellulose and coal will also be used as protection against quick-firing and high explosive shells. The dimensions of the *Dupuy de Lôme* are 374 ft. in length, 52 ft. beam, 23 ft. draught, and 6290 tons displacement. She will carry two 16-ton guns, and six 3·9 ton guns, beside smaller artillery. The four lighter ships, of 4700 tons, will also be armoured with 3½ to 3·9 inches of steel on side and barbette; their armament will consist of two 16-ton guns in the barbettes, and six 3·2-ton guns in a steel superstructure between the barbettes; smaller guns will also be carried on the superstructure and in tops. The estimated speed is 14 knots at economical rate, 20-knot full power and forced draught. Of the new cruisers, the *Cecille*, built by the Société des Forges et Chantiers de la Méditerranée, made her trials in April and May. They were only preliminary. The contract calls for 19 knots, and premiums will be paid or forfeits exacted if the speed rises above or falls below this amount. With 92 revolutions 17·6 knots was obtained early in the year, when

the trials were postponed to effect certain alterations and change the type of propeller. The *Tage* is also ready for her trials. The *Forbin*, mentioned last year, has been tried, she was built by the Société des Ateliers et Chantiers de la Loire. With ordinary draught a speed of 15.7 knots was obtained, and with forced draught 19.8 knots. Further trials are to take place. The following cruisers have been launched during the year 89 — *Jean Bart*, *Lalande*, *Surcouf*, *Côsmos* and *Davoust*. The construction of the *Suchet*, a sister vessel to the last named cruiser, is reported to have been stopped in November. A small gunboat, the *Sentinelle* was lost on the African coast in February. French torpedo-boats are of very diverse types. Fifty-one boats of the 35-metre type were either built or in various stages of construction when, in March, two sad accidents took place. No. 102 and No. 110 of this type capsized, and in the latter case was lost with all hands. The whole series have therefore been laid up until some alteration can be made in their construction. Fourteen 34-metre boats of quite different design are now building, and are to be delivered in '90. Four larger boats, *L'Azile*, *L'Audacieux*, *L'Avant-Garde*, and *L'Alençur*, have been launched, and several more of these sea-faring boats are in various states of completion. In addition, ten of 118 ft and thirty of 112 ft in length, are to be built in private yards. Progress has been made with the scheme of coast defence. The protection works at the naval ports

are begun, at Calais, Bordeaux, and elsewhere, the docks are being completed. Dunkirk is to be made a 4th-class naval port, with torpedo shelter, and refuges for these craft have been made at Leyardreux and St Germain. The works at Calais and Verdun Fort, near Bordeaux, and other places, have been re-armed. Both the Channel and Mediterranean squadrons have been augmented by mobilisation of the reserve, and exercised at manoeuvres, the series of these in the neighbourhood of Toulon and Nice being most complete. Nineteen battleships and a proportion of cruisers and small craft took place in these evolutions. The Minister of Marine claims that the navy in the Mediterranean can be reinforced in forty-eight hours by twenty-one semicircular vessels, of which five are armoured, with their just proportion of cruisers and smaller vessels.

GERMANY (See previous eds.) Under the reorganisation of the German Admiralty, the direction of the service is now vested in Vice Admiral von der Goltz, Naval Commander in Chief, and Rear Admiral Heussner, Naval Secretary. The strength of the navy now stands thus — Seagoing ironclads 12, armoured coast defence vessels 14, cruisers 22, despatch vessels 7, gunboats 3, training vessels 10, special service

vessels 10, and torpedo boats 120. The building programme for the next five years contemplates an increase of 28 vessels, and the money has been voted by the Reichstag. The vessels to be laid down are (a) 4 first class battle ships in 89-90, and finished by '92-93, the displacement between 9000 and 10,000 tons. (b) 9 armoured coast defence vessels in addition to the one hitherto called *O*, now called the *Siegfried*. The

Rapid-firing guns and torpedoes.

new ones will be laid down as follows: *P* and *Q* this year, and finished '91-92; *R* and *S* in '90-91, and finished '91-92; *T* and *W* '91-92, and finished '92-93; *V*, *W*, '92-93, and finished '93-94; and the final one, *X*, laid down and finished in '94-95. These vessels being chiefly for use in the shallow waters of the German coast and canals, the draught and speed and coal capacity

are comparatively small. They are to carry heavy guns in tow sponsored barbettes, one on either side forward, and one high barrette amidships aft. The armoured belt will completely encircle the ship. (c) Seven first-class protected cruisers of the *Irene* type in addition to one now building: three, *J*, *K*, and *L*, will be laid down in '90-91, and *N*, *O*, *P*, the next year. All are to be finished by '95. (d) No small torpedo vessels are to be built this year. In addition to this new programme that of last year is being carried out. The work, therefore, in hand is the ironclads *A* and *B* by the Vulcan Co., Stettin, *C* at the Germania Works, Kiel, *D* at the Imperial Dockyard, Wilhelmshafen. Coast defence vessels *P* and *Q*, the Weser Co., Limited. The cruiser *D* (*Sperber* class), Imperial Dockyard, Kiel. Cruiser *H*, Germania Company. Two torpedo scouts and 16 torpedo boats at Schichau Works, Elbing. It is estimated that Germany will possess 165 torpedo boats by next year. Very early in the year the German navy sustained a terrible loss, the like of which was not even equalled by the loss of the *Grosser Kurfürst* in '78. A squadron consisting of the *Adler*, *Olga*, and *Eber* were at Samoa when a hurricane broke over the islands, and all three were totally lost, with 9 officers and 87 men. The greatest sympathy was expressed by the British navy with their brother seamen in this sad disaster. At the time of the British mobilisation (9.11) a German squadron accompanied the *Kaiser* to our waters, including among its number the new cruiser *Irene*, in command of which came Prince Henry of Germany, who had been made a captain in February. The same fleet afterwards accompanied the Emperor to the Mediterranean, where his Imperial Highness visited the Italian King at Genoa, was presented at the royal wedding at Athens, and then visited the Sultan at Constantinople. A German squadron, under Admiral Dimhouth, also co-operated with our English ships upon the East African coast, from Dec. '88 to Oct. '89. The following is the distribution of the naval force for '89-90. Cruising Squadron, 1 frigate, 3 corvettes; West African Station, 2 cruisers, 1 gunboat; East African Station, 2 cruisers; Asiatic Station, 2 gunboats; Australasian Station, 1 cruiser, 1 gunboat; Mediterranean Station, 1 ship; School Squadron, 4 frigates; Evolutionary Squadron, 4 armoured ships, 1 despatch boat; Reserve Squadron, 2 armoured ships, 1 armoured cruiser, and 2 torpedo division boats. Surveying, 2 vessels, North Sea fisheries, 1 vessel, Experiments, 1 vessel. Trial voyages, 1 armoured, 1 cruiser, and two despatch vessels.

GREECE. Three second-class ironclads were ordered for this navy in France some little time back, and are nearing completion. One, the *Hydra*, was launched at the Société des Ateliers et Chantiers de la Loire (St. Nazaire) on May 15th. The vessel is built of steel, has a ram bow. Her principal dimensions are—length, 234 ft., beam, 51 ft. 10 in., depth 29 ft. 8 in., and displacement 485 tons. The battery is comprised of two 27 c. 10 $\frac{1}{2}$ -in. B.L., of 36 calibres in barrette towers, one on each side, on top of an armoured casemate in forward part of the ship, and one of 30 calibres, in a circular armoured barrette aft; four 15 c. 5 $\frac{1}{2}$ -in. B.L., are mounted in the four corners of the casemate, and 1 in barrette above it, and between the heavy guns. There is an auxiliary battery and torpedoes. The engines are to develop 6700 I.H.P. under forced draught, and give a

maximum speed of 17 knots. Protection is afforded by a complete water-line belt of steel 11 $\frac{1}{8}$ in. in maximum thickness, tapering to 4 $\frac{1}{2}$ in.; a casemate, nearly rectangular in shape, with 13 $\frac{1}{2}$ in. of armour, and 11 $\frac{1}{8}$ in. on the aft barrette tower. The lower, or complete protection deck, is 1 $\frac{1}{2}$ in. steel, the deck above the armour belt 2 $\frac{1}{2}$ in., cellular subdivisions, coffer-dams, and coal armour are also employed to give protection. The two other vessels are building by the Société des Forges et Chantiers de la Méditerranée, at Granville, and one of them, the *Spessia*, was launched Nov. '89.

ITALY. (See eds. '88, '89.) The estimates for '89 make provision for the completion of the three first-class battle-ships, *Morisini*, *Doria*, and *Umberto*, and the *Fieramosca*, *Montebello*, *Monsambano*, *Confienza*, *Volturno*, and *Carlotone*. The value of the fleet on July 1st, '89, was £13,599,196. Two first-class ships, the *Sicilia* and *Sardegna*, and eight other vessels, are in hand. The following construction was authorised: one second-class protected ship, four torpedo cruisers, a gunboat, and several additions to the torpedo flotilla. £1,110,000 was to be spent in shipbuilding, £880,000 being ordinary, and £230,000 extra expenditure. Out of the extraordinary vote, amounts are also to be spent on the new dockyard at Taranto, the Maddalena fortifications, and for other coast defences. It is probable that a battle-ship of 13,000 tons will be laid down this year, unless the failure of the Elswick 110-ton guns prevents it. The cruiser above mentioned is to be called the *Marco Polo*. The four *Dogalis* are the *Lombardia*, *Liguria*, *Etruria*, and *Umbria*. Of the six *Tripolis*, four have been named the *Aretusa*, *Minerva*, *Urania*, and *Parthenope*. The steam trials of the *Ruggiero di Lauria*, an 11,000-ton battle-ship, took place in April '89. With the net draught the I.H.P. was 8200, and speed 15 $\frac{1}{4}$ knots; with forced draught, the maximum I.H.P. 11,000 and the maximum speed 17 $\frac{1}{2}$ knots. The ship to which considerable attention has been drawn is the protected cruiser *Piemonte*. This ship was designed and built at Elswick as a speculation, and bought by the Italian Government. She is a steel built cruiser of the following dimensions: 300 ft. long, 38 ft. broad, and 15 ft. mean draught; she has a protective deck, which is 1 in. thick in the middle and 3 in. thick on some parts of the slopes. Under this deck is the machinery, which consists of two sets of vertical triple expansion engines. The stroke of these delicate pieces of mechanism must be very short, as the depth under the deck cannot be much more than the draught, 15 ft.; it rests also right upon the outer skin of the ship: in fact, everything has been sacrificed to speed. In stowage, protection, and armament she compares very unfavourably with several of H.M.'s cruisers. With natural draught a H.P. of 7500 and a speed of from 19 to 20 knots can be obtained; with forced draught the maximum I.H.P. was 12,980, speed 22 $\frac{1}{2}$ knots. The armament of this vessel consists almost altogether of rapid-firing guns; but the efficiency of these guns is a subject of dispute, and the failure of the *Victoria*'s guns, designed and built by the same firm, seems likely to cause guns of any nature which cannot be worked by hand to be discredited. Two 530-ton gunboats, the *Castore* and *Pollux*, built at Armstrong Yard, at Pozzuoli, near Naples, to carry a 120-ton each, have had their trials.

JAPAN (see eds. '88, '89). The programme '88-93 is being carried out, by which 15 vessels and 30 torpedo boats are to be added to the navy. One of the two coast defence vessels, building at Lafeyne by the Société des Forges et Chantiers de la Méditerranée, was launched in July. She is called the *Itsukusima*, and her principal dimensions are: length, 295 ft.; beam 50 ft.; draught, 21 ft.; and displacement, 4,140 tons. The proposed H.P. and speed are: natural draught, 3,400, and 14 knots; forced draught, 5,600, and 16 knots. Her heaviest gun is a 12-in. B.L. A despatch vessel, called the *Yocuyama*, was launched at Yokosuka early in the year, and the *Takao*, a small cruiser of 1,764 tons, from the same yard.

NETHERLANDS. (See also eds. '88 and '89.) The Dutch Chamber adopted the naval budget in December last, authorising the construction of a small armoured monitor for service in the Indian Netherlands. The Minister of Marine has drawn up a programme asking for 4 armoured-clads and 16 T.B. The firm of Jarrow are building a torpedo boat for the Dutch navy on the lines of our No. 79, and the *Empang* built in '87; on her official trips this vessel was reported to have made from 22'8 to 24 knots.

PORTUGAL. (See also previous editions.) No addition has been made to the naval forces of this power. Admiral Linhares, the Minister of Marine, has, it is reported, visited this country recently for the purpose of obtaining information, with a view to an increase of the fleet. The few vessels completing are very small, and the annual naval estimates are about £400,000.

ROMANIA. (See previous editions.) The Government have recently augmented their small navy by the addition of three vessels,

built by the Thames Ironworks and Shipbuilding Co., Blackwall. The vessels are named after three rivers—viz., the *Olut*, *Siretul*, and *Bistrita*—and are of the following dimensions: length between perpendiculars, 100 ft.; beam, 13 ft. 6 in.; draught, 6 ft.; speed, 11 knots natural draught, and 13½ knots moderate forced draught; indicated power for 11 knots, 160 horses; coal consumption in six hours' trial, 1'97 lb. per horse per hour; and with power for 13'2½ knots, 2'06 lb. per horse per hour. These vessels carry 1'87 mm. and 2'47 mm. Hotchkiss machine guns, and will prove very useful vessels at the mouth of the Danube. They left the Thames in company on Aug. 12th, and arrived at Galatz on Aug. 31st, coaling at Gibraltar and Malta; and, after running speed trials for the satisfaction of the authorities at Galatz, were taken over, not a single hitch occurring throughout.

RUSSIA. The advent of a new Russian Minister of Marine appears to have been the signal for increased activity in the department under his control. The Kundishev Volodin Shipbuilding Company at Nicolaieff have received an order for a new ironclad to be called the *XII. Apostles*. The Franco-Russian Company are building an enlarged *Alexander II.* called the *Navarin*; and at the Admiralty works the *Chang-ko*, so named in honour of the first naval victory obtained by the Russians over the Swedes in 1714, has been laid down. Her dimensions are: length, 380 ft.; beam, 68 ft.; draught, 21 ft.; and displacement, 6,600 tons. In the same yard the *Grosidetski*, an armoured gunboat of 1,500 tons, is also building. At the Baltic works an armoured cruiser (improved *Pamyat Asova*) is to be built; and a new Imperial yacht, the *Polar Star*, is already in

hand—displacement 3600 tons. The *Katarsky*, fast torpedo cruiser, is building at Elbing, in Germany, and four torpedo gunboats at Abo. The *Emperor Nicholas I.* was launched on June 1st, '89, nameday of the Grand Duke Alexis, Admiral-in-chief of the Navy. Her battery comprises two 12-in. 50-ton B.L., four 9-in.; eight 6-in. and two 4-in., all 35 calibres long; 18 machine guns complete the auxiliary battery, with 7 torpedo discharge-tubes. The *Admiral Koniloff*, built at St. Nazaire, made during a trial with natural draught, 17½ knots, and forced draught 18½ knots. The new flagship in the Pacific, *Admiral Nachimoff*, has relieved the *Dmitri Dinskoi*, and has since been ashore at Vladivostok. The damage was slight, but she was docked at Yokosuka, Japan. The *Nachimoff* is 15 ft. longer, 1 ft. less beam, 1 ft. less draught, 1 knot faster, carries 4 inches thicker armour on her turrets, two in each turret instead of one only, 170 tons less coal, and is 600 tons less displacement than the British flagship on the same station. The following vessels are to form the Pacific Squadron: *Koniloff*, *V. Monomach*, *Nachimoff*, *Pamyat Azova*, *Krejin*, *Rasloynik*, *Digite*, *Bobir Manjora*, and *Sevovitch*. The Mediterranean Fleet comprises the *Minime*, *Zaporofit*. The *Vachtina*, built by Harthorn, Leslie, & Co., and launched in April, is the eighth cruiser of the Dobrovolnoi or volunteer

fleet trading between the Black Sea and the East. Her speed is 18 knots. The defences at Vladivostok have been largely pushed ahead during the past year, over five million roubles having been voted for this purpose. The works at Sebastopol, Novorossiask, and Nicolaief in the Black Sea have also been added to, and for the future the Baltic Fleet will winter in the more southern ports, which in the spring are earlier free from ice than Cronstadt. The *Sinope* made her trials on Nov. 30th, the thirty-fifth anniversary of the battle of Sinope, an event celebrated by the surviving officers at Sebastopol. It is reported that, in consequence of the increase of the English, French, and German fleets, 120,000,000 roubles are to be spent on the Russian navy for the purpose of providing ten new protected cruisers. In June a grand review of the men-of-war recently relieved from abroad was held in presence of the Tzar. The Baltic naval manoeuvres took place in August, and in November a partial mobilisation of the naval reserves took place in the Black Sea. This is the first attempt at mobilisation on the system in vogue in other countries. The reserves are now to be called out annually for six weeks' active service. Russia still adds to her torpedo boats, and orders have been placed with Schichau, at Elbing, at Yarrow, and on the Thames, in addition to those building in Russia.

Battle-ships, Cruisers, and Torpedo Craft of the Russian Navy building or ordered.

SPAIN. (See previous ed.) Of the six armoured cruisers of 7000 tons, one is to be built at Ferrol, and her keel was laid in March, the other three by contract by the Rivas and Palmer Co., of Bilbao. Speed 18 knots natural, 20 knots forced draught. Trials of the *Pelayo*, armoured, have given a maximum speed of 16½ knots, and of the *Christabel Colon*, cruiser, 15 knots. A small gunboat, the *Pas*, was lost on June 15th.

SWEDEN AND NORWAY. (See previous ed.)

TURKEY. (See previous ed.) No new vessels have been added to this navy recently; a few small craft are being built, and two armoured vessels are in hand in the public yards. One or two ironclads have been docked at Malta, and in consequence of the German Emperor's visit in October '89, several of the vessels were partially renovated and put in order, but nothing greater has been done to rehabilitate the navy.

UNITED STATES. (See also previous ed.) The increase in this navy continues, although a change of President and party in power has taken place, and Mr. Tracey has succeeded Mr. Whitney as Secretary of the Navy. By the Naval Appropriation Bill, '89, the construction of the following ships was authorised—One first-class armoured cruiser of 7500 tons, one first-class protected cruiser of 5300 tons, two second-class protected cruisers of 3000 tons each (Nos. 7 and 8), three second-class partially protected cruisers of 2000 tons each (Nos. 9, 10, and 11), one armoured steel monitor, one cruiser of *Vesuvius* type, two gun-vessels of 800 to 1200 tons, and one ram for harbour defence. The coast defence vessel (No. 1) authorised in '87, is to be built at the Union Works, San Francisco, California. The ships launched are the *Baltimore*, *Petrel*, and *Philadelphia*. The *Vesuvius*, *Yorktown*, *Charlestown*, and *Baltimore* have made trials. Although, for several reasons, the *Vesuvius* is not likely to

be a success as a pneumatic dynamite gun-vessel, her speed trials were most satisfactory, averaging 21·6 knots. The maximum speed of the *Yorktown* is 17·2 knots, of the *Charlestown* 18·2 knots, and of the *Baltimore* 21 knots. The

loss to the American navy by the sad catastrophe at Apia was not so severely felt as by the Germans, for the vessels were none of them new. The present shipbuilding programme will be seen by the annexed table:—

Battle-ships, Cruisers, and Torpedo Craft of the U.S. Navy building or ordered.

Foreign Office. The minister responsible to Parliament for this department is the **Secretary of State for Foreign Affairs**. He recommends persons to the Crown for appointment as ambassadors, ministers, and consuls to represent the nation abroad; he negotiates treaties with other states, either personally with foreign ministers in London, or through British ministers at foreign courts; and he superintends generally all our transactions and relations with other states. The protection of British subjects abroad who may require it and the issue of passports are among the departmental duties. Valuable information as to trade abroad is obtained by the commercial branch of the department through British consuls abroad, and published periodically. See **SECRETARY OF STATE, MINISTRY**, etc.

Forests of Europe. According to the returns recently issued by the French Ministry of Agriculture, the total area of Europe laid out in forest (exclusive of Turkey, Bulgaria, Bosnia, and Herzegovina, omitted in the official statement) is set down at 286,989,000,000 hectares (about 708,862,000,000 acres). Thus about 28·7 per cent. of the total area of Europe is forest land. **Great Britain and Ireland** has 4 per cent of its surface, amounting to only 0'036 hectare, or 0'089 acre—i.e., considerably less than the tenth of an acre to each inhabitant. **Denmark** has 4'8 per cent., or 0'09 hectare to each inhabitant. **Portugal** has 5 per cent., or 0'11 hectare to each inhabitant. **Holland** has 7 per cent., or 0'05 hectare to each inhabitant. **Russia in Europe** has 200,000,000,000 hectares—

i.e., 37 per cent. of its whole area, or 3·37 hectares to each inhabitant. **Sweden**, with 17,569,000,000 hectares of forest, has 39 per cent. or 3'84 hectares of forest to each of its inhabitants. **Norway**, with 24 per cent., has 4·32 hectares per inhabitant. **Hungary** has 20 per cent., or 0·58 hectare of forest to each inhabitant. **France**, with 9,888,000,000 hectares of forest, or 17'7 per cent., has 0'25 hectare of forest to each of its inhabitants.

"Forma Pauperis." Formerly a person who had a just cause of action, but had no money to pay costs, had counsel assigned him on making oath that he was not worth £5. Any person can now sue in *forma pauperis*.

Forms of Address. See **ADDRESS, FORMS OF**.

Forth and Clyde Ship Canal. In the early part of '89 it was announced that a proposition was on foot to improve the existing canal between the Clyde and the Forth, to admit of the passage of ocean-going ships. The canal is 35 miles long, from Bowling on the west to Grangemouth on the east, there being a branch of 2½ miles to Port Dundas north of Glasgow. Rising 156 feet, there are 39 locks, which are short in size, and the depth of the canal is only about 9 feet. The cost of the necessary improvements is estimated at from 1½ to 2 millions sterling, and it was considered that there should be no difficulty in raising such a sum in view of the advantages to be gained. The Caledonian Railway Co. owns the canal. A meeting was held at Edinburgh on Nov. 20th

to consider a report and plans prepared by Messrs. D. and T. Stevenson, C.E., as to the best route between the two estuaries. A resolution was adopted in favour of the ship canal being constructed, and a suggestion was made that in view of the naval and military advantages to be obtained, the Government should take up the question; and a committee was then formed.

Forth Bridge. The greatest work of its kind in the world. The construction is still in progress. The main feature will be the extraordinary spans, for a rigid structure, of a third of a mile in length, each of which is made by two cantilevers of 680 feet long, united by 350 feet of girder. When finished the structure will carry the railway high above the sides of the valley of the Forth, the piers indeed being nearly the height of St. Paul's Cathedral. Sir John Fowler and Mr. B. Baker, C.E., are the engineers, and the work has progressed from the first without serious mishap. It may be added that it is calculated that the wind pressure will not be more than 56 lb. per foot, amounting to 2,600 tons on one span, and the rolling load 600 tons, not more than two trains being allowed on any part of the bridge at the same time. It is considered that these stresses are far more than provided for. The work was continued with untiring energy throughout '89. The cost of the bridge up to Dec. 31st, '88, was £2,588,328. On Feb. 14th, '89, a fire took place at the works, a naphtha lamp exploding in the engine-house on Inchgarrie Island. The engine-house, time-office, smithy, fitting-shops and painting-shops were all burnt down. Speaking to a gathering of the representatives of several railway companies at Sheffield, on June 1st, '89, Mr. Lees Murgatroyd, C.E., gave some interesting particulars about the bridge. He said that 42,000 tons of steel had been used, 12 caissons larger than the largest gasometer had been launched in the same way as war-ships and turned into position, while upwards of 8,000,000 rivets had been used,—these placed end to end would reach from Edinburgh to France. At the half-yearly meeting of the Company at Edinburgh, on August 20th the chairman (Lord Colville) said the bridge was approaching completion, and the directors hoped to be able to walk over it in October, while the opening for minerals and goods traffic was expected to take place early in '90.

"Fortnightly Review," so named from its having at first been issued twice a month. Founded 1865. First editor Mr. G. H. Lewes, succeeded by the Rt. Hon. John Morley, M.P. (1867-82); Mr. T. H. S. Escott (1882-85); present editor Mr. Frank Harris (1886). Originally a philosophical Radical review, it has now assumed a wider scope, discussing all social and political questions from an independent point of view, and giving occasional reviews of the leading books. *Offices*, 11, Henrietta Street, Covent Garden.

Fourth Estate, The. This term was first used by Carlyle, in his "French Revolution," as applicable to the editors whose talents and skill considerably helped to make the revolution of 1790 successful. The First, Second, and Third Estates were comprised in the National Assembly, respectively (1) the commons, (2) the nobles, and (3) the clergy. The power of the press, through the ability of its editors and contributors, subsequently manifested itself,

and earned from Carlyle the appellation of the "Fourth Estate."

"F. P. A." See **LLOYD'S CLAUSES.**

France. A republic governed by a President and National Assembly under constitution of 1875, revised in 1875 and 1884. The legislative power resides in the Assembly, sitting in two houses: viz., the Senate of 300 members, elected by delegates of municipalities; and the Chamber of Deputies of 557 members, elected by universal suffrage. The initiative in legislation is exercised by the President or either house. Executive power is confided to a president, elected by the two houses united in National Assembly. War can be declared by the President only with consent of the two houses. All religions are on a legal equality; every sect being entitled to a grant from the State if its numbers exceed 50,000.—Area 504,777 sq. m.; pop. 38,218,993. Estimated revenue, 90,306,417,100 fr.; expenditure, 3,046,020,874 fr.; public debt, £1,880,000,000. Imports ('88), 5,187,200,000 fr.; exports, 4,998,500,000 fr. (For army and navy see **FOREIGN ARMIES AND NAVIES**.) The colonies include Algeria, Cochinchina, Senegambia (including the territory of that name and other colonies and protectorates on the west coast of Africa), Réunion, Pondicherry, etc., in India, Martinique and Guadeloupe in West Indies. These colonies are politically part of France, and are represented in the National Assembly. France has also three protectorates: Tunis, Annam, Tonquin. (For history from 1870 to 1889, see former editions.)—

—POLITICAL. The conclusion of the old and opening of the new year were fraught with anxiety with respect to the internal political state of the country, a feeling reflected in the French Chambers, which opened on Jan. 8th. M. Milne, President of the Chamber, delivered an inaugural address of a pacific nature, which was ordered to be placarded. M. Seroyer was re-elected President of the Senate. The **New Army Bill** was earnestly discussed by the Chamber, which, by 396 to 130, reinstated the Lucky Number system, providing for one year's service instead of five (13th). Government and fifty Republicans agreed on Army Bill that parish priests and college or prison chaplains should be exempt unless specially summoned; adopted by 284 to 230 (20th). The remaining clauses of the Bill were disposed of, and returned to the Senate by 369 to 163 (21st). A Bill was submitted to the Chamber by the Government (22nd), notifying the renewal for five years from Feb. 1st of the mixed Tribunals in Egypt, which (26th) passed the Chamber without debate. By 318 to 195 Chamber declared urgency (24th) for Bill to improve Havre and the Lower Seine at a cost of 96,000,000 fr. The indirect taxes of '88 were found to have yielded 40,000,000 fr. above the Budget estimate, due chiefly to the items of sugar and foreign corn. Great excitement in Paris consequent on General Boulanger's election for the Seine (27th), the result being—Boulanger, 245,236; Jacques, 162,875; Boulé, 17,037. Exciting scene in the Chamber (31st) on the introduction by M. Floquet of a Bill to restore Uninominal voting; confidence in the Government voted by 302 to 240. A **Boulangist manifesto** was issued (Feb. 3rd) by MM. Naquet, Louisant, and Micheline. The Chamber, by 377 votes to 263, passed the Bill on women and children's labour in factories (5th). Circular issued by M. de Freycinet, Minister of War, to generals commanding army corps, pointing

out that political demonstrations of all kinds are absolutely forbidden to soldiers (9th). Budget for '90 brought forward in Chamber (9th). M. Bary, Republican, elected for Côte d'Or by 39,000 votes against 32,000 for M. Toussaint, Royalist-Boulangist (10th). Arrondissement Election Bill passed Chamber by 268 to 222 (11th). The Extreme Left issued manifesto against General Boulanger (15th). Senate, by 207 to 62, passed M. Lisbonne's Bill providing that the publication of slanderous and offensive statements should be summarily dealt with by Correctional Tribunals; it was rejected by the Chamber by 306 to 236 (April 2nd). Ministerial crisis; failure of M. Méline to form a cabinet (19th), which was subsequently framed by M. Tirard (21st). Correspondence between Russian and French Governments relative to the action of the French authorities against Capt. Atchinnoff and his Cossacks on the Red Sea coast, to which was partially due the Deroulède trial (see ABYSSINIA). A debate took place in the Chamber on the affairs of the Panama Canal Co. (March 7th). Seizure of documents of the League of Patriots at their office, followed by debate in the Chamber, which resolved, by 334 to 162, to prosecute M. Deroulède, and Deputies MM. Laguerre, Laissant, Turquet and others, on the ground of the mobilisation circular of M. Deroulède, issued Feb. 16th, calling upon the League to organise itself. M. Deroulède, who conducted his own defence, was subsequently, with the other defendants, fined 100 fr. for belonging to unlicensed society. Chamber granted leave (April 4th) to prosecute General Boulanger, and passed Bill regulating the judicial procedure of Senate as a High Court of Justice at the trial (8th). Important speech by M. Jules Ferry against Boulangism and the revival of the Old Left Centre party (11th). The Senate (12th) opened the trial of General Boulanger, the indictment being brought forward by the Procureur-Général, M. Quesney de Beaurépaire. Ultimately General Boulanger was (Aug. 15th) found guilty of the embezzlement of 242,000 fr., and in his absence sentenced to deportation to a fortified place. MM. Dillon and Rochefort, who were charged at the same time with an attempt on the State (July 9th and 11th), were sentenced to deportation, and with Gen. Boulanger to pay the costs of the trial. Senate voted 1,000,000 fr. for Exhibition fêtes (13th), and adjourned to May 14th. At Charenton (14th) Gen. Boulanger was made candidate for the vacancy in the Arrondissement Council, but did not secure the necessary majority. He was defeated at St. Foy, near Bordeaux, by a small majority, and also at Vigan (Gard), and at Briey (Meurthe-et-Moselle). Houses of MM. Boulanger, Rochefort and Dillon searched by the police (16th). The Archbishops of Paris, Lyons, and Bordeaux received notice (16th) of their elevation to the Cardinalate. Condemnation to six months' imprisonment and 1000 fr. fine of M. Numa Gilly, Deputy and ex-Mayor of Nîmes, for libel on prominent Republicans; three associates also receiving sentences of imprisonment and fine (19th). M. Gilly absconded to avoid sentence. Great Royalist banquet at Paris (May 1st), at which all the prominent members of the party were present. Address expressive of loyalty and devotion to the Comte de Paris voted. Versailles Centenary Celebration of the opening of the States-General; President

Carnot being shot at on his way there by a man named Perrin, who afterwards was sentenced to four months' imprisonment (6th). Reception of Mr. Reid, new American Minister (15th). Inaugural speech of M. Floquet as leader of the Radical Left (24th). M. Thévenet, Minister of Justice, announced that, after hearing the explanation of M. Moreau, liquidator of the Comptoir d'Escompte, he had ordered legal proceedings to be taken (24th). Ecclesiastical estimates voted (27th) by Chamber. Scene in the Chamber (28th) due to the proposal of M. Laguerre, Boulangist, to interpellate the Minister of Justice on the delay of the High Court of Justice. Remonstrance of the United States Government with reference to the illegal arrest and imprisonment of some American ladies at Mentone (30th). The Chamber (June 4th), by 314 to 232, rejected proposal of Extreme Left to abolish Embassy to Vatican. Statement of M. Spüller respecting the Khedive's decree for conversion of the Egyptian debt. Opening of the Exhibition (9.v.) by the President; 250 deputies signed an address in reply to that of 204 members of the House of Commons expressing sympathy with the object of the Exhibition, and regret at the absence from the opening of the English Ambassador (4th). Speech of M. Jules Ferry on the Education Estimates in defence of the secular education policy of the Republic, and in favour of the maintenance of the Concordat (6th). Fresh searches in Boulangist houses in Paris resulting in discovery of important papers (6th). Stormy scene in the Chamber on the question of the Angoulême arrests (11th). Barretta delivered by President to the three new Cardinals—Archbishops of Paris, Lyons, and Bordeaux (11th). Search for Boulangist papers at the house of Mme. Bouton (14th). Papers addressed by Boulanger to National Committee taken. Out of 300 senators 104 signed M. Passy's reply to the Gladstonian and Parnellite members of Parliament. Senate by 162 to 99 rejected M. Léon Say's proposal with regard to expenditure on primary education (14th). The Panama Canal Committee nominated (18th); 8 out of 11 members in favour of empowering liquidator to raise 34,000,000 fr. Disagreement of two Houses on Army Bill as to service of seminarists. MM. Deroulède, Faisant, and Laguerre charged before Correctional Tribunal at Angoulême with rioting and threatening officers of the law (20th). Discussion in Chamber on Army Estimates (20th); effective provided for by Budget in '89, 498,000 men; in '90, 510,000. Debate in Chamber on prison treatment of political and press offenders (21st). On same day Senate passed Bill regulating salaries of teachers, and discussed estimate of 69,000,000 fr. for improvement of military ports. General Boulanger's pensions as soldier and Grand Officer of the Legion d'Honneur stopped by virtue of decree of '32 on unauthorised residence abroad (26th). Senatorial Committee on Panama Bill elected. The Senate by 208 to 52 agreed to the Bill for transferring to Panthéon the remains of Carnot, Moreau, and Baudin (July 1st). The Gabes incident, arising from French Custom-house officers boarding Italian barque and retaining vessel, settled by official inquiry (9th). Agreement by Chamber, by 386 to 170, to Army Bill as amended by Senate, thus securing three years' system in the active army, seven in the 1st Reserve, six in 2nd, nine in 3rd, and increasing the army from 2,000,000 to 3,000,000 (9th). The Chamber voted

credits of 200,000 fr. and 2,000,000 fr. for the sufferers from the **soilery explosion at St. Etienne** and from the floods. The **Panama Bill** was passed without debate as amended by the Senate (12th). Forty-five newspapers fined for publishing Boulanger's indictment before the trial. Government officials dismissed for sympathy with him. A decree was signed (Aug. 2nd) by President Carnot, settling the new political and administrative organisation of the **French riverain possessions** to the south of **Senegal** and the French settlements on the **Gold Coast** and the **Gulf of Benin**. Manifesto signed by Gen. Boulanger, Dillon, and Rochefort published, deprecating the judgment of the Senate (16th). Manifestoes prior to general election issued by Comte de Paris and Prince Victor Napoleon (Sept.). M. Terrell Mermeix charged with complicity in the theft of documents in the Boulanger case during the General's absence. Court sentenced M. Mermeix to four months' imprisonment and fine of 500 fr. (4th). Letter addressed by Gen. Boulanger to M. Tirard claiming his right to be arraigned before court martial (5th). In consequence of objection lodged to sentence in his absence, the Court confirmed sentence with costs (9th). List of candidates for French elections closed: 1029 for 576 arrondissements (17th). Appeal to the electors by Gen. B., who was candidate for the Seine (London, Sept. 15th). Proceedings taken against Boulangerist candidates who had put up declarations proscribed by law (8th). Day of elections (22nd); carried out quietly. In Paris, out of 36 seats, 22 Republicans and 14 Boulangerists elected (Oct.). Final result of the **General Election** (7th) gave as returned 325 Republicans, 112 Monarchists, 62 Bonapartists, 41 Boulangerists, and 32 Liberals of uncertain opinions. Manifesto by Gen. B. addressed to the *Petit National*. Declaration by the *Temps* denying the truth of the report that France had given her adhesion to the Convention virtually establishing an **Italian protectorate over Abyssinia** (20th). Stipends of 55 priests suspended by the Government for preaching political sermons (31st). Appointment of M. Barbey Minister of Marine. Manifesto of Gen. B. addressed to the French nation from Jersey (Nov. 11th). Meeting of the new Chamber (12th). M. Floquet elected President of the Chamber for the Session (17th). Ministerial declaration by M. Tirard (19th). Proposal by M. Maujan for revising the **Constitution** rejected by 345 to 123. The Chamber rejected (21st), by 365 to 160, a proposal to give up the match revenue; but by 292 to 232 it adopted the first clause of a Bill throwing open the match manufacture subject to an excise duty. This was a defeat for the Government, which advocated the manufacture of matches, like tobacco, by the State. Among the important measures to be considered during the Session are a Bill to utilise the sources of the Airc, and a Bill for placing the Press under the common law. The Senate (22nd) unanimously agreed to the Bill sent up at the end of last session for a vote of credit of 6,000,000 fr. towards an outlay of 58,000,000 fr. in building new men-of-war—the orders to be given to private firms.—**SOCIAL.** Marriage of **Mademoiselle Marguerite Carnot**, niece of the President, with **M. Henri Perret, of Beaune** (Jan. 9th). Grand diplomatic banquet given by President Carnot at Paris (10th). Admiral Jurien de la Gravière, the historian of the French navy, received at the

Academy as the successor of Baron Viel-Castel (24th). **Umanoeaux**, property of M. Wilson's sister, Madame Pelouze, sold for 470,000 fr. to the **Crédit Foncier** (Feb. 2nd). **M. Clermont Gonneau**, the Orientalist, elected member of the Academy of Inscriptions in succession to the late Comte Riaux (March 1st). Duc d'Aumale elected Director (i.e. president) of the French Academy for the next three months (28th). M. H. Meilhac, dramatist, successor to La Biche, received at the Academy (April 4th). Revival at the **Théâtre Française** of Augier's "**Maitre Guérin**," first produced Oct. '64 (15th). Cardinal Laviege, presiding over charity meeting in Angiers Cathedral, paid a hearty tribute to the liberality of English winter residents to the poor of all nationalities and creeds (16th). Appearance of Madame Sara Bernhardt at the Variétés in "**Lena**," based on the English novel "**As in a Looking-glass**," and the play constructed from it (16th). Death of M. Alfred Elwall, Professor of English at the School of Mines at the **Élysée** (16th). **Baroness Legoux**, known in Parisian society as Gilbert Desroches, met unprecedented success at Nice with lyrical drama "**Jael**," for which M. Louis Gallet wrote libretto (23rd). Lord Mayor and Sheriffs of London present at grand banquet by M. Carnot (May 9th). Performance of the "**Orfeo**" of Gluck at Italian Theatre: not performed in Paris for thirty years. First representation at the **Opéra Comique** of "**Esclarmonde**," an opera by M. Jules Massenet, the debut of Miss Sybil Sanderson producing great sensation (15th). **Maharajah Duplee Singh** married to Miss Wetherell (26th). Ball under the patronage of Lord and Lady Lytton for benefit of the British Charitable Fund, at the Continental Hotel (27th). No first-class medal awarded by the Salon '89. Betrothal of Duke of Orleans to his cousin, the Princess Margaret (30th). Brilliant reception of M. Carnot at Boulogne on his visit to inaugurate the great Breakwater, or "**Digne Carnot**." Grand ball in the evening (June 4th). New train service, "**The Club Train**," between London and Paris, started (4th). Reception of Vicomte Melchior de Vogüe at the Academy in succession to M. Nisard (6th). Great strike of Paris cabmen: efforts of M. Constans to effect an agreement unsuccessful (14th). End of cabmen's strike (18th). Paris Municipal Council, by 33 to 27, voted in favour of giving cab hirers option of paying by distance (19th). Prince George Bibeno gave grand dinner in Roumanian section of the Exhibition (19th). Great fête given by Municipality of Paris to exhibitors and others in the Parc Monceau. **Secretan sale** commenced (20th), creating unprecedented interest; Millet's "**Angelus**" creating exciting scene, due to keen American competition. Finally knocked down to M. Antonin Proust, as representing France, for 553,000 fr. Other pictures by Meissonier and other famous French artists fetched high prices (July 1st). Unveiling of bronze model of Bartholdi's statue of Liberty, one-fourth size, at Exhibition, followed by fête in honour of United States (4th). Statue of Camille Desmoulins unveiled in the Palais Royal Gardens in commemoration of July 12th, 1789 (12th). Ultimately Mr. Sutton, agent of the American Art Association, bought the "**Angelus**" from M. Proust (16th). Thank-giving service for the happy escape of Emperor of Brazil held at the St. Augustine Church, Paris (25th). New galleries of the Natural History Museum at the Jardin des Plantes

opened by Minister of Education (24th). Lord and Lady Lytton entertained the King of Hellenes and Ministers (25th). Arrival and splendid reception of the Shah (August), who conferred a decoration on the President. Portion of the new Sorbonne buildings opened by President, at which representatives of the Universities of Oxford, Cambridge, and Edinburgh were present (5th). "La Vie Parisienne" at the Théâtre Française (18th). Inauguration of monument by M. Dalon, representing Triumph of the Republic (group of statues), erected by City of Paris in honour of Republic, M. Carnot presiding at the opening ceremony (21st). Numerous congresses, including the International Monetary and Railway Congresses, were held at Paris during the Exhibition, and amongst the distinguished visitors to the building were the King of Greece, the Prince of Wales, Mr. Gladstone, and Mr. Edison. Centenary of the *Journal des Débats* (23rd). Meeting of the Congress of the International Geodesic Association at the Foreign Office (Oct. 3rd). Visit of 300 Highlanders to Paris (15th). Grand ball given by President and Madame Carnot to 8000 of the exhibitors at the Exhibition (17th). "Le Père Lebonnard," a comedy by M. Jean Aicard, produced at Paris (21st). Death of M. Arthur Griffith, Gen. Boulanger's maternal uncle, aged 73 (25th). It was officially stated (28th) that the balance of receipts from the Exhibition amounted to 8,000,000 fr., to be divided between the State and the city of Paris—receipts being 49,000,000 fr., and expenditure 41,000,000. Death of Emile Augier, dramatic author. M. Alphonse Daudet's "La Lutte pour la Vie" produced at the Gymnase, Paris (30th). M. Rousselle elected President of the Municipal Council (Nov. 4th). The Academy of Inscriptions, for the first time since the war, elected a German, M. Ernest Curtius, the archæologist, in the room of Baron White (17th).—Amongst the deaths of distinguished people during the year were those of M. Sourgeon, Feb. 18th; Baroness Jules Cloquet, Feb. 19th; M. Denfert-Rochereau, March 5th; Admiral Jaures, Minister of Marine, March 13th; M. de Champeaux, April 12th; and General Charles de Montauban, July 24th.—**GENERAL.** Heavy rains and floods in south of France. Landslip on railway tunnel between St. Raphael and Cannes blocking the line (Dec. 31st, '88). Judgment was given by the tribunal (Jan. 6th, '89) in the case of M. Genouille, formerly Governor of Senegal, who was prosecuted for having left four negroes in charge of an island where the French flag had been hoisted, and for having forgotten to take them off, in consequence of which the men perished of hunger. M. Genouille was found guilty of manslaughter from imprudence, and was sentenced to a fine of 600 fr., which was (Feb. 22nd) increased by Court of Appeal to imprisonment for six months. Riotous disturbances in connection with a labour dispute in the Department of Aisne (Jan. 17th). Riotous conflict in Paris between Possibilists and Boulangerists at an electoral meeting at Paris: about twenty injured (26th). Great fire at Tourcoing, at cotton mills, occasioning serious loss (31st). The sum of 30,000 fr. voted for architects' competition to rebuild Opéra Comique (Feb. 4th). A meeting of delegates from committees of socialist and revolutionary associations held at the Labour Exchange, Paris. Subsequently received by the Premier (10th). A revised scale of wages,

drawn up by the mill-owners at Armentières, was accepted by the men, and the strike considered to be at an end (March 7th). Fresh strikes in the arrondissements of Lille and Cambray. Serious disturbances at Avesnes-lez-Aubert (14th). Explosion in colliery at Pontes, Department of Gard: fifteen killed and six injured. Exhibition of relics of the Revolution opened (April 15th). Suicide at Algiers of M. Rochefort's son, aged 28, formerly associated with M. de Brazza in the Congo, and Olivier Pain in Upper Egypt (15th). Sharp shock of earthquake at Cherbourg (30th), and Brest (June 7th). Opening of the new *Calais Harbour* by M. Carnot (June 3rd). Boulevards lighted by electricity (3rd). Centenary of the Tennis Court Oath celebrated at Versailles: amongst other speeches, one was delivered by M. de Lafayette, grandson of the "Hero of Two Worlds" (30th). Damage of 200,000 fr. done by fire at furniture warehouse in the Rue Beaubourg (21st). Serious balloon accident in Paris: three injured by fall of car (30th). Terrible colliery explosion at St. Etienne: loss of life, 196 (July 3rd). Serious explosion on artillery training frigate *Couronne*, at Les Salins d'Hyères (31st). Attempt of *Ellis Karnour* to dispose of 3,000,000 fr. of forged Egyptian bonds (Sept. 1st). Presentation by English firemen to Mr. Carnot of an Anglo-French flag in commemoration of the Exhibition and firemen's competition, same day. Celebration by French and English Positivists of centenary of the Revolution. Telegraphic apparatus on Eiffel Tower inaugurated; first message transmitted by correspondent of the *Times* (9th). Damage of 1,000,000 fr. done by fire in sugar refinery at Routin (17th). It was stated that for the year ending Oct. 31st, '89, 1870 patients bitten by dogs had been treated at the *Pasteur Institute*: 13 died.—**COMMERCIAL.** In January a report circulated that 80,000,000 fr. had been offered by a London bank for the exclusive right to manufacture the Grand Chartreuse Liqueur. Report authoritatively contradicted. The prospectus of the Panama Canal Completion Co. issued (see PANAMA CANAL). Judgment given by Civil Tribunal in favour of liquidation of Panama Canal Co., with power to the liquidator to enter into arrangements with a new Company. It was stated that about 9000 of the new shares in the Canal had been subscribed (Feb. 4th). Letter of M. de Lesseps to subscribers for shares in the new Panama Canal Company (9th). Great fall in copper shares (March 1st). Rio Tinto shares fell from 408 to 383, and Comptoir d'Escompte shares from 860 to 805, on announcement of the death of M. Denfert-Rochereau, one of the directors, who had committed suicide. Rios afterwards advanced to 397 (5th). The result of the crisis was that the business of the Comptoir d'Escompte was, to avoid official liquidation, transferred to a new company called the Comptoir National d'Escompte, with a capital of 40,000,000 fr. M. Fillet Will, one of the directors of the Bank of France, resigned, owing to disapproval of the advance of 100,000,000 fr. to the Comptoir d'Escompte (12th). In April an arrangement was concluded between France and China for the junction of the telegraph lines of China and Tonquin. Prosecution commenced against M. de Lavalaisière and M. Secrétan, chairman and manager of the *Société des Métaux*, for unlawful proceedings

to raise the price of copper (16th). **Telephones** throughout France taken possession of by Government, companies being expropriated (Sept. 1st). In '88 the wine trade in France amounted to 677,298,000 galls. against 546,797,000 galls. in the previous year. Consult "France" (Story of the Nation Series), Redlus (Elisée) "La France," Vol. II. of "Nouvelle Géographie Universelle," *Journal Officiel* ('89), *The Statesman's Year-Book*, *Almanach de Gotha*, etc.

Franchise. The following, which is issued by one of the large political organisations, gives a good general idea of the different classes of males of full age who are entitled to be registered, and, when registered, to vote at parliamentary elections. There are, in addition, some ancient franchises, such as those enjoyed by the liverymen of the City of London. No man can be registered who has within the twelve months preceding July 15th received paucial assistance (other than medical relief), or who is an alien (see ALIENS). In counties the qualifications are as follows: **Freehold** of inheritance or by purchase of the clear annual value of 40s. or upwards. **Freehold** for life must be of the clear annual value of £5, unless the same comes by descent, marriage, devise, or promotion to any benefice or office, in all which cases 40s. clear annual value is sufficient. **Freeholders** by purchase are required to be six months in possession previous to July 15th; by descent, etc., no length of possession is necessary. **Copyhold** of the clear annual value of £5 or upwards. **Copyholders** are subject to the same terms of possession as freeholders. **Leasehold**, if created originally for a term of not less than sixty years, of the clear annual value of £5 or upwards; if for a term of more than twenty, but less than sixty years, the clear annual value must be £50. **Leaseholders** by purchase are required to be twelve months in possession previous to July 15th; by descent, etc., no length of possession is necessary. Persons qualified in respect of any of the foregoing qualifications must send in their claims to the overseers on or before the 20th of July. [No person can claim in respect of a rent-charge, other than the owner of the whole of the tithe rent-charge of a rectory, vicarage, chapelry, or benefice, to which an apportionment of the tithe rent-charge shall have been made in respect of any portion of tithes. No more than one person can claim in respect of any estate in land or tenement, unless the same shall be derived by descent, succession, marriage, marriage settlement or will, nor unless the owners occupy the land or tenement, and are *bonâ fide* engaged as partners carrying on trade or business thereon.]—**Counties and Boroughs: Occupation** as owner or tenant of any land or tenement of a clear yearly value of not less than ten pounds. **Occupation** as owner or tenant of any dwelling-house. [The term "dwelling-house" includes part of a house in which the landlord or superior tenant does not reside. When he does reside, his under-tenants are held to be lodgers.] **Occupation** by virtue of any office, service or employment, of any dwelling-house which is not inhabited by a person under whom such office, service or employment is held. [In the above three classes of occupiers the occupation need not be of the same premises, but may be of different premises, occupied in immediate and unbroken succession in the same constituency.] **Occupation** as lodger of any lodgings of a clear yearly value, if let

unfurnished, of £10. [Successive occupation is also allowed in the case of lodgings, but it must be from one part to another part of the same house.] In all cases of occupation, whether as owner or tenant, servant or lodger, twelve months' occupation is required up to the 15th day of July in any year. **Occupiers** need not send in claims unless they find that their names are omitted from the list published by the overseers on the 1st of August, or that in the entry on such list there be a misdescription of some essential particular or particulars, and, in case of such omission or misdescription they must send in their claims to the overseers on or before the 20th of August. **Lodgers** must claim every year, and when claiming for the first time must send in their claims to the overseers on or before the 20th of August. After the first year, lodgers continuing in the same lodgings and desiring to continue on the register may send in their claims to the overseers from the 16th to the 25th of July inclusive, and their names will then appear on the list published by the overseers on the 1st of August. [The declaration annexed to the claim of a lodger is held to be *prima-facie* evidence of his qualification.] The revised register comes into operation on the 1st of January in each year.

Francis Ferdinand of Austria, Archduke, son of Archduke Charles Louis, by his second marriage with the Princess Maria Annuncziata, daughter of Ferdinand II., King of the two Sicilies, born at Gratz, in 1863, and is a major in the 4th Dragoon Regiment. A few years ago he inherited the large fortune of his relative, the Grand Duke of Modena, and in so doing took the name of Este. On Feb. 1st, '80, he renounced the fortune and name in favour of his brother, Archduke Otho. Archduke Francis is unmarried, and has never made any great figure in Austrian society. He is said to be good-natured, gentle and indolent. By the death of the Crown Prince Rudolph and the abdication of his father, he becomes heir to the Austrian throne. Henceforth he will reside in Vienna, with the title of Archduke-Heir and will prepare himself for the duties that are presumptively in store for him. His brother, Archduke Otho, was born in '65, and married in '86 Maria Josepha, daughter of Prince George of Saxony.

Francis Joseph I., Emperor of Austria, and King of Hungary and Bohemia, b. 1830. His father was the late Archduke Francis Charles (d. 1878). The present emperor succeeded his uncle, Ferdinand, on the throne when he abdicated (1849). The beginning of his reign was marked by important events. Hungary was in a state of rebellion, which was quelled by the help of Russia. His I dominions were saved by the genius of General Radetzky. The Emperor Francis Joseph made strenuous efforts to prevent the Crimean war, and refused to join France and England. After the Austro-French war (1859), he was compelled to sign the treaty of peace of Villafranca, by which Lombardy was ceded to Italy. In 1866 he lost the duchy of Holstein, obtained by the convention of Gastein, and in the same year as the result of the war with Prussia, also **Venetia**. That year was fatal to the supremacy of Austria in Germany, the contest being decided in favour of Prussia by the treaties of Nikolzburg and Prague respectively. The Turkish provinces of Bosnia and Herzegovina were, by decision of the Berlin Congress (1878),

placed under the administration of Austria-Hungary. In 1854 the Emperor Francis Joseph married the Princess Elizabeth Amalie Eugenie, daughter of the Duke Maximilian Joseph of Bavaria. The Empress is a famous equestrian, and has made several visits on hunting expeditions to England and Ireland. Both the Emperor and Empress suffered a distressing bereavement by the suicide of their son the Crown Prince at Meyerling, on Jan. 30th, '89. In Aug. the Emperor received members of a Siamese mission, who presented him with the insignia of the Order of Chakrikri. Visited the Emperor of Germany, at Berlin, the same month.

* **Fraser, Alexander Campbell**, D.C.L., LL.D., b. at Ardchattan, Argyllshire, 1819. Educated at Glasgow and Edinburgh Univs. He was awarded the Edin. Univ. prize for an essay on "Toleration," in '42. Elected '56 to succeed Sir William Hamilton (the "modern Aristotle") as *Professor of Logic and Metaphysics* in the Univ. of Edinburgh. He is Dean of the Faculty of Arts of the Univ. For some years he edited the *North British Review*. Prof. Fraser has been an Examiner in the Moral Science Tripos of Cambridge, and in *Moral Science and Logic* for the India Civil Service. He is an eminent authority on the philosophy of idealism, and his literary labours have been devoted chiefly to the annotation and criticism of the writings of Bishop Berkeley. He has published in the Clarendon Press Series a "Collected Edition of the Works of Bishop Berkeley, with Dissertations and Annotations"; and has contributed a biography of that philosopher to the series of "Philosophical Classics for English Readers." Hon. LL.D. Univ. of Glasgow '71, and an hon. D.C.L. Oxon. '83.

Frederick William Louis, Grand Duke of Baden; b. 1826. He succeeded his father, the Grand Duke Leopold, 1852. By right of succession the government of the duchy belonged to his brother Louis, who was older than himself; but Duke William had to assume the government, his brother being mentally incapacitated. As a ruler he has proved himself a firm ally of Prussia, and in the war of 1870-71 against France he fought side by side with Prussia, and took a prominent part in the struggle. In home politics he declared himself a stern opponent of the Jesuits, and in 1855 he put an end to their existence as an organised ecclesiastical community, by banishing them from the duchy. His wife is a daughter of the late Emperor William of Germany.

Frederickton, Capital of New Brunswick (q.v.), pop. 7,000, on St. John river.

Free Church of England. A Protestant episcopal organisation, originated in 1844 (enrolled in Chancery 1863) as a counteracting movement to the Oxford Tractarianism. Being free from state control, the Free Church claims the liberty to enter a parish where ritualistic practices prevail, and establish a liturgical service on the basis of the Evangelical party in the National Church, with which section it is in ritual practically identical. It is governed by Convocation and bishops, consecrated in the line of the Canterbury succession by the Rt. Rev. Bishop Cummins, of the American Protestant Episcopal Church, whose bishops were consecrated at Lambeth Palace 1787. The churches, although not numerous, are widely spread. Convocations held yearly (June). Bishops: Reva. B. Price (Primus), H. O. Meyers, W. Baker and J. S. C. Dicksee (Missionary Bishop).

Hon. Sec.: Rev. E. J. Boon, Worcester. Registrar: Mr. F. S. Merryweather, New Malden, Surrey. Offices: 5, Westminster Chambers, S.W. Free Libraries. See PUBLIC LIBRARIES ACT.

Freeman, Prof. E. A., D.C.L., LL.D., was b. at Harborne, Staffordshire, 1823. Educated at Trin. Coll., Oxford, Scholar (1841), Fellow (1841), Hon. Fellow (1880). Has filled several offices of distinction in his university, including that of *Regius Professor of Modern History* (1884), Rede Lecturer at Cambridge (1872), D.C.L. Oxon (1870), LL.D. (1874), Fellow of Oriel (1884). Holds numerous foreign distinctions and orders. A voluminous writer; his works, chiefly on historical, political, and architectural subjects, possess a high reputation. Amongst them may be mentioned "*History of the Norman Conquest*," "*The Ottoman Power in Europe*," "*The Historical Geography of Europe*," "*Lectures to American Audiences*," "*The Chief Periods of European History*," etc. Mr. F. is one of the most distinguished representatives of philosophical Radicalism, and has assisted in promoting the organisation of an Irish Home Rule party in the Univ. of Oxford. Mr. F.'s speech on Home Rule at Wells, Oct. '89, aroused much attention.

Freemantle. Port for Perth, capital of Western Australia (q.v.). At Swan River mouth.

Freemasonry. The masons of the Middle Ages, like many other craftsmen, formed organised corporations which they governed by their own rules, and the numbers of which they kept up from their apprentices. They were called "free" because by several papal bulls they were exempted from laws regulating common labourers and from burdens borne by the working classes in England and on the Continent. Roman Catholicism therefore acknowledged the craft, and it is only within the time of the present generation that it has opposed it. The masonry of the present day is famous for two things: conviviality and charity. The latter was recognised 160 years since by the formation of a committee of charity in connection with the Grand Lodge in 1725. In 1788 Chevalier Ruspini, surgeon-dentist to George III., established the *Free-masons' Girls' School*, now known as *The Royal Masonic Institution for Girls*, and ten years later the *Boys' School* was started. The *Institution for the Aged* is the youngest of the three, the *Institution for the Men* not having been established till 1822, and for the *Widows* not till 1849. English Masonry has first of all a fund called *The Fund of Benevolence*, to which every one initiated in a lodge under the English constitution contributes a sum on his initiation; and as long as he is a subscriber to a lodge in London 4s. a year is paid by his lodge for him to this fund, and 2s. if he subscribe to a country lodge, another 2s. going to the fund of his province. The *Board of Benevolence* assists cases of distress, and during the year just ended it did so to the extent of about £10,500; the *Girls' School* boards, clothes and educates 243 girls, and the *Boys' School* 263 boys; while the *Benevolent Institution* grants annuities to 409 persons—£40 a year to men, and £32 a year to widows; there being now 180 men and 229 widows on the Funds. But all this great work is of very recent date. No extensive strides have been made in Masonry's great work of charity till within the last thirty years. Even from the

Fund of Benevolence the grants used to be so small that ten years ago the accumulations of income under this head exceeded £50,000. The grants, however, have since been so liberal, that not only is the income of the fund exceeded, but the accumulations are encroached upon, reducing the accumulated fund in 1887 to £40,000. The voluntary subscriptions to, and other sources of income of, the three Masonic charitable institutions have been increasing enormously every year for the last twenty years. Before that time they were comparatively small, but they now amount in the aggregate to more than £50,000 annually. In '87 the total was £61,059 os. 11d., the Benevolent Institution obtaining £28,068, the Girls' School £16,429; and the Boys' School £15,661 16s. 1d. But each of these institutions had £2,000 voted to it by the Grand Lodge during the year '87 in addition to these amounts, and that sum has been handed over to them. Down to the 10th Nov. '88 the Girls' School alone had received in the year £51,500, but the receipt of this extraordinary sum was due to the fact that the Craft had resolved to celebrate the Centenary of the existence of the Institution in a special manner. The festival was held on the 7th June at the Royal Albert Hall, when the Grand Master, the Prince of Wales, presided, who was supported by the King of Sweden and nearly all the Provincial Grand Masters of England and Wales. Some 5,000 persons were present. The Benevolent Institution received £17,250 up to Nov. 20th, '89, and the Boys' School £13,628. The English Freemasons celebrated Her Majesty's Jubilee on 13th June, '89, at the Albert Hall, the Prince of Wales in the chair, Grand Lodge bearing all the expenses and handing over the whole receipts for admission, £6,321, which has been equally divided between the above three institutions. The United Grand Lodge of England recognises only two species of Freemasonry—the Craft and the Royal Arch, both of which are exceedingly powerful. Scotch, Irish, American, and Continental jurisdictions acknowledge higher degrees; but these, with the exception of the Mark Degree, are not universal—that is, they are Christian degrees, and the Jew, the Turk, the Mohammedan and the Parsee will not join them. Strong endeavours were made thirty-five years since to induce the Grand Lodge to recognise the Mark Degree, but the attempts were unsuccessful, and the Mark Masons established a Grand Lodge of their own in 1856. By dint of hard work and a strong sincerity of purpose the Mark brethren have raised this degree to the position of one of the great powers in Freemasonry. It has already over 400 lodges in England and Wales and the colonies and dependencies of the British Crown; it numbers 26,165 Mark Masons as subject to its authority; has a large Benevolent Fund, out of which it relieves distressed Mark Masons, or the widows and families of deceased Mark Masons; has an Educational Fund, which pays for the education and clothing of 32 children in the localities where they live; and out of the interest of its annuity funds grants £26 a year to decayed Mark Masons and £21 a year to widows, with a present to each annuitant of £5 at Christmas. The work of English Freemasonry does not end here, because there are several provincial organisations which grant annuities to local brethren and widows, and pay the expense of educating Masons' children.

In connection with Freemasonry there exists a lodge, the Quatuor Coronati (founded 1884), whose membership is restricted to persons possessing either literary or artistic qualifications. Of a similar nature is the Savage Club Lodge, which is restricted to members of the Club. Consult Mackay's "Lexicon of Freemasonry"; Kenning's "Cyclopædia of Freemasonry"; Gould's "History of Freemasonry" (5 vols.).

French Carlists. See FRENCH POLITICAL PARTIES.

French Colonies, The. See FRANCE, and COLONIES AND DEPENDENCIES OF EUROPEAN POWERS; also under various headings.

French Political Parties. Political parties in France may be roughly divided into two camps—**Republicans** and **Reactionaries**. There are, however, both inside and outside the Chamber of Deputies, several groups in each of these two divisions. The common principle which unites the Reactionaries in the Chamber is opposition to the Republic; and they sit together to form **The Right** or **Opposition**, although representing at least two distinct parties, viz., **Bonapartists** and **Monarchists**, while the former are further divided into **Victorians**, or followers of Prince Victor, and **Jeromists**, or adherents of Prince Jerome. The system of election in France is that known as *scrutin d'arrondissement* (*q.v.*), which, by a vote of the Chamber passed in the early part of '89, was substituted for *scrutin de liste* (*q.v.*), the latter system, however, having only obtained since June '85. The avowed object of recurring to *scrutin d'arrondissement* was to combat General Boulanger, who, it was feared, intended to take advantage of the existing system to force a *plébiscite* from the country by offering himself as a candidate in every department. In order to completely defeat this scheme, the Government introduced a further measure abolishing multiple candidatures, which was also passed. The result of this alteration of the electoral system was to reduce the number of deputies from 584 to 576. Of these 16 are returned by Algeria and the distant colonial possessions. To secure election it is indispensable that at least a fourth of the electors on the register record their votes; and return is further conditional on obtaining an absolute majority of the votes recorded. The principle of election is by universal suffrage. The Chamber of Deputies is elected for a period of four years, and the Senate or Upper Chamber, apart from life members, for nine years, one-third retiring every three years. In the present Chamber, which was elected on Sept. 22nd and Oct. 6th, '89, the Opposition numbers 211, and is thus divided: **Monarchists**, 104; **Bonapartists**, 60; and **Boulangists**, 47; the remainder of the Chamber consisting of **Republicans** of various shades. The latter may be subdivided as follows:—**Opportunists.** This is the most numerous and influential section of Republicanism, and owes its creation to Gambetta. In the last Chamber the Opportunists numbered no more than 150, having experienced a serious reverse at the general election of '85. At the general election of last year, however, they recovered some of their lost ground, and now number between 190 and 200. Their most prominent member, however, M. Jules Ferry, was defeated at the polls, and does not sit in the present Chamber. Among the prominent members of the party are MM. Spüller, present Minister for Foreign Affairs, Ranc, and Reinach. The organs of

Opportunism are the *Temps* and the *République Française*.—**Left Centre**, or **Moderate Republican**. This party, which in the former Chamber numbered no more than half a dozen, was returned some so strong to the present Chamber. It has therefore become no inconsiderable factor in the division list of the new Parliament. But it is from the ability of its members, who are nearly all politicians of experience and standing, their wealth, and their social position, that the party will derive its strength, and it is likely to exercise an influence far in excess of the votes it controls in a party division. It accepts as its political motto the dictum of M. Thiers, "*La République sera conservatrice, ou elle ne sera pas*"; and it follows, therefore, that it opposes all measures or ideas approaching an imitation of the first Revolution. At its head stand M. Léon Say, who resigned his seat in the Senate in order to stand for the Chamber at the general election, when he was successful, and M. Ribot, a man of ministerial aims and a disciple of M. Dufaure.—**Radicals**. The Radicals returned to the present Chamber number some 120. They can, however, scarcely be regarded as a united party, and are in the position of having no leader who commands the confidence of all. In the late Chamber the Radicals were divided into Extreme Left, Advanced Left, Extreme Radicals, Rational Radicals, and Radicals. It is probable that the party will again split into at least two groups—namely, Radical Left and Extreme Left—with separate parliamentary organisations, although an effort will, it is believed, be made to abolish all the old Radical and Republican divisions and replace them by one comprehensive Republican organisation. This scheme is strongly favoured by Republicans of such opposite convictions as MM. Reinach, Brisson, and Henri Marct. It is not likely, however, that such an attempt would be permanently successful, the varying opinions among the deputies returned as Republicans being too great to admit of easy adjustment. They comprise, indeed, every conceivable shade of Republicanism, from the mild type professed by such deputies as the Marquis de Moustiers and the avowed Communism of "General" Cluseret, the elect of Var, and the revolutionary Socialist Joffrin, who sits for the division of Paris contested by General Boulanger. In the last Chamber the Radicals numbered 160, then loss of forty seats being chiefly due to the fact that many members of the party openly espoused the cause of General Boulanger. The prominent members of the Radical parties in the Chamber are MM. Clemenceau, Brisson, Floquet, De Freycinet (*q.v.*), and Milleraud. M. Goblet, one of the Radical leaders in the late Chamber, failed to secure re-election.—**Boulangists**. In the late Chamber the Boulangists numbered some score, and their confident anticipation was that the general election would return them in greatly increased strength, the estimate running as high as 300. To what must be called the general surprise, however, the votes of Sept. 22nd and Oct. 6th showed that Boulangism was well-nigh exploded; for, notwithstanding their open alliance with the Bonapartists and Monarchists—the Comte de Paris having, just prior to the election, issued a manifesto urging his followers to support the Boulangist where there was no Monarchist candidate—they were only returned 47 strong to the present Chamber. Of this number 18 sit for Paris constituencies.

It may be stated, however, that had the former system of election, by *scrutin de liste*, prevailed, the Boulangist representation would have been much greater. But even the 47 Boulangist deputies cannot be said to form a united party, many of the number being dissatisfied politicians who are as likely to turn their back upon Boulangism as they were to espouse it. Of actual followers of the General, indeed, there are probably not a score in the Chamber, and whatever the future of the group, it is the almost general opinion that "Boulangism," as a precise political creed, is already extinct. The prominent members of the group in the Chamber are MM. Georges Laguerre, Millevoye, Laisant, Deroulède, Naquet—who resigned his seat in the Senate to stand for the Chamber—and Meriveux. M. Henri Rochefort (who stood for a Paris division, but was defeated), and Count Dillon, who was returned for Morbihan, have also been moving spirits of the agitation. The total Boulangist vote throughout France, at the general election, was 1,037,666, against 2,340,686 votes cast for the Reactionaries, and 4,012,353 for the Republicans. Paris alone recorded 209,000 votes for Boulangist candidates, whereas the total Republican vote in the capital was only 208,000. In spite of this, however, the Republicans gained 24 seats in Paris and suburbs, to 18 won by the Boulangists. While the latter must of course be regarded as in opposition to the present Government, their political creed is Republican, the chief "plank" in their "platform" being a demand for the revision of the constitution.—**Monarchists**. The Monarchists were the chief losers by the increase in the Boulangist strength, their numbers having fallen from some 120 or 130 in the last Chamber to 104 in the present one. The compact, therefore, was particularly unfortunate for them, as they have undoubtedly been discredited by association with the Boulangists, and have lost some 20 seats into the bargain. Of the 104 deputies not 10 are partisans of the monarchy; no more than 60 are thick and thin supporters of the Comte de Paris, the remainder comprising waverers who would probably rally to a Conservative Republic, and a few "Legitimists" and other dissentient Monarchists who do not wholly accept the Comte de Paris as their leader.—There remain the **Bonapartists**, who number 60 in the present Chamber. Of this party there are, as stated, two distinct sections—the "Imperialists" or "Victorians," and the "Jeromists." To the former the young Prince Victor, the son of Prince Napoleon and the Princess Clotilde, stands in the light of the future Emperor. The political leaders of the Victorians are M. Jolibois, a former legal functionary of the Empire, M. Cunéo d'Ornano, and M. Paul de Cassagnac (*q.v.*). Prince Victor has hardly a serious following, but may rather be said to be surrounded by a coterie. His present policy is one of inaction. The **Jeromists**, or adherents of Prince Napoleon, affect to accept the present form of Republic so long as this is the expression of the national will, but aim more or less overtly at what they designate a "Consular Republic." Of this Prince Napoleon is to be the chief, giving a pledge not to employ any unconstitutional act of violence to convert the Consulate into an Empire. The **Jeromists** are scarcely represented in the Chamber. Both Prince Victor and his father are, like the Comte de Paris, in exile under the decree of June 22nd, '85, expelling the direct

descendants of former reigning houses. With the Bonapartists, as with the Monarchists, there are many who are becoming wearied of the useless struggle against the Republic, and probably one-half of the number are only awaiting a convenient opportunity to turn their political coats. Before and during the general election the party made common cause with General Boulanger, and even now there is an evident disunion on the part of many of them to swell the ranks of the Boulangists, particularly on the part of those who are weary of the purposeless opposition of M. Paul de Cassagnac, who leads the party in the Chamber. It is by no means improbable, indeed, that when the new Chamber has settled down, great changes will be witnessed in its political grouping.

Freycinet, Charles Louis de Saulces de, French senator and statesman, b. 1828 at Foix. Educated as an engineer at the Polytechnic School. Engineer-in-chief to the Chemin-de-Fer du Midi (1855-60). Elected member of the Academy of Sciences '78. His talents led to his employment by the Imperial Government to make observations in his own and foreign countries. Appointed (1864) an ordinary engineer of the first class, he was until 1870 a member of the council of the Tarn-et-Garonne. After Sedan M. Freycinet became Prefect of the same Department. He was coadjutor of M. Gambetta in the Ministry of War (1870-71), and initiated the policy which enabled France to place an army of 60,000 men in the field after the regular forces were shut up in Paris. Senator for the Department of the Seine (1876-82). His other official appointments are as follows: Minister for Foreign Affairs 1877-79; President of the Council and Minister for Foreign Affairs 1879-80, January to July 1882, and 1885, after the resignation of M. Jules Ferry. On the fall of the Brisson cabinet (Dec. 20th, 1885), M. Freycinet again resumed office, but was defeated, and retired (Dec. 1886). When M. Grévy resigned (Dec. and 1887), M. de Freycinet was put forward, and received large support as a candidate for the vacant Presidency. In the preliminary ballots he came out well, but as his election, or that of M. Ferry, would in the opinion of the Congress have led to serious political strife, M. Carnot (*q.v.*) was chosen as a less dangerous statesman. On the formation of the **Floquet Cabinet** M. de Freycinet accepted the portfolio of **Minister of War**, which he retained in the Ministry of M. Tirard. He has written several scientific works of acknowledged excellence.

Friendly Societies. The **Friendly Societies Act, '76**, consolidates all the law upon the subject up to that year, but has since been amended in several points of small importance. The latest annual report by Mr. J. M. Ludlow, Chief Registrar of Friendly Societies, was issued in December '87, and brings up the returns to the end of the year '86. The societies include Friendly Societies proper, with their branches, Working Men's Clubs, Industrial and Provident (co-operative) Societies (*q.v.*), Building Societies (*q.v.*), Trade Unions (*q.v.*), certified Loan Societies (*q.v.*), Trustee Savings Banks (*q.v.*), and certain Scientific and Literary Societies certified for exemption from rates. Of Friendly Societies proper the number of newly registered ones rose from 118 in '76 to 186 in '86, giving a total on the register at the end of the latter year of 1,652. The first volume

of a valuable work on the various forms of association amongst English working men, by Dr. Baernreither, a former secretary to the Minister of Justice in Austria, has recently appeared. The author came to England in '83, and remained a whole year, visiting also Scotland and Ireland, staying repeatedly at the great industrial centres of the north, Manchester, Bradford, Leeds, Sheffield, and Newcastle-on-Tyne. The author, after treating of "the State self-government and self-help," enters upon the subject of English Friendly Societies. The two great orders (Manchester Unity of Odd Fellows and Foresters) have a chapter to themselves, as have also accident insurance societies among miners. Dr. Baernreither's conclusion is that the advantages of friendly societies richly outweigh their disadvantages. "In no country has the idea of insurance spread as much in the working class as in England. Thanks to the numerous friendly societies, the conviction of the necessity of providing by way of insurance against the dangers of life and for the time of inability to work, has spread through all working-class circles, and more particularly in the last ten years the knowledge of the principles of insurance and the will to carry them out to perfection have increased in an extraordinary manner. The work which friendly societies carry on in this respect as free associations cannot be highly enough valued. They perform great works of education, they enlarge working men's knowledge, they teach economy and foresight, they raise the sense of duty of the individual towards himself and his family. But they also raise the cohesion of the working class, and bind individual elements, in themselves without power or influence, into a social power, whilst founding a bond of brotherly support." An exhaustive inquiry into Friendly Societies was carried on in '89 in the *West Surrey Times*. For Friendly Societies Act '89 see Session, sect. 74; also sect. 129 for Committee on Friendly Societies.

Friendly Societies' Registry is for the registration of friendly societies, cattle insurance societies, benevolent societies, working men's clubs, and certain societies which may be specially authorised by the Treasury. The chief registrar and assistant registrar, who constitute the central office, also exercise functions and powers as respects building societies, loan societies, and certain societies instituted for purposes of science, literature, or the fine arts, and the rules of savings banks; and the chief registrar reports yearly to Parliament upon the principal matters transacted by him, and upon the valuations returned to or caused to be made by the registrar during the year preceding. **Central Office**, 28, Abingdon Street, S.W.; **Chief Registrar**, John Malcolm Ludlow, (salary £1,500); **Assistant Registrar**, F. W. Libbrook, F.S.A. (£600); **Actuary**, W. Sutton (£800); **Chief Clerk**, H. Tompkins (£500).

Friends. The religious Society of Friends, commonly called Quakers, was founded in the middle of the 17th century by George Fox. "Friends" are distinguished from other Christian bodies by their belief in the immediate teaching and guidance of the Holy Spirit, and that no one should be paid or appointed by human authority for the exercise of the gift of the ministry. In obedience to this belief they hold their meetings without any prearranged service or sermon, and sometimes in total

books for children, of which the best known, perhaps, is "Eomps," published '85-6. An exhibition of Mr. F.'s "whimsical sketches" was held at Old Bond Street in '87. His "M.P.'s in Session" greatly increased his popularity last year. Mr. F.'s composite sketches of the heads of prominent members of Parliament are now (Nov. '89) appearing in *Punch*, the most striking being that of Sir William Harcourt, composed entirely of the profiles of the right hon. gentleman. He is also a popular lecturer.

Furnivall, Frederick James, M.A., Ph.D., b. at Egham, Surrey, 1825. Educated at University Coll., Lond., and Trin. Hall, Camb.,

B.A. '46. Dr. F. has edited numerous works, chiefly those belonging to the **Early English period**, including "Percy's Folio MS. of Ballads and Romances," editions of Chaucer's "Minor Poems," Caxton's "Book of Curteseye," and an edition of Shakespeare's works in one volume, entitled "The Leopold Shakespeare." He is also the founder of several literary societies—notably the Early English Text, the Chaucer, the Wyclif, the Browning, and the Shelley Societies. Dr. F.'s services to literature and Early English scholarship have received State recognition in the form of a Civil List pension.

G

Gaboon-Ogowé Region. or Gaboon and French Congo. A district of Western Africa north of the Lower Congo. The Gaboon is strictly only a great estuary by which several minor streams discharge their waters. The **Ogowé** is a large river, which reaches the Atlantic by several mouths, forming a great delta, not far south of the Gaboon estuary. France has possessed the Gaboon estuary and district since 1843. Since 1884 the French possessions have been extended over a vast territory, back to the Middle Congo, gained for her by the great explorer **Savorgnan de Brazza**, amounting to 174,000 sq. m., with pop. at least 500,000. Some enlargement of the boundaries was effected in 1887. See CONGO FREE STATE, CONGO RAILWAY, and COLONIES OF FOREIGN POWERS.

Galle. Port of call for steamers, south point of Ceylon (q.v.).

"Gallian Church." See OLD CATHOLICS.

Gallipoli. A town of about 21,000 inhabitants, situated on the Dardanelles, chiefly known as the place whither English ships were sent during the Crimean war.

Galton, Francis, F.R.S., F.G.S., b. 1822, is a cousin of the late Charles Darwin, the naturalist. Educated at King Edward's School, Birmingham, King's Coll., Lond., and Trinity Coll., Cambridge, where he graduated (1844). He subsequently travelled much, especially in North and South Africa; received the Royal Geographical Society's Gold Medal; and was appointed for the Royal Society a member of a committee of the Board of Trade which inquired into the administration of the Meteorological Office. From '63 to '68 he was General Secretary of the British Association. His writings include "Narrative of an Explorer in Tropical South Africa," '52; "Art of Travel" ('53—fifth edition '72); "Meteorographica" ('63); "Hereditary Genius" ('69); "English Men of Science: their Nature and Nurture" ('74); "Enquiries into Human Faculty and its Development" ('83). Mr. G., in his annual address as President of the Anthropological Institute (Jan. '89), gave a résumé of his researches at his Anthropometric Laboratory. Has published in the past year "Natural Inheritance."

Gambia. A British colony on Gambia river, West Africa. Mostly negroes. First founded, 1388. Capital, **Bathurst** (pop. 6,138). Consists of St. Mary's Island, with Combo on south, Albreda, Barra, and Ceded Mile on north bank. Up river are several stations, of which **Carthy's Island**, 187 miles from mouth, is

the highest. Produces ground-nuts, hides, beeswax, rice, cotton, maize, grain, etc. Ruled by Administrator, who is subordinate to Governor of Sierra Leone, officially styled Governor of West African Settlements. For financial statistics see BRITISH EMPIRE, et. (table).

Game Laws. Animals, *feræ naturæ* (wild animals), are not in English law subjects of property, and therefore are not protected by the law of larceny. Special statutes, accordingly, have been enacted for the preservation of game, and these are known as the game laws. Game, as a legal term, comprises hares, pheasants, partridges, grouse, heath or moor game, black game and bustards (1 and 2 Will. IV., c. 32, s. 2). By the Ground Game Act, 1880, it is provided that the occupier of land (the tenancy of which has been created since Sept. 7, 1880) shall have the right to kill ground game (hares and rabbits) thereon equally with the landlord, and shall be unable to alienate this right; but he may authorise certain others to kill his game. See more fully, ed. '87.

Garnett, Richard, LL.D. for some years the well-known Superintendent of the Reading Room at the British Museum—from which he retired in '84, in order to devote more attention to the printing of the Catalogue—was born at Lichfield in '35. He received his first appointment in the Museum, as assistant in the Printed Book Department ('51). Under Dr. G.'s superintendence (which dates from '75) many improvements have been introduced. The most important of these is the commencement of the colossal work of re-editing and printing the Catalogue. This is being done under Dr. G.'s superintendence. Dr. G. has been a frequent contributor to periodical literature, and is the author of "The Life of Carlyle" ('87), and "Life of Emerson" ('88); also of "The Twilight of the Gods," a collection of tales ('88). He is an LL.D. Edin.

Garnishee. Where a creditor has obtained judgment, debts owing to the debtor may be attached by a process known as a garnishee order, which compels the debtor's debtor to pay to the judgment creditor the amount owing. Formerly legacies owing to judgment debtors were held not to be attachable debts, but the better opinion now seems to be that a legacy can be garnisheed in the hands of the executor.

Garter King of Arms. The holder of this office of dignity and historic interest is within the College of Arms above all other officers. His powers include the adjustment of arms in

England and Wales, and the power of granting arms under the authority of the Earl Marshal in conjunction with the provincial Kings of Arms, according to their several jurisdictions, to persons qualified to bear them, and the creation of arms, crests, cognisances, and devices, as well as the power and authority to grant armorial bearings. He has under the Earl Marshal the regulation of the proceedings at State ceremonies, and the guidance of coronations; and he controls and manages all matters concerning the Order of the Garter. At the commencement of every session he lays on the table of the House of Lords the roll of the lords temporal, and he assists at the introduction of all newly created peers (see PEERAGE). The present holder of the office, Sir Albert Woods, C.B., F.S.A., is son of the late Sir William Woods, Garter King of Arms, and entered the College of Arms (Queen Victoria Street, E.C.) as Pursuivant 1838, was appointed Lancaster Herald 1841, and assumed his present office 1869.

Garter, The Most Noble Order of the. Was originally established by King Edward III. in 1349. As reconstituted in 1831 it is limited to the Sovereign, the Prince of Wales, and such descendants of George I. as may be elected to be members of it, and to twenty-five Knight Companions; but sovereigns and princes of other realms, and other foreigners of distinction, may be admitted by special statutes. Its abbreviation is K.G., and it is the highest order of knighthood. Its insignia and habit are most elaborate and imposing and include the **George**,—a gold medallion of St. George and the Dragon, suspended from a blue ribbon; the **Garter**, which is worn below the knee of the left leg, and is made of dark blue velvet, edged with gold, its motto being "*Honi soit qui mal y pense*" (Evil to him who evil thinks"); a mantle of blue velvet lined with taffeta, with the star of the order embroidered on the left breast; a hood and surcoat of crimson velvet, and a hat of black velvet; a collar of gold weighing thirty ounces, and the star with the cross of St. George in the centre, encircled by the Garter. There are at present fifty-one K.G.s in all, including the Sovereign, and the following is a full list of them, the date of creation being prefixed in each case.—

THE SOVEREIGN.

- 1835. Cambridge, H.R.H. the Duke of.
- 1867. Connaught, H.R.H. the Duke of.
- 1878. Cumberland, H.R.H. the Duke of.
- 1863. Edinburgh, H.R.H. the Duke of.
- 1841. Wales, H.R.H. the Prince of.
- 1883. Wales, H.R.H. Prince Albert Victor Christian Edward of.
- 1884. Wales, H.R.H. Prince Geo. Frederick of.
- 1867. Austria, the Emperor of.
- 1885. Battenberg, H.R.H. Prince Henry of.
- 1866. Belgians, the King of the.
- 1871. Brazil, the Emperor of.
- 1865. Denmark, the King of.
- 1879. German Emperor, the.
- 1877. Hellene, the King of the.
- 1862. Hesse, the Grand Duke of.
- 1866. Holstein, H.R.H. Prince Christian of.
- 1878. Italy, the King of.
- 1862. Mecklenburg-Strelitz, the Grand Duke of.
- 1862. Netherlands, the King of the.
- 1873. Persia, the Shah of.
- Prussia, Prince Henry of.

- 1881. Russia, the Emperor of.
- 1844. Saxe-Coburg and Gotha, Duke of.
- 1882. Saxony, the King of.
- 1882. Sweden and Norway, the King of.

THE TWENTY-FIVE KNIGHT COMPANIONS.

- 1885. Abergavenny, Marquis of.
- 1883. Argyll, Duke of.
- 1867. Beaufort, Duke of.
- 1880. Bedford, Duke of.
- 1865. Cleveland, Duke of.
- 1865. Cowper, Earl.
- 1884. Derby, Earl of.
- 1858. Devonshire, Duke of.
- 1862. Fitzwilliam, Earl.
- 1883. Grafton, Duke of.
- 1856. Granville, Earl.
- 1862. Grey, Earl.
- 1885. Kimberley, Earl of.
- 1873. Leicester, Earl of.
- 1888. Londonderry, Marquis of.
- 1886. Norfolk, Duke of.
- 1885. Northampton, Marquis of.
- 1885. Northumberland, Duke of.
- 1867. Richmond and Gordon, Duke of.
- 1869. Ripon, Marquis of.
- 1878. Salisbury, Marquis of.
- 1885. Selton, Earl of.
- 1864. Spencer, Earl of.
- 1864. Sutherland, Duke of.
- 1870. Westminster, Duke of.

The Bishop of Winchester is Prelate, and the Bishop of Oxford Chancellor of the Order. Sir Albert W. Woods, C.B., F.S.A., is Garter Principal King of Arms, and the Hon. Sir J. R. Drummond, G.C.B., is Gentleman Usher of the Black Rod.

Gas Manufacture and Supply, '89. For more than fifty years gas for illuminating purposes has been manufactured almost exclusively by the distillation of coal, canal coal being used when gas of high illuminating power is required. Many schemes have been propounded and patented for the enrichment of gas by the use of naphtha and hydrocarbon oils, but none have ever reached the stage of practical application. Early in '89 a furore was created by the formation of several companies for the sale and manufacture of **Water-gas**. The principal or parent company was called the "**British Water-gas Syndicate**." Its £1 shares were run up and dealt in at £25. This company granted licences to subsidiary companies, and the statement was widely published that water-gas could be manufactured for 4d. per 1000 cubic feet. Water-gas is manufactured by the passing over incandescent coke of a jet of steam; a gas being thus made giving considerable heating power, but having little luminosity. This illuminant was and has been used in connection with the production of steel, and Dawson has successfully turned out a plant for the manufacture of water-gas for motive power. The application of this gas for driving gas engines has met with considerable success. When used as an illuminant water-gas has to be enriched or carburetted by passing it through vessels containing hydrocarbon oils of high specific gravity. In fact, although water-gas has for some years been used in America, by reason of the cheapness of the enriching vehicle, there is no prospect of its introduction into this country as an illuminating gas. When unconsumed it gives off carbonic acid gas in large quantities, and its consumption for the same light is as three to one when compared with coal-gas.—Coal-gas standard of illuminating

power. Gas is supplied at varying rates of illuminating power, but it almost universally is fixed by Parliament at not less than the light given by sixteen spermacandles when tested in the Photometer by Sugg's London Standard Argand Burner. In London the testing is performed daily at some ten or twelve testing stations by officials of the London County Council under the direction of Mr. W. F. Dibden, F.I.C., F.C.S., Chemist and Superintending Gas Examiner to the Council. A weekly return is made, and any deficiency below the parliamentary standard is at once reported and gas companies are prosecuted and fined. But to give the gas suppliers their due, it should be noted that it is rarely necessary to take any legal action, as it is usual to send out gas of higher illuminating power than that prescribed by the several Acts of Parliament under which the companies are incorporated. In the provinces, at least in all towns of importance, the same practice obtains. Price of gas varies considerably. In London gas is now being supplied at from 2s. 2d. to 2s. 6d. per 100 cubic feet. It is the practice to supply the public lamps at a somewhat lower rate than the private consumer, and also to supply upon the meter system, and not at per lamp, as is very general in provincial towns. The public lighting of London and the suburbs is entirely in the control of the vestries or other local authority, the gas company only supplying gas. The cheapest gas supplied in the United Kingdom is at Sunderland, 1s. 6d., and the next cheapest at Plymouth, 1s. 9d. per 100 cubic feet. Municipal authorities now own a very large number of gas undertakings, and the profits which are made are allocated to the reduction of rates. The gas consumer really is the contributor, as in too many cases the price of gas is kept up in order to maintain a large profit balance. The Manchester Corporation gas undertaking has contributed as much as £50,000 per annum out of gas profits to the Borough Fund, and Manchester is no exception to the general rule. The amount of money invested in gas manufacture and supply is very large: at the date of the last Board of Trade return (87) it was £57,478,015; and of this amount, owing to the introduction into recent Acts of Parliament of what is known as the "Auction Clause," no less a sum than £1,475,657 is premium capital and bears no interest. Coal carbonised in one year. This is enormous, and the general public have little idea of the gigantic work being carried on, 8,962,631 tons of coal being used in the year 87, producing 91,371,613 cubic feet of gas. This quantity was supplied to 2,163,256 private consumers and 423,580 public lamps. The gross annual receipts were £14,228,616, the expenditure £10,304,687, and the profit made £4,923,914.—Metropolitan Gas Supply. The six companies that supply London and the suburbs carbonised in the year ended Dec. 31st, '88, 2,690,959 tons of coal, and manufactured 27,533,017,000 cubic feet of gas. Three weekly papers are published devoted to the gas interests: the *Journal of Gas Lighting*, the *Gas and Water Review* and *Journal of Electric Lighting*, and the *Gas World*.

Geffcken, Professor. See GERMANY.

Geikie, Dr. Archibald. F.R.S., b. at Edinburgh 1835. Educated at the High School and the University. Appointed to the Geological Survey in 1855. Dr. Geikie was associated with Sir Roderick Murchison in working out the true geological structure of the Scottish

Highlands. On the extension of the Geological Survey in 1867 he was appointed director of the survey of Scotland, and in December 1870 was nominated by Sir Roderick Murchison as first occupant of the new chair of Mineralogy and Geology, founded in the University of Edinburgh by Sir Roderick and the Crown. The University of St. Andrews conferred on him the degree of LL.D. (1872). In 1881 he was appointed **Director-General of the Geological Survey of the United Kingdom**, and Director of the Museum of Practical Geology, London. Dr. Archibald Geikie is sometimes confounded with his younger, and scarcely less distinguished brother, Professor JAMES GEIKIE, author of "The Great Ice Age" and "Prehistoric Europe." Prof. J. G. succeeded his brother in the chair of Geology at Edinburgh; and at the meeting of the British Association at Newcastle-on-Tyne (89) was President of the Geological Section. Hon. D.C.L. (Durham) '89.

General Assembly. The highest court of the Presbyterian State Church of Scotland, and consists of representatives, clerical and lay, from all the presbyteries of the Church in Scotland and Ireland, also delegates from the universities and Scottish royal burghs. It meets annually in Edinburgh in May, and sits about ten days. Its deliberations are presided over by a moderator, and are also attended by an officer representing the State (the Lord High Commissioner), who, however, has no voice in its procedure or decisions. During the sitting of the Assembly the Lord High Commissioner, a Scottish nobleman, holds semi-regal state in the palace of Holyrood.

Gentlemen-at-Arms. A bodyguard to the sovereign instituted by Henry VIII., and the oldest corps in H.M. service except the Yeomen of the Guard. It is only mustered for duty on such occasions as drawing-rooms, levees, and great state ceremonies. The captain of the corps changes with the Ministry (q.v.).

Geographical Progress. '89. It is in Africa that the greatest amount of new knowledge has been gained, and it is needless to say the most important portion has been contributed by Mr. Stanley (q.v.). A year ago, while we were lamenting the deaths of Major Barttelot and Mr. Jameson, news arrived that their great leader had been successful in reaching Emin Pasha (q.v.), and in so doing had explored the country lying between the camp on the Aruwihimi and the Albert Nyanza. The scanty reports we have received confirm the information gathered by Cameron and others as to the almost impenetrable character of the Forests of Uloga. Mr. Stanley was soon again lost to our view, and for a time the gravest anxiety was felt as to his fate, but news has now reached us that he, Emin Pasha and his companions, are well advanced on their homeward route. Waialala has fallen to the Mahdists, and the last remnant of Ismail Pasha's sway in equatorial Africa must be expunged from the map. After Emin Pasha escaped from the hands of his enemies, and joined Mr. Stanley, the latter apparently explored the lake variously known as the "Unvisited Lake," "Mwotta Nzige," or "Beatrice Gulf," and proved that it was indeed one of the head waters of the Nile, and that it was connected with the Albert Nyanza by a river which must share with the Someraet the honour of being one of the twin parents of the great historical river Nile. For the details

of this journey, the most romantic and adventurous ever made in Africa, we must wait for the return of Mr. Stanley. In south-western Central Africa the journey of Mr. Arnot has added somewhat to our knowledge of the springs that feed the Congo and the Zambesi. In Eastern Africa Count Teleki has visited Lake Samburu, three hundred miles north-east of Victoria Nyanza, and proved the reality of its long suspected existence. M. de Foucauld's publication of his work, "Reconnaissance de Marve," and Mr. Joseph Thomson's journey, have added considerably to our knowledge of Morocco. In South Africa Mr. Selvas is still working, and has crossed the Zambesi, and, though soon compelled to return, explored part of the course of the Kafukwe river. In Madagascar, Père Roblet, a French missionary, has surveyed large districts, while the Rev. B. Baron has contributed largely to our knowledge of the geology, physical geography, and botany of that great island. The geographical sensation of the year, apart from Africa, has been the description of Dr. Nansen's journey across Greenland on snow-shoes, which has afforded scientific results commensurate with the danger incurred. In Central Asia Russian explorers, lavishly rewarded by their Government, have been busily employed. M. Grombchevski has traversed the Pamir from north to south, and crossed the Hindu Kush into Hunza. M. Lidsky has explored Karategin and Eastern Bokhara. M. Grum-Griymailo has travelled over the Pamir by the Yarkand river and Kalik pass into Kanjut, returning by the Tashkurgan river, and Little Kara-kul to Kashgar. MM. Nikolsky, Kuznetsov, and Von Krasnof have elucidated the physical geography of the Halkasn basin, of the Sea of Azov, and of the Thian Shan. The work cut short last year by the death of General Prjevalsky, has been undertaken by M. Pievzov, and is being pushed on successfully. In the Caucasus, though we have to deplore the death of Messrs. Fox and Donkin, members of our Alpine Club have added considerably to our knowledge of the orography of that region. In and around our Indian Empire Colonel H. R. Thwaiter reports much progress. The newly-acquired territory in both Beluchistan and Burmah is being rapidly surveyed. Beyond our frontiers maps of over twenty-seven thousand miles of country have been added to our previous knowledge, and over twenty thousand square miles have been traversed and connected with the main triangulation. Major Hobday has also surveyed in Upper Burmah, and Captain Jackson, aided by a native assistant, has examined the Shan country, and materials have been collected for a map of the Assamese Shan States. The operations in Burmah have resulted in the secondary triangulation of 23,000 miles, and nearly 21,000 miles have been surveyed in preparation for a new map of the annexed territory. Mr. Ogle has also explored the routes from Upper Assam to the Hukong Valley, with the result that we now know of two practicable routes between Assam and Burmah, by the Palka pass. Colonel Woodthorpe has been from Eastern Bengal, through Manipur, to the Chindwin river, in Western Burmah. The Black Mountain Expedition has enabled us to examine a country hitherto practically inaccessible, and our knowledge of the Hazara border has thus been much increased. The Afghanistan Boundary Survey has been com-

pleted, and the native surveyor who was employed has cleverly managed to explore 4,600 miles of completely new country. A new map of Afghanistan, comprising this and other work, is shortly to be published. New Guinea is rapidly becoming better known, and besides the work of British explorers and missionaries we are much indebted to Count Pfeil and Dr. Zoller for their work in this island. In South America Captain Page has described to us the Gran Chaco, and the great rivers flowing through that plain, the Pilcomayo and Vermejo, affluents of the Parana or Paraguay. Australia is also becoming daily more known, and as our knowledge increases so do we add to the known area available for settlement and colonisation. As usual, the Hydrographic Department of the Admiralty, under Captain Wharton, R.N., F.R.S., has been busy, and many new charts, as well as rectifications of old ones, have been issued. The year '89, in short, yields to none of its predecessors in the extent and interest of the Geographical Progress made during that period.

Geological Survey. This organisation was founded by Sir H. T. De la Beche, who commenced work single-handed in the south-west of England about 1830. The Geological Survey was officially recognised as a branch of the Ordnance Survey in 1834. In 1845 it was placed under the office of Woods and Forests, and in 1854 under the department of Science and Art. The entire geological survey of England on the one-inch ordnance maps (scale 1: 63,000) has just been completed; the six-inch scale (1: 10,560) has been used for coal-fields and other important districts. The drifts were formerly neglected; but of late these have been mapped, and hence many sheets are issued in two editions— one showing the solid geology, while the other, or drift-map, shows the superficial deposits. The maps are illustrated by horizontal and vertical sections, and by explanatory memoirs. The geological survey of Scotland was commenced in 1854, and that of Ireland in 1845. The survey of each country is placed under a director, and the three surveys are united under a director-general. The successive directors-general have been Sir H. T. De la Beche (1845-55), Sir E. Impey Murchison (1855-72), Sir A. C. Ramsay (1872-81), and Prof. A. Geikie (7. v. c. (1881)). The most important work of the survey in '89 was the publication of Mr. Whitaker's "Geology of London," in 2 vols. For further information consult "The National Geological Surveys of Europe," by W. Topley.

Geology '89. One of the chief topics recently discussed has been the age of the crystalline schists, some geologists maintaining that these are invariably archæan or pre-Cambrian, while others believe that palæozoic or even secondary strata may be so profoundly metamorphosed as to produce such schists. Dr. A. Geikie has visited Norway, with the view of comparing its structure with that of the Scottish Highlands, and finds, as previously asserted by Norwegian geologists, that Silurian strata, with trilobites and corals, pass into crumpled mica-schist, or phyllite. On the other hand, Prof. Bonney, in examining sections in the Lepontine Alps, where belemnites and other Secondary fossils are said to occur in association with crystalline schists, concludes that the relations of the rocks have hitherto been misunderstood, and finds his opinion strengthened that the

schists of the Alps existed as such anterior to any rocks of paleozoic or mesozoic date. Controversy has also been rife regarding the **volcanic rocks of the Western Isles of Scotland**. Prof. Judd recognises five great volcanic centres: viz., Mull, Ardnamurchan, Rum, Skye, and St. Kilda; which were the sites of gigantic eruptive cones, now existing only as denuded wrecks. Dr. A. Geikie, on the contrary, maintains that the great sheets of old lava in the Western Isles were extruded, not from cones, but from huge fissures, now represented by great dykes of basic rocks. Prof. Judd sees no proof of such fissure-eruptions, and believes that the ordinary cone-and-crater type of volcano sufficiently explains the phenomena. Opinions differ also as to the age and succession of the volcanic rocks in Mull, Prof. Judd regarding the granites and felstones as generally older than the basaltic series, while Geikie holds them to be younger.—Among the notable events of '89 was the organised visit of a large party of English geologists to the **volcanic districts of Italy**, including Sicily and the Lipari Islands. The visit extended over six weeks, under the guidance of Dr. Johnston-Lavis, of Naples, and several Italian geologists. Mr. Lohley has published a new volume on Vesuvius, and Prof. Blake has also written on the volcanic districts of Italy. A valuable memoir on the **geology of Madagascar** has appeared from the pen of the Rev. R. Baron, long resident as a missionary in the island. The geological section of the British Association was presided over by Prof. J. Geikie, who delivered an address on **glacial geology**. Dr. Blanford's presidential address to the Geological Society dealt mainly with the history and work of the **International Congress**. Mr. Rudler's address at the anniversary meeting of the Geologists' Association was on **Experimental Geology**. Geology is represented in this country by the **Geological Society**, **President**, Dr. W. T. Blanford. **Hon. Secs.**, Messrs. Hudleston and Marr. **Offices**, Burlington House, W. There is also the **Geologists' Association**, at University College, Gower St., W.C. **President** for '90, Mr. T. V. Holmes. The **London Geological Field Class** has likewise been formed, for the systematic study of the London district. **Consult** Lyell, Geikie, Judd, and Prestwich on Geology.

George, H.R.H. Prince, of Wales. See WALES, PRINCE GEORGE OF.

George, Henry, was b. in Philadelphia, 1839. In '58 he settled in San Francisco, and obtained work as a compositor. He subsequently became a reporter, and applied himself to the "land question." In 1877 he published a pamphlet entitled "**Our Land and Land Policy**." After passing through some vicissitudes in his journalistic career, he came to England in '81. He lectured in '82 in Dublin on the land question, and becoming an object of suspicion on the part of the Irish Government, he was arrested. In '80 he had published a work in the United States entitled "**Progress and Poverty**," in which all the social problems affecting property in land were dealt with from Mr. G.'s point of view. It was subsequently published in this country, where it ran through many editions. Mr. George's other works include "**Social Problems**" ('83), "**The Land Question**" ('84), and "**Protection or Free Trade**" ('86). He became ('86) a candidate, as the representative of the Labour Party (see AMERICAN POLITICAL PARTIES), for the Mayoralty of New York,

but was unsuccessful. Mr. G. paid a second visit to England last year, and addressed large meetings in London and elsewhere on the land question. Mr. G. held a Congress at Paris (June '89) for conference upon social questions.

George I. (Christian William Ferdinand Adolphus George), **King of Greece**, is the second son of King Christian of Denmark, and a brother of the Czarina and the Princess of Wales; was b. 1845. Chosen King of Greece in '64, in succession to Otho I. The vacant throne had previously been offered to Prince Alfred (Duke of Edinburgh), and to Duke Ernest of Saxe-Coburg Gotha. King George married in '67 Princess Olga, daughter of the Russian Grand Duke Constantine. His son, the Crown Prince of Greece, was married at Athens Oct. 20th, '89, to the Princess Sophie of Prussia, sister of the Emperor William. See GREECE.

Georgetown. Capital of **British Guiana** (g.v.). On Demerara river; pop. 49,000.

Georgetown. Capital of **Penang**, one of the **Straits Settlements** (g.v.).

German Clerical Party. See AUSTRIAN POLITICAL PARTIES.

German Confederation. The. See GERMANY.

German East African Company. By a treaty concluded in 1886 between Germany, Great Britain, France, and Zanzibar (g.v.), this Company have acquired rights over territory extending from Kilima-njaro (g.v.) southward to the Rovuma river, including the basins of the Pangani, Wamo, Kiganti, Kuliji, and Ruhuhu, the lands of Usambara, Nguru, Useghu, Usagara, Uzaramo, Ukhuu, Mahenga, Manwera, and Makonde—an area computed at not less than 600,000 sq. m. Dr. Karl Peters states that there are plateaux suitable for white colonists. But in the lowlands the problem is how to find labour, the natives being inveterate idlers. Consult Thomson's and Stanley's works, and the official *Weissbuch*.

German Political Parties. The centre of political life in the German Empire is the **Reichstag** or Imperial Diet, in which, together with the **Bundesrath** or Federal Council, are vested the legislative functions of United Germany. There are sharply defined limits, however, to the power of both. The Reichstag's decisions may be overridden by the Emperor, to whom is intrusted the supreme direction of military and political affairs. The Emperor has the power of declaring war if for purely defensive purposes, of making peace, of contracting treaties, and appointing ambassadors and envoys, without the consent of either legislative body. To declare war for other than defensive purposes, however, the assent of the **Bundesrath** is required. The latter body, which represents the individual states of the Empire, as the Reichstag represents the German nation, consists of fifty-eight delegates. Of these, seventeen, including Prince Bismarck (g.v.), sit for Prussia, six for Bavaria, four each for Württemberg and Saxony, three each for Baden and Hesse, two each for Mecklenburg-Schwerin and Brunswick, and one each for the remaining states, including Hamburg, Lübeck, and Bremen. Of its functions, it may be said that the Bundesrath is mainly a confirming body, although it has the privilege of rejecting measures passed by the Reichstag. It has also a limited initiatory power, which it occasionally exercises. Members of the Bundesrath have the

right of appearing in the Reichstag, and of speaking on any question in which the State they represent is directly interested. Members of the one chamber, however, are not eligible for election to the other, although they may sit in their respective provincial diets. The Reichstag is composed of 397 members. Of these 236 constitute the elected of Prussia, 48 represent Bavaria, 23 Saxony, and the remainder the other states in due proportion, ranging from 1 to 17. The present Reichstag was elected on Feb. 21st, '87, having been dissolved on the 14th January previous, owing to its rejection, by 186 votes against 154, of a bill for increasing the peace effective of the army for seven years. It is split up into eight distinct groups, exclusive of the Independents or "Wilde," who number seven in the present Parliament, and the one Dane who found a seat in Schleswig-Holstein. The largest individual party is the Centre, or Ultramontane, which obtains its chief strength in the Rhine districts and South Germany. It was returned at the '87 election 101 strong—since which time it has gained two seats—and is the most compact and obedient of all the parties in the House. The Centre aims at securing the complete repeal of the May Laws, which is the name given to the present measures regulating the relations between Church and State in Prussia. The chief measures are those passed on May 11th, '73, and May 4th, '74. At one time very stringent in their provisions, the May Laws have been more than once modified of recent years, and notably by a bill passed in April '87. Measures for their complete repeal, however, though passed by the Reichstag, have been twice rejected by the Bundesrath. Alternately cajoled and threatened by Prince Bismarck, the Centre party, which is admirably led by Dr. Windthorst, gives it to be clearly understood that its support of the Chancellor's own schemes must be paid for by concessions. As a consequence there is a more or less constant barter going on between the party and the Imperial Chancellor. Next in point of strength comes the National Liberal party, which, as the result of the general election of '87, numbered 96 in the present parliament against 51 in the previous one, having thus regained the prominent position it occupied before it split in '79, on the question of protection. It now numbers 93. The leaders of the party are Herr von Bennigsen and Dr. Miguel, the Burgomaster of Frankfurt-on-the-Main. The next strongest party in the Diet is that of the German Conservatives, who number 76 in the present parliament, against 77 at the close of the last. They constitute the nucleus of the Ministerial party, chief among their number being Count von Moltke, Herr von Puttkamer, and Herr von Kleist-Retzow. Closely allied to the German Conservatives are the "Reichspartei," or Imperialists, who number 38, against 23 in the last parliament. Their name sufficiently indicates their politics; and although differing from the German Conservatives on one or two minor points of detail, they also go to form the Ministerial party. Dr. Delbrück and the Duke von Ratibor are among the chief members of the party. During '88, and down to the present time, the National Liberals and the two Conservative parties so far merged their principles as to adopt the name of the "Cartel" party. Next comes the "Deutsche Freisinnige," or

German Liberal party, which is composed of the old Secessionists and Progressists (see ed. '87). In the last Reichstag the German Liberals numbered 65, having fallen to that figure from 105 at the time of the fusion. At the election in February '87 the party was even more unfortunate at the polls, and now counts only 35 votes. Its leader is Herr Eugen Richter, and among its prominent members are Professor Virohow, Dr. Hänel, and Dr. Bamberger. The German Liberals are in chronic opposition to Prince Bismarck, as are the remaining groups yet to be dealt with. These are the Alsace-Lorrainers, the Poles, and the Social Democrats. The Alsace-Lorraine party has the same number (15) in the present Reichstag as it had in the last, and nearly the same representatives. The Poles, who numbered 16 in the late Reichstag, have 13 in the present one. Both are parties of protest, and being for the most part Roman Catholic, they invariably vote with the Centre party. Their *raison d'être*, however, is opposition to the Empire, and they would certainly forsake the Centre if the latter became a National party. The Social Democrats, like the German Liberals, sustained a severe loss at the '87 election: 25 strong in the late parliament, they now number only 11. They have therefore lost the power they exercised in the previous Diet, of introducing measures of their own, for which the signatures of 15 members are required. The Social Democrats are the especial antipathy of Prince Bismarck, who has repeatedly tried to crush them. It is owing to them that several of the chief towns of Germany, and among them Berlin, have for a long time past been placed under the minor state of siege. The chief stronghold of the party is Berlin, where, at the last election, its candidates polled 90,107 votes, or some 22,000 more than in '84, when they received 68,910. Their previous records in Berlin were: 1867, 67; '71, 2,058; '74, 11,279; '77, 31,522; '78, 56,147; and '81, 101,178—the falling off in the latter instance being alleged to be due to the rigorous application of the Anti-Socialist Law. The total poll of the Socialists for all Germany was in Feb. '87 774,128, against 549,936 in '84. Of the 7 members of the Volkspartei (see ed. '87) in the last parliament, not one was returned to the present House. Of the 10 Independents in the present Diet, one is an anti-Semite, a second an agrarian member, and a third a Guelph. There are also at the present time three vacant seats.

Germany. The German Empire is a confederation of German states under the presidency of the Emperor William of Hohenzollern, king of Prussia. By the constitution of the 16th April, 1871, all the states of Germany are to form an eternal union; direction of political and military affairs vested in an elective emperor, who may declare war, but if not defensive, consent of Federal Council required. The legislative functions of the empire vested jointly in a Federal Council (Bundesrath) of 58 members appointed by and representing the individual states, and in a Chamber of 397 members elected by ballot and universal suffrage, representing the German nation. The following states are included in the confederation:—The kingdoms of Prussia, Bavaria, Württemberg, and Saxony; the imperial province of Alsace-Lorraine; the grand duchies of Baden, Mecklenburg, Brunswick, Oldenburg, and fourteen smaller principalities. Area (with Alsace-Lorraine),

311,735 sq. m.; pop. ('85), 46,855,704. The expenditure upon federal objects—army, navy, diplomatic, postal and telegraphic services, etc., for '89-90, 806,425,490 m. (mark = 18.)—has to be approved by the Reichstag, and provided for by the contributions of the members of the confederation in specified shares. **Estimated revenue and expenditure** ('85-90), 949,103,987 m. (For army and navy see **FOREIGN ARMIES AND NAVIES**.) **Funded debt** ('87), 540,369,500 m., and **unfunded debt**, 133,868,500 m.; but on the other hand there is a sum of £33,312,055 invested for various federal purposes. **Special imports** ('87), 3,188,798,000 m. (mark = 18.); **special exports**, 3,190,147,000 m. In '70 the North German Confederation comprised all the German states north of the Maine, under the headship of Prussia, united in military alliance with Bavaria, Württemberg, and Baden. (For history 1870-88 see previous editions.)—'89. **POLITICAL.** **The Morier Incident.** The publication, at the end of '88, of the correspondence between Dr. Geffcken and Baron Roggenbach, in the course of which Sir Robert Morier was accused of divulging the movements of the German army to the French in '70, caused great excitement and some friction between England and Germany, resulting in the removal of Sir Robert from the Court at Berlin to that of St. Petersburg. Release of **Dr. Geffcken** by decree of the Supreme Court, the charge of high treason, in having published a portion of the late Emperor's diary in the *Deutsche Rundschau*, being insufficiently sustained (Jan. 5th). Reassembly of the Reichstag (9th). Herr Puttkamer, Dr. von Freidberg, and President von Slinson invested with the Order of the Black Eagle. First quinquennial Prussian Diet opened by the Emperor (14th), who expressed the conviction that peace would be maintained in Europe. Great debate in Reichstag on first reading of **East African Bill**, promoting German interests and combating the slave trade in German East Africa. Referred to select committee of twenty-three members. Warm discussion between the Chancellor and Herr Bamberger. Bill seeks grant not exceeding 2,000,000 marks, the objects to be carried out by Imperial Commander Captain Wissmann (26th). Finally passed Reichstag (30th). Great interest manifested (27th) in the return of **General Boulanger** (see FRANCE). Dr. von Schelling appointed Prussian Minister of Justice (31st). Credits granted for construction of new war vessels (Feb. 1st). Animated debate in Reichstag in connection with the publication of the indictment in the **Geffcken case** (5th). Bill presented to Prussian Parliament for extending and improving railway system of the monarchy at estimated cost of 157,000,000 marks. Supplementary credit of 77,750,000 marks to increase the strength of German artillery submitted to the Reichstag (5th). Reception by Emperor of special mission from Morocco (6th). Discussion on **Bimetallism** by Reichstag (7th). Proceedings against *Kreuz Zeitung* for publishing Geffcken indictment abandoned (8th). German White Book on Samoan affairs published (16th). Rejection by large majority in Prussian Diet of the motion of Dr. Windthorst to amend the **May Laws**, so as to restore Church influence in elementary schools (27th). Law increasing the Emperor-King's Civil List by 3,500,000 marks promulgated (28th). Provincial Diet of Brandenburg addressed by the Emperor (March 12th). Suppression of the *Volks Zeitung* for publication of article celebrating the

memory of the popular leaders of '48 (18th). From April 1st the telegraph tariff between Germany, Great Britain and Ireland to be 15 instead of 20 pence per word. Herr von Puttkamer summoned to the Upper House of the Prussian Diet by the Emperor (3rd). **Resignation of War Minister.** Gen. von Schellendorf (9th), succeeded by Gen. von Verdy du Vernois, Governor of Strasburg. Court of Revision overruled decision of the police suppressing the *Volks Zeitung* (9th). New White Book on Samoa issued (18th). Opening of Samoan Conference of Delegates of Germany, England, and the United States at Foreign Office (29th). Order of the Black Eagle conferred on Count Münster, German Ambassador at Paris (May). Cabinet Council, under presidency of Prince Bismarck, discussed the **mining strikes** (9th). Deputation of mining delegates received by Emperor (14th). Visit of King Humbert to Berlin (22nd). Passage by the Reichstag of the **Old Age and Infirmary Assurance Bill** by 185 to 165 (see STATE SOCIALISM), and prorogation (24th); assent given by the Federal Council (June 5th), the measure thus becoming law. Visit of the **Shah** to Berlin (9th). Final Act of the Samoan Conference signed by the delegates (14th) subject to confirmation at Washington. Letter of thanks from Prince Bismarck to Dr. Fabri for his pamphlet "Five Years of German Colonial Policy" (30th). The King of Württemberg annested 254 culprits, and pardoned a large number of military officers in celebration of his twenty-five years' rule (July). Publication in the *Reichsanzeiger* of despatches of Prince Bismarck to German Minister at Berne with regard to the **Wohlgemuth incident** (4th). A seminary for German teachers at the German-Russian University, Dorpat, in the Baltic provinces, suppressed by Russian Government (9th). A private letter from Dr. Peters, leader of the **German Emin Relief Expedition**, published in the *National Zeitung* (16th), alleging that his expedition was hindered by England, caused some hostility in the German press. On the occasion of the Emperor's visit to England (**August**) German papers expressed themselves cordially. Visit of Emperor of Austria (12th). Visit of Emperor to Strasburg (20th). **Unpleasant incident** between President of the Chamber of Commerce and the Emperor (21st). Mr. Walter Phelps appointed new **American Minister** at Berlin (Sept. 17th) in succession to Mr. Pendleton. Reception by the Emperor of the special envoys of the Sultan of Zanzibar (30th). A remarkable article in the *Kreuz Zeitung* on "**The Monarchy and the Cartel**" was the subject of much comment, and evoked in the official *Gazette* an answer, presumably from the Emperor, disapproving of the political views expressed. Opening of the Reichstag (Oct. 22nd); speech read from the throne by Herr von Boetticher in absence of the Emperor, who had gone to Athens to be present at the royal wedding. Amongst the important bills mentioned were those dealing with the Imperial Military Law, Socialism, a new Banking Law, and the establishment of a new department for Colonial affairs. Budget presented. Proposal of Prussia for prolonging the **exceptional measures against Socialists** accepted by Federal Council (24th), bill to be laid before Reichstag. Stormy debate in the Reichstag (Nov. 1st) on the first reading of the Budget. Visit of the Emperor to Constantinople (1st), to Venice (11th), and

Innsprück (14th). The sum of 1,950,000 marks to be demanded of the Reichstag for expenditure in East Africa. New White Book on African affairs issued (22nd). Animated discussion in the Reichstag on the Foreign Office Estimates.—**GENERAL.** Terrible snowstorm all over Germany (Feb.), causing many disasters to life and property. Atrocious murder committed at Hamburg (April 7th). Spread of miners' strike in Westphalia (May), causing great scarcity of coal, work at several of Herr Krupp's iron and steel works being suspended. Sanguinary encounter between miners and troops near Gladbeck, movement extending to Dortmund. Strikers numbered 70,000 in the districts of Dortmund, Bochum, and Essen (10th), increasing to 100,000 (14th). Strike extended (15th) to Silesia. Close of strike in Westphalia (20th), masters conceding a rise of from 20 to 30 per cent. in wages, retaining the eight-hours day. Great drought in some parts of Germany, with thunderstorms and waterspouts doing much damage in other parts (June). Strike reported from Cologne (July 9th) among the miners of the Saar district. Forty-six miners of the Waldenburg coal district were found guilty of rioting, and sentenced to terms of imprisonment varying from twelve months to seven years' penal servitude (25th). Violent thunderstorm in South Germany (Sept. 4th). Serious railway accident near Posen (Oct. 3rd): four killed, many wounded. Disastrous fire at Stetten: seventy houses burnt, many persons injured (12th).—**SOCIETY.** Betrothal of Prince Frederick Leopold of Prussia and Princess Louise of Schleswig-Holstein (Jan.). Funeral of Count Monte, late chief of the Admiralty, at Berlin (22nd). Birthday of Emperor celebrated (27th). Solemn requiem for Crown Prince Rudolph (Feb. 3rd). Reception of Lord C. Bessford by Prince Bismarck (5th), and dinner in his honour by the Emperor (6th). Celebration of ninetieth birthday of Dr. Dollinger (28th), and of the seventieth year of Count Moltke's military service (March 8th); congratulations from Emperor and other distinguished persons. Birth of son (Frederick Charles) of Prince Henry (20th). Special Japanese mission visited Berlin (29th). Monsignor Agliardi appointed Papal Nuncio at Munich (April 5th). Introduction of a new Court dress, modelled on costume worn at the time of the coronation of Frederick I. in 1701 (8th). Mr. Henry Irving and Miss Ellen Terry performed "Julius Cesar" and "Merchant of Venice" at the Berliner Theater, Berlin (15th). Eighth annual Diet of German Geographers opened at Berlin, and eighteenth Congress of Surgeons (24th). The King of Saxony on his birthday conferred upon Herr von Bötticher the Grand Cross of the Saxon Order of Merit (23rd). Opening of Life Saving Exhibition by the Emperor (30th). Opening of the Hamburg Exhibition of Trade and Industry (May 15th). Geographical Society of Berlin decided to take no part in the Congress in connection with the Paris Exhibition (June). Celebration at Dresden of the Octo-Centenary of the Ruling House of Wettin (15th-19th), including grand review; German Emperor present. Religious service at Potsdam on anniversary of the death of the late Emperor Frederick (15th). Marriage of Prince Leopold of Prussia to Princess Louise of Schleswig-Holstein (24th). Visit of the Emperor to Norway (July 1st). Marriage of the Hereditary Prince of Anhalt to Princess Marie

of Baden, niece of the Grand Duke (2nd). A deputation of the 1st Dragon Regiment of which Queen Victoria has been appointed honorary colonel, and which will henceforth bear the name of the "Queen of England's Regiment," left Berlin for London in order to present the regimental report to Her Majesty (Aug. 5th). Celebration of the Sedan anniversary (Sept. 2nd). Visit of the Duke and Duchess of Edinburgh to Berlin (Oct. 5th). Visit of the Emperor to Kiel to greet the British squadron (8th). Tzar visited Berlin (11th). Reported death of Dr. Peters (Nov.). Jubilee of Prof. von Gneist as teacher of University at Berlin. Amongst the deaths of noted persons during the year were those of Gen. von Gneisenau and Prof. von Holtzendorff (Feb.). Surg.-Gen. Dr. von Lauer, body physician to the late Emperor, aged 82 (April 9th). Dr. Brinkmann, Bishop of Münster (14th). Herr Wagener, a founder of the *Kreis Zeitung* (23rd). Wilhelm Hasenclever, a notorious Social Democrat (July 3rd).—**COMMERCIAL.** To meet the great increase in shipping trade the Chamber of Commerce in Hamburg proposed the further extension of quays and warehouse accommodation (Jan.). Germany and England took over the two telegraph cables between the two States (Feb. 8th). It was announced (April 9th) that "The German Pondoland Co.," which had acquired 150,000 hectares of land in the country, would shortly be launched. Arrangements concluded for running an Orient express train from Hamburg to Constantinople *via* Breslau (24th). The Bochumer Verien Co. secured the order (£22,000) for the construction and equipment of the Fernree Gully narrow-gauge railway, Victoria: the first German railway contract in Australia (15th). Large consignments of Belgian coal to Germany in consequence of the strikes. Commotion on Bourse, due to proposed Russian Conversion scheme; depression in the market (June 15th). The Ministerial Bill authorising a Government subsidy for the establishment of a mail steamship service to East Africa was submitted (Oct. 30th) to the Federal Council. The measure empowers the Imperial Chancellor to grant a concession for this purpose to German contractors for a *maximum* period of ten years, the Government allowing a subsidy not exceeding 900,000 marks annually. The steamers are to run at least every four weeks, the service commencing not later than twelve months after the conclusion of the contract. The selection of the ports of call will rest with the Imperial Chancellor. **Consult "Germany" (Story of the Nations Series); Baring-Gould's "Germany, Past and Present"; The Statesman's Year-Book; Almanach de Gotha, etc.**

Gerome, Jean Léon, French artist, was b. at Vesoul, Haute Saône, 24. Went to Paris in '41, entered the studio of Paul Delaroche, and studied at the Ecole des Beaux Arts. Exhibited for the first time in Paris at the Salon in '47, and visited the East. In '63 appointed Professor of Painting in the Ecole des Beaux Arts. Obtained the Cross of the Legion of Honour in '55, and in '65 nominated *Membre de l'Institut*. At the Exposition Universelle of '67, where his principal paintings since '55 were exhibited, he obtained the *grande médaille*, and was nominated "Officier de la Légion d'Honneur." Some of his principal works are "Virgin, Infant Jesus, and St. John," "Interior of a Greek Household," "The Plague at Marseilles," "Prayer" (in the East), "Slave

Market of Cairo. "Promenade of the Harem," etc. He has also contributed some historic subjects, remarkable for singularity of conception and the striking effect of the execution.

Gibraltar. Name a corruption of *Jebel el Tarik*, the Mount of *Tarik*. Anciently *Calpe*, one of the pillars of *Hercules*. Is a rocky promontory on the south of Spain, connected with *Andalusia* by a low isthmus, and is a British fortress and the "key" of the Mediterranean. Area 2 sq. m., pop. 18,381, exclusive of garrison, 5,000 or 6,000. The rock rises to 1,500 feet, and is impregnablely fortified. The town lies within the bay, on the western side. Anchorage is bad. The port is free, but there is little commerce. For financial statistics see **BRITISH EMPIRE**, etc. (table). Ruled as a Crown colony by a military Governor. Here the *Saracens* landed in the beginning of the eighth century. After much vicissitude it was captured by a British force under *Sir G. Rooke* in 1704, since when it has successfully sustained various attacks and prolonged sieges on the part of France and Spain. Since the establishment of the *Overland Route*, Gibraltar has acquired a new value, as one of a chain of posts connecting England with her Indian possessions. For Governor, etc., see **DIPLOMATIC**.

Giers, Nicholas Carlovitch de, Russian statesman and Minister for Foreign Affairs; b. '20. In '48 he was attached as a diplomatist to the staff of General *Luders* in *Transylvania*. As a reward for his intelligence and activity he obtained the Fourth Class of the Order of *St. Stanislas*. In '50 he became First Secretary to the Russian Embassy at *Constantinople*. Appointed '53 Director of the Chancery of the Commissary-Plenipotentiary in *Moldavia* and *Wallachia*. He was in the Ministry of Foreign Affairs during the Crimean war. In '56 he was raised to the rank of a Councillor of State. After occupying various consular posts, he ('63-66) represented Russia in *Teheran*, Russian Minister at *Berne* ('69-70), and at *Stockholm*. In '75 the post of Adjunct to the Minister for Foreign Affairs and Director of the Asiatic Department was conferred upon him, and in '76 he was appointed to the important office which he now holds.

Gilbert, Sir John, R.A., b. 1817, is President of the Royal Society of Painters in Water Colours, to which position he was elected in 1871. He first exhibited in 1836, since which time he has constantly contributed to the Royal Academy and other exhibitions. He has been well known for many years as an illustrator of books and pictorial magazines. Many of the best editions of the British classics have been enriched by his art, and he was for many years engaged in illustrating an edition of *Shakespeare*. Knighted 1871. Elected A.R.A. (1872), R.A. (1876). He is a Chevalier of the Legion of Honour, and a member of various home and foreign art societies. He exhibited "Ego et Rex meus" at the Royal Academy '80.

Gilbert, William Schwenck, b. '36. Barrister of the Inner Temple. Entered the literary world as a contributor of "Bab Ballads" to *FUN*, and several magazines. Came into note as a play writer on production of his pieces "Palace of Truth" and "Pygmalion and Galatea" ('70-71). Mr. Gilbert has written the librettos of a series of comic operas, which have been set to music by Mr. (now Sir A.) Sullivan. The list comprises "Trial by Jury," "Sorcerer," "Pina-

fore," "Pirates of Penzance," "Patience," "Iolanthe," "Princess Ida," and the Japanese opera "Kikade," produced at the Savoy Theatre, London, all of which have attained great popularity. Mr. Gilbert's other notable productions are "Dan'l Druce," "Engaged," "Sweethearts," "Ruddigore," and "The Yeomen of the Guard" ('88). In '89 Mr. G.'s play "Brantingham Hall" was produced at St. James's Theatre. Mr. G.'s recent copyright action is noticed under **COPYRIGHT, LAW ON**. He is engaged on a new play, the name of which has not yet been disclosed.

Gilchrist Educational Trust. A fund left by the late Dr. John Borthwick Gilchrist (1759-1841) to trustees, "for the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the support of scholarships for young men and young women, awarded on the result of competitive examinations; in occasional grants to Educational Institutions under special circumstances; and to the delivery of high-class scientific lectures for the people, at a charge for admission of 1d. each per lecture. Sec., *Henry A. Papps*; 4, The Sanctuary, Westminster, S.W.

Gladstone, John Hall, Ph.D., F.R.S., was b. 1827, and received his scientific training under Prof. *Graham*, at University College, London, and Prof. *Liebig* at *Giessen*. Was Fullerian Professor of Chemistry at the Royal Institution '74-77, and President of the Chemical Society '77-79. Since '77 he has represented *Chelsea* on the London School Board, of which he was appointed Vice-Chairman last year. He belongs to the "progressist" section of the Board. His scientific reputation is based upon his successful researches in optics as well as in chemistry. He was a member of the Royal Commission on Lighthouses, Buys and Beacons, '59-62, and of the Gun-cotton Committee, '64-68. His principal scientific work is "The Chemistry of Secondary Batteries" ('83). He is also the author of a life of *Faraday*, and of many popular lectures, in which he has endeavoured to reconcile science and theology. His "Spelling Reform from an Educational Point of View" ('78) is a vigorous attack upon the alleged waste of time and money in teaching typographical spelling to young children.

Gladstone, The Rt. Hon. William Ewart, M.P., P.C., statesman and man of letters, b. at Liverpool Dec. 29th, 1809. The son of a Liverpool corn merchant—*Sir John Gladstone*, M.P., sometime of *Leith*—and of *Ann Robertson*, daughter of Mr. *Andrew Robertson*, of *Stornoway*, and Provost of *Dingwall*, the greatest Liberal statesman of his time has ever been proud to boast of his Scottish nationality and middle-class origin. He was educated at *Eton*, and *Christ Church, Oxford*, and at both places early developed High Church tendencies, and those Tory principles he apparently inherited from his father; at school contributing largely to the *Eton Miscellany*, and subsequently taking an active part in the discussions of the Oxford Union. Shortly after the passing of the first Reform Bill, in 1832, Mr. Gladstone made his entry into public life at *Newark*, where he was elected, as the Duke of *Newcastle's* nominee, in the Tory interest, defeating *Sergeant Wilde*, the popular candidate. It was on May 12th, 1833, that he delivered his maiden speech in the House of Commons, in reply to Lord *Howick*, on the slavery question, when

he expressed himself as opposed to slavery, but not in favour of hasty and wholesale enfranchisement. On the dissolution of the Melbourne ministry, at the end of 1834, Sir Robert Peel called Mr. Gladstone to his first public appointment as *Junior Lord of the Treasury*, which post he resigned in February of the following year for that of *Under-Secretary for the Colonies*. A month afterwards (March 1835), however, Lord John Russell introduced his motion with regard to the temporalities of the Irish Church, which Mr. Gladstone vigorously opposed; but the ministry were beaten and Lord Melbourne again came into power. The death of William IV., in June 1837, caused another general election, when Mr. Gladstone was once more returned for Newark. In 1841, on the accession of Sir Robert Peel, after the defeat of Lord John Russell in the House of Commons, Mr. Gladstone accepted office as *Vice-President of the Board of Trade and Master of the Mint*. He took an active part in the Corn Law debates of 1841-2, and although opposed to Mr. Villiers, the champion of the Repeal party, the revised tariff scheme was said to be chiefly Mr. Gladstone's work. He became *President of the Board of Trade* in 1843; but at the commencement of 1845 he resigned, owing to his opposition to the extension of the Maynooth Grant and the establishment of non-sectarian colleges. In 1846, it having been announced that an immediate revision of the Corn Laws was pending, Sir Robert Peel resigned, finding that certain members of his government would not go with him; but Lord John Russell declining to form a cabinet, Sir Robert returned to office with Mr. Gladstone as *Colonial Secretary*, and member for Oxford University. On the death of Sir Robert Peel, in 1850, he paid his memorable visit to Naples, which laid the foundation of his future friendship with Cavour and Garibaldi. During this period he finally severed himself from the Tories, although holding aloof from the Liberals for a time; and in 1852 became *Chancellor of the Exchequer* in Lord Aberdeen's administration, but fell with the collapse of that cabinet after the Crimean war. Subsequently he was appointed, by the Earl of Derby *Lord High Commissioner to the Ionian Islands*. In 1859 he accepted the *Chancellorship of the Exchequer* in Lord Palmerston's Government. His budgets were always looked forward to with absorbing interest; but no little sensation was caused by that of 1861, which announced the total repeal of the much debated paper duty. On the dissolution of 1865, Mr. Gladstone was rejected at Oxford, but was returned for South Lancashire, receiving great ovations at Manchester and Liverpool. On the death of Lord Palmerston, in the autumn of that year, Earl Russell became Premier; his old foe, Mr. Gladstone, being the leader of the lower house. During the debates on the new Reform Bill a "cave" (see ADULLAMITES) was formed in the Commons, and the ministry fell in 1866, to be succeeded by the Earl of Derby's government, with Mr. Disraeli as leader in the Commons, who passed a Bill in 1867, by the operation known as "dishing the Whigs." It was in this year that Mr. Gladstone made his famous declaration in favour of disestablishing the Irish Church. In February 1868 Mr. Disraeli became Prime Minister, but parliament

was dissolved in the following November, when Mr. Gladstone, rejected in South-West Lancashire, was elected for Greenwich. In the parliament of 1869 he became Premier for the first time, and thence up to the dissolution of 1874 a number of important measures were placed on the statute book. The Irish Church having been disestablished, and while Europe was distracted with the Franco-Prussian war, the Liberal Government carried the Elementary Education Act (*q.v.*), the Irish Land Act, the Abolishment of Purchase in the Army (by Royal warrant), the Act for abolishing University Tests, and the Ballot Act; but they were beaten on the Irish University Education Bill in 1873, and Mr. Disraeli returned to power in 1874. Mr. Gladstone then decided to resign the leadership of the Liberal party, but in 1875 aroused much public indignation by calling attention to the alleged horrors being perpetrated in Bulgaria by the Turks. In 1879 he made his first visit to Midlothian, and on the dissolution of 1880 issued his great Liberal manifesto, which was followed by the second Midlothian campaign and his return for that constituency. For the second time Premier, with a Liberal majority in the House of Commons of fifty over the Conservatives and Home Rulers combined, with Mr. Disraeli as Lord Beaconsfield in the House of Lords, and Sir Stafford Northcote as his opponent in the Commons, Mr. Gladstone again succeeded in carrying many important Acts up to the dissolution of 1885. Amongst these are included the Employers' Liability Act, the second Irish Land Act, the Hares and Rabbits Act, a reform in the Land Laws, and chief of all, the third Reform Act and Redistribution Act (*q.v.*). After the dissolution of the autumn of 1885, Mr. Gladstone again came forward for Midlothian, and was re-elected by an enormous majority. On the fall of the Salisbury administration, January 26th, 1886, Mr. Gladstone was summoned by the Queen to again take office. He then held as Premier the office of First Lord of the Treasury and Keeper of the Privy Seal. In consequence of a divergence of views between some of the leading members of the Liberal party and Mr. Gladstone with respect to his proposed Irish policy, several of his old colleagues, notably Lord Hartington and Sir H. James, did not join his cabinet.—Mr. Chamberlain and Mr. Trevelyan, who accepted office, resigning March 27th. Mr. Gladstone gave notice (29th) of his intention to introduce bills relating to the government and land of Ireland. The former (see HOME RULE) was introduced in a great speech on April 8th, and the Sale and Purchase of Land (Ireland) Bill on April 16th. But in the meantime the revolt of a large section of the Liberal party, who were known as Unionists, became pronounced, and on April 14th a great Unionist meeting was held at Her Majesty's Theatre to protest against both the Home Rule and the Land Purchase Bills, which, the Premier had announced, were indissolubly tied together. Earl Cowper presided, and amongst those who took a prominent part in the proceedings were the Marquis of Salisbury, the Marquis of Hartington, Mr. Goschen, M.P., and Mr. Rylands, M.P. On May 3rd Mr. Gladstone issued (in the *Edinburgh Daily Review*) a lengthy address to his constituents of Midlothian, the opposition to his Irish proposals meanwhile having been actively

carried on all over the United Kingdom. On May 10th the second reading of the Government of Ireland Bill was moved in the House of Commons, and a lengthy debate commenced. On May 17th a meeting was called by Mr. Gladstone at the Foreign Office, the invitation being issued to "all members of the Liberal party who are desirous, while retaining full freedom on all the particulars of the Irish Government Bill, to vote in favour of the establishment of a legislative body in Dublin for the management of the affairs specifically and exclusively Irish." More than 200 members attended. On June 8th, about one o'clock in the morning, the vote of the House was taken on the Home Rule Bill, when the Government were defeated by a majority of 30—there being 311 ayes and 341 noes—a result which caused a scene of wild excitement. At a Cabinet Council on the same day the Government resolved to resign, the announcement being made in Parliament on June 10th, the Sale and Purchase of Land (Ireland) Bill being on the same evening withdrawn. On June 14th Mr. Gladstone issued his election address, and on June 17th left London for another Midlothian campaign, his progress to the north being yet again marked with every sign of enthusiasm. After his return to Hawarden, the right hon. gentleman proceeded to Manchester, June 25th, and to Liverpool, June 28th, and addressed large gatherings in those cities. In a supplement of the *London Gazette* of June 26th Parliament was dissolved by proclamation. On July and Mr. Gladstone was elected for both Midlothian and Leith, and chose to sit for his old constituency. The result of the general election was to deprive him of power, and as a mark of sympathy a Gladstone Presentation Fund was opened in the United States, but was not generally taken up. On July 3rd Mr. Gladstone published a letter he had addressed to Mr. John Bright in reply to the latter's great speech at Birmingham in favour of the Union; and to this Mr. Bright made a reply on July 6th. (For later events see previous editions.) In Committee of Supply on Dec. 3rd, '88, whilst the vote for the Chief Secretary's (Ireland) office was under discussion, Mr. Gladstone warmly attacked that official (Mr. A. J. Balfour), and complained of his style of language and invective. In the course of the debate raised by Lord R. Churchill on the sending out of British troops to Suakin, Mr. Gladstone also spoke (Dec. 4th). On Dec. 15th he addressed a great meeting at Limehouse, called under the auspices of the London Liberal and Radical Union, "in order to enable the seven divisions of the Tower Hamlets to have an opportunity of hearing him." The reception was enthusiastic. On the resumption of the debate on the Diplomatic Vote (Civil Service Estimates), Dec. 17th, the ex-premier delivered a somewhat lengthy speech with special reference to Egypt and the Soudan. Under date Dec. 18th he replied to a memorial from the unemployed workmen of the East End, stating in effect that he had not sufficient acquaintance with the subject and its local conditions to suggest a practical remedy for the distress in which they found themselves; and on the 19th he left London for Naples. During the absence of the right hon. gentleman his birthday (Dec. 29th) was "officially" celebrated at Chester Town Hall on Jan. 2nd, '89. The *Times* of Jan. 12th published (in French) a

letter from Mr. Gladstone to M. Francis de Prénassé, acknowledging the receipt of the latter's book, "*L'Irlande et l'Angleterre depuis l'Acte d'Union jusqu'à nos Jours*," which was followed by another, an extract of which was published on Jan. 19th. From Rome, under date Feb. 1st, it was stated that Mr. G. had published a letter he sent to the *Marquis de Risa*, which had given rise to some comment. In it he spoke in favour of international arbitration as a general principle, and not in relation to the position of the Pope. On Feb. 9th Mr. G. left for Amalfi and Cannes for London, and on the 21st spoke on the Address to the Throne at the opening of Parliament, and again on Mr. Morley's amendment to the Address on March 1st. On March 19th the ex-premier spoke in the House when he denied the right of the Chancellor of the Exchequer to settle beforehand the time to be devoted to the discussion of Supply. Sir Thomas Gladstone, of Fasque, the eldest brother of the subject of this record, expired on March 20th (see OBITUARY), and Mr. G. attended the funeral; while on the 29th he had the melancholy duty of bearing tribute in the House of Commons to the great qualities of the late Mr. John Bright. In the House of Commons, on April 9th, the ex-premier spoke on Dr. Clark's motion in favour of Home Rule for Scotland; and on May 2nd, during the discussion on the Budget, also May 6th, on Mr. Atherley-Jones's motion for the adjournment of the House to discuss the conduct of the police at Falcarragh. Mr. Gladstone on May 16th took part in the debate on *Perpetual Pensions*, raised by Mr. Bradlaugh, and on the same evening, in committee on the Customs and Inland Revenue Bill, moved the addition of a sub-section to Clause 5, the object of which, he explained at some length, was to establish equality in the treatment of reality and personality without increase of taxation. The amendment was negatived by 257 to 181. About the same date he received a memorial from the State of Minnesota, which, while disclaiming on the part of the subscribers any desire to obtrude their opinions concerning the affairs of another people, said that they felt that recent events had "lifted the great struggle in which Mr. G. is the leader above the lines of mere national politics." This document was signed by the Governor, Lieut.-Governor, Secretary of State, Auditor, Attorney-General, the complete Senate (47), and 101 out of the 103 members of the House of Representatives. A similar memorial also came from Wisconsin. On May 22nd the right hon. gentleman attended an "at home" of the *Women's Liberal Federation* at the Grosvenor Gallery, Bond Street, delivering a short address; Mr. Parnell was present. On the same day he gave evidence before a House of Commons Select Committee against a proposal to vest a portion of the Wirral Railway in the L. & N. W. and G. W. Railway Companies. He took part in a debate arising out of the employment of police at the Luggacurran evictions on May 27th, and on the following day, on the Report of the Foreign Office vote, with special reference to the absence of the British Ambassador from the opening of the Paris Exhibition, and also as to the condition of affairs under Turkish rule in Armenia. Mr. Gladstone spoke on May 30th in favour of referring the *Scottish Local Government Bill* to a committee of Scotch members

assisted by thirty others; but the amendment (which was moved by Mr. Munro-Ferguson) was rejected. On June 5th the ex-premier commenced one of his usual *craterial* tours, this time in the west and south-west of England, leaving London for Southampton, where a speech was delivered on arrival in the afternoon; the distinguished traveller then proceeded to Malwood, the seat of Sir W. Harcourt. A visit was paid to and a speech delivered at Romsey on the 7th. Leaving Malwood on the 8th, Mr. G. went on to Weymouth, and after replying to addresses, drove to Portland and embarked on Mrs. Elliot-Yorke's yacht *Garland*, for Dartmouth, which place was reached at a late hour. On the Bank holiday, June 10th, a busy time was spent. Deputations were received on board the yacht, and in the afternoon a mass meeting was held at Torquay, at which the ex-premier delivered a lengthy speech, afterwards returning to the *Garland*, which left in the small hours of the following morning for Falmouth. Here a kind of procession was formed to the Moor, a square fronting the Market-place, where another speech was delivered. Driving on to Redruth amid enthusiastic demonstrations, Mr. G. spoke again, and then returned to Falmouth. On June 13th the veteran statesman visited Truro, St. Austell, and Bodmin, speaking at some length at each place, finally driving to Lanhedrock, the seat of Lord Robartes. The following day he drove to Tintagel, Sir Arthur Hayter's seat, and in the evening delivered a short speech in front of the house to the Liberals of Camelford, etc., who had presented an address. On June 14th he addressed a meeting in the Castle grounds at Launceston, and left for Plymouth, saying a few words at Tavistock *en route*; a great meeting and a long speech following at Plymouth Drill Hall. The next day a visit was paid to Poole, where a speech was delivered in the Ladies' Walking Field, and this was followed by another at Wimborne and a third at Blandford, whence Mr. G. drove to Iwerne Minster, the seat of Lord Wolverton. On June 17th he drove from Iwerne to Shaftesbury, where he was presented with an address, and thence proceeded to Gillingham and Salisbury, at both of which places he was enthusiastically received, *en route* for London, which was reached in the afternoon. On June 27th a letter was published from Mr. G. to his supporters in *Midlothian*, in which he spoke hopefully of the prospects of the party. He took part in the discussion in the Commons on July 4th on the reading of the *Royal Messages* relating to the provision for Prince Albert Victor and Princess Louise of Wales, and on the following day spoke on the *Scottish Local Government Bill*. A deputation from the Corporation of Cardiff presented the freedom of the borough to Mr. G. on July 6th at the residence of Sir E. J. Reed, M.P., in Harrington Gardens, where a large company assembled. Mr. and Mrs. G. celebrated their golden wedding on July 26th, being the recipients of messages from the Queen, the Prince of Wales, and many others. Among the gifts was a painting of Mr. G. and his grandson W. C. Glyne, presented by anonymous donors. On the evening of the same day he spoke on the *Royal Grants* in the House of Commons. A reception was held the following night at the National Liberal Club in honour of the occasion. Mrs. G., on Aug. 3rd, opened the *Dee Bridge* (*q.v.*), and on Aug. 22nd delivered a suitable address to the *Hawarden*

Horticultural Society. He left for Paris on Sept. 2nd, being practically one of the first passengers over the new Hawarden line to Chester. A banquet was given in his honour at the Hotel Continental on Sept. 8th by the Paris Society of Political Economy, and Mr. G. replied to the toast of his health in French, afterwards speaking in English. He left Paris the following day for home. On Nov. 22nd a party of directors of the M.S. & L. Railway Co. and friends visited the *Dee Bridge* (*q.v.*), and afterwards were received at Hawarden by Mr. and Mrs. G. Here Mr. A. Cochrane, of the firm of contractors, was presented with a clock as a memento of the completion of the work.—During this busy public life of over fifty years (his political jubilee was celebrated in Dec. '82), Mr. Gladstone has made many valuable contributions to the literature of the country. In '30 Mr. Gladstone married Miss Catherine Glyne, daughter of Sir Stephen R. Glyne, of Hawarden Castle, Flintshire. Consult Barnett Smith's "Life of Gladstone," etc.

Glaisher, James, F.R.S., the well-known aeronaut, was b. 1803, and when a youth was employed in a subordinate capacity at the observatory at Madingley, near Cambridge, and has since acquired considerable fame as a meteorologist. In recognition of his experiments above the clouds in his balloon voyages he was chosen a F.R.S. (1849). In '03 he made, in company with Mr. Coxwell, the famous ascent (nearly seven miles) to the highest altitude ever reached. Appointed (1865) to succeed Admiral Fitzroy in the control of the Meteorological Department of the Board of Trade. His name is appended to a work entitled "Travels in the Air: a Popular Account of Balloon Voyages and Adventure, with Recent Attempts to accomplish the Navigation of the Air" (1870). Mr. G. is President of the *Royal Aeronautical Society* and of the *Photographic Society of Great Britain*, in which he takes a great interest.

Glasgow University. Founded by bull of Pope Nicholas V. in 1450; received a new charter 1577. The number of students in all the faculties was last session 2,104, of whom 968 were students in Arts. Lord Rector, The Earl of Lytton. Principal, John Caird, D.D. (appointed '73). *Parliamentary representative*, J. A. Campbell, LL.D. *Registrar*, W. Innes Addison. *Degrees*. B.A. (*hood* black silk bordered inside with red purple silk, colour of bell heather); M.A. (*h.* black silk lined with red purple silk); B.Sc. (*h.* black silk lined with gold-coloured silk colour of whin blossom); D.Sc. (*h.* black velvet lined with gold-coloured silk); B.L. (*h.* black silk, bordered inside with Venetian red silk colour of clove carnations); LL.B. (*h.* black silk lined with Venetian red silk); LL.D. (*h.* black velvet lined with Venetian red silk); M.B. and C.M. (*h.* black cloth lined with scarlet silk); M.D. (*h.* black silk lined with scarlet silk); B.D. (*h.* black silk bordered with black velvet, lined with red purple silk); D.D. (*h.* black velvet lined with black silk, or, if the graduate be Master of Arts, with red purple silk. Among the distinguished alumni are Adam Smith, Archbishop Tait, Principal Sharp, Rev. R. S. Candlish, and Sir Wm. Thomson.

"**Globe, The.**" Established 1803, and subsequently incorporated *The Traveller*. It was started by the old Whig party, and always was recognised as an authority on political matters,

its contributors including some who held high office in the State. It retained its Whiggism until 1866, when a new proprietary, recognising the changed times, made it an outspoken though independent Conservative organ, reducing its price from fourpence to twopence, and eventually to one penny. It is now a recognised evening journal of the Constitutional party. Editor: **Captain G. C. H. Armstrong.** Offices: 367, Strand, W.C.

Gloucester and Bristol (united 1856), **Right Rev. C. J. Ellicott**, D.D., Bishop of, was b. 1819. Educated at St. John's Coll., Cambridge, where he graduated with distinction (1841); Fellow of St. John's (1844). Rector of Pilton (1848); resigned his benefice to prosecute his critical studies at Cambridge (1854); Professor of New Testament Exegesis at King's Coll., Lond. (1858); Dean of Exeter (1861); appointed Bishop of Gloucester (1863) by Lord Palmerston. **Chairman** of the Company of **Revisers** of the **New Testament** on the death of the late Bishop of Winchester. Bishop Ellicott holds high rank as a commentator, and has published commentaries on the Galatians and other Pauline Epistles, Hulsean Lecture (1860), "Historical Lectures on the Life of our Lord"; edited Cassell's "Popular Commentary on the Bible," and is the author of several other works.

Goa. A port-town and territory between the boundaries of Madras and Bombay, India. Once the seat of great trade, now decayed and ruinous. Belongs to Portugal. See **COLONIES OF EUROPEAN POWERS.**

Goblet, René Marie, b. Sept. 26th, 1828, at Aire, in the Pas-de-Calais. He belongs to the party of Progressist Republicans. In the latter days of the Empire, he assisted in founding the democratic *Progrès de la Somme*. In '71 he was elected to the National Assembly, where he sat with the Left. He voted for M. Thiers in the crisis of May 24th, '73, and opposed the motion of Nov. 17th of the same year, converting the Presidency into a septennate. He was elected to the Chamber of Deputies for Amiens in Oct., '77, re-elected (1881-2), and became Minister of the Interior in the ministry of M. de Freycinet. On the formation of the Brisson cabinet ('85), M. Goblet became Minister of Public Instruction and Fine Arts. He also held the portfolio of the Interior in the succeeding ministry of M. de Freycinet. On the defeat of the latter, in Dec. '86, he became President of the Council. He is a good speaker and a sound politician. He was asked by M. Carnot to form a Ministry immediately after the Presidential election, but did not succeed, but accepted the post of Foreign Minister in M. Floquet's administration. In M. Tirard's administration M. Goblet again became Minister of Public Instruction.

Goethe Society, English, was formed to promote and extend the study of Goethe's work and thought, and to encourage original research upon all subjects connected with Goethe. The meetings of the Society are held in Feb., April, June, Oct., and Dec. The President for '89 is Prof. Edward Dowden, Esq., W. C. Coupland, D.Sc., M.A., 20, Maitland Park Road, Haverstock Hill, N.W.

Gold and Money. See **MONEY MARKET.**

Gold Coast Colony. A British Crown colony on the Guinea Coast, West Africa, consisting of towns, forts, and stations, with the country around, formerly styled the Protectorate. The

products are chiefly palm-oil, gold, ivory, copal, monkey skins, caoutchouc, camwood, Guinea grains, palm kernels, etc. For financial statistics see **BRITISH EMPIRE, etc.** (table). Consult Keith Johnston's "Africa," "Her Majesty's Colonies," *The Torch*, etc. For Executive Council see **DIPLOMACY.**

Gold Fields and Production. Gold is found in every quarter of the globe: in reefs or veins among quartz, from which it is separated by quarrying, crushing, washing, and treatment with mercury; in alluvial deposits, from which it is extracted by washing, in dust, grains, laminae, or nuggets. **Alluvial deposits** are of several kinds—namely, (1) beds of running rivers, involving the employment of dredging apparatus; (2) superficial or not deep deposits, capable of being worked by diggers single-handed; (3) deep alluvial beds, often underlying hard rock, necessitating thorough mining; (4) deposits of gravel, schist, and disintegrated rock, often on hill-sides, now generally washed gradually down by means of hydraulic engines. Mining in quartz entails the employment of large capital, machinery, etc. The **annual production of gold throughout the world** is estimated as follows:—

| Epoch. | Production in Australia. | Production in America. | Total production in the World. |
|--------|--------------------------|------------------------|--------------------------------|
| | £ | £ | £ |
| '51-55 | 49,711,711 | 60,950,412 | 135,144,641 |
| '56-60 | 58,520,527 | 52,892,560 | 137,199,753 |
| '61-65 | 53,674,499 | 45,769,628 | 124,726,881 |
| '66-70 | 49,374,613 | 50,148,751 | 130,243,819 |
| '71-75 | 47,517,872 | 40,252,066 | 115,967,933 |
| '76-80 | 29,882,889 | 39,955,992 | 107,924,351 |
| '81-85 | 29,384,790 | 31,528,925 | 97,971,659 |
| '86 | 5,343,346 | 7,231,405 | 19,564,007 |
| '87 | 5,343,346 | 7,747,934 | 20,080,536 |

For the seventeen years, '71-87 inclusive, the average production of **South Africa** was slightly over £50,000 per annum, but it has increased very rapidly since then. It is, however, difficult to arrive at anything like exact figures with regard to the output of all the mines, but as far as can be ascertained, the **aggregate yield** for the first half of '89 was about £750,000, as compared with £400,000 in the corresponding period of '88. It is estimated that the total production for '89 will reach £1,750,000. **Queensland** is also rapidly coming to the front as the leading gold-field of the **Australasian Colonies**. From '51-86 the average yearly production was £52,000; in '87 it amounted to £1,590,000, while for the first half of '89 it reached a total of nearly £1,400,000. **India** is also increasing her output, as the yield for the first six months of '89 was estimated at £129,000, as against £61,000 in the same period of '88. The gold production in **New South Wales** and **Victoria**, on the other hand, is diminishing, the total in the latter colony in '87 being only £2,100,000. For topography of the various gold districts of the world, see ed. '88.

Gondar. Capital of **Abyssinia** (q.v.).

Goodall, Frederick, R.A., b. 1822. Exhibited his first picture in the Royal Academy at the early age of seventeen. Subsequent visits to Normandy, Brittany, and Ireland supplied him with material for a long series of popular pictures, which secured him the encourage-

ment of distinguished art patrons of the day. One of his early pictures, "*The Return from Christening*," gained a prize of £50 from the British Institution. His subsequent productions, which were largely drawn from old English life, increased his fame. His latter pictures, dealing with Eastern subjects, are the outcome of a visit to Egypt in 1858-59. Elected R.A. 1863. Among the best of Mr. Goodall's pictures on religious subjects are his recent pictures "*For of such is the Kingdom of Heaven*," and "*Misery and Mercy*." He exhibited at the Royal Academy, '89, "*Harrow-on-the-Hill*," "*A Dream of Paradise*," and "*Leading the Flock*"; and at the Grosvenor Gallery, "*Pets of the Harem*."

Good Templars. The Independent Order O.T. is a temperance fraternity which originated in New York in 1851. In 1868 it was extended to England by Joseph Malins, who, by 1870, had instituted the Grand Lodge of England, from which the Order has spread round the world. It administers a pledge of lifelong abstinence from intoxicating beverages, and advocates the legal suppression of their common sale. It seeks to protect the abstinent and reclaim the inebriate. It admits both sexes to equal privileges and office. Only a small fee of sixpence or one shilling per quarter is exacted, as it is non-beneficiary in basis; but an auxiliary provident fund is allowable. It enrolls by a brief service, of a somewhat religious character, including scripture reading, counsel, singing, and prayer; and all meetings are opened and closed with prayer and praise. It consists of (1) local "subordinate" lodges, meeting weekly; (2) county "district" lodges, meeting quarterly; (3) national "grand" lodges, meeting annually; and an international "Right Worthy Grand Lodge." In '76, when the Right Worthy Grand Lodge met in Kentucky, a disruption occurred on "the Negro question"; and there have since been two Orders—one mainly American, and the other mainly British. In '86 the American leaders invited the British to a Reunion Conference, which was accordingly held at Boston, Massachusetts, Sept. '86. A basis for reunion, declaring illegal any exclusion on account of colour or race, was unanimously drafted and sent to all jurisdictions, and was indorsed by each. As then agreed, both international courts met separately at Saratoga, New York, May '87. The last R.W.G.L. Session was held at Chicago, May '89, and the officers there installed reside in the United States, Canada, Scotland, England, New South Wales, and South Africa. Mr. W. W. Turnbull, 72, Great Clyde Street, Glasgow, was elected chron; the second post being taken by Dr. Oronhyatekha, of Canada, a Mohawk Indian, who edits the Right Worthy Grand Lodge monthly organ. The Order publishes about forty newspapers and magazines in various languages. The Right Worthy Grand Lodge has 204 in the United States, Canada, England, Ireland, Scotland, Wales, and Sweden, and next meets at Edinburgh, in May '91. The united Right Worthy Grand Lodge has a membership of over 600,000, in about 13,000 branches, governed by 100 different Grand Lodges. There are in the United Kingdom nearly 200,000 adult and junior members, of whom 60,000 adults and 40,000 juniors are under the Grand Lodge of England, whose permanent offices are in Edmund Street, Birmingham. This Grand Lodge has

over 1,300 lodges, of which 70 are in the army and navy. The Grand Lodge annual session at Ryde, I.W., Easter '89, was attended by over 500 representatives and officers. The English Grand Lodge has projected a *Provident Fund* as an auxiliary to the Voluntary Order, and this will include life insurance, medical attendance, sick pay, old age pensions, and a savings fund. Although ordinary lodge meetings are confined to members, yet thousands of public meetings are held annually; while the rules, etc., of the Order are quite public. Most lodges publish programmes, showing that by addresses, debates, essays, music, recitals, and parties the members mutually improve and entertain each other—their greatest festival being an intermittent *Crystal Palace fête*, when some 40,000 or 50,000 persons attend. There is also attached a *Juvenile Order*, enjoining abstinence from strong drink, tobacco, gambling, and profanity, and which has 70,000 British members, in 1,000 branches. The members have founded a *Temperance Orphanage* at Sunbury, at a cost of about £10,000. The Grand Lodge of Scotland has 663 adult and 355 junior branches, with a total of 63,056 members; its office is 72, Great Clyde Street, Glasgow, and its monthly organ is *The Good Templar*. Ireland and Wales have about 500 adult and junior branches, and publish English and Welsh organs. The organ in England is *The Good Templar's Watchword*, weekly; and several local monthlies are issued, besides much literary matter from the Grand Lodge printing-presses.

Goodwood Race Meeting. See TURF.

"**Good Words**" (monthly, illustrated), was founded January '60. Provides good healthy literature, including stories, biographies, travel, science, practical and religious papers, by the best writers of the day. The aim of its first editor, Dr. Norman Macleod, was to provide a periodical that should "embrace as great a variety of articles as those which give deserved popularity to publications professedly secular, but having its spirit and aim distinctively Christian." It is conducted on exactly the same lines by the present editor (Dr. Donald Macleod), and G.W. numbers among its contributors almost all the leading writers and artists of the period. Many good books have been collected and reprinted from G.W. Office, 15 and 16, Tavistock St., Covent Garden, W.C.

Gorsedd. See EISTEDDFOD.

Goschen, Rt. Hon. George Joachim, M.P., P.C., was b. in London 1831. Educated at Rugby, under Dr. Tait, and at Oriel Coll., Oxford, taking a first class in Classics. Soon after he entered the firm of Fröhling & Goschen, and became a director of the Bank of England in '56. He was returned without opposition as a Liberal for the City of London at a bye-election in '73, and at the general election in 1886; was re-elected at the head of the poll. In the same year he was appointed Vice-President of the Board of Trade, and (1886) Chancellor of the Duchy of Lancaster, with a seat in the Cabinet. His tenure of that office, however, was only of brief duration, as Lord J. Russell's ministry retired in June of the same year. On Mr. Gladstone's accession to power, in 1868, Mr. Goschen joined the Cabinet as President of the Poor Law Board, and in 1871 succeeded Mr. Childers as First Lord of the Admiralty. He was again returned for London in 1874, but only as the minority member, and in 1880 did

not seek the suffrages of his old constituents, but accepted an invitation to stand for Ripon, which he represented until the general election of 1885, when he was returned for the Eastern division of Edinburgh. On the formation of Mr. Gladstone's Government in '80, which Mr. Goschen was unable to join owing to his opposition to the extension of the franchise, he was offered the post of Viceroy of India, which he declined. He, however, accepted the office of special Ambassador to the Porte, in which capacity he was instrumental in settling the Montenegrin and Greek frontier questions in '80 and '81. On the elevation of Sir Henry Brand to the peerage, Mr. Goschen was offered the speakership of the House of Commons, but declined the honour on account of his defective eyesight. During the Parliament of 1880-85 Mr. Goschen on several occasions was unable from conscientious motives to move with his party, and broke from them on the question of the extension of the county franchise, as well as on questions of foreign policy. He is the author of several financial and political pamphlets, and of the well-known work on "*The Theory of Foreign Exchange*." He has also published a number of addresses on educational and social subjects, including one on the "*Cultivation of the Imagination*," delivered at Liverpool '77, and one on "*Intellectual Interest*," delivered by him as Lord Rector to the students of Aberdeen University in '88. When Mr. Gladstone launched his Home Rule bill, in '86, Mr. Goschen was among the first to enrol himself in the opposition, and added much to his reputation as an argumentative orator by the successive onslaughts he made upon the measure and its supporters. He delivered in Edinburgh and elsewhere by far the most eloquent and vehement philippics against the Home Rule proposals of the Government, and was speedily recognised as, next to Lord Hartington, the most authoritative and influential of the Liberal Unionists. His eloquence, however, failed to secure him his seat in Edinburgh at the July election, when he was beaten by a large majority by Dr. Wallace. Since that defeat Mr. Goschen has been constantly before the public in connection with the anti-Home-Rule movement. On the resignation of Lord R. Churchill in December 1886, and when Lord Salisbury had failed to induce Lord Hartington to join his Government, Mr. Goschen was prevailed upon to accept the Chancery office of the Exchequer, though he declined the leadership of the House. He accepted the post with the full sanction of Lord Hartington. Mr. Goschen holds his position in the Government as a Liberal Unionist. He was a candidate for the Exchange Division of Liverpool, but was defeated by Mr. Neville, Gladstonian Liberal, by seven votes (Jan. 26th, '87). A vacancy having been caused by the retirement of Lord Algernon Percy from St. George's Hanover Square Division, Jan. 31st, Mr. Goschen was elected to the seat Feb. 9th, '87. The Budgets which he introduced in '87 and '88 were vigorously attacked by Mr. Gladstone because of their proposals with reference to the death duties. The proposal to impose a horse and wheel tax in '88 was also strongly opposed, and had to be abandoned. Mr. Goschen's scheme, however, for the reduction of the interest on the national debt, was cordially accepted by all parties, and successfully brought to a conclusion in July '89. During '88 Mr. G. delivered many vigorous

speeches in defence of the Government in various parts of the country.

Gospel Temperance Movement. An unsectarian Mission to promote Christianity and total abstinence, originated by Francis Murphy, in America, where it was known as the "*Murphy Movement*." Introduced into this country by William Noble, and inaugurated in the Standard Theatre, Shoreditch, on Feb. 10th, 1878. The title of "*Blue Ribbon Army*" (the last word of the title was dropped '83), and the "*Blue Ribbon*" badge, were adopted, and the work established in the Hoxton Music Hall, where nightly meetings have since been held. One million pledge cards were issued during the first three years, and the movement spread throughout the United Kingdom. Missions are conducted in all the principal towns. In Scotland and Ireland the movement has been successfully carried on, and it has been extended to the Continent and the Colonies with satisfactory results. The Headquarters of the movement are at Hoxton Hall, London, where a General Committee exists for reference and assistance. *Chairman*, W. I. Palmer, J.F., of Reading. *Organ*, *Gospel Temperance Monthly*. *Offices*, 134, Hoxton St., N. *Treasurer*, W. P. Goulding; *Gen. Sec.*, J. T. Rae.

Gosse, Edmund William, *Clark Lecturer in English Literature* at Trinity Coll., Camb., and the author of several well-known poems and literary criticisms, b. in London 1840. Educated privately. His work "*From Shakespeare to Pope*," published in '85, provoked a vigorous criticism by Mr. Churton Collins in the *Quarterly Review* (No. 326). "*The Masque of Painters*," which was performed with great success by members of the Royal Institute of Painters in Water Colours in May '86, was written by Mr. Gosse. Mr. G.'s recent work ('89) is entitled "*The History of 18th-Century Literature, 1660-1780*."

Gounod, Charles, b. in Paris 1818. In '38 he entered the Conservatoire at Paris, and won the great "Rome" prize in '39, entitling him to residence in Italy, where he worked hard at the finest early Italian church music. The consummate mastery of strict ecclesiastical writing, which he thus gained, forms the basis of all his work, sacred and secular. After writing some operas, on his return to France C. G. became the conductor of the Paris division of the *Orphéonists*. His successful opera of *Faust* ('59) placed Gounod at the head of operatic composers. Other operas followed, among which we may mention the charming "*Mireille*" ('64), "*Romeo et Juliette*," "*Cinq Mars*" ('77), and "*Polyeucte*" ('78). Besides his male-voice masses, Gounod has written a splendid "*Messe Solennelle*"; a fine motet, commemorating the grief of France in '70, called "*Gallia*," and other choral works universally popular. His songs, especially "*Nazareth*," "*There is a green hill far away*," and "*Serenade*" (Victor Hugo), are well known. In '82 Gounod struck fresh ground with his grand oratorio of the "*Redemption*," written for the Birmingham Festival, followed in '85 by "*Mors et Vita*." Her Majesty, in '86, honoured M. Gounod by attending a special performance of "*Mors et Vita*" at the Albert Hall. M. Gounod's latest opera is "*Charlotte Corday*." His "*Romeo et Juliette*" was revived in '88 at the Royal Italian Opera, Covent Garden. **Government Publications.** See ARTICLES,

PARLIAMENTARY PAPERS and STATIONERY OFFICE PUBLICATIONS.

Grace, Dr. W. G., the renowned cricketer, was b. at Downend, Bristol, 1848; made his first appearance in important match in West Gloucestershire v. Bedminster, at Mangotsfield. Between '64 and '79 he made 20,842 runs in a total of 415 innings. His exploits as a batsman, fielder, and bowler, became so celebrated, that the title of "champion" was spontaneously conferred upon him. No amateur or professional has ever reached the batting averages credited to Mr. Grace, who comes of a cricketing family; and on July 22nd, '79, at Lord's, the enthusiasm of his admirers took the form of a presentation of the value of £1,400. Some years ago he partially retired from cricketing pursuits and devoted himself more closely to his profession as a medical man, but his subsequent averages clearly show that he is still amongst the greatest of living cricketers. In *Sussex v. Gloucestershire* he made for the latter, in May '88, 215 runs off his own bat. During the "Canterbury Week" ('89) Dr. G. was entertained at a banquet.

Grand Committees. "Since 1832," says Sir T. E. May in his "Parliamentary Practice" (p. 443, ed. 4, 1883), "the annual appointment of the ancient Grand Committees for Religion, for Grievances, for Courts of Justice, and for Trade, has been discontinued. They had long since fallen into disuse, and served only to mark the ample jurisdiction of the Commons in Parliament. When they were accustomed to sit they were, in fact, constituted like committees of the whole House, but sat at times when the House itself was not sitting." In 1882 the pressure of public business induced the House of Commons to revive the Grand Committees in a new shape. By Standing Orders of December 1st, 1882, two standing committees were appointed to consider—the one all Bills relating to law and courts of justice; the other, all Bills relating to trade, shipping, or manufactures; the procedure to be that of select committees—the public, however, not being excluded; the committees not to sit whilst the House was sitting unless by order of the House; twenty members to form a quorum; the number of each committee to be not less than sixty or more than eighty members, to be nominated by a committee of selection, regard being had to the classes of bills committed, the composition of the House, and the qualifications of the members selected; the chairman's panel, of not less than four nor more than six members, to be nominated by the same committee of selection, and to appoint from among themselves the chairman, three being a quorum for that purpose. A Bill which had been committed to one of these standing committees was when reported to the House to be proceeded with as if it had been reported from a committee of the whole House. The above standing orders remained in force until the end of the session 1883; and under them the committees began to sit in April 1883. The Committee on Trade, etc., passed the Bankruptcy Bill and the Patents Bill, both of which subsequently became law; but the proceedings of the Committee on Law and Justice did not prove quite so expeditious as had been hoped. The standing orders were prolonged in duration until the end of the session of 1884, when they lapsed, and only the Committee on Law and Justice met in that year. At the com-

mencement of the session of '88 the resolutions relative to the two Grand Committees were revived, and it was decided that the Committee on Trade should also consider Bills relative to agriculture and fishing. (See PARLIAMENTARY PROCEDURE.) In course of the session of '89 the Lords adopted the system, two Standing Committees of the House being appointed to consider, the one such Bills relating to law, etc., and the other such general Bills, as might be committed to them by the House.

Grand Prix de Paris. See TURF.

Grantham, Sir William, b. 1835, called to the bar ('63), and became a Q.C. fourteen years later. Bench of the Inner Temple ('78). Represented in the Conservative interest East Surrey '74-85, and sat for Croydon for a few months, until his appointment as a Judge of the High Court ('86). His remarks in the early part of '89, upon the alleged prevalence of perjury in Wales, occasioned much controversy.

Grants to Members of Royal Family. See SESSION, sect. 47.

Granville, George Leveson-Gower, K.G., P.C., 2nd Earl (creat. 1833); b. 1815. Educated at Eton and Oxford (graduating 1834). Entered the public service as attaché to the British Embassy at Paris, of which his father, 1st Earl Granville, was the head. Elected to Parliament for Morpeth (1836), and afterwards for Lichfield. Appointed (1840) Under-Secretary of State for Foreign Affairs. He attached himself from the beginning with great zeal to the Liberal party. In 1846 he succeeded to the peerage. He was appointed vice-president of the Board of Trade in 1848, and he succeeded Lord Palmerston as Secretary of State for Foreign Affairs (1851), but retired with the Russell Ministry in 1852. During this last year he took an active part in connection with the Hyde Park Exhibition as vice-president of the Royal Commission, which led to his being nominated chairman of the Exhibition of 1862. He held successively the offices of Master of the Buckhounds, Paymaster-General of the Forces, Chancellor of the Duchy of Lancaster, Treasurer of the Navy, and President of the Council, and became ministerial leader of the House of Lords in 1856. In 1856 he was despatched to St. Petersburg to represent the British Crown at the coronation of the Czar Alexander. When Lord Palmerston formed a ministry, in 1859, Lord G. was appointed President of the Council, and in 1863 he was nominated Lord Warden of the Cinque Ports. In 1868 he became Secretary for the Colonies in Mr. Gladstone's first administration, and finally succeeded Lord Clarendon as Secretary for Foreign Affairs, holding this office until the retirement of the Liberal ministry, in 1874. Upon the fall of Lord Beaconsfield's Government, in 1880, and Mr. Gladstone's accession again to office, Lord G. resumed office a second time as Secretary for Foreign Affairs, retaining this post until Lord Salisbury came into power, 1885. In the last Gladstone administration he held office as Secretary of State for the Colonies (Feb. 1886). Lord G. has been one of Mr. Gladstone's most powerful supporters since the split in the Liberal party on the Irish question. His lordship is Chancellor of the University of

London. A fancy portrait of his lordship appeared (Oct. '89) in the now famous *Punch's* "Puzzle Portraits."

"*Graphic, The*," founded 1869, by Mr. W. L. Thomas, its present manager, is an illustrated weekly of high-class character, and treats of current events. Its Christmas and Summer numbers are especially excellent, and have a very wide circulation. See also DAILY GRAPHIC. Office, 190, Strand.

Great Britain. See UNITED KINGDOM.

Great Metropolitan Stakes. See TURF.

Great Officers of State are:—(1) The Lord High Steward, (2) The Lord High Chancellor, (3) The Lord High Treasurer, (4) The Lord President of the Council, (5) Lord Privy Seal, (6) Lord Great Chamberlain, (7) Lord High Constable, (8) Earl Marshal, and (9) the Lord High Admiral. They are always of the Privy Council, and the first five take precedence of all dukes who are not of the blood royal, while the others have place of all peers of their own degree. Nos. 1 and 7 when existing, and Nos. 6 and 8, have no share in the government of the country, and the duties of Nos. 3 and 9 have long been performed by commission. See CHANCELLOR, TREASURY, ADMIRALTY, NAVY, and other headings.

Great Tithes. See TITHES.

Greece. A kingdom under George I., of Glücksburg. Area about 25,014 sq. m.; pop. 2,200,000. By the constitution of 1864, legislative power is vested in a single chamber (Boule), elected by ballot and manhood suffrage for four years. Boule, which numbers 245 members, meets annually for not less than three nor more than six months' sitting; not valid unless at least half the members are present, and no law can pass without absolute majority of members. Executive vested in king and responsible ministers. Greek orthodox Church state religion; other sects tolerated: complete liberty of worship. Estimated revenue ('90), 93,967,000 dr.; expenditures, 91,081,000 dr.; amount yet due of total funded debt, 600,000,000 dr. Imports, '88, 124,388,593 dr., exports 103,142,903 dr.—about two-thirds to the United Kingdom.—

POLITICAL, '89.—Ministerial Bill introduced into Greek Chamber (Feb. 8th) empowering the Government to contract new loans and convert old ones (see AUSTRIA). The Porte having given its consent (17th) to a project fixing the town of Larissa as the junction station for the connection of the Greek and Turkish railways, the Chamber (April 11th) passed the Bills for the construction of the railway from Athens to Larissa, and for lines in the Peloponnesus. A claim of 1,000,000 francs against the Corinth Canal (*q.v.*) Company was lodged by the Société pour la Construction et l'Exploitation des Chemins de Fer de Paris (March 19th). The Chamber (26th) adopted by 90 against 10 votes the Bills for granting a dowry of 400,000 francs to Princess Alexandra, and authorising the sum of 540,000 francs to be expended upon the building of a residence for the Duke of Sparta. M. Delyannis and nine of his supporters voted in favour of the Bills, while twenty-five of the Opposition members withdrew. Close of the extraordinary session of the Chamber (April 16th); several important measures, besides the Railway Extension Bill, having been passed. Budget introduced (Nov. 16th). The Tsarwich visited Venice during the month.—**GENERAL.** A shock of earthquake was felt at Athens, accompanied by heavy rains and violent gale (Jan. 22nd). Sudden death of Monsignor

Prokopios, Archbishop of Athens and Primate of the Greek Orthodox Church (Feb. 11th). Outrage on Mr. Eley, at Olympia, by brigands (April). Marriage of the Princess Alexandra of Greece with the Grand Duke Paul of Russia, and visit of the King of Greece to Paris (June). It was reported from Athens (Sept.) that the safety of the currant crop was assured, the quality excellent, but the quantity moderate. Great forest fire (6th) at Eidyflia, near Megara, and 1500 pine trees destroyed. There was also a serious fire at Feneus. Wedding of the Duke of Sparta with the Princess Sophie of Prussia; the Emperor of Germany, the Prince of Wales and the King of Denmark being amongst the Royal and distinguished persons present (Oct. 27th). Illuminations, processions, and general rejoicings accompanied the event. For history '72-89 see earlier editions, and for army and navy see FOREIGN ARMIES and NAVIES. Consult Bædeker for Greece.

Greek Political Parties. The Greek Legislative Assembly, or Boule, consists of 150 members, having been reduced to this number from 245, by a measure introduced by M. Tricoupis, the present premier, in the early part of '86. The system of election is by *scrutin de liste (q.v.)*, as in France. The existing Legislative Assembly has sat since February '87, a general election, which resulted in an overwhelming majority for the Government, having been held in the preceding month. Since the death of M. Coumoundouros, the party leaders in Greece have been M. Tricoupis and M. Delyannis, who have alternated as Presidents of the Council of Ministers, as did MM. Coumoundouros and Tricoupis during the lifetime of the former. The present Tricoupis ministry succeeded in May '86 to the troublesome legacy left by M. Delyannis, who, after squandering 100,000,000 drachmas, or nearly £4,000,000 sterling, in a costly and useless mobilisation, consequent on the proclamation of the union between Bulgaria and Eastern Roumelia, reduced the country to the verge of bankruptcy. M. Delyannis continued, however, to lead the opposition, and at the '87 election offered violent opposition to M. Tricoupis at the polls. The latter courageously appealed to the country, on perhaps the least attractive programme ever submitted to a Greek electorate. He demanded a considerable increase of taxation for the honest payment of the public debt, and the abolition of the privilege hitherto accorded to Greek deputies to demand armed assistance for the protection of their supporters at the polls. He also caused it to be known that the Government would not, as its predecessor had done, seek to obtain support by making concessions to local interests, or by remitting taxes for similar reasons. The result showed the courage of the Greeks to face a crisis when the issue was put squarely before them. All the ministers were re-elected, and the Government obtained a majority of a full two-thirds. During the existence of the present Assembly many measures of financial and administrative reform have been successfully carried, and the country shows marked signs of increasing prosperity. The great curse of Greece, a want of administrative stability, seems in a fair way of a permanent cure, while the *morale* of the Legislative Assembly, which had fallen so low that jobbery and corruption were openly practised, many of the deputies being dependent upon the 1,800

drachmas allowed for each session, has already greatly improved. This latter result is, no doubt, in great measure due to the substitution of the *scrutin de liste* for individual nomination, which, by underling the personal connection between voters and deputies, has rendered the latter less subject to the importunities of their constituents, who for generations have been taught to respect the creed that to the victors in the elections belong the spoils of office.

Green, Rev. Thomas, M.A. (Lond.), the Chairman-elect of the Congregational Union of England and Wales, was ed. for the ministry at Spring Hill Coll., and commenced his first and only pastorate in 1856, at **Ashton-under-Lyne**, where he has exercised considerable influence in ecclesiastical and social questions. For nine years he was a member of the **School Board** for that district, and, in connection with the Lancashire College Committee, he has been specially active. Educated, in early life, in Established Church principles, he came under the influential ministry of the late Rev. Thos. Binney, whom he resembles in the possession of the power of felicitous and, at times, humorous expression. He was elected to succeed Dr. Falding in the chairmanship of the Congregational Union for '90.

Greenbacks. Paper currency issued at the time of the war of the Rebellion in the United States, prior to the establishment of the National Bank system still in vogue. They received the name by which they are popularly known from the colour of the ink used in printing their backs. They were not issued in any lower denomination than one dollar. The "greenbacks" (many of which are still in circulation) are the size of the ordinary Treasury or National Bank note.

Green Books. The official books of the Italian Government.

Greenland. An extensive region or island on N.E. of America, extending into Polar regions. Interior is all ice, but part of south and west coast are habitable, with verdant pasturage, some shrubbery, and mossy valleys. Principal exports: oil of seals and whales, fox, seal, and reindeer skins, eider down, feathers, and cryolite. The chief trade is with Denmark. See COLONIES OF FOREIGN POWERS.

Gregory, Rev. Robert, Canon and Treasurer of St. Paul's, b. at Nottingham, 1819. Graduated at Corpus Christi Coll., Oxford. Ordained curate of Bilsley, Gloucestershire, '43. He subsequently held the curacies of Panton and Wragby, Lincolnshire, and the parish church of Lambeth. Since he became Canon of St. Paul's, '68, he has been an active promoter of various religious and educational movements. He is treasurer of the National Society for the Education of the Children of the Poor in the Principles of the Established Church. Member of the London School Board '73-'76. He served on the Ritual Commission, the City Parochial Charities Commission, and the Education Commission of '80-'88. Canon G.'s sermon ('89) combating Socialism, delivered in St. Paul's Nov. 3rd, attracted much attention.

Grenada. An island in the West Indies forming part of the British colony of the Windward Islands. Capital, St. George. Products are sugar and rum, cacao, cotton, coffee, fruits, spices, and turtles. For financial statistics see BRITISH EMPIRE, etc. (table).

Grenadines. A cluster of islets lying be-

tween Grenada and St. Vincent, and forming a dependency of Grenada. Exports: fish oil, wood, sugar, corn, and cotton. Area, 86 sq. m.; pop. 6,400.

Gresham College. In connection with this College lectures have been regularly given since Nov. 1843; having for many years previous to that time, and pending the erection by the Gresham Committee of a completed building for the headquarters of the College, been read in a room over the Royal Exchange. There was a certain fitness in the temporary establishment of the lectures under this roof; for the Gresham Lectures, as well as the College in which they are delivered, owe their institution to the munificence of Sir Thomas Gresham, the "Royal Merchant" of Queen Elizabeth. By his will, dated July 5th, 1575, Sir Thomas bequeathed certain rents growing out of the Royal Exchange, which he built, in trust severally to the Corporation of the City of London, and to the Master and Wardens of the Mercers' Company, for the "erecting and maintaining of divers lectures in sundry faculties"—divinity, law, physic, geometry, astronomy, music, and rhetoric. The bequest of Sir Thomas Gresham who died Nov. 20th, 1579 (did not come into effect until the death of his widow, Dame Anne Gresham (December 1596); and the lectures were organised and commenced in June, 1597. Sir Thomas further left for the professors, who should be appointed under his will, his house in Bishopsgate Street, with its gardens and other appurtenances, "for them and every of them there to inhabit, study, and daylie to read the said several lectures." The buildings of Gresham House, which had thus become Gresham College, were pulled down in 1768, and the General Excise Office erected on the site, the property having been acquired by the Crown for an annuity of £500. Sir Thomas enjoined that the Lecturers of his College should be unmarried at the time of their appointment, and also that marriage, subsequently contracted, should void their preferment. This injunction, after many years of neglect or abeyance, was formally set aside by Act of Parliament. In '76, whilst the Earl of Selborne was Master of the Mercers' Company, the Gresham Lecturers submitted two schemes for the improvement of the Lectures, and the recommendations under this head were adopted, the principal being that all the Lectures should be delivered in English instead of Latin and English, twelve lectures to be given by each Professor. The names of the present Gresham Lecturers are as follows:—*Physic*, E. Symes Thompson, M.D.; *Rhetoric*, J. E. Nixon, M.A.; *Astronomy*, Rev. F. Ledger, M.A., F.R.S.A.; *Law*, J. T. Abdy, LL.D.; *Geometry*, Very Rev. B. M. Cowie, D.D., Dean of Exeter; *Music*, Henry Wyld, Mus.D.; *Divinity*, Rev. Henry E. J. Bevan, M.A.; *Clerk to the Gresham Committee*, John Watney, Mercers' Hall, London, E.C.

Grévy, Jules, ex-President of the French Republic, b. 1807, at Mont-sous-Vaudrez, in the Department of the Jura. Educated at the college at Poligny, he studied law in Paris and began his career as an advocate. He gained distinction as counsel in his defence of the revolutionists of 1830. After the Revolution of 1848, he was Commissary of the Provisional Government in the Jura, and was returned by that department to the Constituent Assembly, in which he was a member of the Committee

of Justice and a vice-president. During the Presidency of Louis Napoleon, M. Grévy opposed the policy of the future Emperor. After the Franco-German war, M. Grévy came again to the front, and from 1871 to 1873 was President of the National Assembly, to which in 1876 he was again returned, and elected President of the Chamber of Deputies. This office he held till 1879, having been re-elected twice. On the retirement of Marshal MacMahon from the Septennial Presidency of the Republic, M. Grévy was elected his successor, Jan. 29th, 1879. Re-elected Dec. 28th, 1885. Resigned Dec. 2nd, 1887. The unexpected fall of M. G. was indirectly due to what are known as the *Limousin* or *decoration scandals*. It is rumoured that M. Grévy is about to embody the events happening since '48 in the *Memoirs*, on which he is engaged.

Griqualand East. A district of the Transkeian Territories (*q.v.*).

Griqualand West. A province or district of Cape Colony. In 1867 diamonds were discovered here, and a rush from all sides into it ensued. In 1871 the Griqua chief, Waterboer, was induced to cede his authority, and the province was annexed to Cape Colony but with independent jurisdiction. In 1881 it became an integral part of Cape Colony. The diamond fields are some of the most productive in the world. See CAPE COLONY and DIAMOND FIELDS.

Grolier Club. The, was originated in Jan. '84, at a small meeting in New York, at the house of Mr. Robert Hoe, jun., and its first clubhouse was 64, Madison Avenue. The Club—which is named after Jean Grolier de Servier, Visct. D'Aguiet, Treasurer-Gen. of France (1534), who chose the best impressions of the best editions of the best books, and had them bound by the best binders—is formed of booklovers from taste and bookmakers by trade—printers and publishers—and its objects are to bring together those interested in the arts of bookmaking, that there might be a stimulating interchange of suggestions and experiences; and to further those arts in the United States. The Club has published a number of works, the most important of which is Washington Irving's "*History of New York*," in two vols. The number of members is now extended to 250, and they are about to move to a new house, 29, East 32nd Street. President: William L. Andrews. Vice-President: Mr. De Vinne. *Consult Century Magazine*, Nov. '89.

Grossmith, George, actor, a son of the late Mr. Grossmith, journalist and lecturer, was b. in London, and commenced life as a reporter for the London daily papers at Bow St. police court. Having attracted the notice of Sir Arthur Sullivan, he was given the part of John Wellington Wells in the comic opera of "*The Yeomen*," written and composed by Gilbert and Sullivan. In all those gentlemen's subsequent productions Mr. Grossmith has taken a leading character, and played the Lord High Admiral in "*H.M.S. Pinafore*," Ko Ko in the "*Ukado*," and the Jester in the "*Yeomen of the Guard*." Mr. G. has assumed the rôle of an entertainer, and has given a humorous account of his experiences in this direction under the title of "*A Society Clown*."

Grosvenor Gallery. New Bond Street. The founder is Sir *Cecilia Lindsay*, and under his guidance certain schools of art which have not been regarded with much affection elsewhere

have been largely developed. There is a spring and a winter exhibition, very much after the style of the Royal Academy, with which, indeed, the G. G. has become a strong competitor during the last few years. During '87 there was some discussion in the public press in reference to the management of the G. G., with the result that one or two well-known artists who had previously been associated with Sir Coutts Lindsay severed their connection from him. As a result of the split, Mr. Comyns Carr and Mr. Hallé formed a new Art Gallery in the Metropolis. See NEW GALLERY.

Grove, Sir George, was b. 1820. Educated as a civil engineer. In 1850 became Secretary to the Society of Arts. Appointed Secretary of Crystal Palace Company on its formation in 1852, and afterwards served on the Board of Direction. His analyses of classical orchestral music for Crystal Palace Saturday Concerts are well known, as also his zeal in propagating good music. Edited *Macmillan's Magazine* for many years, and is also the editor of the "*Dictionary of Music*." In 1875 the University of Durham conferred on him the honorary degree of D.C.L. Appointed Director of the Royal College of Music at Kensington by the Prince of Wales in 1882. Knighted in 1883.

Grove, Sir William Robert, D.C.L., F.R.S., was b. in 1811. Graduated at Brasenose '30, and subsequently devoted himself to the study of science. He is the author of "*Correlation of Physical Forces*" ('46), and many papers published in the "*Transactions of the Royal Society*." Was Professor of Experimental Philosophy at the London Institution '40-'47, President of the British Association at Nottingham '66, and Gold Medalist of the Royal Society '47. Called, to the bar ('35); Q.C. ('53); elevated to the bench ('71); retired '87.

Guadeloupe. Consists of two islands, Basse-terre and Grande-terre, separated by a narrow salt water river. Situated in the Leeward group of the Lesser Antilles. One of the principal French colonies in the West Indies. Products are sugar, rum, coffee, cotton, cacao, tobacco, etc. Exports and imports approaching £1,000,000. First colonised by the French in 1635, it was afterwards several times captured by England, but confirmed to France in 1814. See COLONIES OF EUROPEAN POWERS.

Guatemala. The most northern republic of Central America, bounded on the east and north by Mexico, west by Balize, the republics of Honduras and Salvador, and south by the Pacific; governed by President and Assembly, each elected for six years by universal suffrage. Area 46,800 sq. m.; estimated pop. in '88, 1,394,233. Capital, *Santiago de Guatemala* (or *Guatemala la Nueva*), pop. 59,039. Revenue, '88, £769,919; expenditure, £704,216. External debt, \$4,613,500; internal debt, \$8,481,444. Estimated value of imports in '87, \$3,280,391; of exports, \$3,447,999. Chief exports, coffee, sugar, fruit, hides. The first line of railway, from San José to the capital (60 miles), was opened in '84. Army nominally 4,000, with militia about 64,000. In '72 a war took place with Honduras. In '74 the Commandant of Guatemala, having imprisoned and flogged the British consul nearly to death, was imprisoned for five years and compensation paid. In April '85 the President Barrios was killed in battle, in an unsuccessful attempt to unite the Central American States under his dictatorship.

Guernsey. One of the Channel Islands (*q.v.*).

Guiana, or Guayana (pron. Gwi-ah'-nah, and Ghe-ah'-nah). A region of South America comprised between the Orinoco and Amazon rivers. May be regarded as a great forest-clad peninsula. Chief sections appertain to Brazil and Venezuela. Name now usually confined to European provinces, *British Guiana, Cayenne* or *French Guiana, Surinam* or *Dutch Guiana* (*q.v.*). Coasts are low and flat, faced by mud-shallows. Country rises gradually, forming plateaus of different elevations, back to high mountains of far interior, whence large rivers descend. Climate tropical and humid. Europeans few, but many negroes; tribes of Indians sparsely people the interior. Guiana was the "El Dorado" of Sir Walter Raleigh, and formerly supposed to be rich in gold. Gold is still found in the interior, in the Sierra Parime, but the true wealth of Guiana lies in its fertile soil and its boundless capabilities in regard to tropical produce. Much of the interior still unexplored. The *Kaitetour Falls*, on the Potaro, a western tributary of the Essequibo, were discovered 1870. They are 822 ft. high and 370 ft. broad, and are one of the greatest wonders of the kind in the whole world. *Mount Roraima*, a singular table-mountain on the borders of British, Venezuelan and Brazilian territories, has been the chief object of recent travellers. Consult "Proceedings of Royal Geographical Society," 1885-87.

Gulldford, Rt. Rev. Dr. Sumner, Suffragan Bishop of; son of the "Prince Bishop" of Winchester. Educated at Balliol Coll., where he graduated '45 and was ordained '47. After holding a curacy at Crawley, Dr. S. became rector of Old Alresford, continuing there for 35 years. He has been a proctor in the Lower House of Convocation since '66, and in '86 was elected *Prolocutor*, in both of which offices he laboured with much success. Was rural dean of Alresford '57-85, and Canon of Winchester since '85, becoming Archdeacon in '84. Dr. S. edited "*Principles at Stake*" ('69) and "*Our Holiday in the East*" ('81). Is also the author of the "*Life of Bishop Sumner, Bishop of Winchester*" ('76).

Gull, Sir William Withey, M.D., F.R.S., b. at Thorpe-le-Soken, Essex, 1816. Educated at Guy's Hospital, and graduated M.B. '41, M.D. '46, at the Univ. of London, of which he is a Senator. He has held many offices of distinction, and was for many years connected with Guy's Hospital as a lecturer and physician. He is one of the most eminent living authorities and practitioners in clinical medicine. He attended the *Prince of Wales* through his severe illness in '71, and in recognition of his services on that occasion he was created a baronet and appointed one of *Her Majesty's Physicians extraordinary*. He is President of the Clinical Society, and an hon. D.C.L. Oxon. ('68).

Guns, Various Classes of. See ARTILLERY.

H

Habeas Corpus, Writ of. A writ directed to a person who has another person in custody requiring him to produce his prisoner in court upon a day specified therein. From the time of Magna Charta imprisonment at the discretion of any person, even the sovereign, has been unlawful in England. But down to the seventeenth century the royal prerogative was so indefinite, and the royal power so great, that persons were frequently detained in custody at the discretion of the Crown. See ed. '88.—*Law on*, in '89. The case of *William Henry Thompson*, which came before the public in the month of June, was remarkable in many respects for the official blundering which it disclosed. A man named Floyd seems to have deserted from H.M.S. *Calliope*, at Sydney, in Nov. '88, and in the following December the naval authorities thought they had detected him in the person of Thompson, who had just enlisted into the Derby Militia. Thompson was arrested and conveyed to Plymouth, where he was put on board H.M.S. *Duke of Wellington*, commanded by Capt. Woodward. It was assumed, without any evidence, that the man was Floyd, and he was sentenced to ninety days' confinement in a naval prison. At the expiration of this term he was sent back to the *Duke of Wellington*, and then, for the first time, he was able to communicate with his friends, who sued for a writ of *habeas corpus*. It was found that Thompson was a Coventry weaver, seven years younger than the deserter Floyd, and he was thereupon sent back to Derby under escort. Subsequently, when Capt. Woodward was required to produce the body, the man was again taken under escort to Plymouth, locked in the "cage" of the *Duke of Wellington*, and

thence escorted to the Law Courts in London by a corporal of marines. The writ required Capt. Woodward to produce, together with itself, the body of Thompson, and to explain the cause of his detention; but the Admiralty counsel simply answered by the production of Thompson, without producing the writ, and without a written reply to it. The Queen's Bench Division, insisting that *habeas corpus* procedure was useless if the custodians of persons wrongly imprisoned could justify their conduct by merely producing a prisoner in court, attached the person of Capt. Woodward for contempt, and afterwards inflicted upon him a fine of £50, remarking that his conduct could not be excused merely because he had acted under the direction of superior officers. Subsequently there was a discussion in Parliament with reference to the case, and Thompson was awarded some small compensation. He afterwards entered an action for damages against Capt. Woodward.

Hading, Mme. Jane, is a native of Marseilles. Her father was an actor, and trained her for the stage from her infancy. She made her *debut* when only three years of age, and was subsequently sent to the Marseilles Conservatoire, where she greatly distinguished herself, though she remained there only up to the age of fourteen, when she accepted an engagement at Algiers, whence she proceeded to Cairo. She made her first appearance in Paris as "*La Chaste Suzanne*" at the Palais Royal, subsequently at the Renaissance as "*Jolie Persane*," "*Belle Lurette*," and "*Héloïse*" ('79), and at the Gymnase as "*Faulette*" and "*Claire de Beaulieu*," in which character she achieved triumphant success. In '85 she appeared in this

character at the Royal Theatre, London. In '60, in company with M. Coquelin (*q.v.*), Mme. Flading made an American tour, and at Rio especially commanded great popular enthusiasm by her playing in "L'Aventuriera."

Haeckel, Ernst. The best known of the popularisers of Darwin in Germany. Was b. Feb. 16th, '34, at Potsdam. Pupil of Johannes Müller and Virchow, at Berlin and Würzburg. Afterwards worked at Vienna. Extraordinary Professor of Comparative Anatomy at Jena University, then Ordinary Professor (1865)—a position he still holds. Visited England (1866), where he met Darwin.—Amongst his many works are "Generelle Morphologie der Organismen" (based on Darwin's views); "Anthropogenie" (history of man's development); "Arabische Korallen"; "Protistenreich" (account of Protista, or first living beings, neither distinctively animals nor plants); "Naturliche Schöpfungsgeschichte" (translated as the "Natural History of Creation"); monograph on Medusae, and on Radiolaria collected in the voyage of the *Challenger* ; "Popular Lectures on Evolution" etc.

Haggard, Henry Rider, was b. at Bradenham Hall, Norfolk, 1856. At the age of nineteen he accompanied Sir Henry Bulwer to Natal as his private secretary, and subsequently served in a similar capacity under Sir Theophilus Shepstone, H.M. Commissioner to the Transvaal, and took part in the temporary annexation of that territory to the British Crown in '77, and was afterwards appointed Master of the High Court of the Transvaal. At the commencement of the Zulu war he was adjutant-lieutenant of the Pretoria Horse. He began his career as an author with the publication of "Cetywayo and his White Neighbours" in '82, and subsequently wrote "Dawn," and "The Witch's Head," in which he gave promise of his success as a romance writer, which was fully realised in "King Solomon's Mines." This won for him immense popularity, which was further increased by his wildly romantic and idealistic story "She" which was originally published in the *Graphic*, and created a great sensation on its appearance, in book form, in '87. "Allan Quatermain," "Jess," "Mr. Meeson's Will," "Maiwa's Revenge" and "Colonel Quaritch, V.O.," are also among the most successful of Mr. H.'s recent writings. His latest work is "Oleopatra," '89. Mr. H. is now engaged on a new story founded on the life of Queen Esther.

Halleybury College, Herts. Founded 1862, received Royal Charter '64. Exhibitions to Oxford and Cambridge five annually (£60, £50, £50, £40, and £30) for three years. Pupils 500. Head Master, Rev. J. Robertson, M.A.

Halifax. Capital of Nova Scotia (*q.v.*), pop. 40,000. It is a fine city, and stands on one of the finest harbours in the world. It is the chief naval station of British North America, and has a large royal dockyard, covering 74 acres. Harbour and city are protected by 11 different fortifications, garrisoned by British troops. As the eastern seaport of the Dominion, and the terminal point of the Inter-colonial system of railways, as well as the centre of the vast coal and mineral resources of Nova Scotia, Halifax cannot fail to have a great future before it.

Hall, Rev. Newman, b. at Maidstone, 1816. Educated at Totteridge and Highbury Coll., LL.B. Lond., '55 (law scholarship). Ordained Pastor of the Albion Congregational Ch.,

Hull, '42. In '54 was chosen minister of Rowland Hill's Chapel, Blackfriars Road, London. Subsequently removed with his congregation to the handsome new church in the Westminster Bridge Road, the tower of which, called "Lincoln Tower," was erected by English and American subscribers in memory of Abraham Lincoln. During the American war Mr. H. raised his voice on behalf of the North, and subsequently visited the United States with a view to promoting international goodwill. Mr. H. has long been associated with the temperance cause, and was one of the first to inaugurate a movement for providing pleasant evenings for the people. He is the author of various evangelical books and tracts, of which the best known is "Come to Jesus," of which several millions have been circulated. During '89 Mr. Hall has sustained the loss of his brother, the Rev. Sidney Hall.

Halle, Sir Charles, esteemed pianist, musical editor, and conductor of the day, b. 1819, the son of a local bandmaster near Elberfeld. He studied chiefly at Paris, and in 1846 gave concerts there. The Revolution of '48 drove him to London. His rendering of Beethoven's E Flat and Pianoforte Concerto at a concert at Covent Garden in the same year brought him prominently into notice. He subsequently settled in Manchester. For many years he has been at the head of classical pianists; and since about '57 has gained fame as conductor. In addition, Halle has edited the finest classical composers, and has done much for the culture of the highest description of music. He was knighted in '88, which was the fortieth anniversary of his settlement in England. In July '88 he married Madame Norman-Néruda, the celebrated violinist. During Nov. '89, Sir C. Halle's celebrated orchestra from Manchester visited the Metropolis.

Halsbury, Hardinge Stanley Giffard, P.C., 1st Baron (creat. 1885); b. 1825: belongs to an old family, the Giffards of Devon. Mr. Giffard, after graduating at Merton Coll., Oxford, was called to the bar at the Inner Temple '50, becoming Q.C. ('65). He was engaged in most of the celebrated trials of his time, including the Overend, Gurney, and the Tichborne cases. Solicitor-General ('75-80). On the accession to office of the Salisbury government ('85) he was made Lord Chancellor. His attainment to high judicial office is a remarkable exception to the general axiom of the English bar, that no criminal practitioner ever reaches the woolsack. M.P. for Launceston ('77-85).

Hamilton. Capital of the Bermuda Isles (*q.v.*).
Hamilton, The Rt. Hon. Lord George Francis, P.C., M.P., third son of the late Duke of Abercorn, was b. at Brighton, 1845, and educated at Harrow. Married Lady Maud Caroline, youngest daughter of the third Earl of Harewood (1871). Entered the Rifle Brigade (1866): was ensign and lieutenant Coldstream Guards (1868). Lord George contested Middlesex at the election of 1868, and won the seat by a majority of more than a thousand over Viscount Enfield, who was second. Again, at the general election of 1874, Lord George defeated Lord Enfield by over 5,000 votes. After this election, when he was under thirty years of age, he was appointed Under-Secretary for India, and four years later succeeded Lord Sandown as Vice-President of the Committee of Council on Education. Lord George attained cabinet rank in 1885, Lord Salisbury nominating him for the

high post of **First Lord of the Admiralty**. In Lord Salisbury's present administration he holds the same office. Lord George was again elected member for Middlesex in 1880, when he defeated Mr. Herbert Gladstone by a large majority, and for the Ealing Division in 1885 and 1886. With the assistance of Mr. Forwood, secretary to the Admiralty, Lord G. has instituted some important reforms in the Department. With a view to testing the capacity of the fleet to meet a sudden emergency, he in '88 originated the Naval Manœuvres, which are now held annually (see **SESSION, PARLIAMENTARY**). The Naval Estimates introduced by Lord G. H. in '89 caused great discussion.

"Hammering." See **STOCK EXCHANGE TERMS**.

Hannen, The Rt. Hon. Sir James, b. at Kingswood, Surrey, 1807, and was educated at St. Paul's School and Heidelberg University. Called to the bar at the Middle Temple (1848). Going the old Home Circuit, he soon acquired a reputation for ability and industry, which led to his appointment as junior counsel to the Treasury, which is said to carry with it the reversion of a pious judgeship. He was junior counsel for the prosecution at the celebrated trial of "the Manchester martyrs," during the Fenian agitation. An advanced Liberal, Sir James Hannen unsuccessfully contested Shoreham (1865). Appointed a judge of the Queen's Bench Division (1868), President of the Probate, Divorce, and Admiralty Division (1872), in which capacity he has tried many *causes célèbres*. Sir James is both capable and careful as a judge, and his decisions are very seldom overruled. Was appointed **President of the Farnell Inquiry Commission** (q.v.), and his dignified bearing during the Commission met with general approval.

Hanoi. Capital of Tonquin (q.v.), a French colony in Indo-China.

Harcourt, Sir Wm. Geo. Granville Venables Vernon, Knt. (1873), M.P., P.C., LL.D., Q.C., son of the late Rev. W. V. Harcourt, of Nuneham Park, Oxford, and grandson of a former Archbishop of York, was b. 1827. Educated at Trin. Coll., Cambridge, where he graduated with first-class honours in the Classical Tripos, and Senior Optime (1851). Called to the bar at the Inner Temple (1854), Q.C. (1866). Appointed Whewell Professor of International Law, Cambridge (1869). Sir W. Harcourt entered parliament as Liberal for Oxford (1868-80). On seeking re-election after his acceptance of office in Mr. Gladstone's administration he was defeated by Mr. Hall, who was subsequently unseated on petition. Meantime a seat was found for Sir W. H. at Derby, by the voluntary retirement of Mr. Plimsoll, for which constituency he has continued to sit up to the present time. He has held the following offices: Solicitor-General (1873-74); Secretary of State for the Home Department (1880-85); Chancellor of the Exchequer (1886). He married (1876, his second wife) Mrs. Ives, daughter of the late Mr. J. L. Motley, the historian. Under the *nom de plume* of "Historicus" he is the author of the well-known letters on International Law. He was one of the members of the Round Table Conference, which was held at his town residence '87. The great speech he delivered on the law relating to the right of public meetings on the occasion of the **Mitchelstown** debate was subsequently published by the Cobden Club.

Sir William Harcourt may be regarded as the deputy-leader of the Opposition. He is one of the most clever of Parliamentary debaters, and platform speakers, and is spoken of as a probable future leader of his party. He accompanied Mr. Gladstone to the great meeting in Bingley Hall, Birmingham, on Nov. 7th, '88, and spoke on that occasion. In the debate raised last Session on the conduct of the Attorney-General with reference to the Pigott forgeries, Sir W. H. made a vigorous attack on the right hon. gentleman (see **SESSION, PARLIAMENTARY**). During '89 Sir W. H. delivered many noticeable speeches in the provinces, and his leadership during the discussion of the **Tithes** question was much appreciated by his party.

Hardwicke Stakes. See **TURF**.

"Harper's Magazine." Originally started in America, but now published simultaneously in England by Sampson, Low & Co. (monthly). It has an immense circulation in both countries—mainly owing, no doubt, to the high-class nature of its literary matter, as well as the beauty of its illustrations, and which, combined with those of the *Century*, have greatly tended to improve the production of English magazines of a similar nature.

Harris, Augustus, actor, dramatist, and manager (b. 1852), is a son of the late Augustus Harris, at one time so well known in the theatrical world. After his father's death Mr. Harris made his first appearance on the stage ('73). He is renowned as a most enterprising, energetic, and successful manager. He has also brought two Italian opera seasons to a successful termination at Covent Garden, and in April last accepted a seat on the Board of the Carl Rosa Opera Company. His spectacular melodramas, though replete with highly spiced sensationalism, have invariably hit the public taste. Since '79, when he first took over the theatre, he has produced, besides several popular pantomimes, "The World" (written by himself in collaboration with Messrs. Merritt and Pettitt), "Youth" (Harris and Merritt), "Human Nature" (Harris and Pettitt), "A Run of Luck" (Harris and Pettitt), "Pleasure" (Merritt and Harris), "The Armada" (Harris and Hamilton), '88, and "The Royal Oak," '89. Mr. Harris was elected to the London County Council for the Strand Division last January, and is a member of the music and dancing licensing committee of that body. Mr. H. took a prominent part in the discussion, during '89, on the question of the employment of children in theatres. His correspondence with Mr. H. J. Leslie, relative to his forthcoming pantomime, also attracted attention.

Harrison, Benjamin, President of the United States, was b. Aug. 20th, 1833, at North Bend, near Cincinnati. He claims descent from Commissioner Harrison, who signed the death warrant of Charles I. He is a great-grandson of Benjamin Harrison, one of the signers of the declaration of American Independence, and a grandson of General W. H. Harrison, who was elected President of the United States in '40, and died a month after his installation. The new President, who was elected by a large majority in succession to Mr. Cleveland in November '88, was educated at the Miami University at Oxford, Ohio. He subsequently studied law in Cincinnati, in '54 removed to Indiana, and in '60 was elected reporter of the

Supreme Court of that State. After the outbreak of the civil war, he entered the 20th Indiana regiment, and during the Atlanta campaign greatly distinguished himself. At the conclusion of the war he returned for a short time to his post in Indiana. He subsequently became partner in a law firm. In '80 he was elected Governor of Indiana, and in the following year was returned by that State to the United States Senate. As a Senator he commanded great respect by his force of intellect, unobtrusiveness, and debating power. He is an ardent Republican, and the large majority by which he defeated Mr. Cleveland, the nominee of the Democrats, created much surprise. President Harrison married in '53, before attaining his majority, Miss Carrie L. Scott, daughter of Rev. W. J. Scott, of Oxford, Ohio. On March 4th, '89, he was formally installed, and delivered his inaugural message.

Harrison, Frederic, M.A., was b. in London 1831; educated at King's Coll., Lond., and Wadham Coll., Oxford; scholar, '48; first class in classics, '53; fellow and tutor, '54. Called to the bar, Lincoln's Inn, '58; practised in the Equity Courts; examiner in jurisprudence for Inns of Court '69-76; for London University '75-9; Professor of Jurisprudence, Inns of Court, '78-89; member of Royal Commission on Trades Unions '69-69; secretary to the Royal Commission for the Digest of the Law '69-70. Is President of the London Positivist Committee, Newton Hall, and has published numerous essays and addresses on Positivism. Author of very many articles in the *Fortnightly*, *Contemporary*, and *Nineteenth Century*. Reviews from their commencement; of "The — of History," '69; of "Order and Progress," '75; "Social Station," the second volume of Comte's "Positive Polity" (a translation), '75; the "Choice of Books," '86; "Oliver Cromwell," '88; and a great number of lectures, printed privately, on historical, social, and religious questions. He was elected an alderman by the London County Council in February '88. In March '89 he wrote a series of letters to the *Daily News* charging the Government with using the whole machinery of government to suppress popular rights. Mr. H. contributed to the November number of the *Nineteenth Century* an article on "The New Trades Unionism."

Harrow School. Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Age of admission from 12 to 14. Among the scholarships to either University are Isabella Gregory's of £100 a year for four years, Earl Spencer's £30 a year for three years, Botfield's £20 a year for three years; to Hertford College, Oxford, Baring's three of £100 a year for five years; to Caius College, Cambridge, Sayer's two of £52 10s. for four years; and to any College, Oxford, Need's two of £30 for three years. Pupils—880. Head Master—Rev. J. E. C. Welldon, M.A. Motto—*Sic fortuna domus*. Some distinguished alumni—Butler, afterwards head master, Sir R. Peel, Cardinal Manning, Byron, Archbishop Trench, Trollope the novelist, Sir George Trevelyan, Lord Shaftesbury, Dr. Parr, Lord Palmerston, Theodore Hook. About six or seven Entrance Scholarships, one of not less than £80 a year, two of not less than £60 a year, and the rest of not less than £30 a year each, are offered every Easter to boys (not members of the School) who were under four-

teen years of age on the previous 1st of January. These scholarships are held during the scholar's stay in the School, provided that both his conduct and diligence continue satisfactory. One at least of the scholarships is given for proficiency in mathematics, or in modern subjects. No boy can be elected under twelve years of age. The governors can, at their discretion, add £20 a year to any scholarship, if the circumstances of the scholar appear to make it desirable. There are also two scholarships, each of £30 a year for two years, open to boys in the fifth form, and awarded for proficiency in such subjects as are common to both sides (classical and modern) of the school.

Harte, Bret, was born at Albany, New York, 1839. At the age of fifteen he settled in California, and went through a variety of experiences. He worked for a time in the mines, and subsequently served a short apprenticeship to a printer, and also acted as teacher in a school, and express messenger to a newspaper editor, and secretary to the Mint at San Francisco. He became the first editor of the *Atlantic Monthly*, in '68. He established his reputation as a humorist by his well-known poem "The Heathen Chinese," which appeared in that journal in '69. "The Luck of Roaring Camp" greatly increased his popularity. Was appointed United States Consul at Creefield and at Glasgow in '80. In '82 he published a collected edition of his works. His latest ('89) works are "Oressy" and "The Heritage of Deadlow Marsh."

Hartington, Rt. Hon. Spencer Compton Cavendish, Marquis of, M.P., P.C., is the eldest son of the Duke of Devonshire, and was b. July 23rd, 1833. Educated at Trinity College, Cambridge, where he graduated B.A. (1854). He was returned for North Lancashire as a Liberal in 1857, and in 1859 moved the vote of non-confidence which resulted in the defeat of Lord Derby. In March 1863 he was appointed a Lord of the Admiralty, and in April of the same year Under-Secretary of State for War in Lord Russell's administration. In February 1866 he obtained cabinet rank as Secretary for War. At the general election of 1868 he was defeated in North Lancashire by Mr. (now Lord) Stanley, but shortly afterwards was returned for the Radnor Boroughs. He was appointed Postmaster-General in Mr. Gladstone's first administration, and retained that office till 1871, when he succeeded Mr. Chichester Fortescue as Chief Secretary for Ireland. On the retirement of Mr. Gladstone after his defeat in 1874, Lord Hartington was unanimously chosen as leader of the Liberal party at a meeting held at the Reform Club under the presidency of Mr. John Bright. In 1879 he was elected Lord Rector of the University of Edinburgh (q.v.). At the general election of 1880 he was elected M.P. for North-East Lancashire, and was sent for by the Queen on the defeat and resignation of Lord Beaconsfield. He declined, however, to form an administration, being content to serve again under Mr. Gladstone. He became Secretary for India, but on the appointment of Mr. Childers as Chancellor of the Exchequer in 1882, his lordship returned to the War Office. At the general election in 1885 he was returned by an enormous majority for the Rossendale Division of Lancashire. When Mr. Gladstone formulated his policy of Home Rule for Ireland, Lord Hartington was unable to follow him, and moved the amend-

ment to Mr. Gladstone's motion for the second reading of that measure. During the electioneering campaign which followed the defeat of the Government on the Bill, Lord Hartington frequently declared himself in favour of a substantial reform of Irish local government, but protested against such a reform being based upon a principle which he conceived to be inapplicable to England, Scotland and Wales, and destructive of the integrity of the United Kingdom. His lordship became the recognised leader of the Liberal Unionist party, to whose action in dividing the Liberal vote the Conservative triumph at the polls was largely due. Recognising the commanding influence of Lord Hartington with the Unionists of both parties, Lord Salisbury offered to serve under him if he would accept the premiership. Lord Hartington, however, declined Lord Salisbury's overtures, but undertook to give his support to the new ministry in the House of Commons. After the secession of Lord Randolph Churchill, Lord Salisbury again endeavoured to induce Lord Hartington to join his cabinet. On the ground that he could best serve the Unionist cause without taking office, he again declined. It was, however, with his full approval that Mr. Goschen entered the cabinet as Chancellor of the Exchequer. Events which have taken place since then have emphasized Lord Hartington's antagonism to Mr. Gladstone's Home Rule policy; and in his speeches delivered in the autumn of '88 at Nairn and Belfast he assumed an attitude of closer alliance with Lord Salisbury. He made another political tour in Scotland last October, and in speeches delivered at Stirling and Aberdeen alluded to the possibility of a defeat by the Unionist party at the next general election.

Harvest Moon. If the moon moved along the equator, and at a uniform rate, it would rise about fifty minutes later each day. Its motion is not uniform, and not on the equator, and hence arise considerable variations in the retardation. We may, for our purpose, suppose the moon's orbit to coincide with the ecliptic. Now, the inclination of the ecliptic to the horizon varies, and it is evident that the less this angle the sooner the moon appears above the horizon. Also the retardation is least when the equator and ecliptic intersect near the horizon. This condition occurs at every full moon, but is most marked at the full moon nearest the autumnal equinox, when it rises only about twenty minutes later each day (at London), and soon after sunset. The full moon preceding the autumnal equinox is the **Harvest Moon**, that following is the **Hunter's Moon**. The phenomena are most marked in high latitudes.

Haussa, or Houssa. An African people of the Fulah or Fellatah race, distinct from the Negroes proper. Their country lies on the lower middle course of the Niger, and between that river and the Benue. Here are various States loosely confederated into the empires of Sokoto and Gando. The Haussa people are distinguished above all West African nations for intelligence, vivacity, industry, and commercial address, good faith, and friendliness. The Haussa language is said to be the noblest, richest, and most harmonious in Nigritia. Haussas are recruited for service in Gold Coast Colony, where an armed constabulary of 1,000 of them is maintained, and the

British Royal Niger Co. has entered into a treaty with the ruler of Sokoto.

Havana. Capital of Cuba (*q.v.*), pop. 230,000.

Hawaiian Islands. A group of eight inhabited and four uninhabited islands in the North Pacific. Area, 6,677 sq. m., pop. 80,576. Capital, Honolulu, on the south-west coast of the island of Oahu, pop. 20,487. Imports in '86, £975,547; exports, £2,068,075; estimated revenue for biennial period, '86-88, £567,985; expenditure, £910,495; debt, £42,000, exclusive of the loan which has been sanctioned of £400,000. The Hawaiian Islands were discovered by Captain Cook in 1778, and by him named Sandwich Islands, in honour of the Earl of Sandwich, then first lord of the Admiralty; but the natives have adopted the name Hawaiian, from the largest island, Hawaii. Exports, sugar, rice, coffee, hides, wool, whale oil and bone. The bulk of the trade is with the United States. Under Kamehameha I. the Hawaiian Islands were united into one kingdom. Kamehameha II. succeeded him in 1819, and one of his first acts was to abolish idolatry. Thenceforward the commercial development of the islands and the civilisation of the people has proceeded rapidly. The form of government is a limited monarchy. A new constitution was granted in July '87. There are two Houses—the House of Nobles and the House of Representatives—each consisting of 24 members, and both popularly elected, the nobles for six years, the representatives for two. The two Houses sit together, and form the Legislative Assembly. The members of the Privy Council are appointed by the king. The reigning sovereign is Kala-Kana I. Steamers connect the islands with America, Australasia, and China. For Ministry, etc., see DIPLOMATIC.

Haweis, Rev. H. R. b. 1840; educated at Trinity College, Cambridge, where he graduated (1861), M.A. (1864). In 1866 he was appointed to the Crown living of St. James's, Marylebone, which he still holds. He is well known as an able preacher and speaker; and also for the æsthetic character of the services held at his church. He is an author of repute, his principal works being "*Music and Morals*," and "*New Pet, or Pastimes and Penalties*," besides several pamphlets and articles on social subjects, etc. Mr. Haweis has recently interested himself in the affairs of Morocco, which he visited last summer, and contributed to the press his experiences concerning this country. He has denounced the corruptions of its consular system, and urged the establishment of a British consulate at Tangier. Mrs. H. has written some well-known books on various subjects.

Hawkers, Law relating to, '89. A case of some importance to costermongers and hawkers was that of *Brookley v. The Vestry of St. Mary, Battersea* (Queen's Bench Division, May and). The plaintiff's handbarrow had been seized in the street after notice from the defendants, and the court held that the vestry had a right to make such a seizure, even without taking proceedings before the magistrates.

Hawkesbury Bridge. This steel bridge, which carries a double line of rails, and is the third largest structure of its kind in the world, and the largest of any in the southern hemisphere, was opened on May 1st, '89. It is on the Sydney and Newcastle Railway, and completes the system of railway communication

between Brisbane and Adelaide; there are seven spans of 415 ft. each, while the heading above the Hawkesbury river high-water mark is 40 ft. The contract was taken by an American firm, who got the iron and steel work done in Great Britain, the work having been under construction two and a half years. The distance by rail between Brisbane and Adelaide is rather over 1,800 miles, and it is now possible to make a railway journey of 2,600 miles in Australia. The tender for the bridge was £327,000, and the total cost complete, including abutments, amounts to about £350,000.

Hawkins, Sir H. was b. at Hitchin 1816, and educated at Bedford School. Called to the bar 43, Q.C. '58, and made a Judge in '76. He was junior counsel for the defence at the famous trial of Sir John Dean Paul and his colleagues, and assisted Mr. (afterwards Lord Chief Justice) Bovill in the Roupel case. He successfully defended Mr. W. H. Smith when his return for Westminster was challenged, and was leader in the prosecution of the Tichborne claimant. Sir Henry retains many of his youthful tastes for athletics, and is an hon. member of the Jockey Club, for which he was formerly standing counsel.

Hawks, Master of the. In an appendix to the report of the Committee of the House of Commons on *Perpetual Pensions (q.v.)*, it is stated that by letters patent dated July 5th, 1684, James II. granted this office to the ancestor of the Duke of St. Albans and his heirs for ever, charging the salary and expenses upon revenues at the disposal of the Crown. The right of the Duke of St. Albans to the annuity was referred by the Treasury to the law officers in 1831; and they reported that the heirs of the first grantee of the office have such an interest in the salary granted as to render it imperative upon the Lords of the Treasury to make provision for continuing the annual payment. The sums granted by the original patent were as follows: Master of Hawks, salary £391 1s. 5d.; four falconers at £50 per annum each, £200; provision of hawks, £600; provision of pigeons, hens, and other meats, £182 10s. Total, £1,373 11s. 5d. This amount has been reduced by office fees and other deductions to £865 a year. It was charged on the land revenues under the Act 3 & 4 Will. IV., c. 86, and Treasury warrants of '33 and '34. It was subsequently transferred to the Consolidated Fund under the authority of the Act 29 & 30 Vict., c. 62, and the Treasury warrant of June 30th, '68. It was stated in committee that the pension is still paid; and in answer to Mr. Jennings and Mr. Mundella, Sir R. Welby said he presumed the Duke of St. Albans does not keep hawks, and he did not think his Grace has any duties of attendance on the Court, or any Court duties devolving on him in consequence of the office that he holds. The Treasury had no reason to know that there are any hawks kept. Asked whether any expenditure was at present made under the second, third, and fourth heads, Sir R. Welby said he was not aware; the Treasury had no reason to know that there were any hawks. One part of the question he should not be able to give an answer to: the Duke might perhaps give something to nominal falconers, but the Treasury had no information before them to show that there was any establishment of hawks kept. He believed the Treasury had

been advised that the Duke was legally entitled to these sums.

Hayti, called Hispaniola by Columbus, and afterwards San Domingo. The second largest island of the Antilles, lying between Cuba and Puerto Rico. Area 28,249 sq. m., pop. 1,200,000.—There are two states. The largest, the *Dominican Republic* (the mulatto republic) occupies the eastern end of the island. Area, 18,045 sq. m.; estimated pop. in '87, 504,000. Is divided into five states or provinces, and four maritime districts. Has a President and National Congress. Capital, *San Domingo*, founded in 1494, the first European settlement in America, pop. 16,000. *Revenues* ('87) £320,000; *expenditure*, £290,000; *foreign debt* in '87 (not reckoning unpaid interest), £714,300. There is also an internal debt and an international debt. There is said to be now some progress, and the country is being opened up by railways. *Exports*—valuable timbers, coffee, tobacco, cacao, and sugar, to amount of £530,084 in '86. *Imports*—£438,410. The *Republic of Hayti* (the negro republic) occupies the western portion of the island. Area, 10,204 sq. m.; pop. estimated at from 572,000 to 800,000. The capital is *Port-au-Prince*, pop. 40,000. It has a President, Senate, and House of Representatives. The government, nominally republican, is in reality military, the powers of the elective President greatly outweighing those of the legislature. There is an army of about 7,000 men, commanded by numerous generals; and a navy of five small gunboats. *Estimated revenue and expenditure* for '86-7, £1,064,257, including over £200,000 for interest. *Debt* officially stated in '87 as £13,500,000. *Exports*, coffee, mahogany, logwood, and cotton (1886) £1,511,199; *imports*, £993,050. (See previous editions.)—At the close of '88 the forces of Gen. Légitime, the President of the Republic, suffered a severe defeat at the hands of the insurgents under Gen. Hyppolite. Several hundreds were killed in the battle. Gen. Paul, who deserted Gen. Hyppolite, was captured and shot. Gen. Hyppolite was chosen President of the North of Hayti at Cape Haytien, and selected his cabinet. Gen. Légitime offered to pay \$100,000 as indemnity for the detention of the American steamer *Osama* at Port-au-Prince during the blockade (Jan. '89). Important successes were gained by Gen. Légitime over Gen. Hyppolite, including the surrender of several towns (Feb.). Recognition of Gen. Légitime as President of Hayti by British and French Governments. During the spring conflicts took place between the rival parties, resulting in the defeat of Gen. Hyppolite and the capture of the town of Dessalines by Gen. Légitime (April). For the purpose of examining the situation, and endeavouring to pacify the country, and also to arrange for the acquisition of an American coaling station, the United States Government appointed (May) Gen. Wallace and Col. Tucker as commissioners to Hayti. They were, however, suddenly recalled. The rumour of a treaty alleged to have been concluded between France and Hayti was declared by M. Félix Faure, French Minister of Foreign Affairs, in reply to a question in the Chamber, to be without foundation. Gen. Hyppolite, having defeated Gen. Légitime and entered the Port-au-Prince, assumed the provisional presidency (May). Gen. Légitime, with his family and suite, arrived at New York (Sept. 5th) on his way to France. By advice (Nov. 13th)

to the Haytian Minister at Washington, it was stated that Gen. Hyppolite had constituted a cabinet (see DIPLOMATIC). Serious earthquake occurred (Feb. 28th) at Port De Pex, many houses being wrecked and a large number of persons injured. Consult Hazard's "Santo Domingo," and Sir Spencer St. John's "Hayti or the Black Republic."

Healy, Timothy Michael, b. in Bantry, 1855 Secretary to Mr. Parnell in 1880, when he was summoned to America. Took an active part in the Land League agitation (1880), and was arrested in the autumn on a charge of intimidation, and committed for trial, but was acquitted. Elected for Wexford borough without opposition. Took a very active part in the discussions of the Land Bill of 1881, and obtained the insertion of words excluding the improvements of tenants from rent; and the clause has since come to be known as the "Healy clause." Went to America (1881), and was present at the great Irish-American convention in Chicago in that year. Charged with the use of intimidating language in a speech in 1882, and was sentenced to find bail for good behaviour, or be imprisoned for six months. Refusing bail, he was imprisoned. Was released after he had served four months of his sentence. Returned for Monaghan in '83, and in '85 for both North Monaghan and South Derry; elected to sit for the latter. Failed to secure his return in '86, but (Feb. 7th, '87) was returned unopposed for North Longford. Mr. H. was called to the Irish bar 1884. He conducted the defence of Mr. T. D. Sullivan before the Dublin magistrates in the spring of '88, and was one of the counsel for the scheduled members before the Parnell Commission (q.v.). He has frequently during '89 acted as counsel for various political offenders in Ireland.

Heart's Content. A harbour on the south-east of Newfoundland, where the Atlantic telegraph cables from Valentia, Ireland, land.

Hegira, The. See MOHAMMEDAN ERA.

Helligoland (Holy land). A British island 36 miles north of the Elbe mouth. Under a Governor as a Crown colony. Consists of a rock 200 ft. high, on which are a village and a lighthouse. Is resorted to by bathers from Hamburg, etc. Oysters and lobsters are the chief productions. [For latest statistics see BRITISH EMPIRE, etc. (table).] The island was captured from Denmark in 1807, and was formerly of importance as a naval station. For Governor see DIPLOMATIC.

Heliograph. See ed. '87.

Henley Bogatta. See AQUATICS.

Hennessy, Sir John Pope, K.C.M.G. and Knight of Malta, was b. at Cork in 1834 and educated at Queen's Coll. in that city. Called to the bar at the Inner Temple '61, and elected to Parliament (as a National Conservative) for King's County '59. He was the first Roman Catholic M.P. After an active parliamentary career, during which he frequently opposed the measures of his own party, he was appointed Governor of Labuan ('67), and subsequently of West Africa ('72), Bahamas ('73), Windward Islands ('75), Hong Kong ('77), and Mauritius ('82). After arriving in Mauritius he had a dispute with Mr. Clifford Lloyd, which led to an official investigation by Sir Hercules Robinson. Created K.C.M.G. '80. He has contributed occasionally to several of the leading periodicals, and in '83 published a history of the proceedings of "Raleigh in Ireland."

Herbert, John Rogers, R.A., b. at Maldon 1810, devoted his attention at an early age to portrait painting, and received sittings from many remarkable persons, including Her Majesty, then Princess Victoria. Elected an A.R.A. in 1841, he next year exhibited "The First Introduction of Christianity into Britain," which initiated a series of pictures from religious subjects which have made him famous. R.A. (1846). His "Illustration of Justice on the Earth, and its Development of Law and Judgment," for the Peers' Robing Room at Westminster, was completed in 1864. He and Mr. MacIse were long engaged on this work, in which the "water-glass" method was adopted. Mr. Herbert's "Moses Descending from the Mount with the Tables of the Law" is in the principal committee room of the House of Lords. During '89 allusion was made to this, as not being so available for public exhibition as was desirable.

Hereford, Rt. Rev. James Atlay, Lord Bishop of. Consecrated '68. The see was founded 676 (income £4200). His lordship, who is the 93rd bishop, was b. 1817. Educated at St. John's Coll., Cambridge; Sen. opt., 1st cl. Class. Tripos, 1840; M.A. 1843, B.D. 1850, D.D. 1859. Was ordained deacon 1842 by the Bishop of Ely, and priest in the following year by the Bishop of Lincoln. His lordship was formerly Fellow of St. John's Coll., Camb., 1842-59, and Tutor 1846-59; vicar of Madingley, Cambs., 1847-52; Whitehall Preacher 1850-58; vicar of Leeds and Rural Dean 1859-68; Canon Residentiary of Ripon Cathedral 1861-68.

Hereditary Legislators. See Session, sect. 35.

Herkomer, Hubert, A.R.A., b. 1849 at Waal, in Bavaria. At an early age he settled with his parents first in America and subsequently in England. Joined the Institute of Painters in Water Colours (1871), and to the gallery of this Society and to the Grosvenor and Academy exhibitions he contributed many drawings, chiefly of Bavarian subjects. His oil picture, "After the Toil of Day," in the Academy exhibition of 1873, extended his reputation, and prepared the way for his "Last Muster," the memorable picture of the Chelsea pensioners (1875). He subsequently turned his attention to etching, and other branches. He was (1879) elected an A.R.A. In '88 Mr. Herkomer painted a portrait of Mrs. Gladstone, which was presented to her on the occasion of her golden wedding. He personally directs the well-known Art School at Bushey, of which he is the founder, and in connection with which a new theatre was opened in '88 with the performance of a romantic fragment entitled "The Sorceress," composed by Professor H. himself. He has since prepared for the same theatre a musical and pictorial play illustrative of "Scenes in y^e Olden Time." Professor H. interests himself in various philanthropic movements for elevating the tastes of the people, and is one of the most welcome lecturers at Toynbee Hall. Created Officer of the Légion d'Honneur ('89) for his services in connection with the Paris Exhibition.

Herschell, Farrer, P.C., 1st Baron (created '86) b. 37, ed. at Univ. Coll., London, and Univ. of Bonn. Called to the bar '60, and became Q.C. '72; bencher of Lincoln's Inn the same year; Recorder of Carlisle '73. Represented Durham City in the Liberal interest '74-'85. Solicitor-General in Mr. Gladstone's ministry

(80), and received the honour of knighthood. In '80 was raised to the peerage, and became Lord Chancellor. Took part in the Round Table Conference, which was called in order to discover, if possible, a *modus vivendi* for the Liberal party with regard to the Irish question. The first meeting of this Conference took place at Lord H.'s house. On the appointment of a Royal Commission to inquire into the working of the Metropolitan Board of Works, the selection of Lord H. to act as President was unanimously approved; and his able conduct entirely justified it. Towards the end of '88 Lord H. visited India; and in his absence was chosen an Alderman on the London County Council, an office which his lordship declined to fill. His lordship is well known for his musical tastes. Lord H. delivered a powerful speech on the Farnell Commission (*q.v.*), in the House of Lords.

Herts. County Council for. See COUNTY COUNCILS.

Hervey Archipelago, or Cook's Islands. In the South Pacific, between the Friendly Islands and the Society Islands. Discovered by Captain Cook in 1777, and in 1823 became the scene of the missionary labours of John Williams (of Rarotonga). Annexed to Britain, '88. See BRITISH EMPIRE (table).

Hesse. See DIPLOMACY.
